# General Information

## Features at a glance

<b>Significant benefits</b>	Provides protection against adverse <i>exchange rate</i> movements whilst also providing the potential to benefit from favourable <i>exchange rate</i> movements. Additional benefits are outlined on page 7.
<b>Significant risk</b>	You may not receive the full benefit of favourable <i>exchange rate</i> movements. Additional risks are outlined on page 8.
<b>Minimum transaction amount</b>	Australian dollars (AUD) 50,000.00 or equivalent foreign currency.
<b>Terms</b>	3 <i>business days</i> to 2 years. (Longer terms may be available on request.)
<b>Costs</b>	See “What are the costs involved in FFP transactions?” on page 9.
<b>Settlement</b>	<i>Settlement date</i> , once agreed, cannot be varied.
<b>Early termination</b>	An amount may be payable by or to you depending on the <i>mark-to-market</i> value of the transaction upon termination.

This is a sophisticated financial product which involves dealing in foreign exchange. The information in this Product Disclosure Statement (PDS) does not take into account your personal objectives, financial situation and needs. Before transacting in this product you should be satisfied that this product is suitable for you in view of those objectives, and your financial situation and needs, and we recommend that you consult your investment adviser or obtain other independent advice. Unless you are familiar with foreign exchange dealings and products of this type, the product may not be suitable for you.

The information in this PDS is subject to change from time to time and is up to date as at the date stated on the cover. Where the new information is materially adverse information the Bank will either issue a new PDS or a supplementary PDS setting out the updated information. Where the new information is not materially adverse information we will not issue a new PDS or supplementary PDS to you, but you will be able to find the updated information on our web site [commbank.com.au](http://commbank.com.au) or you can call **13 2221**. If you ask us to, we will send you a paper copy of the information.

## Purpose of a Product Disclosure Statement (PDS)

A PDS aims to provide you with enough information to help you decide whether the product will meet your needs. It also helps you to compare the product with others you may be considering.

This PDS provides information about a **Flexible Forward Participating** (FFP). If you decide to enter into a FFP transaction, you should keep this PDS and all other documentation relating to your FFP transaction for future reference.

If you have any questions or wish to contact us call **13 2221** between 8am and 8pm, Monday to Friday, visit our web site at **commbank.com.au**, call into any branch of Commonwealth Bank of Australia (the Bank) or contact your relationship manager.

To assist you in understanding this PDS, the definitions of some words are provided in the “Definitions” section on page 11 at the end of this PDS. When used in this PDS, these words usually appear in italics.

## What is a Flexible Forward Participating (FFP) transaction?

A FFP transaction is an agreement between you and the Bank to exchange one currency for another at an agreed *contract rate* on an agreed future date that is more than *2 business days* (but not more than 2 years) after the *trade date*.

The FFP transaction has two contract amounts: the *ceiling amount* and the *floor amount*. The ceiling amount is the same as your total transaction amount. The *floor amount* will determine your potential to benefit from *exchange rate* movements that are favourable to you.

At the *settlement date* of a FFP transaction:

- If, at the *expiration time*, the *market spot exchange rate* is equal to or less favourable for you than the *contract rate*, the *currency pair* must be exchanged between you and the Bank at the *contract rate* and for the *ceiling amount*
- If, at the *expiration time*, the *market spot exchange rate* is more favourable for you than the *contract rate*, the *currency pair* must be exchanged between you and the Bank at the *contract rate* and for the

*floor amount*. You may exchange the difference between the *ceiling amount* and the *floor amount* at the *spot exchange rate* and benefit from the favourable exchange rate movement

FFP transactions are available only in some currencies (see Appendix A).

Details of current *exchange rates*, including the currencies in which the Bank offers FFP transactions, are available on request through your relationship manager or from any branch of the Bank.

FFP transactions are subject to the standard credit approval process employed by the Bank.

