

Commonwealth Bank of Australia
U.S. Disclosure Document

For the half year ended 31 December 2021

Results for announcement to the market

Report for the half year ended 31 December 2021

	\$M	
Revenue from ordinary activities ^{1,2}	12,265	up 3%
Profit/(loss) from ordinary activities after tax attributable to Equity holders	5,870	up 21%
Net profit/(loss) for the period attributable to Equity holders	5,870	up 21%
Dividends (distributions)		
Interim dividend - fully franked (cents per share)		175
Record date for determining entitlements to the dividend		17 February 2022

- 1 Information has been presented on a continuing operations basis. Comparative information used to calculate the growth percentages was restated to align with the presentation in the current period. See "Disclosures-Financial Information Definitions-Basis of Preparation" and Appendix 4.8 for more information on the related restatements. The financial results of discontinued operations are excluded from the individual account lines of the Bank's performance and are reported as a single cash net profit after tax line item. Discontinued operations includes Colonial First State (CFS), Commlinsure Life, BoCommLife and Colonial First State Global Asset Management (CFSGAM).

- 2 Represents total net operating income before operating expenses and impairment.

This Report (this "Document") should be read in conjunction with:

- The Commonwealth Bank of Australia Annual U.S. Disclosure Document –Year Ended 30 June 2021 (the "2021 Annual U.S. Disclosure Document");
- The Commonwealth Bank of Australia Financial Report (U.S. Version) – Year Ended 30 June 2021 which contains the Financial Statements for the years ended 30 June 2019, 2020 and 2021 and as at 30 June 2019, 2020 and 2021 (the "2021 Financial Report");
- The Commonwealth Bank of Australia Financial Report (U.S. Version) – Year Ended 30 June 2020 which contains the Financial Statements for the years ended 30 June 2018, 2019 and 2020 and as at 30 June 2018, 2019 and 2020 (the "2020 Financial Report");
- The Commonwealth Bank of Australia Basel III Pillar 3 Capital Adequacy and Risk Disclosures as at 31 December 2021 (the "December 2021 Capital Disclosure Report"); and
- The Commonwealth Bank of Australia Basel III Pillar 3 Capital Adequacy and Risk Disclosures as at 30 June 2021 (the "June 2021 Capital Disclosure Report", and, together with the December 2021 Capital Disclosure Report, the "Capital Disclosure Reports").

In each case, these are found on the U.S. Investor Website located at www.commbank.com.au/usinvestors (the "U.S. Investor Website").

The terms "Bank" and "CBA" refer to the Commonwealth Bank of Australia and the terms "Group", "we" and "our" refer to the Bank and its consolidated subsidiaries. Certain other terms used in this Document are defined in Appendix 4.7 to this Document.

This Document, the 2021 Annual U.S. Disclosure Document, the 2021 Financial Report, the Capital Disclosure Reports and the 2020 Financial Report are each presented in Australian dollars unless stated otherwise.

The Group's financial year ends on June 30 of each year. References to the 2021 Financial Year are to the year ended 30 June 2021 and prior financial years are referred to in a similar manner.

Except where otherwise stated, all figures in this Document relate to the half year ended 31 December 2021. The terms "prior comparative period" and "1H21" refer to the half year ended 31 December 2020, while the terms "prior half" and "2H21" refer to the half year ended 30 June 2021 and the terms "current period", "current half" and "1H22" refer to the half year ended 31 December 2021.

Except where otherwise indicated, references to "Notes" or a "Note" are to Notes or a Note, as the case may be, to the Financial Statements for the half years ended December 31, 2021, June 30, 2021 and December 31, 2020 contained in this Document (the "Financial Statements").

Segment Disclosure

The Group conducts its businesses through five segments: Retail Banking Services; Business Banking; Institutional Banking and Markets; New Zealand; and Corporate Centre and Other. The businesses previously presented separately as International Financial Services and Corporate Centre segment are now presented through the Corporate Centre and Other segment and are included in the results for that segment for the 2022 financial year and the 2021 financial year. Balances disclosed in the "Divisional Performance", are spot balances, unless otherwise stated.

Special Note Regarding Forward-Looking Statements

Certain statements under the captions “Highlights”, “Risk Factors”, “Group Performance Analysis”, “Retail Banking Services”, “Business Banking”, “Institutional Banking and Markets”, “New Zealand”, “Corporate Centre and Other”, “Group Operations and Business Settings” and elsewhere in this Document constitute “forward-looking statements”, within the meaning of the U.S. Private Securities Litigation Reform Act of 1995, with respect to the financial condition, operations and business of the Group and certain plans and objectives of the management of the Group. Such forward looking statements, including economic forecasts and assumptions and business and financial projections, involve known and unknown risks, uncertainties and other factors that may cause the actual results, performance or achievements of the Group to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements.

Such factors include the ongoing impact of the COVID-19 pandemic and future outbreaks of other communicable diseases or pandemics, a downturn in the macroeconomic environment, extensive regulation and political scrutiny, competition and digital disruption, deteriorations in global financial markets, environmental and social risks, investor

activism, organisational capability and culture risks, failure to maintain capital adequacy requirements, damage to the Group’s reputation, sub-optimal investment allocation and delivery risks, including through acquisitions or divestments of businesses, credit risk exposures, operational risks, cyber-security risks, data management risks, third party risks, transaction processing risks, non-technology business disruption risks, modelling risks, fraud risks, employment risks, accounting, legal and taxation risks, compliance risks, legal liability or regulatory action against the Group, inappropriate conduct of the Group’s staff, failure to comply with financial crime legislation or privacy legislation, liquidity and funding risks, adverse financial and credit market conditions, failure to maintain adequate levels of liquidity and funding, failure to maintain credit ratings, failure to hedge effectively against market risks (including adverse fluctuations in exchange rates), insurance risk and various other factors, many of which may be beyond the Group’s control. Given these risks, uncertainties and other factors, potential investors are cautioned not to place undue reliance on such forward-looking statements.

Risk factors applicable to the Group are detailed on page 8 of this Document and pages 17 to 29 of the 2021 Annual U.S. Disclosure Document.

Disclosures (continued)

Financial Information Definitions

Basis of Preparation

The consolidated Financial Statements of the Group for the half years ended 31 December 2021, 30 June 2021 and 31 December 2020 comply with International Financial Reporting Standards ("IFRS").

This Document, the 2021 Annual U.S. Disclosure Document, the 2021 Financial Report, the 2020 Financial Report and the Capital Disclosure Reports are each presented in Australian dollars, unless otherwise stated.

This Document does not include all Notes of the type included in the 2021 Financial Report and therefore cannot be expected to provide as full an understanding of the financial position and financial performance of the Group as that given by the 2021 Financial Report. As a result, this Document should be read in conjunction with the 2021 Annual U.S. Disclosure Document, the 2021 Financial Report and the 2020 Financial Report.

During the current period, the Group adopted amendments to AASB 139 'Interest Rate Benchmark Reform – Phase 2'. The amendments only apply to those changes to financial instruments and hedging relationships that are a direct consequence of Interbank Offered Rate ("IBOR") reform and where cash flows are amended on an economically equivalent basis. The key changes include the following:

- A practical expedient for changes in contractual cash flows required by the reform – the Group does not have to derecognise or adjust the carrying amount of financial instruments for these changes, but instead updates the effective interest rate to reflect the change to the alternative benchmark rate;
- Hedge accounting – the Group does not have to discontinue its hedge accounting solely because it makes changes required by the reform, if the hedge meets all the other hedge accounting criteria; and
- Additional disclosures – the Group is required to disclose information, as contained in Note 1.1 to the Financial Statements, about new risks arising from the reform as well as how the Group manages the transition to alternative benchmark rates.

Refer to Note 1.1 to the Financial Statements for further information.

Other than the above, the accounting policies and methods of computation adopted in the preparation of the Financial Statements are consistent with those adopted and disclosed in the 2021 Financial Report.

Where necessary, comparative information has been restated to conform to the presentation in the current half. Such restatements have been footnoted throughout the Financial Statements and in this Document. Refer to Note 1.1 to the Financial Statements and Appendix 4.8 to this Document for further details.

Discontinued operations and transaction update

On 21 June 2021, the Group announced the sale of CommInsure General Insurance to Hollard Insurance Company Pty Ltd (Hollard). The sale is subject to Australian regulatory approvals and other conditions, and is expected to complete in the second half of calendar year 2022.

On 28 July 2021, the Group entered into an agreement with AIA Australia for a partial transfer of the Commonwealth Financial Planning (CFP) business to AIA Financial Services Limited. On 26 October 2021, the Group announced its intent to close the remaining CFP business. The transfer completed on 30 November 2021.

On 1 December 2021, the Group completed the sale of a 55% interest in CFS to KKR.

CFS has been classified as a discontinued operation in the Group's financial statements for the half year ended 31 December 2021. The assets and liabilities of CommInsure General Insurance are classified as held for sale at 31 December 2021.

Discontinued operations are excluded from the results of the continuing operations and are presented as a single line item "net profit after tax from discontinued operations" in the Consolidated Income Statement. Assets and liabilities that are held for sale have been presented separately on the Consolidated Balance Sheet.

Refer to Note 7.3 to the Financial Statements included in this Document for further information.

Non-GAAP Financial Measures

In addition to its statutory financial results reported in this Document, the 2021 Financial Report and the 2020 Financial Report which are prepared in accordance with IFRS, the Group reports and describes certain "non-GAAP financial measures" (as defined by the U.S. Securities and Exchange Commission's Regulation G) of the financial performance and results of the Group. These non-GAAP financial measures are not calculated in accordance with IFRS. This Document and the 2021 Annual U.S. Disclosure Document contain reconciliations of these non-GAAP financial measures to the Group's financial results prepared in accordance with IFRS.

Net Profit after Tax

The management discussion and analysis in this Document presents Net profit after tax on both a "statutory basis" and a "cash basis".

Net profit after tax ("statutory basis") is prepared in accordance with the Corporations Act 2001 (Cth) (the "Corporations Act") and the Australian Accounting Standards, which comply with IFRS. References to "statutory profit", "statutory net profit after tax" or "statutory earnings" in this Document have the same meaning as "Net profit after tax ("statutory basis)".

Disclosures (continued)

Financial Information Definitions (continued)

Net profit after tax ("cash basis") is a non-GAAP financial measure that is defined by management as net profit after tax and non-controlling interests, before non-cash items including hedging and IFRS volatility, and losses or gains on acquisition, disposal, closure, capital repatriation and demerger of businesses. Net profit after tax ("cash basis") is management's preferred measure of the Group's financial performance. This measure is used by management to present what it believes to be a clear view of the Group's underlying operating results, excluding certain items that the Group believes introduce volatility and/or one-off distortions of the Group's performance. These items, such as hedging and IFRS volatility, are calculated consistently period on period and do not discriminate between positive and negative adjustments. A reconciliation of the Net profit after tax ("cash basis") to Net profit after tax ("statutory basis") by business segment is provided in Note 2.4 to the Financial Statements included in this Document. A list of items excluded from Net profit after tax ("cash basis") and their description is set out on page 11 of this Document. References to "cash profit" or "cash earnings" in this Document have the same meaning as "Net profit after tax ("cash basis)".

Other Non-GAAP Financial Measures

Other non-GAAP financial measures included in this Document are:

- Earnings per share ("cash basis") – the Group presents its earnings per share on both a statutory and a cash basis. Earnings per share ("cash basis") is defined by management as Net profit after tax ("cash basis") as described above, divided by the weighted average number of the Group's ordinary shares over the relevant period. The weighted average number of shares incorporates an adjustment for the bonus element of any rights issue, discount element of any dividend rights plan, and excludes treasury shares related to investments in the Bank's shares held by the employee share scheme trust.
- The dividend payout ratio and dividend cover are presented on both a statutory and cash basis. The dividend payout ratio ("statutory basis") is calculated by dividing the dividends paid on the Group's ordinary shares by the net profit after tax ("statutory basis"), net of dividends on other equity instruments. The dividend payout ratio ("cash basis") is calculated by dividing the dividends paid on the Group's ordinary shares by net profit after tax ("cash basis"). "Dividend cover – statutory" is calculated as net profit after tax ("statutory basis") net of dividends on other equity instruments, divided by dividends on the Group's ordinary shares for the applicable period. "Dividend cover – cash" is calculated as net profit after tax ("cash basis"), divided by dividends on the Group's ordinary shares for the applicable period. These ratios are provided on both a statutory and cash basis because net profit after tax, the primary component of these ratios, is also presented on a statutory and cash basis, for the reasons described above.

Impact of COVID-19

During the half year ended 31 December 2021, we have seen the continuation of the COVID-19 pandemic and the outbreak variants, including 'Delta' and 'Omicron'. There remains significant uncertainty regarding how the COVID-19 pandemic will continue to evolve, including the duration of the pandemic, the severity of any economic downturn and the speed of economic recovery. We cannot accurately predict the ongoing impact on the Bank of COVID-19, however, we continue to regularly review forward looking assumptions and forecast economic scenarios to give us a better indication of the potential future impacts of the pandemic on the Group. The Group has carefully considered the impact of COVID-19 in preparing its Financial Statements, including the application of critical estimates and judgements. The key impacts on the financial statements are as follows:

- Provisions for impairment (refer to Note 3.2 to the Financial Statements included in this Document for more information);
- Assessment of impairment of non-financial assets.

The Group assessed property, plant and equipment, right-of-use assets, and assets held as lessor for indicators of impairment. Due to the expected recoveries by global aviation and shipping industries from the impacts of COVID-19, impairment reversals of \$8 million were recognised during the half year ended 31 December 2021, which are presented within Other banking income. In determining the value in use of the aircraft, the Group incorporates the cash flows over the lease term, as well as the expected selling price on expiry of the lease. Recovery from disruption across the aviation industry resulted in a partial recovery in the assets' expected recoverable values. There remains uncertainty regarding the aviation sector, and the duration of global restrictions on domestic and international travel imposed as a result of COVID-19.

In prior periods, the Group extended a number of support measures to customers impacted by COVID-19, including loan repayment deferrals, switches from principal and interest repayments to interest only repayments and other modifications including the extension of loan maturity dates. The majority of retail and non-retail loans that were previously granted COVID-19 deferrals have returned to their regular non-deferral repayment terms. Deferral extensions were treated as non-substantial modifications and therefore accounted for as a continuation of the existing loan with no material modification gains or losses having been recognised. Other contract modifications are treated as substantial or non-substantial based on the terms on which they are granted.

During the half year ended 31 December 2021, loans with a gross carrying value of approximately \$1,626 million were granted COVID-19 related repayment deferrals or other contractual modifications when they were included in either Stage 2 or Stage 3 (30 June 2021: \$273 million; 31 December 2020: \$10,303 million). Loans with a gross carrying value of approximately \$13,396 million that were subject to COVID-19 related modifications when in Stage 2 or Stage 3, remained in either Stage 2 or Stage 3 at 31 December 2021 (30 June 2021: \$14,902 million; 31 December 2020: \$23,281 million). For more information, refer to Note 3.2 to the Financial Statements included in this Document.

The impact of the COVID-19 pandemic on our historical results and the expected future impact on our operations are discussed further throughout this Document and in the 2021 U.S. Annual Disclosure Document and the 2021 Financial Report.

Disclosures (continued)

Impact of Foreign Currency Movements

The Group's consolidated financial results are presented in Australian dollars. In order to prepare the Group's consolidated financial results, the financial results of any reporting entities of the Group with a functional currency other than Australian dollars are translated into Australian dollars for each reporting period. As foreign exchange rates are subject to change, the Group's financial results can be affected by the prevailing rate of the Australian dollar at the time of such translations. The effects of these translations on various segments of the Group's business are noted throughout this Document.

The movement of the Australian dollar against the following currencies is highlighted in the table below. Rates are sourced from Bloomberg.

Exchange Rates Utilised ¹	Currency	As at		
		31 Dec 21	30 Jun 21	31 Dec 20
AUD 1.00 =	USD	0. 7260	0. 7521	0. 7705
	EUR	0. 6411	0. 6319	0. 6270
	GBP	0. 5376	0. 5431	0. 5657
	NZD	1. 0628	1. 0740	1. 0667
	JPY	83. 5572	83. 1173	79. 4750

Average Exchange Rates Utilised ²	Currency	Half Year Ended		
		31 Dec 21	30 Jun 21	31 Dec 20
AUD 1.00 =	USD	0. 7318	0. 7714	0. 7228
	EUR	0. 6301	0. 6400	0. 6123
	GBP	0. 5368	0. 5557	0. 5536
	NZD	1. 0489	1. 0756	1. 0727
	JPY	81. 8715	83. 0721	76. 0995

1 End of day, Sydney time.

2 Rates are the six month period average of End of Day, Sydney time.

The Group hedges foreign currency exposures on debt issues and significant foreign currency earnings exposures in offshore locations. For further information regarding the composition of the Group's income by location please refer to Note 2.4 to the Financial Statements included in this Document.

