Except where otherwise stated, all figures relate to the half year ended 31 December 2007. The term "prior comparative period" refers to the half year ended 31 December 2006, while the term "prior half" refers to the half year ended 30 June 2007. The term "Bank" refers to the Commonwealth Bank of Australia and the term "Group" refers to the Bank and its consolidated subsidiaries. The terms "\$" and "A\$" refer to Australian dollars, while "US\$" refers to US dollars. Other terms used in this Profit Announcement are defined in Appendix 17 Definitions.

Special Note Regarding Forward-Looking Statements

Certain statements under the captions "Highlights", "Group Performance Analysis", "Retail Banking Services", "Premium Business Services", "Wealth Management", "International Financial Services", "Other" and elsewhere in this Profit Announcement constitute 'forward-looking statements' within the meaning of the U.S. Private Securities Litigation Reform Act of 1995. Such forward-looking statements, including economic forecasts, assumptions, business and financial projections, involve known and unknown risks, uncertainties and other factors. These factors may cause the actual results, performance or achievements of the Group to be materially different from any future results, performance or achievements expressed or implied by such forward looking statements. Such factors include demographic changes, changes in competitive conditions in Australia, New Zealand, Asia, the United States or the United Kingdom, changes in the regulatory structure of the banking, life insurance and funds management industries in Australia, New Zealand, the United Kingdom or Asia, changes in political, social, credit and economic conditions in Australia or New Zealand, the availability and cost of funding, legislative proposals for reform of the banking, life insurance and funds management industries in Australia, and various other factors beyond the Group's control that may also affect the performance of the Group. Given these risks, uncertainties and other factors, investors are cautioned not to place undue reliance on such forward looking statements.

Details on significant risk factors applicable to the Group are detailed on page 12 of the U.S version of Bank's Annual Report for the fiscal year ended 30 June 2007 posted to the Group's U.S. Investor website <http://www.commbank.com.au/usinvestors>

Financial Information Definitions

In addition to discussing the Australian equivalent to International Financial Reporting Standards ("AIFRS") in this profit announcement, certain "non-GAAP financial measures" of the financial performance and results of the Group (as defined in SEC Regulation G) are included. These non-GAAP financial measures are not calculated in accordance with either AIFRS or US GAAP and are described below. This profit announcement contains reconciliations of these non-GAAP financial measures to our financial results prepared in accordance with AIFRS.

In this profit announcement, the Group presents its profit from ordinary activities after tax on a "statutory basis", which is calculated in accordance with AIFRS. The Group also presents its results on a "cash basis". "Cash basis" is defined by management as net profit after tax and minority interests, before treasury share valuation adjustments, defined benefit superannuation plan expense and unrealised gains and losses related to hedging and AIFRS volatility (refer to page 7 of the report). Management believes "cash basis" is a meaningful measure of the Group's performance and it provides the basis for determination of the Bank's dividends.

The Group also presents its earnings per share on a statutory basis and on a cash basis. Earnings per share on a statutory basis are affected by the impact of changes in the treasury share valuation adjustments, defined benefit superannuation plan expense, and unrealised gains and losses related to hedging and AIFRS volatility. "Earnings per share ("cash basis") is defined by management as net profit after tax and minority interests, before treasury share valuation adjustments, and defined benefit superannuation plan expense, and unrealised gains and losses related to hedging and AIFRS volatility, divided by the weighted average of the Bank's ordinary shares outstanding over the relevant period. This measure shows the "cash basis" net profit after tax, as described above, per share.

The Group presents its dividend payout ratio on a statutory and cash basis. The dividend payout ratio (statutory basis) is calculated by dividing the dividends paid on ordinary shares by the net profit after tax ("statutory basis"), net of dividends on other equity instruments. The dividend payout ratio ("cash basis") is calculated by dividing the dividends paid on ordinary shares by the net profit after tax ("cash basis"), net of dividends on other equity instruments. Similarly, the Group presents "Dividend cover – statutory", which is net profit attributable to members of the Bank after dividends on other equity instruments divided by dividends on ordinary shares for the financial year, and "Dividend cover – cash", which is net profit attributable to members of the Bank ("cash basis") after dividends on other equity instruments divided by dividends on ordinary shares for the financial year. These ratios are provided on both a statutory and cash basis since net profit after tax, the primary component of these ratios, is also presented on a statutory and cash basis, for the reasons described above.

The Group presents an Adjusted Common Equity ratio (the "ACE ratio"). The ACE ratio is one measure considered by Standard & Poor's in evaluating the Bank's credit rating and is calculated in accordance with Standard & Poor's methodology. The ACE ratio has been provided in response to the focus by equity analysts on this measure and to permit comparability by investors with other financial institutions. For the Group's calculation of the ACE ratio refer to Appendix 8: Capital Adequacy.

Basis of preparation

The consolidated Financial Statements of the Group for the half years ended 31 December 2007 and 2006 comply with current Australian Accounting Standards, which consist of Australian equivalents to International Financial Reporting Standards ("AIFRS") and also with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB").

This half year Financial Report does not include all notes of the type normally included within the Annual Financial Report and therefore cannot be expected to provide as full an understanding of the financial position and financial performance of the Group as that given by the Annual Financial Report. As a result, this report should be read in conjunction with the 30 June 2007 Annual Financial Report of the Group (U.S. Version) and any public announcements made by the Group since the date of that Annual Report that have been posted to the Group's U.S. Investor website at <http://www.commbank.com.au/usinvestors>.

Critical Accounting Policies and Estimates

Critical Accounting Policies and Estimates

The accounting policies followed in this Financial Report are the same as those applied in the Bank's Annual Report for the fiscal year ended 30 June 2007 except for those items referred to in Note 1 of this Financial Report. Certain of these policies are considered to be more important in the determination of the Group's financial position, since they require management to make difficult, complex or subjective judgements, some of which may relate to matters that are inherently uncertain. These decisions are reviewed by the Board Audit Committee.

These policies include judgements as to levels of provisions for impairment for loan balances, actuarial assumptions in determining life insurance policy liabilities and pensions, and determining whether certain entities should be consolidated. An explanation of these policies and the related judgements and estimates involved is set out below.

Provisions for Impairment

Provisions for impairment are recognised where there is objective evidence of impairment, at an amount adequate to cover assessed credit related losses.

Credit losses arise primarily from loans but also from other credit instruments such as bank acceptances, financial guarantees and commitments, contingent liabilities, financial instruments and investments and assets acquired through security enforcement.

Individually Assessed Provisions

Individually Assessed provisions are raised where there is objective evidence of impairment and full recovery of principal is considered doubtful.

Individually assessed provisions are made against individual facilities in the credit risk rated managed segment where exposure aggregates to \$250,000 or more, and a loss of \$10,000 or more is expected. The provisions are established based primarily on estimates of the realisable (fair) value of collateral taken and are measured as the difference between the asset's carrying amount and the present value of the expected future cash flows (excluding future credit losses that have not been incurred), discounted at the financial asset's original effective interest rate. Short term balances are not discounted.

Individually Assessed provisions (in bulk) are also made against statistically managed segments to cover facilities which are not well secured and past due 180 days or more, against the credit risk rated segment for exposures aggregating to less than \$250,000 and 90 days or more past due, and against credit risks identified in specific segments in the credit risk rated portfolio. These provisions are derived primarily by reference to historical ratios of write-offs to balances in default.

Individually assessed provisions are provided for from the collective provision.

Collective Provision

All other loans and advances that do not have an individually assessed provision are assessed collectively for impairment.

The collective provision is maintained to reduce the carrying amount of portfolios of similar loans and advances to their estimated recoverable amounts at the Balance Sheet date.

The evaluation process is subject to a series of estimates and judgements.

In the credit risk rated segment, the risk rating system, including the frequency of default and loss given default rates, loss history, and the size, structure and diversity of individual credits

are considered. Current developments in portfolios (industry, geographic and term) are reviewed.

In the retail statistically managed segment the history of defaults and losses, and the size, structure and diversity of portfolios are considered.

In addition management considers overall indicators of portfolio performance, quality and economic conditions.

Changes in these estimates could have a direct impact on the level of provision determined.

The amount required to bring the collective provision to the level assessed is recognised as an expense as set out in Note 6 to the Financial Statements.

Life Insurance Policyholder Liabilities

Life insurance policyholder liabilities are accounted for under AASB 1038: Life Insurance Business. A significant area of judgement is in the determination of policyholder liabilities, which involve actuarial assumptions. The areas of judgement where key actuarial assumptions are made in the determination of policyholder liabilities are:

- Business assumptions including:
 - Amount, timing and duration of claims/policy payments;
 - Policy lapse rates; and
 - Acquisition and long term maintenance expense levels;
- Long term economic assumptions for discount and interest rates, inflation rates and market earnings rates; and
- Selection of methodology, either projection or accumulation method. The selection of the method is generally governed by the product type.

The determination of assumptions relies on making judgements on variances from long-term assumptions. Where experience differs from long term assumptions:

- Recent results may be a statistical aberration; or
- There may be a commencement of a new paradigm requiring a change in long term assumptions.

The Group's actuaries arrive at conclusions regarding the statistical analysis using their experience and judgement.

Consolidation of Special Purpose Entities

The Group assesses whether a special purpose entity should be consolidated based on the risks and rewards of each entity and whether the majority pass to the Group. Such assessments are predominately required in the context of the Group's securitisation program and structured transactions.

This page has been intentionally left blank.

Highlights

Group Performance Highlights

Net Profit after Income Tax	Half Year Ended		
	31/12/07	30/06/07	31/12/06
Statutory basis	\$M	\$M	\$M
	2,371	2,279	2,191

The Group's net profit after tax ("statutory basis") for the half year was \$2,371 million which represents an increase of 8% on the prior comparative period.

The volatility in global credit markets has had a significant impact on the Group during the current half year. This caused a widening of the spread between the official cash rate and the 90-day bank bill rate, together with a higher cost of debt in the wholesale markets. As a result the Group estimates that it incurred approximately \$100 million of extra funding costs (\$70 million after tax) during the half year. In addition, loan impairment expenses increased \$138 million on the prior comparative period, reflecting risk downgrades in the corporate segment and some large specific provisions.

The Group has delivered a solid business result in a difficult environment, supported by strong growth across both lending and deposit balances and the strong performance of the Wealth Management operations. The financial performance of the Group was underpinned by:

- Growth in Banking income of 5% on the prior comparative period, following strong growth in average interest earning assets of 15% to \$352 billion;
- Growth in Average Funds Under Administration of 21% on the prior comparative period to \$191 billion, underpinned by strong retail and wholesale inflows;
- Growth in average inforce insurance premiums of 16% on the prior comparative period reflecting strong sales volumes and progress on cross-sell initiatives;
- Continued improvement in credit quality across consumer portfolios offset by an increase in Corporate provisioning levels; and
- Operating expense growth of 7% on the prior comparative period. Continued productivity gains and realisation of other cost savings have enabled increased investment in the business to support productivity and growth initiatives.