## Uses of FFP transactions

Commercial activities for which FFP transactions may be useful include:

- importing where the invoice is quoted in foreign currency
- exporting where the invoice is quoted in foreign currency
- foreign currency borrowing
- foreign currency investing
- repatriation of overseas profit or interest in foreign currencies back to Australia
- other foreign currency payments and receipts

## Determining FFP exchange rates

You will specify to the Bank the transaction amount (which is equal to the *ceiling amount*), the *floor amount* and the *settlement date* (see “Entering and settling FFP transactions” on page 8 of this PDS).

The Bank will determine the *contract rate*, taking the following factors into account:

- the *market spot exchange rate*
- the *forward points*
- the *floor amount* (in the case of determining the *contract rate*)
- a *volatility factor*
- the *transaction period*
- an allowance for the Bank’s costs, both fixed and variable
- the Bank’s profit margin

## Examples of how a FFP transaction works

### Example 1: You are making a payment in a foreign currency\*

You will be making a payment of USD100,000.00 to an offshore party in 93 days. You will need to sell AUD and buy USD to make this payment.

The *spot exchange rate* is AUD/USD0.6500.

A fall in the AUD/USD *market spot exchange rate* means you would have to pay more AUD for your USD, so you are seeking protection against a fall in the AUD/USD *market spot exchange rate*. You would also like the potential to benefit if the AUD/USD *market spot exchange rate* rises.

The 93 day *forward exchange rate* is AUD/USD0.6440 after allowing for a *forward points* adjustment of 0.0060 to the *spot exchange rate*. To enter into a FFP transaction your *contract rate* will have to be below the 93 day *forward exchange rate*. This is so you can receive *exchange rate* protection and potentially benefit if the AUD/USD *spot exchange rate* rises above the *contract rate*.

You would like to protect the full payment of USD 100,000.00 but also have the potential to benefit from favourable exchange rate movements on USD 40,000.00

### Assume the following for Example 1

USD amount ( <i>ceiling amount</i> )	100,000.00
<i>floor amount</i> (always below the <i>ceiling amount</i> )	60,000.00
AUD/USD <i>spot exchange rate</i>	0.6500
AUD/USD <i>forward points</i>	0.0060
AUD/USD 93 day <i>forward exchange rate</i>	0.6440
AUD/USD <i>contract rate</i> (calculated by the Bank and always below the 93 day <i>forward exchange rate</i> if you are making a payment in a foreign currency)	0.6250
<i>transaction period</i>	93 days

### Possible outcomes at the expiration time

### Possible effective exchange rate achieved\*

a. If the *market spot exchange rate* is equal to or lower than the *contract rate*, on the *settlement date* you must buy USD100,000.00 from the Bank in exchange for AUD at the *contract rate*. You will pay:

$$\text{USD}100,000.00 \div 0.6250 = \text{AUD}160,000.00$$

0.6250

b1. If the *market spot exchange rate* is higher than the *contract rate*, on the *settlement date* you must buy USD 60,000.00 from the Bank in exchange for AUD at the *contract rate*. You will pay:

$$\text{USD}60,000.00 \div 0.6250 = \text{AUD}96,000.00$$

Higher than 0.6250, but lower than *spot exchange rate*

b2. You can instruct the Bank to exchange the difference between the *ceiling amount* and the *floor amount*, ie USD 40,000.00 at the *spot exchange rate*. For example, if the *spot exchange rate* is 0.6900 you will pay:

$$\text{USD}40,000.00 \div 0.6900 = \text{AUD}57,971.01$$

In total, you will pay AUD 153,971.01 for USD 100,000.00, which equates to an exchange rate of 0.6495.

With this FFP transaction, the maximum amount of AUD you will pay is \$160,000.00. At the same time you will be able to reduce the amount of AUD you will pay if the AUD/USD exchange rate is trading above 0.6250 at the expiration time.

\* Examples are for illustrative purposes only and do not reflect current market prices or outcomes or the Bank's (and its associates) view on future matters.

### Issues to consider

When you set your *floor amount* there are various issues you need to consider. Using Example 1, these can be summarised as follows:

1. A lower *floor amount* will increase your potential to benefit from a rise in the *spot exchange rate*, however, it also decreases your *contract rate* and therefore increases your exposure to a falling AUD
2. A higher *floor amount* will reduce your potential to benefit from a rise in the *spot exchange rate*, however, it also increases your *contract rate* and therefore decreases your exposure to a falling AUD

## Example 2: You are receiving a payment in a foreign currency\*

You will be receiving a payment of USD100,000.00 from an offshore party in 93 days. When the USD is received you would like to sell it and buy AUD.