Disclosures (continued)

Critical Accounting Policies and Estimates

The application of the Group's accounting policies requires the use of judgement, estimates and assumptions. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant, and are reviewed on an ongoing basis. Actual results may differ from these estimates, which could impact the Group's net assets and profit.

Where applicable, each note in the 2021 Financial Report discloses the accounting policy for the transactions and balances, which provides information to assist in the understanding of how the numbers are measured, recognised and disclosed. An explanation of these policies and the related critical accounting judgements and estimates applied by the Group is set out below. For further information regarding the Group's accounting policies, see Notes 1.1 to 7.4 to the Financial Statements included in this Document and Notes 1.1 to 12.5 to the 2021 Financial Report.

Provisions for Impairment of Financial Assets

When estimating the provisions for impairment, management judgement was applied in respect of forecasting forward-looking scenarios. Forward-looking information is incorporated into both the Group's assessment of whether there has been a significant increase in credit risk ("SICR") event and in its estimate of expected credit losses ("ECL"). Refer to Note 3.2 to the Financial Statements included in this Document for further information.

Sensitivity of provisions for impairment to changes in forward looking assumptions

The Group applies four alternative macro-economic scenarios (Central, Upside, Downside and Severe downside scenarios) to reflect an unbiased probability-weighted range of possible future outcomes in estimating ECL.

The table below provides approximate levels of provisions for impairment under the Central and Downside scenarios assuming 100% weighting was applied to each scenario and holding all other assumptions constant. These scenarios and their associated weights have been selected based on the expected range of potential future loss outcomes.

	31 Dec 21 \$M	30 Jun 21 \$M	31 Dec 20 \$M
Reported probability - weighted ECL	5,854	6,211	6,815
100% Central scenario	3,771	4,119	5,022
100% Downside scenario	7,425	9,000	8,978

Sensitivity of provisions for impairment to SICR assessment criteria

If 1% of Stage 1 credit exposures as at 31 December 2021 was included in Stage 2, provisions for impairment would increase by approximately \$146 million (30 June 2021: \$162 million; 31 December 2020: \$136 million).

If 1% of Stage 2 credit exposures as at 31 December 2021 was included in Stage 1, provisions for impairment would decrease by approximately \$25 million (30 June 2021: \$27 million; 31 December 2020: \$31 million).

Provisions (Other than Impairment of Financial Assets)

Provisions are recognised for present obligations arising from past events where a payment to settle the obligation is probable and can be reliably estimated. Where the effect of the time value of money is material, the amount of the provision is measured as the present value of expenditures required to settle the obligation, based on a market observable rate. Where a payment to settle an obligation is not probable or cannot be reliably estimated, no provision is recognised. Such obligations are instead disclosed as contingent liabilities. Refer to Note 7.1 to the Financial Statements included in this Document for further information.

Leases

Judgement has been applied by the Group in assessing which arrangements contain a lease, the period over which the lease exists and the variability of future cash flows when recognising right-of-use assets. The Group assesses at each Balance Sheet date useful lives and residual values and whether there is any objective evidence of impairment.

In determining the value in use of assets held as lessor, the Group incorporates the cash inflows over the lease term, as well as the expected selling price on expiry of the lease. Market disruption, lower demand for assets, decline in asset prices as well as credit events specific to individual lessees can result in a reduction of the asset's recoverable values. There remains significant uncertainty regarding the severity of the impact of COVID-19 on the aviation sector, and the duration of global restrictions on domestic and international travel.

If an asset's carrying amount is greater than its recoverable amount, the carrying amount is written down immediately to its recoverable amount.

Consolidation of Structured Entities

The Group exercises judgement at inception and periodically thereafter, to assess whether a structured entity should be consolidated based on the Bank's power over the relevant activities of the entity and the significance of its exposure to variable returns of the structured entity. Such assessments are predominantly required for the Group's securitisation programs and structured transactions such as covered bond programs.

Disclosures (continued)

Critical Accounting Policies and Estimates (continued)

Financial Instruments at Fair Value

Fair value is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. On initial recognition, the transaction price generally represents the fair value of the financial instrument, unless there is observable information from an active market that provides a more appropriate fair value.

The fair value for financial instruments traded in active markets at the reporting date is based on their quoted market price or dealer price quotations, without any deduction for transaction costs. Assets and long positions are measured at a quoted bid price; liabilities and short positions are measured at a quoted asking price. Where the Group has positions with offsetting market risks, mid-market prices are used to measure the offsetting risk positions and a quoted bid or asking price adjustment is applied only to the net open position as appropriate.

Non-market quoted financial instruments are mostly valued using valuation techniques based on observable inputs except where observable market data is unavailable. Where market data is unavailable the financial instrument is initially recognised at the transaction price, which is generally the best indicator of fair value. This may differ from the value obtained from the valuation model. The timing of the recognition in the Income Statement of this initial difference in fair value depends on the individual facts and circumstances of each transaction, but is never later than when the market data becomes observable. The difference may be either amortised over the life of the transaction, recognised when the inputs become observable or on de-recognition of the instrument, as appropriate.

The fair value of Over-the-Counter ("OTC") derivatives includes credit valuation adjustments ("CVA") for derivative assets to reflect the credit worthiness of the counterparty. Fair value of uncollateralized derivative assets and uncollateralised derivatives liabilities incorporate funding valuation adjustments ("FVA") to reflect funding costs and benefits to the Group. These adjustments are applied after considering any relevant collateral or master netting arrangements.

Valuation techniques are used to estimate the fair value of securities. When using valuation techniques the Group makes maximum use of market inputs and relies as little as possible on entity specific inputs. It incorporates all factors that the Group believes market participants would consider in setting a price and is consistent with accepted economic methodologies for pricing financial instruments. Data inputs that the Group relies upon when valuing financial instruments relate to counterparty credit risk, volatility, correlation and extrapolation.

Periodically, the Group calibrates its valuation techniques and tests them for validity using prices from any observable current market transaction in the same instruments (i.e. without modification or repackaging) and any other available observable market data. Refer to Note 6.1 to the Financial Statements included in this Document for further information.

Goodwill

Goodwill is allocated to cash generating units whose recoverable amount is calculated for the purpose of impairment testing. The recoverable amount calculation relies primarily on publicly available earnings multiples.

Taxation

Provisions for taxation require significant judgement with respect to outcomes that are uncertain. For such uncertainties, the Group has estimated the tax provisions based on the expected outcomes. A deferred tax asset is only recognised to the extent that it is probable that future taxable profits will be available for it to be used against. Refer to Note 2.5 to the Financial Statements included in this Document for further information.

Superannuation Obligations

The Group currently sponsors two defined benefit superannuation plans for its employees. Actuarial valuations of the plans' obligations and fair value of the plans' assets are performed semi-annually.

The actuarial valuations of plan obligations are dependent on a series of assumptions, including inflation rates, discount rates, and salary growth rates. Changes in these assumptions impact the carrying amounts of the plans' obligations, assets, superannuation expense and actuarial gains and losses recognised in Other Comprehensive Income. Refer to Note 2.3 to the Financial Statements included in this Document for further information.

Trail Commission Revenue

The amount of trail commission revenue is dependent on assumptions about the behavioural life of the underlying transaction generating the commission. Trail commission income is only recognised to the extent it is highly probable it will not reverse in future periods. Refer to Note 2.2 to the Financial Statements included in this Document for further information.

Effective Interest Rate

When applying the effective interest method the Group has estimated the behavioural term of each loan portfolio by reference to historical prepayment rates and the contractual maturity. Refer to Note 3.1 to the Financial Statements included in this Document for further information.

Disclosures (continued)

Risk Factors

Details of significant risk factors applicable to the Group are set forth under the section entitled “Risk Factors” on pages 17 to 29 of the 2021 Annual U.S. Disclosure Document. That section describes the principal risk factors that have materially impacted and could further materially affect the Group’s businesses, revenues, operating income, net income, net assets, reputation, liquidity and capital resources. The “Risk Factors” set forth therein are in addition to, and should be read in conjunction with, the “Special Note Regarding Forward-Looking Statements” on page 2 of this Document and Appendices 2.1 and 2.2 to this Document. The risk factors described in the 2021 Annual U.S.

Disclosure Document should also be read in conjunction with the updates provided in the rest of this Document, in particular “Note 7.2 Customer Remediation, Litigation, Investigations and reviews, other matters” on pages 125 to 129 of this Document and “Note 7.4 Subsequent Events” in this Document. Appendix 2.1 to this Document provides details on how the Group manages its credit, market (traded and non-traded), funding and liquidity risks in the course of carrying on its business. Appendix 2.2 to this Document provides details on the Group’s counterparty and other credit risk exposures. Also refer to Notes 9.1 to 9.4 of the 2021 Financial Report.

² The financial results of discontinued operations are excluded from the individual account lines of the Bank's performance and are reported as a single cash net profit after tax line item. Discontinued operations includes CFS, CommInsure Life, BoCommLife and CFSGAM.

Highlights (continued)

Non-Cash Items included in Statutory Profit

This Document discloses net profit after tax on both a statutory and cash basis. The statutory basis is prepared in accordance with the Corporations Act and the Australian Accounting Standards, which comply with IFRS. The cash basis is used by management to present what it believes to be a clear view of the Bank's operating results. It is not a measure based on cash accounting or cash flows. The items excluded from cash profit, such as hedging and IFRS volatility and gains or losses on acquisition, disposal, closure, capital repatriation and demerger of businesses are calculated consistently with the prior year and prior half disclosures and do not discriminate between positive and negative adjustments. A list of items excluded from cash profit is provided in the table below. A reconciliation of the Group's net profit after tax from "cash basis" to "statutory basis" is set out in Appendix 4.3 to this Document.

	Half Year Ended

Group Performance Analysis

Financial Performance and Business Review

Performance Overview – historical comparisons are versus prior comparative period unless stated otherwise (continuing operations basis¹).

The Bank's statutory net profit after tax (NPAT) from continuing operations for the half year ended 31 December 2021 increased \$982 million or 26.1% on the prior comparative period to \$4,741 million. The Bank's statutory NPAT (including discontinued operations) for the half year ended 31 December 2021 increased \$1,001 million or 20.6% on the prior comparative period to \$5,870 million. The increase was driven by higher operating income, slightly lower operating expenses and a significant decrease in loan impairment expense and higher net profit from discontinued operations.

Cash net profit after tax ("cash NPAT" or "cash profit") from continuing operations increased \$878 million or 22.7% on the prior comparative period to \$4,746 million. The increase was driven by a 2.0% increase in operating income, a 0.1% decrease in operating expenses and a \$957 million decrease in loan impairment expense, each discussed below.

Operating income increased 2.0% on the prior comparative period. Key movements included:

- Net interest income increased 1.5% primarily driven by a 9.2% or \$85 billion increase in average interest earning assets (AIEA), mainly due to above system growth² in home loans and business loans, and higher liquid assets. Excluding the increase in liquid assets, AIEA increased by 5.0%. This was partly offset by a 14 basis point reduction in Net Interest Margin (NIM). Excluding the 9 basis points reduction in margin from increased lower yielding liquid assets, NIM decreased by 5 basis points, primarily driven by continued pressure on the home lending margin from the impact of swap rates on fixed rate loans, customers switching to lower margin fixed rate loans, and competition, as well as the impact from the low-rate environment, partly offset by the benefit of deposit repricing and favourable portfolio mix.
- Other banking income increased 7.7%, primarily driven by improved retail and business lending volume related fees, increased retail deposits income from higher spend and transaction volumes, the non-recurrence of prior period aircraft operating lease impairment, and higher net profit from minority investments. This was partly offset by decreased Global Markets trading gains, lower equities income from reduced trading volumes and reduced merchants income mainly due to the impact of COVID-19 including fee waivers.
- Funds management and Insurance income decreased \$73 million primarily driven by lower Insurance income due to higher claims net of reinsurance recoveries, mainly due to increased weather event related claims.

Operating expenses decreased 0.1%. Excluding "remediation costs and other²ⁿ" (as described in more detail below), operating expenses increased 2.7%, due to higher staff costs mainly driven by wage inflation and additional resources to support higher loan processing and [financial crime assessment volumes], the delivery of strategic investment initiatives and frontline resources, partly offset by benefits from business simplification initiatives and lower occupancy costs from the consolidation of our property footprint.

Loan impairment expense (LIE) decreased \$957 million, primarily driven by lower collective provisions reflecting an improvement in economic outlook, and higher collective provision charges in the prior comparative period from the impact of COVID-19.

CET1 decreased by 130 basis points from 30 June 2021 to 11.8%, well above APRA's 'unquestionably strong' benchmark of 10.5%. The decrease was primarily driven by the completion of the Group's \$6 billion off-market share buy-back in October 2021 (-133bps), the FY21 final dividend payment (-79bps) and higher RWAs (-54bps). This was partly offset by capital generated from earnings (+98bps), the benefit from the divestment of Colonial First State (+32bps) and other movements (+6bps).

Earnings per share ("statutory basis") increased 23% on the prior comparative period to 337.4 cents per share, primarily driven by the increase in statutory profit and the reduction in the number of shares on issue as a result of the share buy-back.

Return on equity ("statutory basis") increased 200 basis points to 15.2% due to the impact of higher statutory profit, partly offset by an increase in average capital levels, net of the completion of the share buy-back, reflecting organic capital generation and the benefits of divestments over the period.

The interim dividend determined was \$1.75 per share, which is equivalent to 61.6% of the Bank's cash profit.

Balance sheet strength and resilience is a key priority for the Bank. The Bank has managed key balance sheet risks in what management believes to be a sustainable and conservative manner, and has made strategic decisions designed to ensure strength in capital, funding and liquidity. In particular, the Bank has:

- Satisfied a significant proportion of its funding requirements with customer deposits, accounting for 73% of total funding at 31 December 2021 (down 2% from 75% at 31 December 2020 primarily due to the drawdown of the RBA's \$51 billion TFF);
- Issued new long-term wholesale funding of \$14.9 billion. Including the TFF, the portfolio WAM³ was 5.0 years (down from 5.2 years at 31 December 2020);
- Maintained its strong funding position, with long-term wholesale funding accounting for 67% of total wholesale funding (down 3% from 70% at 31 December 2020); and

Managed the level of liquid assets and customer deposit growth to maintain our strong funding and liquidity positions, as illustrated by the Liquidity Coverage Ratio (LCR) and Net Stable Funding Ratio (NSFR) being well above the regulatory minimum.

1 The financial results of discontinued operations are excluded from the individual account lines of the Bank's performance and are reported as a single cash net profit after tax line item. Discontinued operations primarily include CFS, CommInsure Life, BoCommLife and CFSGAM.

2 System source: RBA/APRA/RBNZ.

3 For further details on remediation costs refer to page 19 and Note 7.2 to the Financial Statements.

4 The portfolio WAM excluding the TFF was 6.5 years (up from 5.7 years as at 31 December 2020).

Group Performance Analysis (continued)

Financial Performance and Business Review (continued)

The Bank's financial result was impacted by remediation costs and other expenses. In order to present a transparent view of the business' performance, operating expenses are shown both before and after these items.

Net interest margin (%)	1.92	2.09	2.06	(17)bpts	(14)bpts

1 Comparative information has been restated to conform to the presentation in the current half. Refer to Appendix 4.8 to this Document for further details.

2 Net of average mortgage offset balances. Gross average home loans balance, excluding mortgage offset accounts was \$593,214 million for the half year ended 31 December 2021 (\$567,368 million for the half year ended 30 June 2021; \$549,776 million for the half year ended 31 December 2020). While these balances are required to be grossed up under accounting standards, they are netted down for the calculation of customer interest payments and the Bank's net interest margin.

3 Average external non-lending interest earning assets held by the Group for liquidity purposes and included in LCR liquid assets.

Half Year Ended December 2021 versus December 2020

Net interest income ("statutory basis") was \$9,748 million, an increase of \$148 million or 2% on the prior comparative period. The result was driven by an \$85 billion or 9% increase in average interest earning assets to \$1,008 billion, partly offset by a 14 basis point or 7% decrease in net interest margin to 1.92%. Excluding the impact of higher liquid assets in the current half, average interest earning assets increased by \$40 billion or 5%, and the net interest margin reduced by 5 basis points, on the prior comparative period.

Average Interest Earning Assets

Average interest earning assets increased \$85 billion or 9% on the prior comparative period to \$1,008 billion.