Earnings per share ("statutory basis") increased 6% on the prior comparative period to 180.4 cents per share. The Group's Return on Equity ("statutory basis") has decreased 120 basis points on the prior comparative period, principally reflecting the higher capital levels in the period leading up to Basel II.

Basel II Transition

On 10 December 2007, the Australian Prudential Regulatory Authority ("APRA") granted advanced accreditation status to the Group for the measurement of regulatory capital under the Basel II framework.

This approval was effective from 1 January 2008 and will result in an increase in the Group's Tier One and Total Capital ratios as disclosed on page 9.

Dividends

The interim dividend for the year is \$1.13 per share, an increase of 6 cents or 6% on the prior comparative period, representing a dividend payout ratio ("statutory basis") for the half year of 63.4%.

The interim dividend payment will be fully franked and will be paid on 2 April 2008 to owners of ordinary shares at the close of business on 22 February 2008 ("record date"). Shares were quoted ex-dividend on 18 February 2008.

The Group issued \$709 million of shares to satisfy shareholder participation in the Dividend Reinvestment Plan ("DRP") in respect of the final dividend for 2006/07. In respect of the current interim dividend, shares to be allocated to participants under the DRP will be provided by an on-market purchase, to a maximum value of \$550 million. Any DRP allocation in excess of this limit will be satisfied by the issuance of new shares.

Outlook

The discussion below includes forward looking statements. See "Special Note Regarding Forward Looking Statements".

The increased volatility in global financial markets which characterised the first half of the Group's fiscal year is expected to continue until at least the end of the current calendar year as the full impacts of the sub-prime crisis flow through the market.

For the Australian economy this is likely to mean that wholesale funding costs will remain above levels experienced in the 2007 financial year and inflation will continue to be a concern. This is expected to lead to further upward pressure on interest rates.

The underlying economy maintained a good level of growth during the first half of the 2008 fiscal year. Despite continuing volatility in global markets, the outlook for the Australian economy remains positive, with credit growth likely to continue close to present rates during the 2008 calendar year with the fundamentals favouring business credit growth over that of households.

With a strong capital position, a diversified funding and asset profile, banking and wealth businesses which are generating solid profit growth and an ongoing commitment to reinvest for the future, the Group believes it is well positioned. Nevertheless, the Group is unable to predict the impact that the current turmoil in the international financial markets will have on the Group's ability to access and cost of accessing the international wholesale funding markets and on its customers' financing needs and financial condition. While it is difficult to forecast peer performance because of market volatility and its varying impacts, the Group believes that it should continue to deliver EPS growth which meets or exceeds the average of its peers.

(1) Average interest earning assets and average interest bearing liabilities have been adjusted to remove the impact of securitisation. Refer to Average Balances and Related Interest Page 57.

(2) The 1 January 2008 ratios are calculated using the Basel II capital adequacy regulations. The existing Basel I ACE ratio is shown above pending Standard & Poor's guidance on the Basel II impact on the Bank's ACE capital.

(3) For additional information, refer to appendix 8, Capital Adequacy.

Credit Ratings

	Long-term	Short-term	Affirmed
Fitch Ratings	AA	F1+	Dec 07
Moody's Investor Services	Aa1	P-1	Dec 07
Standard & Poor's	AA	A-1+	Dec 07

Ratings are not a recommendation to purchase, hold or sell securities, and may be changed, suspended or withdrawn at any time.

The Group continues to maintain a strong capital position which is reflected in its credit ratings. Additional information regarding the Group's capital is disclosed in appendix 8, pages 63 to 65.

Group Performance Analysis

Financial Performance and Business Review

The half year statutory net profit after tax of \$2,371 million for the Group increased 4% on the prior half and 8% on the prior comparative period.

The performance during the half year was principally affected by:

- Strong improvement in business lending volumes, up 23% since December 2006 to \$104 billion;
- Significant domestic deposit volume growth of 25% since December 2006 to \$202 billion;
- Continued gains in home loan market share translating into balance growth of 13% on the prior comparative period to \$188 billion;
- Underlying net interest margin contraction of four basis points over the half year and ten basis points over the prior comparative period;
- Productivity improvements and other cost savings financing additional investment in front line staff;
- Increased Funds under administration of 24% on the prior comparative period to \$208 billion. FirstChoice flows remained solid over the half year capturing further market share gains;
- Growth in CommInsure inforce premiums to \$1,094 million representing an increase of 11% on the prior comparative period, reflecting strong sales volumes and progress of the Wealth Management cross-sell initiative; partly offset by
- Impact of recent volatility in global credit markets which has caused funding costs to increase by \$100 million (\$70 million after tax) and some deterioration in credit quality in the corporate sector, leading to loan impairment expenses increasing by \$138 million on the prior comparative period.

More comprehensive disclosure of performance highlights by key business segments is contained on pages 14-28.

Net Interest Income

Net interest income increased by 12% on the prior comparative period to \$3,899 million. The growth was driven by a strong increase in average interest earning assets of 15% offset by a 10 basis point reduction in underlying net interest margin over the 12 months ended 31 December 2007.

Average Interest Earning Assets

Average interest earning assets increased by \$27 billion on the prior half and \$45 billion on the prior comparative period to \$352 billion, reflecting a \$23 billion increase in average lending interest earning assets and a \$4 billion increase in average non-lending interest earning assets on the prior half.

Home lending growth continued to be the largest contributor to the increase in average interest earning assets, resulting from market share gains during the half year. Average home loan balances excluding the impact of securitisation increased by 9% since 30 June 2007 and 12% since 31 December 2006.⁽¹⁾

Personal Lending average balances have increased by 7% since 30 June 2007 and 15% since 31 December 2006, driven by strong growth in margin lending.

Average balances for Business and Corporate lending have increased 8% since 30 June 2007 and 18% since 31 December 2006 reflecting robust growth, particularly in Institutional Banking.

Net Interest Margin

Underlying net interest margin decreased four basis points on the prior half and ten basis points over the prior comparative period. Headline net interest margin includes the favourable impact of reclassification of net swap costs under AIFRS (offset within Other banking income). Underlying margins decreased due to:

Incremental Funding Costs: The lack of liquidity in global credit markets resulted in an increase in the cash to bill rate spread and higher wholesale funding costs. This led to three basis points of margin compression in the half year (net of the retail deposit benefit) and three basis points of compression on the prior comparative period, as well as additional costs on derivatives used to hedge short-dated interest rate exposures, which are recognised within Other banking income.

Asset Pricing & Mix: Changes within the home loan and credit card portfolios resulted in two basis points margin decline (excluding the impact of market liquidity issues) on the prior half and five basis points over the prior comparative period. This was due to adverse portfolio mix changes within both of these portfolios. Portfolio mix changes include both compression due to growth in both packaged and fixed rate home lending as well as "Yellow" credit card growth. Business lending margins remained stable overall, with improving product margins on some products being offset by the corresponding adverse mix impact of growth in the institutional lending portfolio.

Lending mix: Higher margin business lending grew faster than lower margin home lending, resulting in a one basis point increase in margin on both the prior half and prior comparative period.

During the current half the net interest margin has been protected from a further three basis point deterioration by hedging of short-dated interest rate exposures which led to incremental losses of \$50 million in Other banking income.

Cash Rate & Deposit Pricing:

The combined impact of cash rate increases, unfavourable yield curve movements together with mix changes resulted in three basis points of margin compression on the prior comparative period.

Additional information, including the average balances, is set out on pages 57 to 58.

(1) Refer to appendix 3 page 57: Average Balances and Related Interest disclosing average asset and liability balances including the value of securitised assets.

CommInsure & Other	130	104	121
Sovereign & Other	22	25	21
Funds management income	1,141	981	893

Funds management income increased by 28% on the prior comparative period to \$1,141 million. The growth was driven by average funds under administration (FUA) increasing by 21% on the prior comparative period to \$191 billion. Funds management income to average FUA grew from 1.12% to 1.19%, an increase of 7 basis points since 31 December 2006.

Insurance Income

	Half Year Ended		
	31/12/07	30/06/07	31/12/06
	\$M	\$M	\$M
CommInsure & Other	273	306	267
Sovereign & Other	120	129	115
Insurance income	393	435	382

Insurance income increased by 3% on the prior comparative period to \$393 million. The current half result is a combination of growth in average inforce premiums of 16% offset by adverse claims experience arising from the recent storms in NSW and Victoria.

Factors impacting Other banking income were:

- Commissions: increased by 6% on the prior comparative period to \$908 million, principally driven by volume-led increases in home lending package fees and continued strong brokerage commissions within CommSec;
- Lending fees: increased by 12% on the prior comparative period to \$469 million. The growth is principally due to higher business and corporate fees due to increased lending volumes;
- Trading income: decreased 35% on the prior comparative period to \$200 million due to losses incurred of \$50 million related to derivatives used to hedge short-dated interest rate exposures; and
- Other income: decreased \$31 million on the prior comparative period. The prior comparative period included \$79 million due to the sale of the Group's share in Greater Energy Alliance Corporation Pty Limited ("Loy Yang"). Excluding Loy Yang, Other income increased by \$48 million on the prior comparative period due to realised gains on the economic hedge of revenue from the New Zealand operations; accrued income on a prior half year tax refund and other volume-driven increases in other income items.

Group Performance Analysis continued

Operating Expenses

Group operating expenses increased by 7% on the prior comparative period to \$3,378 million. Operating expenses were impacted by:

- Increased salary costs of 12% reflecting a competitive domestic labour market together with additional front line staff in key businesses;
- The introduction in the prior half of competitive remuneration schemes in the Global Asset Management business to attract and retain high quality talent;
- A one-off GST refund received in the half year ended 31 December 2007 (\$64 million) which was used to fund \$62 million of additional projects to support the Group's strategic initiatives;
- Continued productivity gains achieved through process re-engineering and realisation of cost savings; and
- Increased volume related expenses attributable to strong growth across both lending assets and funds under administration.

Group Expense to Income Ratio

The expense to income ratio improved from 48.6% in the prior comparative period to 48.4% in the half year ended 31 December 2007. The half year ended 31 December 2007 includes the benefit of the GST refund which was reinvested in projects supporting the Group's strategic priorities.

Loan Impairment Expense

The total charge for loan impairment for the half year was \$333 million, which represents 20 basis points of average loans and acceptances on an annualised basis. This expense is \$138 million higher than the prior comparative period, reflecting increased levels of collective and specific provisioning for the corporate segment.

Gross impaired assets were \$562 million as at 31 December 2007, compared with \$421 million at 30 June 2007.

Total provisions for impairment as a percentage of gross impaired assets was 246% at 31 December 2007.

Taxation Expense

The corporate tax charge for the half year was \$905 million, an effective tax rate of 27.4%. The effective tax rate is lower compared to the prior half rate of 28.0% and the prior comparative period of 28.2%, primarily due to higher levels of concessional tax on dividends received.

Provisions for Impairment Losses

Total provisions for impairment losses at 31 December 2007 were \$1,380 million. The current level reflects:

- The continued high quality of the home lending portfolio;
- Continued improvement in the unsecured retail lending portfolio; and
- Some softening in the corporate portfolios.