The *spot exchange rate* is AUD/USD0.6500. A rise in the AUD/USD *market spot exchange rate* would mean you get fewer AUD for your USD, so you are seeking protection against a rise in the AUD/USD *market spot exchange rate*. You would also like the potential to benefit if the AUD/USD *market spot exchange rate* falls.

The 93 day *forward exchange rate* is AUD/USD0.6445 after allowing for a *forward points* adjustment of 0.0055 to the *spot exchange rate*. To enter into a FFP transaction your *contract rate* will have to be above the 93 day *forward exchange rate*. This is so you can receive *exchange rate* protection and potentially benefit if the AUD/USD *spot exchange rate* falls below the *contract rate*.

You would like to protect the full payment of USD 100,000.00 but also get the potential to benefit from favourable exchange rate movements on USD 40,000.00

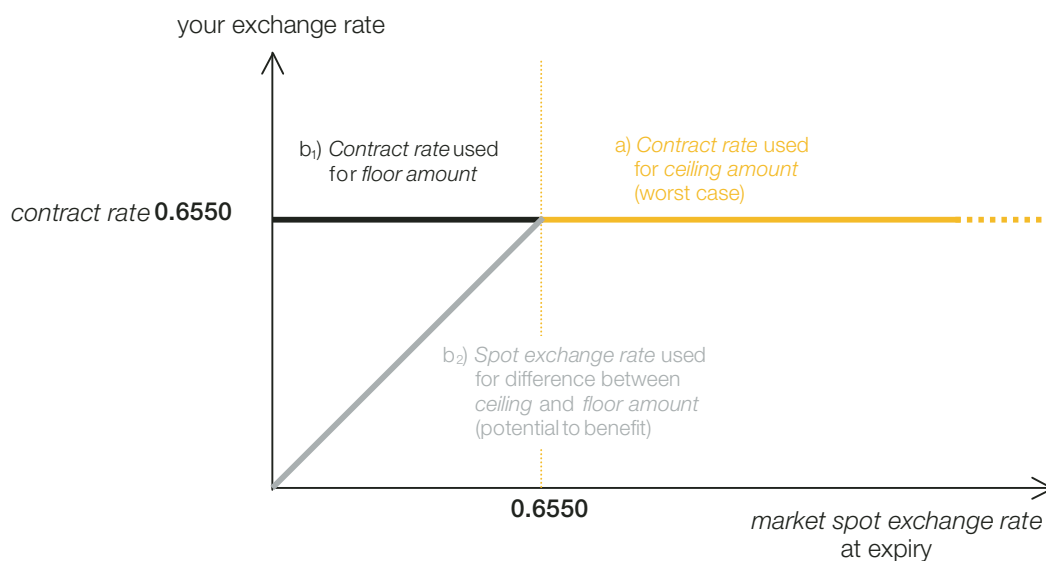

## Assume the following for Example 2

USD amount ( <i>ceiling amount</i> )	100,000.00
<i>floor amount</i> (always below the <i>ceiling amount</i> )	60,000.00
AUD/USD <i>market spot exchange rate</i>	0.6500
AUD/USD <i>forward points</i>	0.0055
AUD/USD 93 day <i>forward exchange rate</i>	0.6445
AUD/USD <i>contract rate</i> (calculated by the Bank and always above the 93 day <i>forward exchange rate</i> if you are receiving a payment in a foreign currency)	0.6550
<i>transaction period</i>	93 days

