Commonwealth Bank FY26 results: CEO Matt Comyn audio and video

Overview

Today's result means we can continue to support and protect our 18 million customers as well as invest in Australia's future. Over the last financial year, we helped our customers purchase 150,000 homes and also lent $17 billion to build new homes. We backed Australian businesses by lending $50 billion to help them grow, invest and employ people. Importantly, we were also able to provide 147,000 tailored payment arrangements to customers most in need, and we also invested more than a billion dollars to protect our customers from scams, fraud, cyber and financial crime.

Outlook

Growth is slowing, with higher interest rates and inflation placing uneven pressure on household incomes and economic activity. However, the economy remains resilient and we should be optimistic about Australia's long-term potential.