(1) Other assets include Bank acceptances of customers, derivative assets, provisions for loan impairment, securitisation assets, insurance assets and intangibles.

(2) Non-interest bearing liabilities include derivative liabilities and insurance policy liabilities.

(3) Included in Other provisions.

(4) Bulk portfolio provisions of \$79 million at 31 December 2007 (\$99 million at 30 June 2007 and \$92 million at 31 December 2006) to cover unsecured personal loans and credit card lending have been deducted from individually assessed provisions to calculate this ratio. These provisions are deducted due to the exclusion of the related assets from gross impaired assets. The related asset amounts are instead included in the 90 days or more past due disclosure.

(5) Average of opening and closing balances.

Retail Banking Services

Financial Performance and Business Review

Retail Banking Services continued its strong performance over the half year ended 31 December 2007 with net profit after tax increasing by 8% on the prior comparative period. The result was underpinned by solid revenue growth in a competitive business environment, good expense management and continuing sound credit quality in the home and personal loan markets.

Business Review

Over the half year, the business maintained its solid momentum. Volume growth was strong with market share increasing for home loans, retail deposits and personal loans.

A number of key initiatives contributed to the achievement of these outcomes. Highlights included:

- The introduction of a new network operating model which had a positive influence on sales volumes through ensuring that there are greater lending capabilities in branches;
- The commencement of Sunday trading at sixteen of the busiest branches and extended Saturday trading hours;
- Implementation of improved branch performance measurement which facilitates greater sales focus, including cross sell, by front line staff;
- The introduction of a new branch design in eight locations, with further expansion planned. The new design incorporates a modern, open plan layout with a number of features more conducive to effective customer service and sales;
- Improvements and continued investment in IT platform stability and key platform upgrades, including NetBank and a new Credit Card platform;
- Continued focus on processing efficiencies, including improvements in loan processing times, and the national rollout of a new efficiency program;
- Needs analysis sales and service training programs continue to be rolled out to the front line staff;
- Ongoing improvements and recognition of the product range, highlighted by the awarding of five star ratings to a number of these products (Source: Cannex); and
- Improved online banking functionality which provides customers with faster access to account details, and aligns with the Group's approach to sustainability by reducing paper waste.

Home Loans

Home loan revenue increased by 4% on the prior comparative period to \$714 million. This result was supported by balance growth of 14%, which was above market, and included nine consecutive months of market share gains leading up to 31 December 2007. This was partially offset by lower margins due to mix changes including a higher proportion of package and fixed rate lending and increased funding costs. Fee revenue growth was strong, up 23% on the prior comparative period, underpinned by package fee income and volume related growth.

Consumer Finance

Consumer Finance income growth was down 2% on the prior comparative period. The focus on profitable growth has seen steady growth in credit card balances and continued improvement in credit quality with declining arrears rates over the half year. Credit card balances and market share have been impacted by the Group's decision not to enter into zero rate balance transfer offers. Key leading indicators including the number of new accounts opened have been encouraging.

Personal loans have performed well with steady volume growth, and sound credit quality including a decline in arrears rates.

Retail Deposits

Deposit revenue increased 6% on the prior comparative period, driven by strong balance growth of 12%, stable margins in a competitive environment, partly offset by the flow-on impact of the pensioner savings deeming rate increase in April 2007.

During the current year over 30% of market balance growth was captured, which translated into increased market share (Source: APRA). Good inflows have been recorded in a range of products, including Transaction Accounts, NetBank Saver and Term Deposits. Margins have been stable reflecting effective management of portfolio mix changes.

Operating expenses

Expenses increased by 2% on the prior comparative period, reflecting salary increases from 1 July 2007, increased investment on projects supporting the Group's strategic priorities and higher occupancy costs. Offsetting this has been the continuing realisation of IT savings and productivity gains, resulting in an improved expense to income ratio.

Loan Impairment

Total Loan Impairment Expenses decreased by 14% on the prior comparative period to \$141 million. This has been achieved whilst average interest earning assets increased by 12%. Credit card arrears and loss rates trended downwards. Personal loans credit quality continues to improve as the new scorecard delivers better quality and higher business volumes. Home loan arrears rates have improved, and losses remain at historically low levels.

Market Share Percentage ⁽¹⁾	31/12/07	30/06/07	31/12/06
Home loans	18.8	18.5	18.4
Credit cards ^{(2) (3)}	18.6	18.8	19.3

Premium Business Services

Financial Performance and Business Review

During the half year to 31 December 2007, Premium Business Services showed signs of significant improvement in underlying business performance. Revenue growth of 12% on the prior comparative period was underpinned by stable margins and a significant lift in business volumes, which led to gains in both business lending and business deposit market share. Efficiency gains were also made during the half year resulting in a reduction in the overall cost to income ratio.

Despite this strong underlying business performance, net profit after tax was impacted by higher loan impairment expense, driven by a change in the Group's assessment of portfolio risk as well as some rating downgrades in the segment. The growth in the loan impairment expense led to net profit after tax of \$723 million representing a flat result on both prior half and the prior comparative period. The prior comparative period contained a \$55 million after tax profit on the sale of the Group's share in Greater Energy Alliance Corporation Pty Limited ("Loy Yang").

Revenue growth during the half year was strong across all business segments, with growth of 10% on the prior half and 12% on the prior comparative period. Excluding Loy Yang, revenue increased 17% on the prior comparative period. Revenue growth across the segments was the result of the investment made as part of the Group's strategic focus on Business Banking as well as significant volume growth and stable margins through both the Institutional Banking and Private Client Services segments.

Institutional Banking

Institutional Banking services large institutional clients through a relationship management model supported by teams of industry and product specialists. Income increased by 22% on the prior comparative period (excluding the impact of Loy Yang) reflecting the strong balance growth and stable margins achieved during the half year.

Private Client Services

Private Client Services provides both private banking services to high net worth individuals and direct trading and margin lending through CommSec. Private Client Services maintained its strong growth during the half year with revenue growth of 38% on the prior comparative period due to strong volume growth and increasing margins. Marginally slower growth of 15% on the prior half was the result of seasonal factors leading up to 30 June 2007. On 27 November 2007 CommSec acquired IWL Ltd providing enhanced wholesale broking capabilities and a larger retail client base. CommSec continued to benefit from high trading volumes within the Australian Equities market. In addition, the Private Bank opened three new offices on the East Coast of Australia during the half year.

Corporate Financial Services

Corporate Financial Services provides relationship management and specialised banking services to larger business banking customers. Income increased by 8% on the prior half and 7% on the prior comparative period. This strong level of growth is due to additional investment in front line staff and distribution capability. During the current half year four new business banking centres were opened across New South Wales, South Australia and Victoria adding to the eight new centres opened during the 2007 financial year. The Group's new transaction banking platform for business, CommBiz, continued to grow with over 20,000 customers using the platform.

Agribusiness

Agribusiness provides services to regional customers whose primary income is generated from agricultural production. Agribusiness income increased 15% on the prior half and 13% on the prior comparative period. Income growth was underpinned by a strong focus on providing a service to top tier clients with specific structured solutions and providing customer service via the 24 hour hotline 'Agriline' based in Wagga Wagga.

Local Business Banking

Local Business Banking provides small to medium businesses with a relationship manager and 24 hour access to a business banking specialist. Investment in Local Business Banking has resulted in a turnaround in performance during the half. The progressive re-introduction of Business Bankers covering more than 700 branches and the 24 hour, 7 day remote customer service centre have led to an uplift in lending activity and income growth of 6% on the prior comparative period.

Operating Expenses

Operating expenses of \$883 million represented an increase of 2% on the prior half and 10% over the prior comparative period. This increase was driven by continued investment in business banking, including an increase in the number of front line employees, the impact of a competitive labour market on salary costs, and the opening of new business banking centres.

Loan Impairment Expense

The loan impairment expense for the half year was \$175 million, which is significantly higher than prior half years (\$155 million increase on prior comparative period). This was the result of increases in both the collective and the specific provisions. Increases to the collective provision related to portfolio growth and an increase in the Group's assessment of portfolio risk as well as some rating downgrades in the segment.

Market Share

Business lending market share to non-financial corporations, as measured by APRA, increased 6 basis points since 30 June 2007 to 12.5% while business lending market share as measured by the RBA has increased 12 basis points since 30 June 2007 to 12.9%. Despite gaining market share, lending balances were impacted by a decline in asset finance balances reflecting the significant tightening of credit standards for sales through third party originators.

Business deposit market share of non-financial corporations, as measured by APRA, has increased by 73 basis points since 30 June 2007 to 13.7%.

Market Share Percentage ⁽¹⁾	31/12/07	30/06/07	31/12/06
Business lending – APRA	12.5	12.4	12.5
Business lending – RBA ⁽²⁾	12.9	12.7	12.9
Business deposits – APRA	13.7	13.0	12.0
Equities trading (CommSec) ⁽²⁾	6.4	4.3	4.3

Financial Performance and Business Review

Net Profit after tax for the Wealth Management business increased by 41% on the prior comparative period to \$367 million, reflecting continued strong revenue growth across the business.

Wealth Management Funds Under Administration increased by 24% on the prior comparative period to \$200 billion. The growth in funds under administration was driven by net flows and investment performance.

Net funds flows for the half year ended 31 December 2007 were \$25.2 billion.

The drivers of these strong net funds flows for the half were:

- Continued strong flows into the FirstChoice platform; and
- Solid institutional flows generated by the CFS Global Asset Management business with Wholesale inflows and Cash balances increasing as a result of short-term cash mandates from Institutional investors.

Investment markets have been positive despite volatility in the current half year. Investment performance has been solid with 71% of funds outperforming benchmark on the latest rolling three year performance basis.

CommInsure Inforce premiums increased by 11% on the prior comparative period to \$1,094 million, reflecting strong sales volumes and progress of the Wealth Management cross-sell initiative.

Net Operating Income

Net operating income increased by 22% on the prior comparative period to \$1,126 million. Underpinning this half year result was growth in funds management revenue driven by an increase in average funds under administration and higher margins.

Margins increased due to growth in higher margin asset classes more than offsetting the general trend toward lower margin platform offerings.

Inforce premiums and planned margins contributed strongly to Insurance income. The result was adversely impacted by the recent storms in New South Wales and Victoria and a return to more normal levels of Life claims experience.

CFS Global Asset Management (CFS GAM)

CFS Global Asset Management provides asset management services to wholesale and institutional investors. Net profit after tax increased by 38% on the prior comparative period reflecting the global expansion and diversification of the business. Included in operating income is a gain from the partial sell down of an interest in Anglian Water Group plc. The gain represents a small increment over holding costs. To date, 32% of Anglian Water Group plc has been sold down.

Funds under management increased 28% on the prior comparative period to \$164 billion. The growth in funds under management was driven by strong wholesale flows and short-term cash mandates from institutional investors.