- Home loan average balances increased \$35 billion or 7% on the prior comparative period to \$530 billion. Proprietary mix for CBA branded home loans has increased from 57% to 58% of new business flows with higher new business application volumes and a continued focus on credit decisioning turn-around times;
- Consumer finance average balances decreased \$1 billion or 6% on the prior comparative period to \$16 billion, driven by lower consumer demand for unsecured lending;
- Business and corporate loan average balances increased \$9 billion or 4% on the prior comparative period to \$226 billion, driven by an increase in Business Bank business lending across a number of industries, partly offset by a decline in institutional lending balances mainly due to a reduction in pooled facilities;
- Non-lending interest earning asset (excl. liquids) average balances decreased \$4 billion or 6% on the prior comparative period to \$57 billion, primarily driven by a decrease in the inventory of government bonds within Global Markets; and
- Liquid asset average balances increased \$45 billion or 34% on the prior comparative period to \$179 billion due to strong customer deposit growth.

For further details on the balance sheet movements refer to the 'Group Assets and Liabilities' on page 30 of this Document.

NIM movement since December 2020

Net Interest Margin

The Bank's net interest margin decreased 14 basis points on the prior comparative period to 1.92%. Excluding a 9 basis point reduction in margin from increased lower yielding liquid assets, net interest margin reduced by 5 basis points. The key drivers of the movement were:

Asset pricing: Decreased margin by 12 basis points driven by reduced home lending and business lending pricing. Decreased home lending pricing (down 11 basis points) reflects the impact of swap rates on fixed rate loans (down 3 basis points), unfavourable portfolio mix from customers switching to lower margin fixed rate loans (down 6 basis points), and increased competition (down 5 basis points), partly offset by repricing (up 3 basis points). Lower business lending pricing (down 1 basis point) reflects price reductions to support our customers.

Group Performance Analysis (continued)

Net Interest Income (continued)

Funding costs: Increased margin by 4 basis points driven by the net benefit of deposit repricing (up 5 basis points), and lower wholesale funding costs (up 1 basis point), partly offset by lower earnings from the replicating portfolio due to the low interest rate environment (down 2 basis points).

Portfolio Mix: Increased margin by 4 basis points driven by favourable asset mix from a reduction in lower margin trading asset balances and pooled facilities (up 2 basis points), and favourable funding mix (up 2 basis points) due to the drawdown of RBA Term Funding Facility (TFF) and strong growth in at-call deposits.

Basis Risk: Basis Risk arises from the spread between the 3 month bank bill swap rate and the 3 month overnight index swap rate. The average spread and exposure remained broadly flat on the prior comparative period.

Capital and other: Decreased margin by 1 basis point driven by lower earnings on capital due to the low interest rate environment (down 2 basis points), partly offset by increased contribution from New Zealand (up 1 basis point) reflecting lower wholesale funding costs and higher deposit margins.

Treasury and Markets: Was flat compared to the prior half.

Half Year Ended December 2021 versus June 2021

Net interest income (“statutory basis”) increased \$46 million on the prior half, driven by a \$71 billion or 8% increase in average interest earning assets and the benefit of three additional calendar days in the current half, partly offset by a 17 basis point or 8% decrease in net interest margin. Excluding the impact of higher liquid assets in the current half, average interest earning assets increased by \$33 billion or 4%, and the net interest margin reduced by 9 basis points on the prior half.

Average Interest Earning Assets

Average interest earning assets increased \$71 billion or 8% on the prior half.

- Home loan average balances increased \$21 billion or 4% on the prior half, due to higher new business application volumes and a continued focus on credit decisioning turn-around times. Proprietary mix for CBA branded home loans decreased from 62% to 58%, due to stronger broker flows;
- Consumer finance average balances decreased \$1 billion or 5% on the prior half, driven by lower consumer demand for unsecured lending;
- Business and corporate loan average balances increased \$9 billion or 4% on the prior half, driven by an increase in Business Bank business lending across a number of industries, and an increase in institutional lending balances mainly in the Funds Financing and Securitisation portfolios, partly offset by a reduction in pooled facilities;
- Non-lending interest earning asset (excl. liquids) average balances increased \$3 billion or 6% on the prior half, primarily driven by higher reverse sale and repurchase agreements, partly offset by reduction in the inventory of government bonds in Global Markets; and
- Liquid asset average balances increased \$38 billion or 27% on the prior half due to strong customer deposit growth.

For further details on the balance sheet movements refer to the ‘Group Assets and Liabilities’ on page 30 of this Document.

NIM movement since June 2021

Net Interest Margin

The Bank’s net interest margin decreased 17 basis points on the prior half. Excluding an 8 basis point reduction from increased lower yielding liquid assets, net interest margin reduced by 9 basis points. The key drivers of the movement were:

Asset pricing: Decreased margin by 10 basis points mainly driven by decreased home lending pricing (down 9 basis points) reflecting the impact of swap rates on fixed rate loans (down 2 basis points), unfavourable portfolio mix from customers switching to lower margin fixed rate loans (down 4 basis points), and increased competition (down 3 basis points). Lower business lending pricing (down 1 basis point) reflects price reductions to support our customers.

Funding costs: Increased margin by 1 basis point driven by the benefit of savings and investment deposit repricing (up 2 basis points), partly offset by lower earnings from the replicating portfolio due to the low interest rate environment (down 1 basis point).

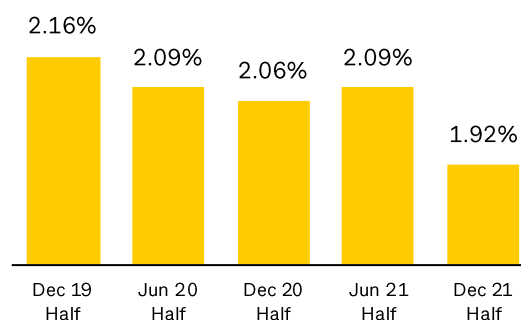

Portfolio Mix: Increased margin by 2 basis points driven by favourable funding mix from the drawdown of TFF (up 1 basis point) and strong growth in at-call deposits (up 1 basis point).

Basis Risk: The average spread and exposure remained broadly flat on the prior half.

Capital and other: Decreased margin by 2 basis points driven by lower earnings on capital due to the low interest rate environment (down 1 basis point) and reduced contribution from New Zealand (down 1 basis point) mainly due to lower home lending margins from competition.

Treasury and Markets: was flat compared to the prior half.

NIM (Half Year Ended)

Group Performance Analysis (continued)

Other Banking Income (continuing operations basis)

	Half Year Ended ¹				
	31 Dec 21 \$M	30 Jun 21 \$M	31 Dec 20 \$M	Dec 21 vs Jun 21 %	Dec 21 vs Dec 20 %
Commissions	1,176	1,265	1,299	(7)	(9)

Other banking income - "statutory basis"	2,419	2,677	2,125	(10)	14

¹ Comparative information has been restated to conform to the presentation in the current half. Refer to Appendix 4.8 to this Document for further details.

Half Year Ended December 2021 versus December 2020

Other banking income ("statutory basis") was \$2,419 million, an increase of \$294 million or 14% on the prior comparative period. The key drivers of the movement were:

Commissions: decreased by \$123 million or 9% to \$1,176 million, mainly due to the divestment of Aussie Home Loans (AHL) and AUSIEX on 3 May 2021, lower equities income from reduced trading volumes, and decreased merchant income mainly reflecting the impact from COVID-19 including fee waivers. This was partly offset by higher retail deposit income from improved spend and transaction volumes.

Lending fees: increased by \$81 million or 27% to \$377 million, mainly driven by higher retail and business lending volume growth, and increased institutional lending syndication and commitment fees.

Trading income: decreased by \$167 million or 31% to \$368 million, mainly driven by lower Global Markets trading gains from precious metal inventory financing and the Fixed Income and Rates portfolios.

Other income: increased by \$378 million to \$438 million, mainly driven by the non-recurrence of impairment of aircraft operating leases, higher net profits from minority investments including a reversal of historical impairment, and higher Treasury income.

Hedging and IFRS volatility: decreased by \$17 million on the prior comparative period primarily driven by losses on the hedge of New Zealand earnings.

Gain/(loss) on disposal and acquisition of controlled entities net of transaction costs: increased by \$142 million on the prior comparative period, mainly driven by higher gains and losses net of transaction and separation costs associated with divestments of businesses and capital repatriations.

Half Year Ended December 2021 versus June 2021

Other banking income ("statutory basis") decreased by \$258 million or 10% on the prior half. The key drivers of the movement were:

Commissions: decreased by \$89 million or 7%, mainly due to the divestment of AHL and AUSIEX on 3 May 2021, lower equities income from reduced trading volumes, and reduced merchant income mainly reflecting the impact from COVID-19 including fee waivers.

Lending fees: increased by \$8 million or 2%, mainly driven by higher retail and business lending volume growth, and increased institutional lending syndication and commitment fees. This was partly offset by lower retail volume based fees, including reduced retail overdrawn account fees, reflecting increased deposit balances.

Trading income: increased by \$51 million or 16%, driven by higher Global Markets sales and trading income from Foreign Exchange and Fixed Income and Rates portfolios.

Other income: increased by \$35 million or 9%, mainly driven by higher Treasury income and receipt of the final AIA partnership milestone payment. This was partly offset by the non-recurrence of gains on minority investments from the reversal of historical impairment in the prior half.

Hedging and IFRS volatility: decreased by \$45 million on the prior half primarily driven by losses on the hedge of New Zealand earnings.

Gain/(loss) on disposal and acquisition of controlled entities net of transaction costs: decreased by \$218 million or 72% on the prior half, mainly driven by lower gains and losses net of transaction and separation costs associated with divestments of businesses and capital repatriations in the current half.

Trading Income (\$M)

Assets Under Management (AUM) - average (\$M) ³	21,084	19,630	18,179	7	16

1 Comparative information has been restated to conform to the presentation in the current half. Refer to Appendix 4.8 to this Document for further details.

2 Retail Banking Services incorporates the results of Commonwealth Financial Planning and the Aligned Advice businesses.

3 All average AUM balances relate to New Zealand.

Half Year Ended December 2021 versus December 2020

Funds management income ("statutory basis") was \$80 million, flat to the prior comparative period. The key drivers of the movement were:

- An increase in New Zealand & Other of \$6 million or 9% to \$70 million, mainly driven by higher average AUM (up 16%) reflecting favourable investment markets and higher net inflows, and improved margins, partly offset by the removal of administration fees on KiwiSaver accounts; partly offset by
- A decrease in Retail Banking Services of \$6 million or 38% to \$10 million, mainly due to the closure of the Commonwealth Financial Planning business.

Half Year Ended December 2021 versus June 2021

Funds management income ("statutory basis") decreased \$5 million or 6% on the prior half. This is mainly due to the closure of Commonwealth Financial Planning business in Retail Banking Services. New Zealand & Other increased by \$1 million or 1%, driven by higher average AUM (up 7%) due to favourable investment markets and net inflows, partly offset by the removal of administration fees on KiwiSaver accounts.

Insurance Income (continuing operations basis)

	\$M	\$M	\$M		
Insurance income - "statutory basis"	18	54	91	(67)	(80)

Half Year Ended December 2021 versus December 2020

Insurance income ("statutory basis") was \$18 million, a decrease of \$73 million or 80% on the prior comparative period, driven by higher claims net of reinsurance recoveries, mainly due to increased weather and earthquake event related claims.

Half Year Ended December 2021 versus June 2021

Insurance income ("statutory basis") decreased \$36 million or 67% on the prior half due to higher claims net of reinsurance recoveries, mainly due to increased weather and earthquake event related claims, partly offset by lower working claims experience.

Spot number of full-time equivalent staff (FTE) - Australia	37,754	35,761	34,823	6	8

¹ Comparative Information has been restated to conform to the presentation in the current period. Refer to Appendix 4.8 to this Document for further details.

² For further details on remediation costs and other refer to page 19 and Note 7.2 to the Financial Statements.

³ Includes restructuring, separation and transaction costs associated with previously announced divestments. ⁴

Half Year Ended December 2021 versus December 2020

Operating expenses ("statutory basis") excluding remediation costs and other were \$5,601 million, an increase of \$191 million or 4% on the prior comparative period. The key drivers of this movement were:

Staff expenses: increased by \$395 million or 13% to \$3,358 million, mainly driven by increased full-time equivalent staff (FTE) and wage inflation. The average number of FTE increased by 3,890 or 9% from 42,185 to 46,075, primarily to support increased loan application processing and higher financial crime assessment volumes, and the delivery of our strategic investment priorities. In addition, the bank has increased its frontline and technology resources to help our customers and uplift our cyber security and data management capabilities, partly offset by business simplification initiatives.

Occupancy and equipment expenses: decreased by \$90 million or 16% to \$486 million, primarily reflecting benefits from branch and ATM optimisation, and exiting commercial office space as we continue to consolidate our property footprint.

Information technology services expenses: decreased by \$49 million or 5% to \$960 million, primarily driven by lower amortisation and business simplification initiatives. This was partly offset by increased IT infrastructure and maintenance costs including higher cloud computing and storage volumes, and higher software licence costs.

Other expenses: decreased by \$110 million or 14% to \$691 million, primarily driven by [business simplification initiatives] and reduced credit card loyalty redemptions.

⁴ Refer to Note 7.3 to the Financial Statements included in this Document for further information.

Group Performance Analysis (continued)

Operating Expenses (continued)

Restructuring, separation and transaction costs: increased \$45 million or 74% to \$106 million primarily due to the write-down of customer receivables and employee redundancy payments provision related to the partial transfer of Commonwealth Financial Planning to AIA and closure of the remaining CFP business⁴, partly offset by AUSIEX and AHL divestment related costs in the prior comparative period.

Operating expenses to total operating income ratio excluding remediation costs and other (“statutory basis”): increased 20 basis points from 45.5% to 45.7%.

Half Year Ended December 2021 versus June 2021

Operating expenses (“statutory basis”) excluding remediation costs and other increased \$101 million or 2% on the prior half. The key drivers of this movement were:

Staff expenses: increased by \$336 million or 11%, mainly driven by increased FTE and wage inflation. The average number of FTE increased by 2,412 or 6% from 43,663 to 46,075, primarily to support increased loan application processing, higher financial crime assessment volumes and the delivery of our strategic investment priorities. In addition, the bank has increased its frontline and technology resources to help our customers and uplift our cyber security and data management capabilities, partly offset by business simplification initiatives.

Occupancy and equipment expenses: decreased by \$92 million or 16%, primarily reflecting benefits from branch and ATM optimisation, and exiting commercial office space as we continue to consolidate our property footprint.

Information technology services expenses: decreased by \$63 million or 6%, primarily due to reduced IT vendor spend, business simplification benefits and lower amortisation. This was partly offset by increased IT infrastructure and maintenance costs including higher cloud computing and storage volumes, and higher software licence costs.

Other expenses: decreased by \$121 million or 15%, primarily driven by business simplification initiatives, lower discretionary spend and reduced credit card loyalty redemptions.

Restructuring, separation and transaction costs: increased \$41 million or 63% primarily due to the write-down of customer receivables and employee redundancy payments provision related to the partial transfer of Commonwealth Financial Planning to AIA on 30 November 2021, and the subsequent closure of remaining CFP business⁴, partly offset by costs related to the sale of CommInsure General Insurance in the prior half.

Operating expenses to total operating income ratio excluding remediation costs and other (“statutory basis”): increased 180 basis points from 43.9% to 45.7%.

4 Refer to Note 7.3 to the Financial Statements included in this Document for further information.

1 Comparative information has been restated to conform to the presentation in the current half. Refer to Appendix 4.8 to this Document for further details.

2 Included within the operating expenses disclosure on page 24.

3 Includes software capitalised investment spend and non-software capitalised investment spend, primarily related to branch refurbishments and the development of the corporate and supporting offices.

Half Year Ended December 2021 versus December 2020

The Bank has continued to invest in our strategy of building tomorrow's bank today for our customers with \$945 million of investment spend incurred in the half year ended 31 December 2021, an increase of \$89 million or 10% on the prior comparative period. This is primarily driven by an increase of

\$132 million in productivity and growth initiatives partly offset by a reduction of \$23 million in risk and compliance spend.

In the current half, productivity and growth initiatives accounted for 39% of investment spend, an increase of 12% from 27% in the prior comparative period. The Bank has increased focus on strengthening capabilities and extending our leadership in digital, technology and customer-centric product offerings through the ongoing modernisation of our platforms to provide integrated and personalised experiences for our customers.

Group Performance Analysis (continued)

Investment Spend (continued)

The Bank is also innovating for the future through initiatives such as the simplification of our technology platforms, uplifting our payments capabilities, including our new Smart EFTPOS terminal and the New Payments Platform, and ongoing advancement of the digital interface for our home loan and everyday banking customers.

