<b>Indexation</b>				
Indexation is used in the Asset Coverage Test (ACT) and the Amortisation Test to protect investors from a downward move in property prices.				
Indexation is applied to the LVR Adjusted Mortgage Loan Balance in the ACT and the Amortisation Test Current Principal Balance in the Amortisation Test.				
Indexation is applied 85% for upward revision of House Price Index (HPI) and 100% for downward revision.				
HPI is applied to each individual residential loan based on the loan's approval date.				
HPI used is the CoreLogic's "8 Capital Cities Combined" Index.				
The HPI is designed to provide a measure of the inflation or deflation in the price of the stock of established houses over time. Separate indexes are produced for each capital city in Australia, and these indexes are combined to produce a weighted average index of the eight capital cities. The HPI is published quarterly, approximately five weeks after the end of the reference quarter. The figures published for the two most recent quarters are regarded as preliminary and are revised in subsequent publications as more data is collected.