Key developments include:

- Led a consortium which acquired United Utilities Electricity Limited ("UUE"), an infrastructure company which comprises an electricity distribution network in the north of England. The sale of these assets into funds continues;
- A new Asia Pacific Equity Leaders Fund was launched to market and we commenced incubation of a new World ex-US Equity Fund during the half. These form part of the US Commingled Fund range;

- CFS Retail Property Trust was a member of a consortium that acquired the Myer Melbourne site on Bourke and Lonsdale streets for \$605 million. The consortium intends to undertake an approximate \$500 million redevelopment of the site over a five year period;
- Global Listed Infrastructure capability launched in the UK;
- Incubation commenced for a new Asian Bond capability, which is available to Australian institutional investors; and
- First State Media Group acquired the music publishing assets of Wind-up Entertainment Inc, one of the largest independently owned and operated record labels in the US.

Colonial First State

Colonial First State provides product packaging, administration, distribution and advice to retail customers. Net profit after tax increased by 124% on the prior comparative period.

Net revenue benefited from strong inflows as investors took advantage of superannuation legislation changes in June 2007. Subsequent strong flows and tighter expense control also contributed to the result.

FirstChoice flows remained strong in the market with \$3.5 billion in net flows for the half year ended 31 December 2007. With over \$42 billion in funds under administration, FirstChoice has experienced a growth rate of 36% in the last 12 months.

CommInsure

CommInsure is a domestic provider of life and general insurance. Net profit after tax for the business decreased 24% on the prior comparative period.

The increase on the prior half reflects growth in planned margins offset by less favourable claims experience, while the fall compared to the prior comparative period reflects general insurance claims associated with the recent NSW and Victoria storms.

Wealth Management continued

Operating Expenses

Total operating expenses of \$611 million (excluding volume expenses) increased by 8% on the prior comparative period.

The key drivers of expense growth on the prior comparative period include:

- Increased product development expenses across the three businesses;
- Investment in the international expansion of the Global Asset Management business;
- Competitive remuneration schemes in the asset management business to attract and retain high quality talent; and

- Increased spend on strategic projects including Wealth Management cross-selling initiatives, investment on system migration and simplification to further reduce the number of insurance systems used and reduce ongoing costs.

Taxation

The effective corporate tax rate on underlying profit for the half year was 27.8% compared with 31.4% for the prior comparative period. The prior year was impacted by one-off permanent tax differences.

International Financial Services

Financial Performance and Business Review

International Financial Services incorporates the Group's retail, business/commercial and rural banking operations in New Zealand, Indonesia, China and Fiji. It also includes life insurance operations in each of these countries.

Net profit after tax for the half year was \$310⁽¹⁾ million, an increase of 40% over the prior comparative period. The half year result included \$12 million of pre-tax realised gains from the currency hedge of the New Zealand operations (December 2006: nil). Excluding this gain, profit growth was 36% on the prior comparative period.

(1) Represents Group Management view for the production segment rather than statutory view.

ASB Bank

ASB Bank Net profit after tax for the half year was \$216 million, an increase of 20% from \$180 million in the prior comparative period. Excluding the impact of realised gains and losses on the hedge of New Zealand operations, profit increased 15% on the prior comparative period. The major drivers of this growth were:

- Home loan balances increased by 12% on the prior comparative period resulting in stable market share of 23.1%. Retail deposits have increased to NZD \$26.2 billion or 7% since 30 June 2007 and market share has increased 60 basis points on prior comparative period;
- Net interest margin was stable over the half year representing an improving trend compared with prior half years; and
- Continued sound credit quality.

Sovereign Insurance

The life insurance operations in New Zealand operate predominantly under the Sovereign brand.

Sovereign's Net profit after tax was \$43 million for the half year ended 31 December 2007, a decrease of 17% on the prior half and an increase of 5% on the prior comparative period. The main drivers of this result were:

- A deterioration in death, medical and disability claims experience;
- Market leading growth in new business sales with Sovereign capturing 33.9% of New Business sales market share for September 2007; and
- A continuation of positive investment returns.

Other Asia Pacific Business

The highlights in this region include:

- Indonesia: Completion of the acquisition of Bank Arta Niaga Kencana (ANK) on 26 July 2007. The legal merger of Bank ANK with PT Bank Commonwealth was completed in December 2007. Bank ANK added 25 branches to the existing retail branch network in the Surabaya region. The business also opened six new branches and rebranded in the market to Commonwealth Bank (previously PT Bank Commonwealth);
- Indonesia: Acquisition of an additional 30% interest held by the Group's joint venture partner in PT Astra Life Insurance business bringing the Group's shareholding to 80%. The combined business was re-branded PT Commonwealth Life. PT Commonwealth Life has 51 branches operating in 16 Indonesian cities. The business provides personal accident, hospitalisation, and critical illness cover as well as education and savings products. Commonwealth Life ensured it stayed

firmly placed as a leading insurance company in Indonesia after being awarded the highest rating available by "Info Bank" industry magazine. Ratings are given based on a company's financial performance;

- Vietnam: A licence to operate a branch in Ho Chi Minh City was granted in January 2008;
- China: Continued strong growth in profits during the half year of the investments in Jinan (11% holding) and Hangzhou (19.9% holding) City Commercial Banks. The Group also continued during the half year to implement its Capability Transfer Program at both Jinan and Hangzhou City Commercial Banks; and
- Fiji lending balances were stable at \$373 million. Margins improved during the half year following an easing of liquidity restrictions which arose during the political crisis last year. Deposits have grown by 18% since 30 June 2007 to \$501 million.

Market Share

Housing market share in New Zealand was in line with December 2006 at 23.1% despite intense competition in this market.

Retail deposit market share in New Zealand was 21.3%, up from 20.7% at 31 December 2006.

(1) Excludes the impact of reclassification of net swap costs from Net interest income to Other banking income related to certain economic hedges which do not qualify for AIFRS hedge accounting (December 2007: \$164 million; June 2007: \$78 million; December 2006: \$29 million)

Financial Performance

Corporate Centre includes the results of unallocated group support functions such as Investor Relations, Group Strategy, Secretariat and Treasury, together with centralised project spend. Net profit after tax decreased \$83 million on the prior comparative period due largely to the impact of additional funding costs which were absorbed in Treasury during the current half.

Eliminations/Unallocated includes intra-group elimination entries arising on consolidation, centrally raised provisions and other unallocated intra-group revenue and expenses. Net profit after tax ("statutory basis") decreased \$6 million on the prior comparative period due to a reduction in the interest accrued on intra-group lending balances and a change in the methodology relating to the apportionment of deferred tax assets across the Group. As these changes occurred during 2007, the result is flat on the prior half.

Liquidity and Capital Resources

Liquidity and Capital Resources

Liquidity and Funding Arrangements

Overview

The Group's liquidity and funding policies are designed to ensure it will meet its obligations as and when they fall due, by ensuring it is able to borrow funds on an unsecured basis, or has sufficient quality assets to borrow against on a secured basis, or has sufficient quality liquid assets to sell to raise immediate funds without adversely affecting the Group's net asset value. The Group's funding policies and risk management framework complement the Group's liquidity policies by ensuring an optimal liability structure to finance the Group's businesses. The long-term stability and security of the Group's funding is also designed to protect its liquidity position in the event of a crisis specific to the Group.

The Group's liquidity policies are designed to ensure it maintains sufficient cash balances and liquid asset holdings to meet its obligations to customers, in both ordinary market conditions and during periods of extreme stress. These policies are intended to protect the value of the Group's operations across its Retail Banking Services, Premium Banking Services, Wealth Management and International Financial Services businesses, during periods of unfavourable market conditions, such as have been experienced since July 2007.

The Group's funding policies are designed to achieve diversified sources of funding by product, term, maturity date, investor type, investor location, jurisdiction, currency and concentration, on a cost effective basis. This objective applies to the Group's wholesale and retail funding activities. The Group's retail funding base formed approximately 53% of its total funding requirements at 31 December 2007.

The Risk Management Framework for Liquidity and Funding

The Group's liquidity and funding policies are approved by the Board and agreed with the Australian Prudential Regulation Authority ("APRA"). The Group has an Asset and Liability Committee whose charter includes reviewing the management of assets and liabilities, reviewing liquidity and funding policies and strategies, as well as regularly monitoring compliance with those policies across the Group. The Group Treasury division manages the Group's liquidity and funding positions in accordance with the Group's liquidity policy, including monitoring and satisfying the liquidity needs of the Group and its subsidiaries.

Larger domestic subsidiaries, such as CBFC Limited and subsidiaries within the Colonial Group, also apply their own liquidity and funding methods to address their specific needs. The Group's New Zealand banking subsidiary, ASB Bank Limited ("ASB"), manages its own domestic liquidity and funding needs in accordance with its own liquidity policies and the policies of the Group. ASB's liquidity policy is also overseen by the Reserve Bank of New Zealand. The Group also has relatively small banking subsidiaries in Indonesia and Fiji that manage their liquidity and funding on a similar basis.

The Group's Financial Services and Risk Management divisions provide prudential oversight of the Group's liquidity and funding risk and manage the Group's relationship with prudential regulators.

Liquidity and Funding Policies and Management

The Group's liquidity and funding policies provide that:

- Balance sheet assets that cannot be liquidated quickly are funded with deposits or term borrowings that meet minimum maturity requirements, including appropriate liquidity buffers;
- Short and long term wholesale funding limits are established and reviewed regularly based on surveys and analysis of market capacity;
- A minimum level of assets are retained in highly liquid form;
- The level of liquid assets complies with crisis scenario assumptions related to "worst case" wholesale and retail market conditions; is adequate to meet known funding obligations over certain timeframes; and are allocated across Australian dollar and foreign currency denominated securities in accordance with specific calculations;
- Certain levels of liquid assets are held to provide for the risk of the Group's committed but un-drawn lending obligations being drawn by customers, as calculated based on draw down estimates and forecasts; and
- The Group maintains certain levels of liquid assets categories within its liquid assets portfolio. The first category includes negotiable certificates of deposit of Australian banks, bank bills, Commonwealth of Australia Government and Australian state and semi-government bonds and supra-national bonds eligible for repurchase by the Reserve Bank of Australia ("RBA") at any time. The second category is AAA and A-1+ rated Australian residential mortgage backed securities that meet certain minimum requirements.

At 31 December 2007, around 90% of the Group's Australian dollar liquid assets qualify for repurchase by the RBA at any time.

The Group's key liquidity tools include:

- A liquidity management model similar to a "cash flow ladder" or "maturity gap analysis", that allows forecasting of liquidity needs on a daily basis;
- An additional liquidity management model that implements the agreed prudential liquidity policies. This model is calibrated with a series of "worst case" liquidity crisis scenarios, incorporating both systemic and "name" crisis assumptions, such that the Group will have sufficient liquid assets available to ensure it meets all its obligations as and when they fall due;
- The Reserve Bank of Australia's repurchase agreement facilities provide the Group with the ability to borrow funds on a secured basis, even when normal funding markets are unavailable; and
- The Group's various short term funding programmes are supplemented by the Interbank Deposit Agreement between the four major Australian banks. This agreement is similar to a standby liquidity facility that allows the Group to access funding in various crisis circumstances.