Risk and compliance projects accounted for 41% of investment spend, a decrease of 8% from 49% in the prior comparative period. Risk and compliance initiatives continue to be a priority for the Bank as we continue to build simpler and better foundations.

Infrastructure and branch refurbishment initiatives accounted for 20% of investment spend, with the Bank continuing to uplift cyber security and enhance IT infrastructure.

Key areas of investment across each of the categories are outlined below.

Risk and Compliance

The Bank has continued to increase Group wide capability in the management of financial and non-financial risks as part of a comprehensive program of investment, including:

- Anti-money laundering and counter-terrorism financing (AML/CTF) compliance, including upgrading AML/CTF technology, updating policies and procedures, investing in further capability and improving training of our personnel;
- Strengthening the Bank's operating model and processes for monitoring, managing, reporting and controlling financial crime across all of its operations, including how the Bank engages with and informs AUSTRAC and other regulators;
- Enhancing Customer Risk Assessment capability, and strengthening data controls and processes; and
- Improving processes and systems for additional functionality, improved operational excellence, protection of privacy, and compliance with new regulations including the Comprehensive Credit Reporting Regime, Banking Code of Practice and Open Banking.

Productivity and Growth

The Bank has continued to invest in the following:

- Ongoing development of CommBank applications and digital channels to improve the customer service experience and maintain leadership in digital banking;
- Commercial lending systems to simplify the end-to-end process for loan origination and maintenance, to improve business customer experiences and build Australia's leading business bank;
- Enhancing technology and customer insights to assist merchant customers, including developing a self-service merchant portal and deploying the next generation smart payment device offering;
- Ongoing modernisation of the technology stack to accelerate migration to cloud, in order to reduce the cost of IT ownership, reduce risk and improve delivery agility to respond faster to changing customer needs;
- Simplifying and automating manual back-end processes and systems to improve customer experience, reduce operating costs and digitise end-to-end processes;
- Differentiating our customer proposition through collaboration with our partners on initiatives that create additional features for our core products and our customer experience; and
- Reducing reliance on external vendors and providers by bringing more functions in-house, delivering cost savings and deepening internal capabilities.

Infrastructure and Branch Refurbishment

The Bank has continued to invest in the following:

- Protecting customers and the Bank against cyber security risks and data breaches;
- Improving the resilience and simplicity of the Bank's IT infrastructure and data centres;
- Retail branch refurbishment as our branch design continues to evolve to reflect changes in customer preferences; and
- Development of two sustainably designed, 6 Stars corporate office buildings to replace existing offices as leases expire.

Group Performance Analysis (continued)

Capitalised Software

	Half Year Ended ¹				
	31 Dec 21	30 Jun 21	31 Dec 20	Dec 21 vs Jun 21 %	Dec 21 vs Dec 20 %
	\$M	\$M	\$M		
Opening Balance	1,427	1,334	1,296	7	10
Additions	318	277	276	15	15
Amortisation and write-offs	(160)	(184)	(238)	(13)	(33)
Closing balance	1,585	1,427	1,334	11	19

¹ Comparative information has been restated to conform to the presentation in the current half. Refer to Appendix 4.8 to this Document for further details.

Half Year Ended December 2021 versus December 2020

Capitalised software balance increased \$251 million or 19% to \$1,585 million. The key drivers of the movement were:

Additions: increased by \$42 million or 15% to \$318 million, due to higher capitalised investment spend, particularly in relation to productivity and growth initiatives as the Bank continues to enhance its product offering and customer experiences, strengthen its digital capabilities, modernise technology platforms and innovate for future growth.

Amortisation and write-offs: decreased by \$78 million or 33% to \$160 million, mainly driven by a higher work in progress balances and investment in productivity and growth initiatives with longer amortisation periods.

Half Year Ended December 2021 versus June 2021

Capitalised software balance increased \$158 million or 11% on the prior half. The key drivers of the movement were:

Additions: increased by \$41 million or 15%, due to higher capitalised investment spend, particularly in relation to productivity and growth initiatives as the Bank continues to enhance its product offering and customer experiences, strengthen its digital capabilities, modernise technology platforms and innovate for future growth.

Amortisation and write-offs: decreased by \$24 million or 13%, mainly driven by a higher work in progress balances and investment in productivity and growth initiatives with longer amortisation periods.

Group Performance Analysis (continued)

Loan Impairment Expense (continuing operations basis)

Corporate Centre and Other	23	12	84	92	(73)
Loan impairment (benefit)/expense	(75)	(328)	882	77	(large)

¹ Comparative information has been restated to conform to the presentation in the current half. Refer to Appendix 4.8 to this Document for further details.

Half Year Ended December 2021 versus December 2020

Loan impairment expense was a benefit of \$75 million, a decrease of \$957 million on the prior comparative period. This was driven by:

- A decrease in Retail Banking Services of \$309 million to a benefit of \$5 million, driven by lower collective provisions reflecting an improvement in the economic outlook;
- A decrease in Institutional Banking and Markets of \$302 million to a benefit of \$125 million, driven by lower collective provisions reflecting decreased forward looking adjustments in the aviation sector and an improvement in the economic outlook, and lower individually assessed provisions;
- A decrease in Business Banking of \$246 million or 85% to \$44 million, driven by lower collective provision charges reflecting an improvement in the economic outlook, and lower individually assessed provision charges;
- A decrease in Corporate Centre and Other of \$61 million or 73% to \$23 million, driven by the non-recurrence of a central management overlay taken in the prior comparative period, partly offset by higher individually assessed provision charges in PTBC; and
- A decrease in New Zealand of \$39 million to a benefit of \$12 million, driven by lower collective provisions reflecting an improvement in the economic outlook.

Loan impairment expense annualised as a percentage of average gross loans and acceptances (GLAAs) decreased 24 basis points to -2 basis points.

Half Year Ended December 2021 versus June 2021

Loan impairment expense increased \$253 million or 77% on the prior half. This was driven by:

- An increase in Retail Banking Services of \$160 million or 97%, mainly driven by higher collective provision releases in the prior half;
- An increase in Business Banking of \$106 million, mainly driven by higher collective provision releases in the prior half, partly offset by lower individually assessed provisions;
- An increase in New Zealand of \$20 million or 63%, mainly driven by higher collective provision releases in the prior half; and
- An increase in Corporate Centre and Other of \$11 million or 92%, driven by the non-recurrence of the benefit from the release of a central management overlay in the prior half, partly offset by lower collective provision charges in PTBC; partly offset by
- A decrease in Institutional Banking and Markets of \$44 million or 54%, mainly driven by lower collective provisions reflecting decreased forward looking adjustments in the aviation sector and an improvement in the economic outlook.

Loan impairment expense annualised as a percentage of average gross loans and acceptances (GLAAs) increased 6 basis points.

Half Year Loan Impairment Expense annualised as a percentage of average GLAAs (bpts)

¹ Comparative information has been restated to conform to the presentation in the current half. Refer to Appendix 4.8 to this Document for further details.

Half Year Ended December 2021 versus December 2020

Corporate tax expense ("statutory basis") for the half year ended 31 December 2021 was \$1,905 million, an increase of \$302 million or 19% on the prior comparative period, reflecting a 28.7% effective tax rate.

The rate is below the Australian company tax rate of 30% primarily as a result of the profit earned in offshore jurisdictions that have lower corporate tax rates, and profits of associates which is reflected on an after tax basis.

The 120 basis points decrease in effective tax rate ("statutory basis") from 29.9% to 28.7% was primarily due to the release of foreign currency translation reserves to profit or loss.

Half Year Ended December 2021 versus June 2021

Corporate tax expense ("statutory basis") decreased \$24 million or 1% on the prior half.

The 120 basis point increase in the effective tax rate ("statutory basis") from 27.5% to 28.7% was primarily due to tax losses on disposals in the prior period.

1 Comparative information has been restated to conform to the presentation in the current half. Refer to Appendix 4.8 to this Document for further details.

2 Home loans are presented gross of \$66,167 million of mortgage offset balances (30 June 2021: \$57,813 million; 31 December 2020: \$57,479 million). These balances are required to be grossed up under accounting standards, but are netted down for the calculation of customer interest payments.

3 Loans, bills discounted and other receivables exclude provisions for impairment which are included in other assets.

4 On 21 June 2021, CBA announced that it had entered into an agreement to sell its Australian general insurance business (CommInsure General Insurance) to Hollard Group, the sale is subject to Australian regulatory approvals and other conditions, and is expected to complete in the second half of calendar year 2022. As at 31 December 2021, \$377 million of non-lending interest earning assets and \$668 million of other assets have been reclassified to assets held for sale, and \$952 million of other non-interest bearing liabilities have been reclassified to liabilities held for sale in relation to this business.

On 1 December 2021, CBA completed the sale of a 55% interest in CFS to KKR. The assets and liabilities held for sale in relation to this business have therefore been deconsolidated during the six months ended 31 December 2021, resulting in a decrease in the assets held for sale of \$1,199 million and a decrease in the liabilities held for sale of \$405 million.

5 Transaction and savings deposits includes \$66,167 million of mortgage offset balances (30 June 2021: \$57,813 million; 31 December 2020: \$57,479 million).

6 Term funding from central banks includes the drawn balances of the RBA Term Funding Facility and the RBNZ Funding for Lending Programme and Term Lending Facility.

Half Year Ended December 2021 versus December 2020

Total assets were \$1,150 billion, an increase of \$91 billion or 9% on the prior comparative period, driven by an increase in home loans, non-lending interest earning assets, and business and corporate loans, partly offset by lower other assets, consumer finance balances and assets held for sale.

Total liabilities were \$1,075 billion, an increase of \$91 billion or 9% on the prior comparative period, driven by an increase in transaction and savings deposits, term funding from central banks, other demand deposits, and other interest bearing liabilities, partly offset by a decrease in investment deposits, other non-interest bearing liabilities and debt issues.

The Bank continued to fund a significant portion of lending growth from customer deposits. Customer deposits represented 73% of total funding (31 December 2020: 75%).

Home loans

Home loan balances increased \$47 billion to \$606 billion, reflecting an 8% increase on the prior comparative period. The increase was driven by growth in Retail Banking Services, New Zealand and Business Banking. Domestic home loan growth of 9% was above system growth¹. Proprietary mix for CBA branded home loans increased from 57% to 58% of new business flows, with higher new business application volumes and a continued focus on credit decisioning turn-around times.

Australian home loans amounted to \$539 billion (31 December 2020: \$498 billion) of which 71% were owner occupied, 28% were investment home loans and 1% were lines of credit (31 December 2020: 69% were owner occupied, 29% were investment home loans and 2% were lines of credit).

¹ System source: RBA/APRA/RBNZ

Group Performance Analysis (continued)

Group Assets and Liabilities (continued)

Consumer finance

Consumer finance balances decreased \$1 billion to \$17 billion, a 4% decrease on the prior comparative period, broadly in line with system¹. The decrease was driven by lower consumer demand for unsecured lending.

Business and corporate loans

Business and corporate loans increased \$11 billion to \$226 billion, a 5% increase on the prior comparative period. This was driven by a \$12 billion or 13% increase in Business Banking (above system growth¹) reflecting growth primarily across the Property, Agriculture and Wholesale Trade industries. New Zealand business and rural lending increased \$2 billion or 7% (excluding the impact of FX). Growth in Business Banking and New Zealand was partly offset by a \$3 billion or 3% decline in institutional lending balances primarily due to a reduction in pooled facilities.

Domestic business lending (excluding institutional lending) increased 12%, above system growth¹.

Non-lending interest earning assets

Non-lending interest earning assets increased \$46 billion to \$248 billion, a 23% increase on the prior comparative period. This was mainly driven by an increase in liquid asset balances due to strong customer deposit growth, partly offset by a decrease in the inventory of government bonds.

Other assets

Other assets, including derivative assets, property, plant and equipment and intangibles, decreased \$11 billion to \$52 billion, an 18% decline on the prior comparative period. The decrease was driven by lower derivative assets due to foreign currency and interest rate movements, and lower commodities inventory balances in Institutional Banking and Markets.

Total interest bearing deposits

Total interest bearing deposits increased \$25 billion to \$679 billion, a 4% increase on the prior comparative period. This was primarily driven by growth in transaction, savings and other demand deposits, partly offset by lower investment deposits. The growth in transaction and savings deposits was driven by increased domestic money supply, growth in mortgage offsets, and greater demand for at-call deposits in the low-rate environment.

Domestic household deposits grew 12%, above system growth¹.

Debt issues

Debt issues decreased \$5 billion to \$117 billion, a 4% decrease on the prior comparative period, reflecting lower wholesale funding requirements due to the growth in customer deposit funding and drawdown of the RBA's Term Funding Facility (TFF).

Deposits satisfied the majority of the Bank's funding requirements, however the Group remained active in both domestic and international wholesale debt markets.

Refer to page 48 of this Document for further information on debt programs and issuances for the half year ended 31 December 2021.

Term funding from central banks

Term funding from central banks includes the drawn balance of the RBA Term Funding Facility and the RBNZ Funding for Lending Programme and Term Lending Facility. Term funding from central banks increased \$34 billion to \$53 billion on the prior comparative period, predominately driven by additional drawdown of the RBA Term Funding Facility in the prior half ended June 2021. The Group will be actively managing the maturity profile of the TFF across the 2023 – 2025 financial years through a range of funding sources. Please refer to page 50 for further information.

Other interest bearing liabilities

Other interest bearing liabilities, including loan capital, liabilities at fair value through income statement and amounts due to other financial institutions, increased \$10 billion to \$60 billion, a 20% increase on the prior comparative period. The increase was mainly driven by higher central bank deposits, deposits from other banks and foreign currency term deposits.

Non-interest bearing transaction deposits

Non-interest bearing transaction deposits increased \$43 billion to \$134 billion, a 48% increase on the prior comparative period. The growth was driven by increased domestic money supply and higher demand for at-call deposits in the low-rate environment.

Other non-interest bearing liabilities

Other non-interest bearing liabilities, including derivative liabilities, decreased \$17 billion to \$30 billion, a 36% decrease on the prior comparative period. The decrease was mainly driven by lower derivative liabilities primarily due to foreign currency and interest rate movements.

Half Year Ended December 2021 versus June 2021

Total assets increased \$58 billion or 5% on the prior half, primarily driven by increased home loans, non-lending interest earning assets and business and corporate loans, partly offset by lower other assets and consumer finance balances.

Total liabilities increased \$62 billion or 6% on the prior half, reflecting an increase in deposits, debt issues, liabilities held for sale and other interest bearing liabilities, partly offset by a decline in other non-interest bearing liabilities.

Customer deposits represented 73% of total funding (30 June 2021: 73%).

Home loans

Home loan balances increased \$26 billion or 5% on the prior half driven by growth in Retail Banking Services, New Zealand and Business Banking. Domestic home loan growth of 5% was above system growth¹. Proprietary mix for CBA branded home loans decreased from 62% to 58% of new business flows due to stronger broker flows, with higher new business application volumes and a continued focus on credit decisioning turnaround times.

Consumer finance

Consumer finance balances decreased 2% on the prior half to \$17 billion, broadly in line with system¹. The decrease was driven by lower consumer demand for unsecured lending.

¹ System source: RBA/APRA/RBNZ

Group Performance Analysis (continued)

Group Assets and Liabilities (continued)

Business and corporate loans

Business and corporate loans increased \$6 billion or 3% on the prior half, driven by \$6 billion or 5% growth in Business Banking reflecting growth primarily across the Property, Wholesale Trade and Health industries, and New Zealand business and rural lending increased 2% (excluding the impact of FX).

Domestic business lending (excluding institutional lending, which was flat) increased 5%, above system growth¹.

Non-lending interest earning assets

Non-lending interest earning assets increased \$28 billion or 13% on the prior half. This was mainly driven by an increase in liquid asset balances due to strong customer deposit growth, partly offset by a decrease in the inventory of government bonds.

Other assets

Other assets, including derivative assets, property, plant and equipment and intangibles, decreased \$3 billion or 5% on the prior half, driven by lower derivative assets primarily due to foreign currency and interest rate movements.

Total interest bearing deposits

Total interest bearing deposits increased \$27 billion or 4% on the prior half. This was driven by growth in transaction, savings and other demand deposits due to increased domestic money supply and demand for at-call deposits in the low-rate environment.

Domestic household deposits grew 10%, above system growth¹.

Debt issues

Debt issues increased \$14 billion or 14% on the prior half to meet the Group's future funding requirements.

Refer to page 48 for further information on debt programs and issuances for the half year ended 31 December 2021.