### Possible outcomes at the *expiration time*

### Possible effective *exchange rate* achieved\*

- a. If the *market spot exchange rate* is equal to or higher than the *contract rate*, on the *settlement date* you must sell USD100,000.00 to the Bank in exchange for AUD at the *contract rate*. You will receive:
- $$\text{USD}100,000.00 \div 0.6550 = \text{AUD}152,671.76$$
- b1. If the *market spot exchange rate* is lower than the *contract rate*, on the *settlement date* you must sell USD 60,000.00 to the Bank in exchange for AUD at the *contract rate*. You will receive:
- $$\text{USD}60,000.00 \div 0.6550 = \text{AUD}90,255.56$$
- b2. You can instruct the bank to exchange the difference between the *ceiling amount* and the *floor amount*, ie USD 40,000.00 at the *spot exchange rate*. For example, if the *spot exchange rate* is 0.6000 you will receive:
- $$\text{USD}40,000.00 \div 0.6000 = \text{AUD}66,666.67$$
- In total, you will receive AUD 156,922.23 for USD 100,000.00, which equates to an exchange rate of 0.6373

With this FFP transaction, the minimum amount of AUD you will receive is \$152,671.76. At the same time you will be able to increase the amount of AUD you will receive if the AUD/USD *exchange rate* is trading below 0.6550 at the *expiry time*.

\* Examples are for illustrative purposes only and do not reflect current market prices or outcomes or the Bank's (and its associates) view on future matters.

#### Issues to consider

When you set your *floor amount* there are various issues you need to consider. Using Example 2, these can be summarised as follows:

1. A lower *floor amount* will increase your potential to benefit from a fall in the *spot exchange rate*, however, it also increases your *contract rate* and therefore increases your exposure to a rising AUD
2. A higher *floor amount* will reduce your potential to benefit from a fall in the *spot exchange rate*, however, it also decreases your *contract rate* and therefore decreases your exposure to a rising AUD

#### What are the significant benefits of a FFP transaction?

Benefits include:

- the provision of *exchange rate* protection via a *contract rate*
- the potential to benefit from favourable *exchange rate* movements below the *contract rate* (if you are receiving a payment in a foreign currency) or over the *contract rate* (if you are making a payment in a foreign currency).

#### What are the significant disadvantages of a FFP transaction?

Disadvantages include:

- the *contract rate* will be less favourable to you than the *forward exchange rate* applicable at the time you enter into the transaction
- the potential to benefit from favourable *exchange rate* movements is limited to the difference between the *ceiling amount* and the *floor amount*
- the fact that there may be a cost if the FFP transaction is terminated before the *settlement date* (see "Terminating a FFP transaction" and "What are the costs involved in FFP transactions?" in this PDS).

## What are the significant risks of a FFP transaction?

Risks derive from factors that are beyond your control. Starting from the time at which you enter a FFP transaction with the Bank, risk factors may lead to changes in the financial outcomes that are unfavourable to you. Monitoring of any risks associated with this product is your responsibility (subject to the responsibility of the Bank for its own operational processes, see "Operational risk").

### Market risk

The FFP guarantees that your least favourable outcome will be to transact at the *contract rate*.

In FFP transactions, there is an opportunity risk that the benefits received under the FFP may not be as great as if you had entered into a forward foreign exchange contract or if no transaction had been entered into at all.

This will occur if the *spot exchange rate* moves favourably at the expiration date, but you must exchange the *floor amount* at the *contract rate*, rather than exchanging the total amount at the *spot exchange rate*.

### Credit risk

Credit risk is common to all financial markets products that you may hold with the Bank. In all cases, you are reliant on the ability of the Bank to meet its obligations to you under the terms of each transaction. This risk is sometimes described as "counterparty risk".

### Operational risk

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people and systems or external events.

You are reliant on the ability of the Bank to price and settle your FFP transaction in a timely and accurate manner. The Bank in turn is dependent on the reliability of its own operational processes that include communications, computers and computer networks. Disruptions in the Bank's processes may lead to delays in the execution and settlement of your FFP transaction. Such disruptions may result in contractual outcomes that are less favourable to you.

However, once you have entered into the FFP transaction, the management of risks associated with its own operational processes is the responsibility of the Bank.

The risks described here may not include all risk considerations that may be relevant to you when transacting a FFP. Please also refer to "What are the significant disadvantages of a FFP transaction?" described on page 7. Before transacting in this product you should be satisfied that this product is suitable for you. We recommend that you consult your investment adviser or obtain other independent advice.