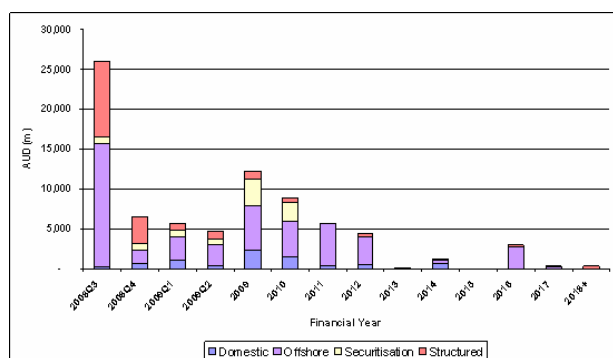

The Group's key funding tools include:

- Its consumer, small business and institutional deposit base;
- Its consumer retail funding base which includes a wide range of retail transaction accounts, investment accounts, term deposits and retirement style accounts for individual consumers; and

Liquidity and Capital Resources continued

- Its wholesale international and domestic funding programmes which includes its: Australian dollar Negotiable Certificates of Deposit programme; Australian dollar bank bill programme; US Commercial Paper programme; US and Euro Commercial Paper programme; US Extendible Notes programme; Australian dollar domestic borrowing programme; US "Rule 144A" Medium Term Note Programme; Euro Medium Term Note Programme; Medallion "Regulation AB" securitisation programme; various Japanese wholesale and retail programmes; and a series of other related programmes in American, European and Asian jurisdictions.

The chart below illustrates the liquidity profile of its currently outstanding indebtedness, broken down by type of debt instrument and maturity.

In addition to these debt instruments, the Group has made certain contractual commitments to make expenditures. The contractual obligations profile of the Group is set forth under "Contractual Commitments" beginning on page 46 of the U.S. version of the Bank's Annual Report for the Fiscal Year ended June 30, 2007. The Group is not aware of any material changes to this profile since June 30, 2007.

Recent Market Environment

Although the cost of liquidity and funding have increased significantly since July 2007 due to market conditions as discussed under "Highlights", the Group's liquidity and funding policies have remained unchanged throughout this period, as they have proven to be effective and the Group's liquidity and funding arrangements have remained within the requirements of these policies.

The Group has managed its liquidity during adverse market conditions to avoid concentrations such as dependence on single sources of funding and has taken advantage of the Group's diversified funding base. For example, the Group has shifted a portion of its funding to the Japanese retail funding market from its large scale international securitizations. The Group has also controlled its funding requirements by carefully planning its asset origination activities.

For more information on the Group's funding programs, see "Liquidity and Capital Resources" beginning on page 34 of the U.S. version of the Bank's Annual Report for the Fiscal Year ended June 30, 2007.

Details of the Group's regulatory capital position and capital management activities are disclosed in Appendix 8: Capital Adequacy.

For further details regarding the Group's liquidity and capital resources, please see "Liquidity and Capital Resources" in the

Bank's Annual Report (US Version) for the fiscal year ended 30 June 2007.

For details regarding prudential changes related to Basel II, International Financial Reporting Standards and Conglomerate Groups, please see "Regulatory Changes" in the Bank's Annual Report (US Version) for the fiscal year ended 30 June 2007, Note 35.

Off-Balance Sheet Arrangements

For further details regarding the Group's off-balance sheet arrangements, please see "Off-Balance Sheet Arrangements" in the Group's Annual Report (US Version) for the fiscal year ended 30 June 2007.

The Directors submit their report for the half year ended 31 December 2007.

Directors

The names of the Directors holding office during the half year ended 31 December 2007 and until the date of this report were:

J M Schubert	Chairman
R J Norris	Managing Director and Chief Executive Officer
Sir J A Anderson KBE	Director
R J Clairs AO	Director
C R Galbraith AM	Director
J S Hemstritch	Director
S C H Kay	Director
W G Kent AO	Director (Retired 7 November 2007)
F D Ryan	Director
F J Swan	Director (Retired 7 November 2007)
D J Turner	Director
H H Young	Director

Review and Results of Operations

Commonwealth Bank recorded a statutory net profit after tax of \$2,371 million for the half year ended 31 December 2007, compared with \$2,191 million for the prior comparative period, an increase of 8%. The increase was principally due to strong growth in banking income resulting from lending asset growth, as well as continued strong performance within the Wealth Management businesses.

The net profit after tax ("statutory basis") from Retail Banking Services of \$949 million (December 2006: \$881 million) reflects continued growth in home loans and retail deposits together with improving credit quality across the personal lending portfolio.

The net profit after tax ("statutory basis") from Premium Business Services of \$723 million (December 2006: \$722 million) reflects strong improvements in business lending volumes, offset by increased investment in business banking and an increase in loan impairment expense.

The net profit after tax ("statutory basis") from Wealth Management of \$367 million (December 2006: \$261 million) reflects the outstanding performance of both the CFS Global Asset Management and Colonial First State businesses.

The net profit after tax ("statutory basis") from International Financial Services of \$310 million (December 2006: \$222 million) reflects solid growth in ASB, increasing market share in retail deposits whilst maintaining its market share position in home lending.

In accordance with the ASX Principles of Good Corporate Governance and Best Practice Recommendations, the Chief Executive Officer and the Chief Financial Officer have provided the Board with a written statement that the accompanying Financial Report represents a true and fair view, in all material respects, of the Group's financial position as at 31 December 2007 and performance for the half year ended 31 December 2007, in accordance with relevant accounting standards.

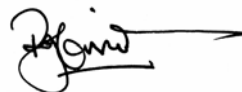

Signed in accordance with a resolution of the Directors.

J M Schubert

Notes to the Financial Statements

Note 1 Accounting Policies

General Information

The Financial Statements of the Commonwealth Bank of Australia (the 'Bank') and the Bank and its subsidiaries (the 'Group') for the half year ended 31 December 2007, were approved and authorised for issue by the Board of Directors on 13 February 2008.

The Group is incorporated and domiciled in Australia. It is a company limited by shares that are publicly traded on the Australian Stock Exchange. The address of its registered office is Level 7, 48 Martin Place, Sydney NSW 1155, Australia.

The Group is one of Australia's leading providers of integrated financial services including retail, business and institutional banking, superannuation, life insurance, general insurance, funds management, broking services and finance company activities. The principal activities of the Commonwealth Bank Group during the financial period were:

(i) Retail Banking Services

The Group provides retail banking services within Australia including housing loans, credit cards, personal loans, savings and cheque accounts, and demand and term deposits.

(ii) Premium Business Services

The Group offers commercial products within Australia including business loans, equipment and trade finance, and rural and agribusiness products and provides private banking services to high net worth individuals and direct trading and margin lending through CommSec. This segment also has wholesale banking operations in London, New York, Singapore, Hong Kong and Malta.

(iii) Wealth Management

The Wealth Management segment conducts Australian funds management business comprising wholesale and retail investment, superannuation and retirement funds. Investments are across all major asset classes including Australian and international shares, property, fixed interest and cash. This segment also has funds management businesses in the United Kingdom and Asia.

The Wealth Management segment also provides Australian term insurance, disability insurance, annuities, master trusts, investment products and general insurance.

(iv) International Financial Services

The Group has full service banking operations in New Zealand, Fiji and Indonesia. The Group also has wholesale banking operations in Indonesia, regions of China and Tokyo. The Group's International Financial Services segment also conducts Life Insurance operations in New Zealand, where it has the leading market share, as well as Asia and the Pacific, and conducts Funds Management business in New Zealand.

(a) Bases of accounting

This general purpose financial report for the half year reporting period ended 31 December 2007 has been prepared in accordance with the requirements of the Corporations Act 2001, AASB 134 Interim Financial Reporting and in compliance with IAS 34 Interim Financial Reporting.

This half year financial report complies with current Australian Accounting Standards which consist of Australian equivalents to International Financial Reporting Standards (AIFRS) and also with International Financial Reporting Standards (IFRS)

as issued by the International Accounting Standards Board (IASB).

This half year Financial Report does not include all notes of the type normally included within the Annual Financial Report and therefore cannot be expected to provide as full an understanding of the financial position and financial performance of the Group as that given by the Annual Financial Report.

As a result, this report should be read in conjunction with the 30 June 2007 Annual Financial Report of the Group (U.S. version) and any public announcements made in the period by the Group in accordance with the continuous disclosure requirements of the Corporations Act 2001 and the ASX Listing Rules.

The amounts contained in this Financial Report and the Financial Statements are presented in Australian Dollars and have been rounded to the nearest million dollars unless otherwise stated, under the option available to the company under ASIC Class Order 98/100 (as amended by ASIC Class Order 04/667).

For the purpose of this half year Financial Report, the half year has been treated as a discrete reporting period.

(b) Basis of Preparation

The accounting policies followed in this half year Financial Report are the same as those applied in the 30 June 2007 Annual Financial Report, with the following exceptions:

- The Group decided to early adopt AASB Interpretation 13 Customer Loyalty Programmes on 1 July 2007. Upon transition this resulted in a reduction to retained earnings of \$5 million and replacement of the Group's provision for future expenses in relation to its credit card loyalty programmes with an equivalent amount of deferred income. Income in relation to the credit and loyalty program will be recognised in subsequent periods when the cost of loyalty points is expensed; and
- The Group elected to early adopt AASB 8 Operating Segments on 1 July 2007. This has resulted in changes to the presentation of the Group's segment reporting.

On 1 July 2007 the Group adopted the disclosure requirements of AASB 7 Financial Instruments: Disclosures. This new standard has no impact on the recognition, measurement or presentation of financial instruments, so does not impact the Group's financial position or results. It requires disclosures about the significance of financial instruments to the Group's financial position and results, and the nature and extent of credit, market and liquidity risks arising from financial instruments, including how they are managed. This standard resulted in limited additional disclosures for the half year ended 31 December 2007.

Other credit provisions ⁽¹⁾	28	23	19
Total provisions for impairment losses	1,380	1,256	1,230

(1) Included in Other Provisions.

Provisioning Policy

Provisions for impairment are maintained at an amount adequate to cover incurred credit related losses.

The Group first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, and then individually or collectively for financial assets that are not individually significant. If there is objective evidence of impairment, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of the expected future cash flows discounted at the financial asset's original effective interest rate.

	As at		
	31/12/07 %	30/06/07 %	31/12/06 %
Provision Ratios			
Collective provisions as a % of gross loans and acceptances	0.31	0.32	0.35
Collective provisions as a % of risk weighted assets	0.40	0.42	0.44
Individually assessed provisions for impairment as a % of gross impaired assets ⁽¹⁾	33.6	23.8	23.4
Total provisions for impairment losses as a % of gross impaired assets	245.6	298.3	363.9

(1) Bulk portfolio provisions of \$79 million at 31 December 2007 (\$99 million at 30 June 2007 and \$92 million at 31 December 2006) to cover unsecured personal loans and credit card lending have been deducted from individually assessed provisions to calculate this ratio. These provisions are deducted due to the exclusion of the related assets from gross impaired assets. The related asset amounts are instead included in the 90 days or more past due disclosure.