Term funding from central banks

Term funding from central banks increased \$1 billion or 2% to \$53 billion on the prior half, driven by additional drawdown of the RBNZ Funding for Lending Programme and Term Lending Facility.

Other interest bearing liabilities

Other interest bearing liabilities, including loan capital, liabilities at fair value through income statement and amounts due to other financial institutions was flat on the prior half.

Non-interest bearing transaction deposits

Non-interest bearing transaction deposits increased \$22 billion or 19% on the prior half. The growth was driven by increased domestic money supply and higher demand for at-call deposits in the low-rate environment.

Other non-interest bearing liabilities

Other non-interest bearing liabilities, including derivative liabilities, decreased \$3 billion or 10% on the prior half, driven by lower unsettled trades balances.

	\$M	\$M	\$M		
Provisions for impairment losses					
Collective provisions	5,062	5,311	5,943	(5)	(15)
Individually assessed provisions	792	900	872	(12)	(9)
Total provisions for impairment losses	5,854	6,211	6,815	(6)	(14)
Less: Provision for off Balance Sheet exposures	(100)	(111)	(137)	(10)	(27)
Total provisions for loan impairment	5,754	6,100	6,678	(6)	(14)

Half Year Ended December 2021 versus December 2020

Total provisions for impairment losses as at 31 December 2021 were \$5,854 million, a decrease of \$961 million or 14% on the prior comparative period. The decrease was driven by:

Collective provisions

- Corporate collective provisions decreased \$474 million or 18% to \$2,098 million. This mainly reflects an improvement in the economic outlook and lower forward looking adjustments in sectors of concern, in particular aviation.
- Consumer collective provisions decreased \$407 million or 12% to \$2,964 million. This primarily reflects an improvement in the economic outlook and lower consumer finance balances with reduced arrears, partly offset by increased forward looking adjustments reflecting uncertainties due to the ongoing impacts of COVID-19.

Individually assessed provisions

- Consumer individually assessed provisions decreased \$55 million or 26% to \$153 million. This was mainly driven by lower impairments in the Australian home lending portfolio reflecting growth in house prices over the period.
- Corporate individually assessed provisions decreased \$25 million or 4% to \$639 million. This was mainly driven by write-offs and write-backs across various industry sectors, partly offset by the impairment of a small number of large exposures.

Half Year Ended December 2021 versus June 2021

Total provisions for impairment losses decreased \$357 million or 6% on the prior half. The decrease was driven by:

Collective provisions

- Corporate collective provisions decreased \$184 million or 8%. This mainly reflects an improvement in the economic outlook and lower forward looking adjustments in sectors of concern, in particular aviation.
- Consumer collective provisions decreased \$65 million or 2%. This primarily reflects an improvement in the economic outlook, and lower consumer finance balances with reduced arrears, partly offset by increased forward looking adjustments reflecting uncertainties due to COVID-19.

Individually assessed provisions

- Corporate individually assessed provisions decreased \$72 million or 10%. This was mainly driven by write-offs and write-backs across various industry sectors, partly offset by the impairment of a small number of large exposures.
- Consumer individually assessed provisions decreased \$36 million or 19%. This was mainly driven by lower impairments in the Australian home lending portfolio reflecting growth in house prices over the period.

2 Investment grades based on CBA grade in S&P equivalent.

3 Loan to value ratio (LVR) defined as current balance as a percentage of the current valuation on Australian home loan portfolio.

4 Any amount ahead of monthly minimum repayment (including offset facilities).

Provision Ratios and Impaired Assets

As at 31 December 2021, total provisions as a proportion of credit RWA decreased 13 basis points on the prior half to 1.50%. This was driven by lower collective provisions, mainly reflecting an improvement in the economic outlook, and lower individually assessed provisions, reflecting corporate write-offs and write-backs, and lower Australian home lending impairments.

Gross impaired assets were \$3,482 million, an increase of \$73 million or 2% on the prior half, mainly driven by an increase in restructured home loans within ASB and the impairment of a small number of single name exposures in the corporate portfolio. Gross impaired assets as a proportion of GLAAs were 0.41%, a decrease of 1 basis point on the prior half. Provision coverage for the impaired asset portfolio was 30.07%, a decrease of 392 basis points on the prior half, mainly driven by an increase in gross impaired assets and a reduction in individually assessed provisions, primarily reflecting write-offs and write-backs across various industry sectors and growth in house prices over the period.

COVID-19 Support

From March 2020, the Bank extended a number of support measures for customers impacted by COVID-19, which included loan repayment deferral arrangements and the origination of loans under the Government's Small and Medium Enterprises (SME) Guarantee Scheme and SME Recovery Loan Scheme. Under these schemes, the Government guarantees 50-80% of new loans issued to SMEs. By December 2021, the vast majority of customers on repayment deferral arrangements had returned to regular repayments on their loans. The Group's remaining support measures have been extended to February 2022.

For further details on loan modifications relating to COVID-19, refer to page 107 of this Document.

Group Operations and Business Settings (continued)

Loan Impairment Provisions and Credit Quality (continued)

Retail Portfolio Asset Quality

Consumer loan impairment expense (LIE) as a percentage of average gross loans and acceptances (GLAAs) was nil, an increase of 6 basis points on the prior half, mainly reflecting higher collective provision releases in the prior half and increased forward looking adjustments reflecting uncertainties due to COVID-19.

Home loan 90+ days arrears were 0.52%, a decrease of 12 basis points on the prior half, mainly driven by an improvement in economic conditions and customer origination quality, and balance growth. Credit cards and Personal loans 90+ days arrears were 0.49% and 0.97% respectively, a decrease of 12 basis points for both on the prior half, driven by an improvement in customer origination quality and economic conditions.

The home loan dynamic LVR was 46.22%, a decrease of 274 basis points on the prior half, driven by growth in house prices over the period. The home lending book remains well secured and the majority of home lending customers remain in advance of scheduled repayments.

Loan Impairment Provisions and Credit Quality (continued)

Corporate Portfolio Asset Quality

Corporate troublesome exposures were \$3.3 billion, a decrease of \$0.8 billion or 20% on the prior half, mainly driven by refinancing, repayments and upgrades supported by improved economic conditions, partly offset by the downgrade of a small number of larger exposures into the troublesome portfolio across a range of sectors.

Investment grade rated exposures increased 70 basis points on the prior half to 69.0% of overall portfolio risk graded counterparties, reflecting the impact of upgrades and increased exposures to the government sector.

Corporate LIE as a percentage of gross loans and acceptances was -7 basis points, an increase of 6 basis points on the prior half, mainly reflecting higher collective provision releases in the prior half.

Industry Exposure and Asset Quality

The distribution of the Bank's credit exposures by sector remained relatively consistent during the half. The largest movement was an increase in the Government, Administration & Defence sector of 60 basis points, from 15.3% to 15.9% of the Bank's total committed exposure, driven by an increase in central bank cash holdings as the Bank re-weighted its portfolio as part of ongoing liquidity management activities.

Movements in troublesome and impaired assets (TIA) were mixed across sectors, as total TIA decreased \$692 million on the prior half to \$6,831 million.

TIA as a percentage of total committed exposures (TCE) was 0.53%, a decrease of 8 basis points on the prior half reflecting:

- Entertainment, Leisure & Tourism (down 202 basis points) mainly driven by the refinancing of a small number of single name exposures;
- Personal & Other Services (down 116 basis points) driven by the reduction of a single name impaired exposure;
- Transport & Storage (down 92 basis points) mainly driven by the refinancing and upgrade of a small number of single name exposures;
- Retail Trade (down 83 basis points) mainly driven by the upgrade of a single name exposure;
- Manufacturing (down 74 basis points) mainly driven by the write-off of a single name exposure;
- Electricity, Water & Gas (down 70 basis points) mainly driven by the upgrade of a single name exposure;
- Agriculture & Forestry (down 63 basis points) driven by refinancing, repayments and upgrade of a small number of single name exposures;
- Education (down 37 basis points) mainly driven by the upgrade of a small number of single name exposures;
- Business Services (down 32 basis points) mainly driven by the upgrade of a single name exposure; and
- Construction (down 31 basis points) mainly driven by the reduction of a single name impaired exposure; partly offset by
- Health & Community Services (up 116 basis points) mainly driven by the downgrade of a single name exposure; and
- Mining, Oil & Gas (up 64 basis points) mainly driven by the downgrade of a single name exposure.

Sector	Total Committed Exposures (TCE)		Troublesome and Impaired Assets (TIA)		TIA % of TCE

Summary Group Capital Adequacy Ratios	As at				
	31 Dec 21 %	30 Jun 21 %	31 Dec 20 %	Dec 21 vs Jun 21 %	Dec 21 vs Dec 20 %
Common Equity Tier 1	11.8	13.1	12.6	(130)bpts	(80)bpts
Tier 1	14.0	15.7	15.0	(170)bpts	(100)bpts
Tier 2	4.0	4.1	3.9	(10)bpts	10 bpts
Total Capital (APRA)	18.0	19.8	18.9	(180)bpts	(90)bpts
Common Equity Tier 1 (Internationally Comparable)¹	18.4	19.4	18.7	(100)bpts	(30)bpts

¹ Aligns with the 13 July 2015 APRA study titled "International capital comparison study".

Capital – CET1 (APRA)

-130bpts in 1H22

¹ The 2021 final dividend included the on-market purchase of \$570 million of shares (CET1 impact of 12 basis points) in respect of the Dividend Reinvestment Plan.

² Excludes net equity accounted profits from associates as they are capital neutral with offsetting increases in regulatory capital deductions.

³ Excludes impact of FX movements.

Capital Position

The Group's CET1 ratio (APRA) was 11.8% as at 31 December 2021, a decrease of 130 basis points from 30 June 2021 and a decrease of 80 basis points from 31 December 2020. The CET1 ratio was above APRA's 'unquestionably strong' benchmark of 10.5% and consistently well in excess of regulatory minimum capital adequacy requirements at all times throughout the half year ended 31 December 2021.

Key drivers of the change in CET1 for the 6 months ended 31 December 2021 were the completion of the \$6 billion off-market share buy-back in October 2021 (-133 basis points), the 2021 final dividend (-79 basis points) in which the DRP was satisfied in full by the on-market purchase of shares and higher total RWA (-54 basis points), partly offset by capital generated from earnings (+98 basis points), the completion of the majority sale of Colonial First State (CFS) (+32 basis points) on 1 December 2021 and other regulatory adjustments (+6 basis points).

Further details on the movements in RWA are provided on page 41.

Internationally Comparable Capital Position

The Group's CET1 ratio as measured on an internationally comparable basis was 18.4% as at 31 December 2021, placing it amongst the top quartile of international peer banks.

Capital Initiatives

In addition to the off-market share buy-back, the following significant capital initiatives were undertaken during the half year ended 31 December 2021:

Common Equity Tier 1 Capital

- The DRP in respect of the 2021 final dividend was satisfied in full by the on-market purchase of shares. The participation rate for the final dividend was 16.1%.

Additional Tier 1 Capital

- In October 2021, the Bank redeemed AUD1,450 million CommBank PERLS VIII Capital Notes that are Basel III compliant Additional Tier 1 capital.

Tier 2 Capital

The Group issued the following Basel III compliant subordinated notes:

- AUD1,500 million and AUD135 million in August 2021; and
- AUD136 million and JPY14 billion in September 2021.

The Group redeemed the following Basel III compliant subordinated notes:

- USD750 million in October 2021;
- JPY20 billion and two JPY10 billion in December 2021; and
- ASB redeemed NZD400 million in December 2021.

Group Operations and Business Settings (continued)

Capital (continued)

Risk Weighted Assets (RWA)

Total Group Risk Weighted Assets

Total RWA increased \$21.2 billion or 5% on the prior half to \$471.9 billion driven by growth in Interest Rate Risk in the Banking Book (IRRBB) RWA, Credit Risk RWA and Traded Market Risk RWA.

1 Includes -3 basis points impact from FX movement, which is capital neutral with offsetting impact in regulatory capital deductions.

Credit Risk Weighted Assets

Credit Risk RWA increased \$9.1 billion or 2% on the prior half to \$390.7 billion. The key drivers of this movement included:

- Volume growth (increase of \$13.5 billion) across commercial portfolios, residential mortgages, sovereign and securitisation exposures, partly offset by a reduction in unsecured retail portfolios, bank exposures and derivatives; and
- Foreign currency movements (increase of \$1.2 billion); partly offset by
- Credit quality movement (decrease of \$4.5 billion) driven by improvements across non-retail portfolios, partly offset by an increase in residential mortgage risk weights due to lower proportion of customers in advance; and
- Data and methodology, credit risk estimates and other changes (decrease of \$1.1 billion).

1 Credit quality includes portfolio mix.

2 Includes data and methodology, credit risk estimates changes and regulatory treatments.

Traded Market Risk Weighted Assets

Traded Market Risk RWA increased \$2.5 billion or 30% on the prior half to \$10.8 billion. This was driven by an APRA capital overlay to be held until modelling work is completed by the Group and approved by APRA in relation to the revised Risks-Not-In-VaR (RNIV) framework.

Interest Rate Risk Weighted Assets

IRRBB RWA increased \$9.7 billion or 67% on the prior half to \$24.4 billion. In order to avoid significant earnings volatility through a rate cycle, the Group's equity is invested over a three year investment term (known as "the duration of equity"). Due to the increased market rate volatility in the current half, in particular the significant increase in two and three year market swap rates in recent months, the amount of IRRBB capital recognised has increased, mainly reflecting the valuation differences to equity invested over a one year term.

Operational Risk Weighted Assets

Operational Risk RWA decreased \$0.1 billion on the prior half to \$46.1 billion. As at 31 December 2021, the Operational Risk RWA includes a \$6.25 billion add-on required by APRA.

The Group regularly reviews and updates its operational risk RWA to reflect material changes in its Operational Risk profile in accordance with the Operational Risk Management Framework and governance processes.

Basel Regulatory Framework

Background

APRA has implemented a set of capital, liquidity and funding reforms based on the Basel Committee on Banking Supervision (BCBS) "Basel III" framework. The objectives of the reforms are to increase the quality, consistency and transparency of capital, to enhance the risk coverage framework, and to reduce systemic and pro-cyclical risk. The APRA prudential standards require a minimum CET1 ratio or Prudential Capital Requirement (PCR) of 4.5% effective from 1 January 2013. An additional CET1 capital conservation buffer (CCB) of 3.5%, inclusive of a Domestic Systemically Important Bank (D-SIB) requirement of 1% and a countercyclical capital buffer (CCyB)¹ of 0% (effective from 1 January 2016), brings the minimum CET1 ratio requirement to 8%.

1 In December 2021, APRA announced that the CCyB for Australian exposures will remain at 0%. The Bank has limited exposures to those offshore jurisdictions in which a CCyB in excess of 0% has been imposed.

Group Operations and Business Settings (continued)

Capital (continued)

Unquestionably Strong Capital Ratios

In July 2017, APRA released an information paper establishing the quantum of additional capital required for the Australian banking sector to have capital ratios that are unquestionably strong.

Under the existing capital framework, APRA's expectation is that the Australian major banks will operate for the majority of the year with a CET1 ratio of 10.5% or more. As at 31 December 2021, the Group's CET1 ratio was 11.8%, and was above the 10.5% benchmark for the entire 2021 calendar year.

In November 2021, APRA finalised the revisions to the overall design of the capital framework, to be implemented on 1 January 2023. These revisions will result in changes to the calculation of RWA and will therefore result in changes to the presentation of bank capital ratios. APRA expects that capital ratios will increase, as the amount of RWA will likely fall.

The Group intends to undertake further capital management via an on-market buy-back of up to \$2 billion. The buy-back is expected to reduce the CET1 ratio by approximately 42 basis points, making its pro forma CET1 ratio as at 31 December 2021 11.4%. Post the buy-back, CBA expects to remain well placed to accommodate changes under APRA's new capital framework.

Regulator COVID-19 capital announcements

Capital Announcements

In July 2020, APRA issued guidance requiring banks to preserve capital through retaining at least half of their earnings during the period of disruption caused by COVID-19. On 15 December 2020, APRA announced that this guidance will no longer apply from calendar year 2021. Nevertheless, in determining the appropriate level of dividends, APRA expects banks to moderate dividend payout ratios to ensure they are sustainable, taking into account the outlook for profitability, capital and the broader environment.