### Legal risk

Australia, as a member state of the United Nations, is obliged to implement United Nations Security Council sanctions. Australia also may be required to implement other international sanctions and sometimes imposes unilateral sanctions. Sanctions can cover various subject matters including financial restrictions. Consequently, the Bank may be prohibited from dealing with certain persons or entities.

This means that if the Bank is aware that you are a proscribed person or entity, then the Bank may be required to suspend, cancel or refuse you services or close or terminate any account, facility, transaction, arrangement or agreement with you. We may also be required to freeze your assets. You could incur significant costs as a result of these actions.

## Entering and settling FFP transactions

### Entering a FFP transaction

Following credit approval by the Bank and your entering into the *master agreement and transaction addendum* (see "FFP documentation" below), you may enter into FFP transactions with the Bank.

The next steps are:

1. You contact the Bank and ask for a FFP transaction for a *currency pair* for a specified *settlement date*. You will specify to the Bank the transaction amount or *ceiling amount* and the *floor amount* you require before the Bank can offer you a FFP quote.
2. The Bank will determine the corresponding *contract rate*. If the Bank offers you a FFP transaction, and if you accept the offer (which can be done verbally), a FFP transaction is entered into between you and the Bank. All telephone conversations between you and the Bank will be recorded.
3. The Bank will send you a *confirmation letter* setting out the details of your FFP transaction. You must sign and return this *confirmation letter* to the Bank.

## FFP documentation

The FFP documentation comprises a *master agreement and transaction addendum* and a *confirmation letter*. The FFP documentation sets out in full the terms and conditions of the FFP transaction. Samples of the FFP documentation can be obtained through your relationship manager or any branch of the Bank on request.

## Settling a FFP transaction

Subject to the terms and conditions of the FFP documentation, on the *settlement date* the *currency pair* is exchanged. You must ensure that you have sufficient *cleared funds* accessible to the Bank.

## Variations to settlement dates

Variations to the *settlement date* are not available after the FFP has been entered into.

## Terminating a FFP transaction

A FFP transaction may be terminated before the *settlement date* either:

- by agreement between you and the Bank; or
- as set out in the FFP documentation.

At termination, the Bank will calculate the *mark-to-market value* of the FFP transaction in AUD, as at the *termination date*, using prevailing market rates chosen by the Bank in good faith. The Bank calculates the *mark-to-market value* having regard to what a person would pay the Bank, expressed as a negative number, or what the Bank would have to pay another person, expressed as a positive number, in order to take over your rights and obligations under the terminated FFP transaction.

If more than one FFP transaction is terminated, the sum of all positive *mark-to-market values* of those FFP transactions and any other transactions also terminated under the *master agreement and transactions addendum* governing the FFP transactions will be set-off against the sum of all negative *mark-to-market values*. If, as a result of this calculation, the overall sum is positive, you must pay the Bank an amount equal to the total positive sum. Alternatively, if, as a result of this calculation, the overall sum is negative then the Bank must pay you an amount equal to the total negative sum. The Bank will notify you as soon as practicable after making these calculations.

## Payments netting

In accordance with the FFP documentation, if you have more than one transaction under the FFP documentation (including any FFP transaction), with the same *settlement date* and for the same *currency pair*, payments and receipts may be “net settled”. This means that all settlements are combined to a single net payment between you and the Bank.

## What are the costs involved in FFP transactions?

### Fees and charges

There are no fees and charges for entering into a FFP transaction. The factors used in determining FFP exchange rates, including an allowance for the Bank’s costs and profit margin, are set out in the section on ‘Determining FFP exchange rates’ on page 3.

Your FFP transaction may be subject to Government taxes and duties (if any). These may vary from State to State.

## Are there any tax implications you should be aware of?

FFP transactions may have tax implications which can be complex and are invariably specific to your circumstances. They may depend on whether you are an individual or company and whether any elections in relation to foreign currency have been made. Therefore, you should discuss any taxation issues with an independent tax adviser before entering into an FFP transaction.