Notes to the Financial Statements continued

Note 11 Assets Held for Sale

The Group holds an \$832 million stake in Anglian Water Group plc, held through preference shares and eurobonds that are classified as Assets Held for Sale, which are being sold into Australian and European based infrastructure funds within the next 12 months. Interest revenue on the eurobonds is accrued, while dividend revenue on the preference shares is recognised when declared.

During the half year ended 31 December 2007 the Group acquired an equity stake of \$614 million in United Utilities Electricity Limited of which \$200 million was sold prior to 31 December 2007. The Group retains a stake of \$414 million at 31 December 2007.

The remaining Assets held for sale relate to various items of property, plant and equipment.

Note 12 Events after the end of the Financial Period

Dividends

The Directors have declared a fully franked dividend of 113 cents per share – amounting to \$1,487 million for the half year ended 31 December 2007. In respect of the current interim dividend, shares to be allocated to participants under the DRP will be provided by an on-market purchase, to a maximum value of \$550 million. Any DRP allocation in excess of this limit will be satisfied by the issuance of new shares.

The Directors are not aware of any other matter or circumstance that has occurred since the end of the half year that has significantly affected or may significantly affect the operations of the Group, the results of those operations, or the state of affairs of the Group in subsequent financial years.

Note 13 Contingent Liabilities

There have been no material changes in contingent liabilities since those disclosed in the Financial Statements for the year ended 30 June 2007. Refer to Note 42 in the 2007 Annual Report (US Version).

Note 14 Acquisitions of Business Interests

On 26 July 2007 the Group completed the acquisition of Arta Niaga Kencana (ANK) Bank in Indonesia. In December 2007 the legal merger of ANK Bank with PT Commonwealth Bank was completed.

On 27 November 2007 the Group completed the acquisition of IWL Limited, an online broking business, for total consideration of \$366 million. The completion of the valuation of the acquired assets and liabilities will take place during the second half of the current financial year.

Directors' Declaration

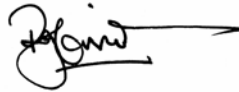

In accordance with a resolution of the Directors of the Commonwealth Bank of Australia we state that in the opinion of the Directors:

- (a) The half year consolidated financial statements and notes as set out on pages 34 to 52 are in accordance with the Corporations Act 2001 and:
- (i) give a true and fair view of the financial position of the consolidated entity as at 31 December 2007 and the performance for the half year ended on that date; and
 - (ii) comply with Accounting Standard AASB 134: Interim Financial Reporting; and
- (b) There are reasonable grounds to believe that the company will be able to pay its debts as and when they become due and payable.

Signed in accordance with a resolution of the Directors.

J M Schubert
Chairman

R J Norris
Managing Director and Chief Executive Officer

Dated: 13 February 2008

INDEPENDENT AUDITOR'S REVIEW REPORT to the members of Commonwealth Bank of Australia

Report on the Half-Year Financial Report

We have reviewed the accompanying half-year financial report of the Commonwealth Bank of Australia (the company), which comprises the balance sheet as at 31 December 2007, and the income statement, statement of recognised income and expense and cash flow statement for the half-year ended on that date, other selected explanatory notes and the directors' declaration for the Commonwealth Bank of Australia Group (the consolidated entity) included on pages 34 to 53. The consolidated entity comprises both the Commonwealth Bank of Australia (the company) and the entities it controlled during that half-year.

Directors' Responsibility for the Half-Year Financial Report

The directors of the company are responsible for the preparation and fair presentation of the half-year financial report in accordance with Australian Accounting Standards (including the Australian Accounting Interpretations) and the *Corporations Act 2001*. This responsibility includes establishing and maintaining internal control relevant to the preparation and fair presentation of the half-year financial report that is free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditor's Responsibility

Our responsibility is to express a conclusion on the half-year financial report based on our review. We conducted our review in accordance with Auditing Standard on Review Engagements ASRE 2410 *Review of an Interim Financial Report Performed by the Independent Auditor of the Entity*, in order to state whether, on the basis of the procedures described, we have become aware of any matter that makes us believe that the financial report is not in accordance with the *Corporations Act 2001* including: giving a true and fair view of the consolidated entity's financial position as at 31 December 2007 and its performance for the half-year ended on that date; and complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*. As the auditor of Commonwealth Bank of Australia, ASRE 2410 requires that we comply with the ethical requirements relevant to the audit of the annual financial report.

A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. It also includes reading the other information included with the financial report to determine whether it contains any material inconsistencies with the financial report. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

For further explanation of a review, visit our website <http://www.pwc.com/au/financialstatementaudit>.

While we considered the effectiveness of management's internal controls over financial reporting when determining the nature and extent of our procedures, our review was not designed to provide assurance on internal controls.

Our review did not involve an analysis of the prudence of business decisions made by directors or management.

Independence

In conducting our review, we have complied with the independence requirements of the *Corporations Act 2001*.

Conclusion

Based on our review, which is not an audit, we have not become aware of any matter that makes us believe that the half-year financial report of the Commonwealth Bank of Australia is not in accordance with the *Corporations Act 2001* including:

- (a) giving a true and fair view of the consolidated entity's financial position as at 31 December 2007 and of its performance for the half-year ended on that date; and
- (b) complying with Accounting Standard AASB 134 *Interim Financial Reporting* and *Corporations Regulations 2001*.

Benefit of interest-free liabilities, provisions and equity ⁽²⁾	0.36	0.37	0.36
Net interest margin ⁽³⁾	2.17	2.16	2.22

(1) Difference between the average interest rate earned and the average interest rate paid on funds.

(2) A portion of the Group's interest earning assets are funded by interest free liabilities and Shareholders' Equity. The benefit to the Group of these interest free funds is the amount it would cost to replace them at the average cost of funds.

(3) Net interest income divided by average interest earning assets for the half year, annualised.

3. Average Balances and Related Interest

The following table lists the major categories of interest earning assets and interest bearing liabilities of the Group together with the respective interest earned or paid and the average interest rate for each of the half years ending 31 December 2007, 30 June 2007 and 31 December 2006. Averages used were predominantly daily averages. Interest is accounted for based on product yield, while all trading gains and losses are disclosed as trading income within other banking income.

Where assets or liabilities are hedged, the interest amounts are shown net of the hedge.

The overseas component comprises overseas branches of the Bank and overseas domiciled controlled entities.

The official cash rate in Australia increased by 50 basis points during the half year while rates in New Zealand increased by 25 basis points.

(1) Personal includes personal loans, credit cards, and margin loans.

(2) During the current period, certain balances and associated interest amounts were re-classified to ensure consistent classification of amounts across all of the Group's businesses. Prior periods have been restated on a consistent basis.

(3) Comparisons between reporting periods are impacted by the re-classification of net swap interest from Net Interest income to Other banking income related to certain economic hedges which do not qualify for AIFRS hedge accounting.

(4) Used for calculating net interest margin.

(1) During the current period, certain balances and associated interest amounts were re-classified to ensure consistent classification of amounts across all of the Group's businesses. Prior periods have been restated on a consistent basis.

The overseas component comprises overseas branches of the Bank and overseas domiciled controlled entities. Overseas intragroup borrowings have been adjusted into the interest spread and margin calculations to more appropriately reflect the overseas cost of funds. Non-accrual loans were included in interest earning assets under Loans, advances and other receivables.

In calculating net interest margin, assets, liabilities, interest income and interest expense related to securitisation has been excluded, to more accurately reflect the Bank's underlying net margin.

Capitalisation of Computer Software Costs

Capitalised computer software costs (net of amortisation) totalled \$316 million as at 31 December 2007 (June 2007: \$297 million and December 2006: \$267 million). Expenditure in the half year principally comprised development of customer focussed systems.

7. Integrated Risk Management (Excludes Insurance and Funds Management)

The major categories of risk actively managed by the Group include credit risk, liquidity and funding risk, market risk and other operational and compliance risks. The 2007 Annual Report (US Version) "Integrated Risk Management" section on pages 40 to 42, details the major risks managed by a diversified financial institution.

Credit Risk

The Group uses a portfolio approach for the management of its credit risk. A key element is a well diversified portfolio. The Group uses various portfolio management tools to assist in diversifying the credit portfolio.

Below is a breakdown of the Group's committed exposure across industry, region and commercial credit quality.

By Industry	31/12/07 %	30/06/07 %	31/12/06 %
Agriculture, forestry and fishing	2.2	2.3	2.4
Business services	0.8	0.8	0.9
Construction	0.9	1.0	1.0
Culture and recreational services	1.0	1.1	1.0
Energy	1.8	1.4	1.6
Finance – Banks	11.5	13.8	12.5
Finance – Other	9.5	10.6	9.5
Government administration and defence	3.3	1.5	1.9
Health and community service	1.0	1.1	0.8
Manufacturing	2.9	3.1	3.1
Mining	1.4	1.2	1.4
Property	6.9	6.0	6.2
Retail trade and wholesale trade	2.8	2.6	2.5
Transport and storage	1.7	1.7	1.6
Other	5.4	5.9	6.2
Consumer	46.9	45.9	47.4
	100.0	100.0	100.0

The bulk of the Group's committed exposures are concentrated in Australia and New Zealand.

By Region	31/12/07 %	30/06/07 %	31/12/06 %
Australia	74.3	73.2	73.2
New Zealand	12.4	14.0	13.3
Europe	8.4	7.5	7.8
Americas	2.8	3.6	4.1
Asia	1.8	1.5	1.3
Other	0.3	0.2	0.3
	100.0	100.0	100.0

Commercial Portfolio Quality	31/12/07 %	30/06/07 %	31/12/06 %
AAA/AA	30	30	30
A	18	17	17
BBB	19	20	20
Other	33	33	33
	100	100	100

As a measure of individually risk rated commercial portfolio exposure (including finance and insurance), the Group has 67% of commercial exposures at investment grade quality.

Appendices

7. Integrated Risk Management (continued)

Interest Rate Risk

Interest rate risk in the balance sheet is discussed within Note 43 of the 2007 Annual Report (US Version).

Next 12 months' Earnings

The potential impact on net interest earnings of a 1% parallel rate shock and the expected change in price of assets and liabilities held for purposes other than trading is as follows:

Interest Rate Risk	31/12/07 %	30/06/07 %	31/12/06 %
(expressed as a % of expected next 12 months' earnings)			
Average monthly exposure	0.9	1.3	1.2
High month exposure	1.8	2.2	2.2
Low month exposure	0.4	0.4	0.3

Value at Risk (VaR)

VaR within Financial Markets Trading is discussed in the 2007 Annual Report (US Version) "Integrated Risk Management" section on page 40. The following table provides a summary of VaR by type.

In the June 2007 half year, the Group implemented a new methodology for the measurement of credit spread VaR. The new methodology now captures the diversification benefit between credit spread risk and other risk types. Credit spread risk prior to 30 June 2007 is reported within undiversified risk.