In April 2020, the Reserve Bank of New Zealand (RBNZ) also issued guidance restricting the distribution of dividends by banks in New Zealand due to COVID-19. On 31 March 2021, the RBNZ announced that this guidance has been eased, allowing banks to pay up to a maximum of 50% of their earnings as dividends. This restriction will remain in place until 1 July 2022, at which point, the RBNZ has stated that it intends to normalise the dividend settings by removing the restrictions entirely, subject to no significant worsening in economic conditions. Dividends from the Bank's New Zealand subsidiary, ASB, only affect the Group's Level 1 CET1 capital ratio. As at 31 December 2021, the Group's Level 1 CET1 capital ratio was 12.0%, well above regulatory requirements, and as such, the Group is well placed to absorb the restriction of dividends.

COVID-19 Customer Support Measures

The Group continues to extend support measures for customers impacted by COVID-19, which includes the origination of loans under the Government's Small and Medium Enterprises (SME) Guarantee Scheme and SME Recovery Loan Scheme.

The SME Guarantee Scheme and SME Recovery Loan Scheme were established by the Commonwealth Government to support economic recovery and provide continued assistance to businesses, and may be regarded as eligible guarantees by the government for risk weighting purposes. ASB has participated in a similar scheme in New Zealand. The Group will continue to provision for these loans under relevant accounting standards.

The Group's temporary loan deferral programs concluded in November 2021, with the vast majority of customers returning to regular repayments on their loans. For eligible borrowers, this was not treated as a period of arrears or a loan restructuring.

Pillar 3 Disclosures

Details on the market disclosures required under Pillar 3, per APRA prudential standard APS 330 "Public Disclosure", are provided on the U.S. Investor Website.

Regulatory Reforms

APRA

Implementation of revised regulatory capital framework

From 1 January 2023, APRA will implement its revisions to the ADI capital framework. The objectives of these revisions are to increase the risk sensitivity within the capital framework, to enhance the ability of ADIs to respond flexibly to future stress events, and to improve the comparability of the Australian framework with international standards.

APRA's revisions, which were finalised in November 2021, include the following changes with respect to major Internal Ratings-based (IRB) ADIs such as CBA:

- A minimum CET1 Capital Ratio of 10.25%, which is comprised of a minimum PCR of 4.5% and a CCB of 5.75%, which includes a D-SIB buffer of 1% and a baseline CCyB set at 1%. The CCyB, which may be varied by APRA in the range of 0-350 basis points, can be released in times of systemic stress and post-stress recovery;
- Enhancing risk sensitivity in the residential mortgage and commercial property portfolio, through greater allowance of an ADI's own models to measure credit risk capital, and higher capital requirements for high-risk segments such as interest only and investor mortgages;
- Implementing a 72.5% output floor to limit the gap in capital requirements between standardised and IRB ADIs; and
- Further aligning the RWA of New Zealand banking subsidiaries at the consolidated group level by adopting a revised version of the RBNZ capital framework.

Group Operations and Business Settings (continued)

Capital (continued)

Further APRA Revisions

In January 2022, APRA changed its approach on equity exposures to banking and insurance subsidiaries of ADIs under the revised APS 111 “Capital Adequacy: Measurement of Capital”. The revised standard requires each individual equity exposure to be risk-weighted at 250% up to 10% of the ADI’s Level 1 CET1 capital, with any excess above that threshold to be deducted from Level 1 CET1 capital. The revision will result in an uplift to the Group’s Level 1 CET1 December 2021 capital ratio of 20 basis points. There is no impact to the Group’s Level 2 CET1 capital ratio.

From 1 January 2022, the APRA requirements released under the final APS 222 “Associations with Related Entities” will come into effect. The revised standard is intended to strengthen the ability of ADIs to monitor, limit and control risk arising from transactions and other associations with related entities.

From 1 January 2022, the APRA requirements released under the final APS 220 “Credit Risk Management” will come into effect. The revised standard is broader in application covering credit standards as well as the ongoing monitoring and management of credit portfolios.

From 1 January 2024, D-SIBs, including CBA, will be required to hold an additional Total Capital requirement of 3% of RWA to satisfy APRA’s loss-absorbing capital requirements. This will increase to 4.5% from 1 January 2026.

In January 2024, changes to APS 117 “Capital Adequacy: Interest Rate Risk in the Banking Book” will be implemented by APRA. This is expected to be followed by changes to APS 116 “Capital Adequacy: Market Risk”, also known as the Fundamental Review of the Trading Book, and APS 180 “Capital Adequacy: Counterparty Credit Risk” in 2025. APRA is yet to commence consultation on the changes to APS 116 and APS 180.

Reserve Bank of New Zealand (RBNZ)

In June 2021, the RBNZ finalised its bank capital adequacy requirements. These requirements include the RWA of New Zealand internal ratings-based (IRB) banks, such as ASB Bank Limited, increasing to approximately 90% of that required under a standardised approach. In addition, for those banks deemed systemically important, including ASB, the Tier 1 capital requirement will increase to 16% of RWA, of which 13.5% must be in the form of CET1 capital. Tier 2 capital will remain in the framework, and can contribute up to 2% of the 18% minimum Total Capital ratio. Existing Additional Tier 1 and Tier 2 instruments issued by New Zealand banks will no longer be eligible under RBNZ’s new capital criteria.

These reforms have been phased in from 1 October 2021 with full implementation on 1 July 2028.

Group Operations and Business Settings (continued)

Financial System Regulation in the United States

We have elected to be treated as a Financial Holding Company (“FHC”) by the Board of Governors of the Federal Reserve System in the United States (“FRB”). The FRB is the “umbrella” supervisor with jurisdiction over FHCs, including us. A FHC is allowed to engage, or acquire companies engaged, in the United States in activities that are determined by the FRB and the Secretary of the Treasury to be financial in nature or incidental thereto, and activities that are determined by the FRB to be complementary to financial activities.

Under the Bank Holding Company Act of 1956 (“BHC Act”), the activities of a FHC are subject to restrictions if it is determined that the FHC (in our case, at the Group level) ceases to be “well managed” or “well capitalized” or is the subject of an enforcement action requiring it to maintain a specific level of capital.

We are subject to U.S. federal laws and regulations, including the International Banking Act of 1978 (“IBA”). Under the IBA, all branches and agencies of foreign banks in the United States are subject to reporting and examination requirements similar to those imposed on domestic banks that are owned or controlled by U.S. bank holding companies. As a federally licensed branch regulated primarily by the Office of the Comptroller of the Currency in the United States (the “OCC”), the Group’s New York branch can engage in activities permissible for national banks, with the exception that the Group’s New York branch may not accept retail deposits. The New York branch does not accept retail deposits (only institutional and corporate deposits) and thus is not subject to the supervision of the Federal Deposit Insurance Corporation (“FDIC”).

Under the IBA, the FRB has the authority to impose reserve requirements on deposits maintained by U.S. branches and agencies of foreign banks, including the Group’s New York branch. The Group’s New York branch must maintain its accounts and records separate from those of the Group generally and must comply with such additional requirements as may be prescribed by the OCC. The IBA and the BHC Act also affect the Group’s ability to engage in non-banking activities in the United States.

Under the IBA, a federal branch of a non-U.S. bank is subject to receivership by the OCC to the same extent as a national bank. The OCC may take possession of the business and property of a federal branch. The OCC has at its disposal a wide range of supervisory and enforcement tools for addressing violations of laws and regulations, and breaches of safety and soundness, which can be imposed upon federal branches. The OCC may remove federal branch management and assess civil money penalties. In certain circumstances, the OCC may also terminate a federal branch license at its own initiative or at the recommendation of the FRB.

The Group is subject to certain provisions of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (“Dodd-Frank”). Dodd-Frank regulates many aspects of the business of banking in the United States and internationally.

Section 13 of the BHC Act and its implementing regulations, commonly referred to as the “Volcker Rule,” among other things, generally prohibit banks and their affiliates from engaging in certain “proprietary trading” (but allows certain activities such as underwriting, market making-related and risk-mitigating hedging activities) and limits the sponsorship of, and investment in, private equity funds and hedge funds, subject to certain important exceptions and exemptions.

Other Dodd-Frank regulations impose minimum margin requirements on uncleared swaps and security-based swaps, require the central execution and clearing of standardized over-the-counter (“OTC”) derivatives on regulated trading platforms and clearing houses, set limits on the size of positions in certain types of derivatives, require the reporting of transaction data to regulated swap data repositories and provide for registration, heightened supervision and regulation of OTC derivatives dealers and major market participants. We are a provisionally registered swap dealer under the U.S. Commodity Exchange Act and Commodity Futures Trading Commission (“CFTC”) regulations. In addition, other affiliated entities within the Group could become subject to swap dealer registration, depending on the level of their swap dealing activities with counterparties that are U.S. persons and with certain counterparties whose swap obligations are guaranteed by U.S. persons. Even if not required to be registered with the CFTC, such entities are potentially subject to certain of the CFTC’s regulatory requirements in connection with transactions that they enter into with counterparties that are U.S. persons and certain other categories of counterparties. Although we are not a registered security-based swap dealer with the U.S. Securities and Exchange Commission (“SEC”), we may register at such time as we are required or consider appropriate. In addition, as is the case with respect to CFTC rules, certain of the SEC’s requirements for security-based swap transactions will apply to our transactions regardless of whether we are registered as a security-based swap dealer.

In 2020, the CFTC adopted rules regarding cross-border transactions, which, among other things, permit “substituted compliance” by swap dealers located in non-U.S. jurisdictions with regulatory schemes determined by the CFTC to be comparable to its own. The CFTC had previously made such a determination with respect to certain aspects of Australian law and regulation pursuant to guidance issued by the CFTC prior to its adoption of the cross-border rules, and that determination remains in effect under the new rules. Pursuant to that determination, we are able to rely on substituted compliance with respect to certain aspects of CFTC rules in connection with transactions outside the U.S. with non-U.S. counterparties.

As part of the Dodd-Frank regulatory regime, the FRB, Farm Credit Administration, FDIC, Federal Housing Finance Agency and the OCC (collectively, referred to as the prudential regulators) have adopted rules imposing initial and variation margin requirements on transactions in uncleared swaps and security-based swaps entered into by registered swap dealers subject to prudential regulation.

As we are supervised by the FRB and operate a New York Branch that is supervised by the OCC, we are subject to these rules, and must comply with the requirements thereunder to collect and post initial and variation margin in respect of in-scope trading with in-scope counterparties. Similar to the CFTC’s cross-border rules, the rules of the prudential regulators allow non-U.S. swap dealers, such as us, to comply with the applicable laws of non-U.S. jurisdictions in lieu of compliance with their margin rules, or otherwise not to comply with U.S. margin rules, with respect to certain categories of transactions and counterparties. The prudential regulators’ rules also provide for full substituted compliance with non-U.S. margin requirement, in lieu of compliance with the prudential regulators’ rules but only if the prudential regulators make determinations of comparability with respect to the non-U.S. regimes.

Group Operations and Business Settings (continued)

Financial System Regulation in the United States (continued)

We are also subject to “enhanced prudential regulations” under Reg. YY, Subpart N, which was adopted pursuant to Dodd-Frank Section 165, and which requires quarterly and annual certification of compliance with the capital adequacy and risk oversight requirements thereof. Dodd-Frank also requires us to submit U.S. resolution plans to the FRB and FDIC. We submitted our most recent reduced resolution plan in December 2018. In October 2019, the FRB and the FDIC issued final rules that apply tailored requirements on resolution planning and a modification of the enhanced prudential standards applicable to foreign banking organizations, depending on the size of their U.S. operations and their risk profile. Under the final rules, we continued to be a triennial reduced filer as of December 31, 2021. If we remain a triennial reduced filer, we will be required to submit our next reduced resolution plan on or before July 1, 2022.

We conduct our debt capital markets activities in the United States through Commonwealth Australia Securities, LLC (“CAS”). CAS is a broker-dealer licensed by the SEC and supervised by the SEC and the Financial Industry Regulatory Authority (“FINRA”). CAS is also licensed in the states and territories where it does business. The SEC and FINRA have extensive compliance requirements that apply to CAS, including record-keeping, transaction and communications monitoring, supervision of CAS staff, internal policies and procedures, and many others that govern the day-to-day business of CAS. CAS is subject to periodic reviews of its operations by the SEC and FINRA.

The U.S. Foreign Account Tax Compliance Act (“FATCA”) requires financial institutions to undertake specific customer due diligence and provide information on account holders (including substantial owners for certain entities) who are U.S. citizens or tax residents to the United States Federal tax authority, the Internal Revenue Service, either directly or via local tax authorities. If the required customer data collection due diligence and provision of account holder information is not undertaken and provided in a manner and form meeting the applicable requirements, the Group and/or persons owning assets in accounts with Group members may be subjected to a 30% withholding tax on certain amounts. While such withholding may currently apply only to certain payments derived from sources within the United States, no such withholding will be imposed on any payments derived from sources outside the United States that are made prior to the date that is two years after the date on which final U.S. regulations defining the term “foreign passthru payment” are enacted. There is currently no proposed or final definition of “foreign passthru payment” (though legislative requirements and timeframes may be subject to change) and it is therefore impossible to know whether certain payments could possibly be treated as foreign passthru payments.

The discussion above reflects proposed U.S. regulations that eliminate withholding on certain gross proceeds payments and delay the effective date for withholding on payments from sources outside the United States. The U.S. Treasury Department has indicated that taxpayers may rely on the proposed regulations. The discussion assumes that the regulations will be finalized in their current form and will be effective retroactively.

In addition to FATCA, the U.S. may require the Group in certain circumstances to provide certain information to U.S. payers

(withholding agents, custodians, etc.), and the Group and/or its customers may face withholding if the Group does not provide such information in compliance with the applicable rules and regulations. Moreover, even if the Group does provide the required information, withholding may still be applicable to certain U.S. source payments.

In the event that any country in which we operate does not have or enforce an Intergovernmental Agreement with the United States, and that country has local law impediments preventing compliance with FATCA, the Group may also be subject to broader compliance issues, significant withholding exposure and other operational impacts.

A major focus of U.S. governmental policies affecting financial institutions has been combatting money laundering, terrorist financing and violations of U.S. sanctions. The Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 (the “Patriot Act”) substantially broadened the scope of U.S. anti-money laundering laws by imposing significant compliance and due diligence obligations, identifying crimes and stipulating penalties and expanding the extra-territorial jurisdiction of the U.S. The U.S. Treasury Department has issued a number of regulations implementing various requirements of the Patriot Act, and other U.S. laws with respect to sanctions, that apply to U.S. financial institutions, including subsidiaries and branches of foreign banks such as our U.S. broker-dealer subsidiary and our New York branch.

Those regulations require financial institutions operating in the United States to maintain appropriate policies, procedures and controls to detect, prevent, and report money laundering and terrorist financing and to verify the identity of their customers. They also require financial institutions in the United States to operate in compliance with U.S. sanctions regimes. In addition, the U.S. bank regulatory agencies have imposed heightened standards and U.S. law enforcement authorities have been taking a more active role, resulting in intensified enforcement of such matters. Recent resolutions of enforcement actions involving other global financial institutions have involved the payment of substantial penalties, agreements with respect to future operation of their businesses and actions with respect to relevant personnel.

Failure of a financial institution to maintain and implement adequate policies and procedures to combat money laundering and terrorist financing, and to comply with U.S. sanctions regimes, could have serious legal and reputational consequences for the financial institution, as well as result in the imposition of civil, monetary and criminal penalties.

In January 2021, the Anti-Money Laundering Act of 2020 (“AMLA”) was enacted. The AMLA is intended to comprehensively reform and modernize U.S. anti-money laundering laws. Among other things, the AMLA codifies a risk-based approach to anti-money laundering compliance for financial institutions; requires the development of standards by the U.S. Department of the Treasury for evaluating technology and internal processes for anti-money laundering compliance; and expands enforcement- and investigation-related authority, including a significant expansion in the available sanctions for certain violations. Many of the statutory provisions in the AMLA will require additional rulemakings, reports and other measures, and the effects of the AMLA will depend on, among other things, rulemaking and implementation guidance.

Leverage Ratio

	As at ¹				
	31 Dec 21	30 Jun 21	31 Dec 20	Dec 21 vs Jun 21 %	Dec 21 vs Dec 20 %
	\$M	\$M	\$M		
Summary Group Leverage Ratio					
Tier 1 Capital (\$M)	66,027	70,874	67,927	(7)	(3)
Total Exposures (\$M) ²	1,240,349	1,178,061	1,126,562	5	10
Leverage Ratio (APRA) (%)	5.3	6.0	6.0	(70)bpts	(70)bpts
Leverage Ratio (Internationally Comparable) (%)³	6.2	6.9	6.8	(70)bpts	(60)bpts

1 Comparative information has been restated to conform to the presentation in the current half. Refer to Appendix 4.8 to this Document for further details.