## What if you have a complaint?

Please contact your relationship manager or the manager of the department that handled the matter and explain the problem.

Our staff will review the situation and, if possible, resolve it immediately. If the matter has not been resolved to your satisfaction, please contact our Customer Relations team via:

- our web site at:  
**[commbank.com.au/contactus/comment.asp](http://commbank.com.au/contactus/comment.asp)**
- telephone **1800 805 605**
- facsimile **1800 028 542**; or
- writing to:  
Customer Relations  
Commonwealth Bank  
Reply Paid 41  
Sydney NSW 2001

If after giving us the opportunity to resolve your complaint, you feel we have not resolved it satisfactorily, you may also lodge a written complaint with the Banking and Financial Services Ombudsman at:

GPO Box 3  
Melbourne Victoria 3001  
telephone **03 9613 7333**  
toll free **1300 780 808**  
facsimile **03 9613 7345**

## Customer information and privacy

### Collection and verification of customer information

“Customer information” is information about a customer. It includes personal information.

The law requires us to identify our customers. We do this by collecting and verifying information about you. We may also collect and verify information about persons who act on your behalf. The collection and verification of information helps to protect against identity theft, money-laundering and other illegal activities.

We use your customer information to manage our relationship with you, provide you with the products and services you request and also tell you about the products and services offered by the Commonwealth Bank Group (“Group”), affiliated providers and external providers for whom we act as agent. If you

have given us your electronic contact details, we may provide marketing information to you electronically.

The collection and verification of customer information may be carried out in different ways and we will advise you of the most acceptable methods of doing this. We may disclose your customer information in carrying out verification – e.g. we may refer to public records to verify information and documentation, or we may verify with an employer that the information you have given us is accurate.

Depending on whether you are an individual or an organisation, the information we collect will vary. For instance, if you are an individual, the type of information we may collect and verify includes your full name, date of birth and residential address. If you are commonly known by 2 or more different names, you must give us full details of your other name or names.

For instance, if you are a company, we may collect and verify information, including company incorporation and registration details, as well as details of the company’s officers and its major shareholders.

If you are acting as a trustee, we may ask you for, amongst other things, information on the beneficiaries of the trust and evidence of the existence of the trust.

If you are a partnership, we may require information including evidence of the fact that the partnership exists, as well as the full name of the partnership, the names of the partners and any business name owned by the partnership.

For other organisations, the kind of information we collect and verify will depend on the type of organisation you are.

In addition, during your relationship with us, we may also ask for and collect further information about you and about your dealings with us.

You must provide us with accurate and complete information. If you do not, you may be in breach of the law and also we may not be able to provide you with products and services that best suit your needs.

### Protecting customer information

We comply with the National Privacy Principles as incorporated into the *Privacy Act 1988* (Cth).

We disclose customer information to other members of the Group (including overseas members), so that the Group may have an integrated view of its customers and to facilitate the integrated treatment

of its customers. It also enables other members of the Group to provide you with information on their products and services.

### Other disclosures

At common law, banks are permitted to disclose customer information in the following circumstances:-

- (a) where disclosure is compelled by law; or
- (b) where there is a duty to the public to disclose; or
- (c) where our interests require disclosure; or
- (d) where disclosure is made with your express or implied consent.

So that we can manage our relationships, customer information may be disclosed to:

- brokers and agents who refer your business to us;
- any person acting on your behalf, including your financial adviser, solicitor, settlement agent, accountant, executor, administrator, trustee, guardian or attorney;
- financial institutions who request information from us if you seek credit from them;
- if you have borrowed from the Bank to purchase property: valuers and insurers (so that the Bank can obtain a valuation of your property, and confirm that it is insured);
- if you have insurance: medical practitioners (to verify or clarify, if necessary, any health information you may provide), claims investigators and reinsurers (so that any claim you make can be assessed and managed), insurance reference agencies (where the Bank is considering whether to accept a proposal of insurance from you and, if so, on what terms); and
- organisations to whom we may outsource certain functions.

In all circumstances where our contractors, agents and outsourced service providers become aware of customer information, confidentiality arrangements apply. Customer information may only be used by our agents, contractors and outsourced service providers for our purposes.