Average VaR expressed based on 97.5% confidence	December 2007 Half Year \$M	June 2007 Half Year \$M	December 2006 Half Year \$M
Group			
Interest rate risk	3.92	3.61	3.08
Exchange rate risk	0.99	0.78	0.54
Implied volatility risk	0.86	0.69	0.57
Equities risk	0.35	0.15	0.14
Commodities risk	0.74	0.65	0.71
Credit spread risk	4.00	4.22	-
Diversification benefit	(4.80)	(4.17)	(1.73)
Total general market risk	6.06	5.93	3.31
Undiversified risk	2.33	1.60	6.75
ASB Bank	0.73	0.45	0.27
Total	9.12	7.98	10.33

The 97.5% confidence interval is used internally by management for operational monitoring of traded market risk. The 99.0% confidence interval is shown to enable external comparison.

Average VaR expressed based on 99.0% confidence	December 2007 Half Year \$M	June 2007 Half Year \$M	December 2006 Half Year \$M
Group			
Interest rate risk	4.94	4.60	4.07

Total Tier One Deductions	(9,016)	(8,431)	(8,182)
Total Tier One Capital	19,810	17,512	16,553

(1) Adjusted Common Equity ("ACE") is one measure considered by Standard & Poor's in evaluating the Group's credit rating. The ACE ratio has been calculated on a consistent basis with Standard & Poor's methodology at 31 December 2007.

(2) Represents Total Shareholders' Equity as disclosed in the Group's Consolidated Balance Sheet.

(3) Represents expected dividends required to be deducted from current period earnings.

(4) Based on reinvestment experience related to the Bank's Dividend Reinvestment Plan and approved by APRA. In respect of the current interim dividend, shares to be allocated to participants under the DRP will be provided by an on-market purchase, to a maximum value of \$550 million. Any DRP allocation in excess of this limit will be satisfied by the issuance of new shares.

(5) General reserve for credit losses of \$350 million (after tax) was transferred to retained earnings during the half year to 31 December 2007.

(6) Represents the write-down in retained earnings upon adoption of AIFRS within the non-consolidated subsidiaries.

(7) Trust Preferred Securities 2006 issued March 2006 USD\$700 million. These instruments qualify as Tier One Innovative Capital of the Bank.

(8) APRA approved Innovative Tier One capital instruments (Perfs II and III and Trust Preferred Securities 2003 and 2006).

(9) Perpetual Exchangeable Resaleable Listed Securities (Perfs IV) of \$1,465 million (less costs) issued by the Group in July 2007 and approved by APRA as Tier One Non-Innovative Capital instruments.

(10) Represents total Goodwill and other intangibles (excluding capitalised computer software costs) which is required to be deducted from Tier One Capital.

(11) Represents the Group's non-controlling interest in major infrastructure assets.

(12) In accordance with APRA regulations, the surplus (net of tax) in the Bank's defined benefit superannuation fund which is included in shareholders' equity, must be deducted from Tier One capital.

(13) APRA granted transitional relief for Tier One and Two capital on adoption of AIFRS, which expired 1 January 2008.

Total Capital	26,374	23,951	22,941

(1) Prior to 1 July 2006 APRA required a minimum ratio of 0.5% (after tax) of risk weighted assets which comprised the collective provision for impairment losses and the General Reserve for Credit Losses. From 1 July 2006 there is no longer a minimum regulatory requirement. The Prudential General Reserve for Credit Losses is comprised of the collective provision for loan impairment, other credit provisions and fair value credit adjustments. The general reserve for credit losses within shareholders' equity has been transferred back to Retained Earnings during the December 2007 half year period.

(2) From 1 July 2006 APRA allows only 45% of the asset revaluation reserve to be included in Tier Two capital.

(3) APRA requires these Lower Tier Two note and bond issues to be included as if they were unhedged.

(4) For regulatory capital purposes, Lower Tier Two note and bond issues are amortised by 20% of the original amount during each of the last five years to maturity.

(5) APRA granted transitional relief for Tier One and Two capital on adoption of AIFRS, which expired 1 January 2008.

(6) Funds Management Securities issued September 2006.

(7) Value of acquired inforce business (excess of market value over net assets), which was transferred to Goodwill upon adoption of AIFRS.

Total off balance sheet exposures – credit risk					24,883	21,579	20,032
Risk weighted assets – market risk					4,374	4,123	3,645
Total risk weighted assets ⁽¹⁾					272,609	245,347	234,569

(1) In calculating risk weighted assets in accordance with Standard and Poor's agreed methodology, the equity investment in other companies (December 2007: \$0.9 billion, June 2007: \$0.7 billion, December 2006: \$0.8 billion) is required to be added to regulatory risk weighted assets as this amount is not deducted from ACE Capital. On an unrelated transaction, in December 2006 an amount of \$0.8 billion was required to be deducted from risk weighted assets in calculation of the ACE Capital ratio due to a difference in treatment between Standard and Poor's and APRA on the treatment of set-off arrangements where they are recognised from a legal and accounting perspective. The risk weighted asset balance as used for the purposes of the ACE Capital ratio for December 2007 is \$273,478 million (June 2007: \$246,047 million, December 2006: \$234,569 million).

Active Capital Management

The Group maintains a strong capital position and actively manages its capital to balance the requirements of various stakeholders (regulators, rating agencies and Shareholders). This is achieved by optimising the mix of capital while maintaining adequate capital ratios.

The Tier One Capital ratio increased from 7.14% to 7.27% during the half year to 31 December 2007 reflecting the issue of non-innovative Tier One Capital instruments and continued profit growth (net of dividend) partially offset by the strong growth in Risk Weighted Assets. Total Capital Ratio decreased from 9.76% at 30 June 2007 to 9.67% at 31 December 2007.

Risk Weighted Assets increased to \$273 billion at 31 December 2007 due to strong growth in lending assets particularly in the business/corporate sector. The Group's credit rating remained unchanged during the half year.

Adjusted Common Equity

The Adjusted Common Equity ("ACE") ratio at 31 December 2007 is 4.62%, within the approved target range of 4% to 4.75%.

Significant Capital Transactions

The following significant initiatives were undertaken to actively manage the Group's capital:

Tier One Capital

- Issue of \$1,465 million (\$1,443 million net of issue costs) Perpetual Exchangeable Resaleable Listed Securities (PERLS IV) in July 2007 which qualify as Non-Innovative Residual Tier One Capital;
- Issue of \$709 million shares in October 2007 to satisfy the Dividend Reinvestment Plan ("DRP") in respect of the final dividend for 2006/07; and
- In respect of the current interim dividend, shares to be allocated to participants under the DRP will be provided by an on-market purchase, to a maximum value of \$550 million. Any DRP allocation in excess of this limit will be satisfied by the issuance of new shares.

Tier Two Capital

- Issue of the equivalent of \$664 million of Lower Tier Two Capital.

Deductions from Total Capital

During the half year an increase in deductions for investment in non-consolidated subsidiaries primarily reflects the higher level of net tangible assets within the Colonial Group of companies, which incorporates the life insurance and funds management businesses.

Life & Funds Management Activities

The Group's insurance and funds management companies held an aggregate estimated \$625 million excess over regulatory capital requirements at 31 December 2007 (30 June 2007: \$738 million, 31 December 2006: \$911 million).

Regulatory Changes

Basel II

In December 2007 APRA granted advanced Basel II accreditation to the Group. The accreditation also included the fully owned New Zealand subsidiary, ASB Bank Limited which was separately accredited by the Reserve Bank of New Zealand.

The work undertaken to achieve the advanced accreditation provides the Group with increased sophistication in risk measurement and management thereby significantly increasing flexibility in decision making and capital management. The Group is continuing to work with APRA to finalise this approach.

From a capital management perspective, advanced accreditation resulted in an increase in the Group's Tier One and Total Capital ratios on 1 January 2008. Tier One increased to 7.35% and Total Capital to 11.06%, primarily driven by the reduction in risk weighted assets.

The Group does not anticipate any material change in its capital management approach until such time as the full implications of the new arrangements are finalised with APRA and other regulatory authorities.

Terms and Conditions of Ordinary Share Capital

Ordinary shares have the right to receive dividends as declared and in the event of winding up the Bank, to participating in the proceeds from sale of surplus assets in proportion to the number of and amounts paid up on shares held.

A shareholder has one vote on a show of hands and one vote for each fully paid share on a poll. A shareholder may be present at a general meeting in person or by proxy or attorney, and if a body corporate, it may also authorise a representative.

Dividend Franking Account

After fully franking the interim dividend to be paid for the half year ended 31 December 2007, the amount of credits available as at 31 December 2007 to frank dividends for subsequent financial years is \$781 million (June 2007: \$559 million). This figure is based on the combined franking accounts of the Bank at 31 December 2007, which have been adjusted for franking credits that will arise from the payment of income tax payable on profits for the half year ended 31 December 2007, franking debits that will arise from the payment of dividends proposed for the year and franking credits that the Bank may be prevented from distributing in subsequent financial periods. The Bank expects that future tax payments will generate sufficient franking credits for it to be able to fully frank future dividend payments. These calculations have been based on the taxation law as at 31 December 2007.

Dividends

The Directors have declared a fully franked interim dividend of 113 cents per share amounting to \$1,487 million. The dividend will be payable on 2 April 2008 to shareholders on the register at 5pm on 22 February 2008. Dividends per share are based on net profit after tax ("cash basis") per share, having regard to a range of factors including:

- Current and expected rates of business growth and the mix of business;
- Capital needs to support economic, regulatory and credit ratings requirements;
- The rate of return on assets; and

- Investments and/or divestments to support business development.

Dividend Reinvestment Plan

In respect of the current interim dividend, shares to be allocated to participants under the DRP will be provided by an on-market purchase, to a maximum value of \$550 million. Any DRP allocation in excess of this limit will be satisfied by the issuance of new shares.

Record Date

The register closed for determination of dividend entitlement and for participation in the DRP at 5:00pm on 22 February 2008 at Link Market Services Limited, Locked Bag A14, Sydney South, NSW 1235.

Ex-Dividend Date

The ex-dividend date was 18 February 2008.

10. Life Insurance Business

Life Insurance contract liabilities

Appropriately qualified actuaries have been appointed in respect of each life insurance business and they have reviewed and satisfied themselves as to the accuracy of the policy liabilities included in the Financial Report, including compliance with the regulations of the Life Insurance Act ("Life Act") 1995 where appropriate. Details are set out in the various statutory returns of these life insurance entities.

Life Investment contract liabilities

Investment contracts include both unit linked contracts and term certain annuities. They consist of a financial instrument and an investment management services element, both of which are measured at fair value. For unit linked contracts, the resulting liability to policyholders is closely linked to the performance and value of the assets (after tax) that support those liabilities. The fair value of such liabilities is the same as the fair value of those assets, after allowing for tax.

Components of Policy Liabilities	As at		
	31/12/07 \$M	30/06/07 \$M	31/12/06 \$M
Future policy benefits ⁽¹⁾	22,817	23,569	24,666
Future bonuses	1,327	1,304	1,197
Future expenses	2,316	2,120	1,997
Future profit margins	1,590	1,490	1,517
Future charges for acquisition expenses	(576)	(438)	(442)
Balance of future premiums	(6,913)	(6,544)	(6,290)
Provisions for bonuses not allocated to participating policyholders	110	112	84
Total policy liabilities	20,671	21,613	22,729

(1) Including bonuses credited to policyholders in prior years.