2 Total exposures is the sum of on Balance Sheet exposures, derivatives, Securities Financing Transactions (SFTs), and off Balance Sheet exposures, net of any Tier 1 regulatory deductions, as outlined in APS 110 "Capital Adequacy".

3 The Tier 1 Capital included in the calculation of the internationally comparable leverage ratio aligns with the 13 July 2015 APRA study titled "International capital comparison study", and includes Basel III non-compliant Tier 1 instruments that are currently subject to transitional rules.

The Group's Leverage Ratio, defined as Tier 1 Capital as a percentage of total exposures, was 5.3% at 31 December 2021 on an APRA basis and 6.2% on an internationally comparable basis. The ratio decreased 70 basis points on both an APRA and internationally comparable basis from 30 June 2021, driven by lower Tier 1 Capital primarily reflecting the impact of the off-market share buy-back and the redemption of PERLS VIII, and a 5% growth in exposures driven by increases in liquid assets and lending volumes.

In November 2021, APRA released final prudential standards, which included changes to the definition of exposures related to derivatives and off Balance Sheet items and a minimum leverage ratio requirement of 3.5% for IRB banks, applicable from 1 January 2023.

Dividends

Interim dividend for the Half Year Ended 31 December 2021

The interim dividend determined was \$1.75 per share, an increase of 25 cents on the prior comparative period. The dividend payout ratio ("cash basis") for the half year ended 31 December 2021 was 62% (51% on a "statutory basis").

The interim dividend is expected to be fully franked and is expected to be paid on 30 March 2022 to owners of ordinary shares at the close of business on 17 February 2022 (record date). Shares were quoted ex-dividend on 16 February 2022.

Dividend Reinvestment Plan (DRP)

The DRP will continue to be offered to shareholders, and no discount will be applied to shares allocated under the plan for the interim dividend. The DRP for the 2022 interim dividend is anticipated to be satisfied in full by an on-market purchase of shares.

Dividend Policy

The Bank will seek to:

- Pay cash dividends at strong and sustainable levels;
- Target a full year payout ratio of 70% to 80%; and
- Maximise the use of its franking account by paying fully franked dividends.

Interim Dividend History (cents per share)

LCR surplus	50,105	39,507	54,822	27	(9)

1 The averages presented are calculated as simple averages of daily observations over the quarter. Spot LCR for 31 December 2021 was 130% (30 June 2021: 127%; 31 December 2020: 127%).

2 Includes all repo-eligible securities with the Reserve Bank of New Zealand. The amount of open-repo of Internal Residential Mortgage-Backed Securities and Exchange Settlement Account (ESA) cash balance held by the Reserve Bank of Australia is shown net.

3 Committed Liquidity Facility (CLF) includes CLF of \$30.0 billion (30 June 2021: \$30.0 billion; 31 December 2020: \$30.0 billion) and the Group's average undrawn TFF allowance of nil (30 June 2021: \$18.7 billion; 31 December 2020: \$21.8 billion) as per APRA guidance.

4 Includes cash inflows.

Liquidity Coverage Ratio (LCR)

The Group believes it holds high quality, well diversified liquid assets to meet Balance Sheet liquidity needs, and regulatory requirements, including APRA's Liquidity Coverage Ratio (LCR). The LCR requires Australian Authorised Deposit-taking Institutions (ADIs) to hold sufficient liquid assets to meet 30 day Net Cash Outflows (NCOs) projected under a prescribed stress scenario. LCR liquid assets consist of High Quality Liquid Assets (HQLA) in the form of cash, deposits with central banks, government securities, and other repo-eligible securities with the Reserve Bank of Australia (RBA) under the Committed Liquidity Facility (CLF). Given the limited amount of government securities in Australia, the RBA provides participating ADIs access to contingent liquidity on a secured basis via the CLF. The amount of the CLF for each ADI is set annually by APRA.

In September 2021, APRA announced a sector-wide phased reduction in the reliance on the CLF to zero by the end of 2022, subject to financial market conditions, as APRA and the RBA expect there will be sufficient HQLA for ADIs to meet their LCR requirements without the need to utilise the CLF.

In March 2020, the RBA announced the establishment of a three-year Term Funding Facility (TFF) offered to eligible ADIs to support lending to Australian businesses with fixed rate

funding (0.25% for drawdowns up to 4 November 2020, and 0.10% for new drawdowns from 4 November 2020 onwards). Access to drawdown of the facility ended on 30 June 2021, with the Group having fully drawn on its total available TFF allocation of \$51.1 billion, comprised of \$19.1 billion of Initial Allowance, \$13.0 billion of Supplementary Allowance and \$19.0 billion of Additional Allowance.

The Group's December 2021 quarterly average LCR was 134%, an increase of 5% compared to the quarterly average ended 30 June 2021, and a decrease of 9% from the quarterly average ended 31 December 2020. The LCR remains well above the regulatory minimum of 100%. Effective from 1 January 2022, the Group's access to CLF reduced to \$22.5 billion, and the LCR has been managed accordingly.

Compared to the quarterly average ended 30 June 2021, the Group's LCR liquid assets and 30 day modelled NCOs increased by \$24.3 billion and \$13.7 billion respectively, driven by the strong growth in customer deposits, in particular, at-call deposits.

Compared to the quarterly average ended 31 December 2020, the Group's LCR liquid assets and 30 day modelled NCOs increased by \$16.6 billion and \$21.3 billion respectively, driven by the strong growth in customer deposits, in particular, at-call deposits.

Total funding	1,012,270	961,539	911,013	5	11

1 Comparative information has been restated to conform to the presentation in the current half. Refer to Appendix 4.8 to this Document for further details.

2 Shareholders' equity is excluded from this view of funding sources.

3 Short-term wholesale funding includes debt with an original maturity or call date of less than or equal to 12 months, and consists of certificates of deposit and bank acceptances, debt issued under the Euro Medium Term Note (EMTN) program and the domestic, Euro and US commercial paper programs of Commonwealth Bank of Australia and ASB. Short-term wholesale funding also includes deposits from banks and central banks as well as net securities that are not classified as high quality liquid assets sold or purchased under repurchase agreements.

4 Long-term wholesale funding includes debt with an original maturity or call date of greater than 12 months and the Group's drawn TFF allowance.

5 Short-term collateral deposits includes net collateral received, Vostro balances, and other net repurchase agreements not reported above, including the amount pledged with the Reserve Bank to facilitate intra-day cash flows in the Exchange Settlement Account (ESA).

Customer Deposits

Customer deposits accounted for 73% of total funding at 31 December 2021 (30 June 2021: 73%, 31 December 2020: 75%). The Group satisfied a significant proportion of its funding requirements from retail, business, and institutional customer deposits.

Short-Term Wholesale Funding

Short-term wholesale funding accounted for 33% of total wholesale funding at 31 December 2021 (30 June 2021: 26%, 31 December 2020: 30%). The Group continues to maintain what management believes to be a conservative funding mix.

Customers Deposits to Total Funding Ratio

Short-Term to Total Wholesale Funding Ratio

Group Operations and Business Settings (continued)

Funding (continued)

Long-Term Wholesale Funding

Long-term wholesale funding (including IFRS MTM and derivative FX revaluations) accounted for 67% of total wholesale funding at 31 December 2021 (30 June 2021: 74%, 31 December 2020: 70%).

During the half year to 31 December 2021, the Group raised \$14.9 billion of long-term wholesale funding, across various instruments. During the half, the Group also accessed \$1.0 billion of long-term wholesale funding through drawdowns on the Reserve Bank of New Zealand's Funding for Lending Programme. The Group will be actively managing the maturity profile of the TFF across the 2023 – 2025 financial years through a range of funding sources.

The Weighted Average Maturity (WAM) of outstanding long-term wholesale debt with a residual maturity greater than 12 months at 31 December 2021 was 5.0 years (6.5 years excluding the TFF).

Weighted Average Maturity of Long-Term Wholesale Debt (years)¹

Long-Term Wholesale Funding Profile (\$B)

1 Represents the weighted average maturity of outstanding long-term wholesale debt with a residual maturity greater than 12 months at 31 December 2021 including the TFF drawdown. WAM as at 31 December 2021 excluding TFF drawdowns is 6.5 years (30 June 2021: 6.4 years; 31 December 2020: 5.7 years).

2 Includes Senior Bonds and Structured MTN.

3 Additional Tier 1 and Tier 2 Capital.

Group Operations and Business Settings (continued)

Net Stable Funding Ratio (NSFR)

Level 2	As at				
	31 Dec 21 \$M	30 Jun 21 \$M	31 Dec 20 \$M	Dec 21 vs Jun 21 %	Dec 21 vs Dec 20 %
Required Stable Funding					
Residential Mortgages ≤35% ^{1,2}	295,637	275,208	269,535	7	10
Other Loans	251,753	249,616	243,543	1	3
Liquid and Other Assets	71,856	69,408	69,627	4	3
Total Required Stable Funding	619,246	594,232	582,705	4	6
Available Stable Funding					
Capital	104,034	108,719	103,281	(4)	1
Retail/SME Deposits	467,757	430,483	423,891	9	10
Wholesale Funding & Other	240,777	226,408	191,112	6	26
Total Available Stable Funding	812,568	765,610	718,284	6	13
Net Stable Funding Ratio (NSFR) (%)	131	129	123	200 bpts	800 bpts

Net Stable Funding Ratio (NSFR)

The Net Stable Funding Ratio (NSFR) requirement is designed to encourage stable funding of core assets. APRA prescribed factors are used to determine the stable funding requirement of assets and the stability of funding sources.

The Group's NSFR was 131% at 31 December 2021, an increase of 2% from 129% at 30 June 2021 and an increase of 8% from 123% at 31 December 2020. The NSFR remains well above the regulatory minimum of 100%.

The 4% increase in Required Stable Funding (RSF) over the half primarily reflects strong growth in residential mortgage and business lending.

The 6% increase in Available Stable Funding (ASF) over the half was driven by strong growth in Retail and SME deposits and the Group's return to long-term wholesale funding issuance. This was partly offset by a reduction in capital, following the completion of the off-market share buy-back and payment of the FY21 final dividend.

1 This represents residential mortgages with a risk weighting of less than or equal to 35% under APRA standard APS 112 "Capital Adequacy: Standardised Approach to Credit Risk".

2 Primarily reflecting the impact on NSFR from volume growth in mortgages.

Group Operations and Business Settings (continued)

Corporate Governance

Changes to Executive Leadership Team

On 10 August 2021, the appointment of Monique Macleod as Group Executive Marketing and Corporate Affairs was announced.

On 14 September 2021, the appointment of Sinead Taylor as Chief Operations Officer was announced

Changes to Board of Directors

On 30 August 2021, Chairman of the Bank, Catherine Livingstone AO, announced the appointment of Julie Galbo to CBA's Board of Directors as an Independent, Non-Executive Director with effect from 1 September 2021.

Retail Banking Services

Overview

Retail Banking Services provides simple, convenient and affordable banking and general insurance products and services to personal and private bank customers, helping them manage their everyday banking needs, buy a home, protect their assets, or invest for the future. We support our customers through an extensive network of more than 800 branches and 2,000 ATMs, Australian-based customer call centres, leading online services and apps, as well as mobile banking specialists, private bankers and support teams. Retail Banking Services also include the financial results of retail banking activities conducted under the Bankwest brand.

On 3 May 2021, CBA completed the merger of Aussie Home Loans (AHL) with Lendi Pty Ltd (Lendi) resulting in AHL being deconsolidated from the Group. As AHL did not in itself constitute a major line of the Group's business, the financial results of AHL up until 3 May 2021 were treated as continuing operations and were included in the account lines of Retail Banking Services' performance. The Group retains approximately 40% shareholding of the combined business, with existing Lendi shareholders holding the remaining 60%. From May 2021, the results of the combined entity have been equity accounted within the Corporate Centre division.

On 21 June 2021, the Group announced it had entered into an agreement to sell its Australian general insurance business (Commlnsure General Insurance) to Hollard Group (Hollard). The sale is subject to Australian regulatory approvals, and is expected to be completed in late-calendar year 2022. As Commlnsure General Insurance does not constitute a major line of the Group's business, the financial results of Commlnsure General Insurance are treated as continuing operations and included in the account lines of Retail Banking Services' performance.

On 26 October 2021, the Group announced it will close the remaining Commonwealth Financial Planning (CFP) business, after a partial transfer to AIA Financial Services Limited was announced on 28 July 2021. The Group ceased to provide financial advice services under the CFP licence on 30 November 2021. This component of Commonwealth Financial Planning does not constitute a major line of the Group's business, and as such the financial results are treated as continuing operations and included in the account lines of Retail Banking Services' performance.

1 Comparative information has been restated to conform to the presentation in the current half. Refer to Appendix 4.8 to this Document for further details.

2 RBS including Mortgage Broking and General Insurance.

3 Consumer finance and other includes personal loans, credit cards and business lending.

4 Consumer finance includes personal loans and credit cards.

5 Distribution includes income associated with the sale of foreign exchange and wealth products. Other includes asset finance, merchants and business lending.

6 Home loans are presented gross of \$52,708 million of mortgage offset balances (30 June 2021: \$46,566 million; 31 December 2020: \$45,562 million). These balances are required to be grossed up under accounting standards but are netted down for the calculation of customer interest payments.

7 Transaction and Savings deposits includes \$52,708 million of mortgage offset balances (30 June 2021: \$46,566 million; 31 December 2020: \$45,562 million).

Financial Performance and Business Review ¹

Half Year Ended December 2021 versus December 2020

Retail Banking Services net profit after tax (“statutory basis”) for the half year ended 31 December 2021 was \$2,288 million, an increase of \$175 million or 8% on the prior comparative period. The result reflected a 2% increase in operating income, a 3% increase in operating expenses and a \$309 million decrease in loan impairment expense.

Net Interest Income

Net interest income was \$4,857 million, a decrease of \$9 million on the prior comparative period. This was driven by a 7% decrease in net interest margin, largely offset by a 7% increase in average interest earning assets.

Net interest margin decreased by 17 basis points on the prior comparative period, reflecting:

- Lower home lending margins (down 24 basis points) reflecting the impact of swap rates on fixed rate loans (down 6 basis points), unfavourable home loan portfolio mix (down 14 basis points) with a shift to lower margin loans (primarily variable to fixed), and increased competition (down 11 basis points), partly offset by repricing (up 7 basis points);
- Unfavourable portfolio mix (down 3 basis points) due to a reduction in higher margin consumer finance balances, more than offsetting the mix benefit from customers switching to at-call deposits from investment deposits;
- Lower earnings on equity due to the falling interest rate environment (down 3 basis points); partly offset by
- Lower wholesale funding costs (up 8 basis points); and
- Improved deposit margins (up 5 basis points) due to repricing, partly offset by the continued impact of the low-rate environment on transaction and saving deposit earnings.

Other Banking Income

Other banking income was \$726 million, an increase of \$100 million or 16% on the prior comparative period, due to:

- Higher deposit income from improved spend volumes and higher volume based fees; and
- Higher home loan wealth package fees.

Funds Management Income

Funds management income was \$10 million, a decrease of \$6 million or 38% on the prior comparative period. This was primarily driven by the wind-down and closure of the Commonwealth Financial Planning (CFP) business.

Operating Expenses

Operating expenses were \$2,245 million, an increase of \$61 million or 3% on the prior comparative period. This was primarily driven by inflation, increased investment spend, higher customer remediation and additional staff to support increased operational and risk assessment volumes, partly offset by productivity initiatives including workforce and branch optimisation.

The number of full-time equivalent staff (FTE) increased by 595 FTE or 4% on the prior comparative period, from 15,839 to 16,434. This was driven by additional resources to support increased loan application processing and call centre volumes, and investment in lenders and private bankers, partly offset by the closure of the CFP business, decreased financial assistance resourcing and frontline optimisation.

¹ In order to provide an underlying view of performance, the commentary below has been presented excluding the impact of the Mortgage Broking and General Insurance businesses for which commentary has been provided separately.

Divisional Performance (continued)

Retail Banking Services (continued)

Financial Performance and Business Review (continued)

Investment spend increased on the prior comparative period, driven by productivity and growth initiatives including digital enhancements and integration, and home buying process optimisation. We have also continued to invest in risk and compliance initiatives.

The operating expenses to operating income ratio ("statutory basis") was 42.9%, an increase of 150 basis points on the prior comparative period, mainly driven by higher operating expenses.

Loan Impairment Expense

Loan impairment expense was a benefit of \$5 million, a decrease of \$309 million on the prior comparative period. The result was driven by lower collective provision charges reflecting an improvement in economic outlook, and lower losses.

Loan impairment expense as a percentage of average gross loans and acceptances decreased 14 basis points on the prior comparative period to nil.