We may be required to disclose customer information by law, e.g. under Court Orders or Statutory Notices pursuant to taxation or social security laws or under laws relating to sanctions, anti-money laundering or counter terrorism financing.

We may send customer information overseas if:

- that is necessary to complete a transaction, or
- we outsource certain functions overseas.

We may also be permitted, as distinct from required, to disclose information in other circumstances. For more information, please refer to our Privacy Policy.

### Access to your personal information

The law allows you (subject to permitted exceptions) to access your personal information. You can do this by contacting:

Customer Relations  
Commonwealth Bank  
Reply Paid 41  
Sydney NSW 2001

We may charge you for providing access.

### Further information

For further information on our privacy and information handling practices, please refer to the Group's Privacy Policy, which is available at [commbank.com.au](http://commbank.com.au) or upon request from any branch of the Bank.

Page intentionally left blank

# Definitions

## “AUD”

Australian dollars.

## the “Bank”

Commonwealth Bank of Australia  
ABN 48 123 123 124.

## “business day”

A day on which banks are open for business in Sydney.

## “ceiling amount”

The same as your transaction amount.

## “cleared funds”

Funds that are immediately available to you for settlement of your FFP transaction.

## “confirmation letter”

A letter confirming the details of a particular FFP transaction.

## “contract rate”

The agreed *exchange rate* at which the *currency pair* may be exchanged on the *settlement date*.

## “currency pair”

The 2 currencies that are the subject of the FFP transaction.

## “exchange rate”

The expression of the value of one currency in terms of another. For example, in the *exchange rate* AUD/USD0.6500, 1 Australian dollar is equal to 65 United States cents (AUD1.0000 = USD0.6500).

## “expiration date”

The date at which the outcome of the FFP transaction is determined which is 2 *business days* before the *settlement date*.

## “expiration time”

Usually 3pm Sydney time on the *expiration date*.

## “floor amount”

The minimum amount that you will have to exchange at the *contract rate* on *settlement date*.

## “forward exchange rate”

The expression of the value of one currency in terms of another where the *settlement date* is more than 2 *business days* after the *trade date*. A *forward exchange rate* is the *spot exchange rate* of the currencies on the *trade date* adjusted for the *forward points*.

## “forward points”

The value of the *interest rate differential* for the *currency pair* over the period from the *spot settlement date* to the *settlement date*, expressed as an adjustment to the *spot exchange rate*.

## “interest rate differential”

The difference between the interest rates applicable to the *currency pair* for the *transaction period* of a FFP transaction.

## “market spot exchange rate”

The expression of one currency in terms of another for exchange on the *spot settlement date* before an allowance for the Bank’s costs, both fixed and variable; and the Bank’s profit margin.

## “mark-to-market value”

A valuation method where an existing FFP transaction is valued against current market rates to calculate any potential profit or loss on termination.

## “master agreement and transactions addendum”

The Bank’s Derivatives Master Agreement and Flexible Forwards Transactions Addendum.

## “parties to the agreement”

The parties to a FFP transaction are you and the Bank.

## “settlement date”

A *business day* on which the *currency pair* subject to a FFP transaction are exchanged.

## “spot exchange rate”

The expression of one currency in terms of another for exchange on the *spot settlement date* after an allowance for the Bank’s costs, both fixed and variable; and the Bank’s profit margin.

## “spot settlement date”

The date that is 2 *business days* after any date on which the Bank fixes the *spot exchange rate*.

## “termination date”

A date on which you or the Bank terminate the FFP transaction.

## “trade date”

The date on which a FFP transaction is entered into by the *parties to the agreement*.

## “transaction period”

The period from and including the *trade date* to and including the *settlement date*.

## “USD”

United States dollars.

## “volatility factor”

The expected degree of fluctuation in *market spot exchange rate* during the *transaction period* as calculated by the Bank.

## “you”, “your”

The customer who is one of the *parties to the agreement*.

Page intentionally left blank

# APPENDIX A

## Currencies (FFP)

FFP transactions are only available in some currencies. Examples are included below.

### Currencies