Taxation

Taxation has been allowed for in the determination of policy liabilities in accordance with the relevant legislation applicable in each market.

Actuarial Methods and Assumptions

Insurance contract policy liabilities have been calculated in accordance with AASB 1038 "Life Insurance Contracts" and the Margin on Services ("MoS") methodology as set out in Prudential Standard LPS 1.04 – Valuation of Policy Liabilities issued by Australian Prudential Regulation Authority. The principal methods and profit carriers used for particular product groups were as follows:

Product Type	Method	Profit Carrier
Individual		
Conventional	Projection	Bonuses or expected claim payments
Investment account	Projection	Bonuses or funds under management
Lump sum risk	Projection	Premiums/Expected claim payment
Income stream risk	Projection	Expected claim payments
Lifetime annuities	Projection	Annuity payments
Group		
Investment account	Projection	Bonuses or funds under management
Lump sum risk	Accumulation/Projection	Expected claim payments
Income stream risk	Accumulation/Projection	Expected claim payments

The "Projection Method" measures the present values of estimated future policy cash flows to calculate policy liabilities. The policy cash flows incorporate investment income, premiums, expenses, redemptions and benefit payments.

Bonuses are amounts added, at the discretion of the life insurer, to the benefits currently payable under Participating Business. Bonuses may take a number of forms including reversionary bonuses, interest credits and terminal bonuses (payable on the termination of the policy).

Actuarial assumptions

Set out on page 67 is a summary of the material assumptions used in the calculation of policy liabilities.

Discount rates

Discount rates are used to discount future cash flows in the determination of policy liabilities. Where insurance contract benefits are linked to the performance of the underlying assets, the discount rates are based on the expected earnings rate on the assets held (Traditional and Investment Account contracts). For all other insurance contracts, the discount rates are based on risk free rates of return. Allowance is made for taxation where relevant and for the nature and term of the liabilities. The following table shows the applicable rates for the major classes of business in Australia and New Zealand. The changes relate to changes in long term earnings rates and asset mix.

Appendices

10. Life Insurance Business (continued)

Class of Business – Australia ⁽¹⁾	December 2007	June 2007
	Rate Range %	Rate Range %
Traditional – ordinary business (after tax)	4.43 – 6.64	4.38 – 6.34
Traditional – superannuation business (after tax)	5.38 – 8.12	5.32 – 7.75
Annuity – term and lifetime (exempt from tax)	6.49 – 7.73	6.52 – 7.09
Term insurance – (before tax)	6.24 – 6.88	6.25 – 6.46
Income protection – (before tax)	6.24 – 6.88	6.25 – 6.46
Investment account – ordinary (after tax)	4.70 – 5.26	4.55
Investment account – superannuation (after tax)	5.72 – 6.41	5.53
Investment account – annuities (exempt from tax)	6.66 – 7.40	6.46

(1) For New Zealand, investment earning rates assumed were 4.3% to 6.6% net of tax.

Bonuses

The valuation assumes that the long-term supportable bonuses will be paid, which is in line with company bonus philosophy. There have been no significant changes to these assumptions.

Maintenance expenses

The maintenance expenses are based on an internal analysis of experience and are assumed to increase in line with inflation each year. The expenses are expected to be sufficient to cover the cost of servicing the business in the coming year, after adjusting for one-off expenses. For Australian Participating Business, expenses continue on the previous charging basis with adjustments for actual experience and are assumed to increase in line with inflation each year.

Investment management expenses

Investment management expense assumptions vary by asset classes and are based on the recently negotiated investment fees as set out in Fund Management Arrangements. There has been no significant change to overall investment fees.

Inflation

The inflation assumption is consistent with the investment earning assumptions. The inflation assumption was increased from 2.75% to 3% at 31 December 2007.

Benefit indexation

The indexation rates are based on an analysis of past experience and estimated long term inflation and vary by business and product type. There have been no significant changes to these assumptions.

Taxation

The taxation basis and rates assumed vary by market and product type. There has been no significant change to the taxation basis.

Voluntary discontinuance

Discontinuance rates are based on recent company experience and vary by market, product, age and duration inforce. There have been no significant changes to these assumptions.

Surrender values

Current surrender value bases are assumed to apply in the future. There have been no significant changes to these assumptions.

Mortality and morbidity

Rates vary by sex, age, product type and smoker status. Rates are based on standard mortality tables applicable to each market (e.g. IA95-97 in Australia for retail risk, IM/IF80 for annuities), adjusted for recent company experience where appropriate. There have been no significant changes to these assumptions.

Solvency

Australian life insurers:

Australian life insurers are required to hold prudential reserves in excess of policy liabilities. These reserves are required to support solvency requirements and provide protection against adverse experience. Prudential Standard LPS 2.04 Solvency Standard ("LPS 2.04") prescribes a minimum solvency requirement and the minimum level of assets required to be held in each insurance fund. All controlled Australian insurance entities complied with the solvency requirements of LPS 2.04.

Overseas life insurers:

Overseas insurance subsidiaries are required to hold reserves in excess of policy liabilities in accordance with local Acts and prudential rules. Each of the overseas subsidiaries complied with local requirements.

Managed assets & fiduciary activities

Arrangements are in place to ensure that asset management and other fiduciary activities of controlled entities are independent of the insurance funds and other activities of the Group.

Disaggregated information

Life Insurance business is conducted through a number of life insurance entities in Australia and overseas. Under the Australian Life Insurance Act 1995, life insurance business is conducted within one or more separate statutory funds, which are separated from the shareholders' funds. The financial statements of Australian life insurers, which are lodged annually with the relevant Australian regulators, show all major components of the financial statements disaggregated between the various life insurance statutory funds and their shareholders' funds, as well as between investment linked business and non-investment linked business.

17. Definitions

Term	Description
Customer satisfaction – external survey	This represents the Roy Morgan Research six monthly Main Financial Institutions (MFI) survey (targeting customers aged 14+). The measure is the percentage of customers who respond as either very or fairly satisfied (70.5%). The result from July to December 2007 of 70.5% represents the highest rate in ten years.
Customer satisfaction – internal survey	Internal customer satisfaction surveys are conducted by Roy Morgan Research on behalf of Commonwealth Bank of Australia
Dividend payout ratio	Dividends paid on ordinary shares divided by earnings (earnings are net of dividends on other equity instruments).
DRP	Dividend reinvestment plan.
DRP participation	The percentage of total issued capital participating in the dividend reinvestment plan.
Earnings per share	Calculated in accordance with AASB 133: Earnings per Share.
Expense to income ratio	Represents operating expenses as a percentage of total operating revenue.
International Financial Services	International Financial Services includes the Banking, Funds Management and Insurance businesses operating in New Zealand, Fiji, Indonesia, China, India and Vietnam excluding the international business of Premium Business Services in New Zealand.
Net profit after tax (“Cash basis”)	Represents profit after tax and minority interests, before defined benefit superannuation plan income/expense, treasury shares valuation adjustment and unrealised gains and losses related to hedging and AIFRS volatility.
Net profit after tax (“Statutory Basis”)	Represents profit after tax, minority interests, defined benefit superannuation plan income/expense, treasury shares valuation adjustment and unrealised gains and losses related to hedging and AIFRS volatility. This is equivalent to the statutory item “Net profit attributable to Equity holders of the Bank”.
Net tangible assets per share	Net assets excluding intangible assets, minority interests, preference shares and other equity instruments divided by ordinary shares on issue at the end of the period.
Operating expense to net operating income ratio	Represents operating expenses (excluding volume expenses) as a percentage of total operating income less volume expenses
Overseas	Represents amounts booked in branches and controlled entities outside Australia.
Premium Business Services	Premium Business Services provides specialised banking services to relationship managed business and Agribusiness customers, private banking to high net worth individuals and margin lending and trading through CommSec. In addition commission is received for the distribution of retail banking products through the Premium Business network.
Retail Banking Services	Retail Banking Services includes both the manufacturing of home loan, consumer finance and retail deposit products and the sales and servicing of all Retail bank customers. In addition commission is received for the distribution of business and wealth management products through the retail distribution network.
Return on average shareholders’ equity – Cash basis	Based on cash net profit after tax and minority interests applied to average shareholders equity, excluding minority interests.
Return on average shareholders’ equity – Statutory basis	Based on net profit after tax (“statutory basis”) applied to average shareholders’ equity, excluding minority interests and other equity instruments.
Staff numbers	Staff numbers include all permanent full time staff, part time staff equivalents and external contractors employed by 3rd party agencies.
Wealth Management	Wealth Management includes the Global Asset Management, Platform Administration and Life and General Insurance businesses of the Australian operations including an allocation of Group support costs.
Weighted average number of shares (“Cash basic”)	Includes an adjustment to deduct from ordinary shares only those “Treasury Shares” related to the investment in the Bank’s shares held by the employee share scheme trust.
Weighted average number of shares (“Statutory basic”)	Includes an adjustment to exclude “Treasury Shares” related to investments in the Bank’s shares held by both the life insurance statutory funds and by the employee share scheme trust.

Premium Business Services

Business Lending (APRA)	Loans and advances to residents that are recorded on the domestic books of CBA within the non-financial corporations sector, where this sector comprises private trading corporations, private unincorporated businesses and commonwealth, state, territory and local government non-financial corporations (as per lending balances submitted to APRA in ARF 320.0) <u>Total loans and advances to the non-financial corporations sector for all licensed banks that submit to APRA</u>
Business Lending (RBA)	$\frac{\text{CBA business lending and credit (specific 'business lending' categories in lodged APRA returns - 320.0, 320.1 and 320.4)}}{\text{Total of business lending and credit to the private non-financial sector by all financial intermediaries (sourced from RBA table Lending & Credit Aggregates which is in turn sourced from specific 'business lending' categories in lodged APRA returns - 320.0, 320.1 and 320.4) (includes bills on issue and securitised business loans).}^{(1)}}$
Business Deposits (APRA)	Total transaction and non-transaction account deposit balances recorded on the domestic books of CBA from residents within the non-financial corporations sector, where this sector comprises private trading corporations, private unincorporated businesses and commonwealth, state, territory and local government non-financial corporations (as per deposit balances submitted to APRA in ARF 320.0) <u>Total transaction and non-transaction deposit balances from the non-financial corporations sector for all licensed banks that submit to APRA</u>
Equities Trading (CommSec)	$\frac{\text{12 months rolling average of total value of CommSec equities trades}}{\text{12 months rolling average of total value of equities market trades as measured by ASX SEATS}}$

(1) The RBA restates the total of all financial intermediaries retrospectively when required. This may be due to a change in definition, the inclusion of a new participant or correction of errors in prior returns. CBA restates its market share where the RBA total has changed based on current balances less implied percentage growth rates now reported by the RBA for previous months.