Home loan 90+ days arrears decreased by 5 basis points on the prior comparative period from 0.59% to 0.54%, driven by the improving economic environment and strong origination quality.

Consumer finance 90+ days arrears decreased by 29 basis points from 0.96% to 0.67%, driven by the improving economic environment and strong origination quality.

Balance Sheet

Key spot balance sheet movements included:

- Home loan growth of \$37.1 billion or 9%, above system growth² of 7% due to higher new business application volumes and a continued focus on credit decisioning turn-around times. Proprietary mix for CBA branded home loans has increased from 57% to 58% of new business flows;
- Consumer finance decrease of \$0.6 billion or 5%, broadly in line with system². The decrease in balances was driven by lower consumer demand for unsecured lending; and
- Total deposits growth of \$29.9 billion or 10% (interest and non-interest bearing). Growth was driven by transaction deposits (up 25% including non-interest bearing balances) primarily in existing customer balances and mortgage offset accounts, and savings deposits (up 12%), partly offset by a decline in investment deposits (down 12%), reflecting increased domestic money supply and greater demand for at-call deposits in the low-rate environment.

Risk Weighted Assets

Risk weighted assets were \$163.0 billion, an increase of \$7.8 billion or 5% on the prior comparative period.

- Credit risk weighted assets increased \$10.7 billion or 8% driven by home loan volume growth, partly offset by a reduction in consumer finance volumes; partly offset by
- Operational risk weighted assets decreased \$2.9 billion or 12%, due to improvements in the operational risk profile from enhanced management of conduct risk and strengthening of the control environment.

Retail Banking Services generated \$1,536 million of organic capital¹ for the Group in the current half. This contributed 34 basis points to the Group's CET1 ratio.

General Insurance and Mortgage Broking

Net loss after tax ("statutory basis") was \$29 million, a decrease of \$64 million on the prior comparative period. The result was driven by the General Insurance business, with higher claims experience net of reinsurance recoveries, mainly due to increased weather and earthquake event related claims.

Half Year Ended December 2021 versus June 2021

Net profit after tax ("statutory basis") decreased \$438 million or 16% on the prior half. The result was driven by flat operating income, a 4% increase in operating expenses and a lower loan impairment benefit.

Net Interest Income

Net interest income decreased by \$46 million or 1% on the prior half. This was driven by a 6% decrease in net interest margin, partly offset by a 4% increase in average interest earning assets, and the benefit of three additional calendar days in the current half.

Net interest margin decreased by 16 basis points on the prior half, reflecting:

- Lower home lending margins (down 19 basis points) due to the impact of swap rates on fixed rate loans (down 5 basis points), unfavourable home loan portfolio mix (down 8 basis points) with a shift to lower margin loans (primarily variable to fixed), and increased competition (down 6 basis points);
- Lower earnings on equity due to the falling interest rate environment (down 2 basis points); and
- Unfavourable portfolio mix (down 1 basis point) due to a reduction in higher margin consumer finance balances, more than offsetting the mix benefit from customers switching to at-call deposits from investment deposits; partly offset by
- Lower wholesale funding costs (up 3 basis points); and
- Higher deposit margins (up 3 basis points) reflecting the benefit of repricing, partly offset by the continued impact of the low-rate environment on transaction and savings deposit earnings.

Other Banking Income

Other banking income increased by \$43 million or 6% on the prior half, reflecting:

- Higher AIA partnership payments received in the current half;
- Higher home loan wealth package fees; and
- Improved credit and debit card spend volumes; partly offset by
- Lower volume based deposit fees, including reduced overdrawn account fees mainly due to increased deposit balances.

1 Organic capital generation represents cash net profit after tax less the capital equivalent of the change in regulatory risk weighted assets (excluding FX as it is capital neutral with offsetting impacts in regulatory capital deductions) used to generate those profits. Amounts quoted exclude the payment of dividends and the allocation of Operational RWA from the Enforceable Undertaking with APRA.

2 System source: RBA/APRA.

Divisional Performance (continued)

Retail Banking Services (continued)

Financial Performance and Business Review (continued)

Funds Management Income

Funds management income decreased by \$6 million or 38% on the prior half driven by the wind-down and closure of the CFP business.

Operating Expenses

Operating expenses increased by \$96 million or 4% on the prior half. This was driven by inflation, higher investment spend, customer remediation, additional staff to support increased operational and risk assessment volumes, and the impact of three additional working days, partly offset by productivity initiatives.

The number of FTE increased by 381 or 2% on the prior half, from 16,053 to 16,434 FTE, driven by additional resources to support increased loan application processing and call centre volumes, and investment in lenders and private bankers, partly offset by the closure of the CFP business and frontline optimisation.

The operating expenses to total operating income ratio ("statutory basis") was 42.9%, an increase of 330 basis points on the prior half, mainly driven by higher operating expenses.

Loan Impairment Expense

Loan impairment benefit reduced by \$160 million on the prior half. This was driven by higher collective provision releases in the prior half.

Loan impairment expense as a percentage of average gross loans and acceptances increased by 8 basis points on the prior half.

Home loan 90+ days arrears decreased by 14 basis points from 0.68% to 0.54%, driven by the improving economic environment and strong origination quality.

Consumer finance 90+ days arrears decreased by 15 basis points from 0.82% to 0.67%, driven by the improving economic environment and strong origination quality.

Balance Sheet

Key spot balance sheet movements included:

- Home loan growth of \$21.4 billion or 5%, above system growth of 4%¹, due to higher new business application volumes and a continued focus on credit decisioning turn-around times. Proprietary mix for CBA branded home loans decreased from 62% to 58%, due to stronger broker flows;
- Consumer finance decrease of \$0.2 billion or 2%, broadly in line with system¹. The decrease in balances was driven by lower consumer demand for unsecured lending; and
- Total deposit growth of \$24.2 billion or 8% (interest and non-interest bearing). Growth was driven by transaction deposits (up 16% including non-interest bearing balances) primarily in existing customer balances and mortgage offset accounts, and savings deposits (up 9%), partly offset by a decline in investment deposits (down 4%) reflecting higher demand for at-call deposits in the low-rate environment.

Risk Weighted Assets

Risk weighted assets increased \$6.1 billion or 4% on the prior half.

- Credit risk weighted assets increased \$6.0 billion or 4% driven by home loan volume growth, partly offset by a reduction in consumer finance volumes; and
- Operational risk weighted assets increased \$0.1 billion.

General Insurance and Mortgage Broking

Net profit after tax ("statutory basis") decreased by \$38 million on the prior half. This result was driven by the General Insurance business, with higher claims experience net of reinsurance recoveries, mainly due to increased weather and earthquake event related claims, partly offset by lower working claims.

Divisional Performance (continued)

Business Banking

Overview

Business Banking serves the banking needs of business, corporate and agribusiness customers across the full range of financial services solutions. We also provide equities trading and margin lending services through our CommSec business. Business Banking includes the financial results of business banking activities conducted under the Bankwest brand.

On 3 May 2021, CBA completed the sale of its subsidiary, Australian Investment Exchange Limited (AUSIEX), to Nomura Research Institute (NRI), resulting in AUSIEX being deconsolidated from the Group. As AUSIEX did not in itself constitute a major line of the Group's business, the financial results of AUSIEX were treated as continuing operations and were included in the account lines of Business Banking's performance up until 3 May 2021.

2 Home loans are presented gross of \$13,459 million of mortgage offset balances (30 June 2021: \$11,247 million; 31 December 2020: \$11,917 million). These balances are required to be grossed up under accounting standards, but are netted down for the calculation of customer interest payments.

3 Business loans include \$268 million of Cash Management Pooling Facilities (CMPF) (30 June 2021: \$234 million; 31 December 2020: \$242 million). Transaction Deposits include \$785 million of CMPF liabilities (30 June 2021: \$1,253 million; 31 December 2020: \$1,258 million). These balances are required to be grossed up under accounting standards, but are netted down for the calculation of customer interest payments and risk weighted assets.

4 Transaction and Savings deposits include \$13,459 million of mortgage offset balances (30 June 2021: \$11,247 million; 31 December 2020: \$11,917 million).

5 Average interest earning assets are presented net of mortgage offset balances, which reduce customer interest payments. Average interest earning assets are also used in the calculation of divisional net interest margin.

6 Commercial troublesome and impaired assets only.

Divisional Performance (continued)

Business Banking (continued)

Financial Performance and Business Review

Half Year Ended December 2021 versus December 2020

Business Banking net profit after tax ("statutory basis") for the half year ended 31 December 2021 was \$1,490 million, an increase of \$135 million or 10% on the prior comparative period. The result was driven by a 1% increase in total banking income, a 7% increase in operating expenses and an 85% decrease in loan impairment expense.

Net Interest Income

Net interest income was \$2,870 million, an increase of \$73 million or 3% on the prior comparative period. This was driven by an 8% increase in average interest earning assets, partly offset by a 5% decline in net interest margin.

Net interest margin decreased 16 basis points on the prior comparative period, reflecting:

- Lower deposit margins (down 10 basis points) due to the continued impact from the low-rate environment, partly offset by repricing;
- The impact on home lending margins (down 9 basis points) from swap rates on fixed rate loans and increased competition (down 7 basis points) and unfavourable home loan portfolio mix (down 5 basis points), with a shift to lower margin loans (variable to fixed), partly offset by repricing (up 3 basis points); and
- Lower earnings on equity due to the falling interest rate environment (down 5 basis points); partly offset by
- Favourable portfolio mix (up 4 basis points) from strong growth in business lending and transaction and savings deposits, partly offset by a decline in higher margin consumer finance balances; and
- Higher business lending margins (up 4 basis points) reflecting lower funding costs, partly offset by price reductions to support our customers.

Other Banking Income

Other banking income was \$646 million, a decrease of \$55 million or 8% on the prior comparative period, reflecting:

- Lower equities income due to lower trading volumes and the divestment of AUSIEX on 3 May 2021; and
- Lower merchant income mainly due to the impact from COVID-19 related restrictions and fee waivers; partly offset by
- Higher business lending fee income reflecting volume growth.

Operating Expenses

Operating expenses were \$1,343 million, an increase of \$91 million or 7% on the prior comparative period. This was primarily driven by continued investment in Business Banking product offerings and distribution capabilities, inflation, and risk and compliance related spend.

The number of full-time equivalent staff (FTE) increased by 539 or 10% on the prior comparative period, from 5,147 to 5,686 FTE, primarily driven by investment in product and customer facing staff, partly offset by the divestment of AUSIEX.

Investment spend was primarily focused on further enhancing the customer experience through reimagining products and services, system modernisation, digitisation and automation, as well as investment in regulatory, risk and compliance initiatives.

The operating expenses to total banking income ratio ("statutory basis") was 38.2%, an increase of 180 basis points on the prior comparative period, mainly driven by higher operating expenses.

Loan Impairment Expense

Loan impairment expense was \$44 million, a decrease of \$246 million or 85% on the prior comparative period. This was driven by lower collective provision charges reflecting an improvement in the economic outlook, and lower individually assessed provision charges.

Loan impairment expense as a percentage of average gross loans and acceptances decreased 27 basis points on the prior comparative period to 0.04%.

Troublesome and impaired assets as a percentage of total committed exposure decreased 117 basis points to 2.46% driven by a combination of good quality volume growth and active management of troublesome and impaired assets.

Balance Sheet

Key spot balance sheet movements included:

- Business loan growth of \$12.5 billion or 13%, above system growth¹, reflecting increases primarily across the Property, Agriculture and Wholesale Trade industries, while continuing to support our customers.
- Home loan growth of \$4.3 billion or 5%, below system growth of 7%, reflecting growth in owner occupied home loans and subdued investor loan growth; and
- Total deposits growth (interest and non-interest bearing) of \$29.8 billion or 16%, above system growth¹. Growth was driven by higher transaction (up 27% including non-interest bearing balances), savings (up 10%) and investment deposits (up 2%), reflecting increased domestic money supply and higher demand for at-call deposits in the low-rate environment.

¹ System Source: RBA/APRA.

Divisional Performance (continued)

Business Banking (continued)

Financial Performance and Business Review (continued)

Risk Weighted Assets

Risk weighted assets were \$141.5 billion, an increase of \$7.3 billion or 5% on the prior comparative period.

- Credit risk weighted assets increased \$8.4 billion or 7% driven by lending volume growth, partly offset by improved credit quality and methodology changes; partly offset by
- Operational risk weighted assets decreased \$1.1 billion or 8%, due to improvements in the operational risk profile from enhanced management of conduct risk and strengthening of the control environment.

Business Banking generated \$774 million of organic capital¹ for the Group in the current half. This contributed 17 basis points to the Group's CET1 ratio.

Half Year Ended December 2021 versus June 2021

Net profit after tax ("statutory basis") decreased \$60 million or 4% on the prior half. The result was driven by a 1% increase in total banking income, a 5% decrease in operating expenses and a \$106 million increase in loan impairment expense.

Net Interest Income

Net interest income increased \$70 million or 3% on the prior half. This was driven by a 4% increase in average interest earning assets and the benefit of three additional calendar days in the current half, partly offset by a 4% decline in net interest margin.

Net interest margin decreased 11 basis points, reflecting:

- The impact on home lending margins (down 7 basis points) from swap rates on fixed rate loans and increased competition (down 4 basis points) and unfavourable home loan portfolio mix (down 3 basis points), with a shift to lower margin loans (variable to fixed);
- Lower earnings on equity due to the falling interest rate environment (down 3 basis points);
- Lower deposit margins (down 2 basis points) due to the continued impact from the low-rate environment, partly offset by repricing; and
- Flat business lending margins reflecting lower funding costs, offset by price reductions to support our customers; partly offset by
- Favourable portfolio mix (up 1 basis point) from strong growth in business lending and transaction deposits, partly offset by a decline in higher margin consumer finance balances.

Other Banking Income

Other banking income decreased \$29 million or 4% on the prior half, driven by:

- Lower equities income due to lower trading volumes and the divestment of AUSIEX on 3 May 2021; and
- Lower merchant income mainly due to the impact from COVID-19 related restrictions and fee waivers; partly offset by
- Higher business lending fee income reflecting volume growth.

Operating Expenses

Operating expenses decreased \$74 million or 5% on the prior half. This was primarily driven by lower remediation provisions, partly offset by the continued investment in Business Banking product offerings and distribution capabilities, inflation, and increased risk and compliance related spend.

The number of FTE increased by 370 or 7% on the prior half, from 5,316 to 5,686 FTE, primarily driven by investment in product and customer facing staff.

The operating expenses to total banking income ratio ("statutory basis") was 38.2%, a decrease of 150 basis points on the prior half mainly due to lower expenses.

Loan Impairment Expense

Loan impairment expense increased \$106 million on the prior half, primarily driven by higher collective provision releases in the prior half, partly offset by lower individually assessed provisions in the current half.

Loan impairment expense as a percentage of average gross loans and acceptances increased 10 basis points on the prior half to 0.04%.

Troublesome and impaired assets as a percentage of total committed exposure decreased 52 basis points driven by a combination of good quality volume growth and active management of troublesome and impaired assets.

Balance Sheet

Key spot balance sheet movements included:

- Business loan growth of \$5.6 billion or 5%, above system growth², reflecting growth primarily across the Property, Wholesale Trade and Health industries, while continuing to support our customers;
- Home loan growth of \$2.1 billion or 2%, below system growth of 4%², reflecting growth in owner occupied home loans and subdued investor loan growth; and
- Total deposits growth (interest and non-interest bearing) of \$19.0 billion or 10%, above system growth². Growth was driven by higher transaction (up 15% including non-interest bearing balances), savings (up 7%) and investment deposits (up 1%), reflecting increased domestic money supply and higher demand for at-call deposits in the low-rate environment.

Risk Weighted Assets

Risk weighted assets increased \$5.5 billion or 4% on the prior half.

- Credit risk weighted assets increased \$5.6 billion or 5% driven by lending volume growth, partly offset by improved credit quality; partly offset by
- Operational risk weighted assets decreased \$0.1 billion.

¹ Organic capital generation represents cash net profit after tax less the capital equivalent of the change in regulatory risk weighted assets (excluding FX as it is capital neutral with offsetting impacts in regulatory capital deductions) used to generate those profits. Amounts quoted exclude the payment of dividends and the allocation of Operational RWA from the Enforceable Undertaking with APRA.

² Interest earning lending assets include \$13,854 million of Cash Management Pooling Facilities (CMPF) (30 June 2021: \$17,814 million; 31 December 2020: \$22,886 million). Transaction deposits include \$34,920 million of CMPF liabilities (30 June 2021: \$43,462 million; 31 December 2020: \$41,096 million). These balances are required to be grossed up under accounting standards, but are netted down for the calculation of customer interest payments and risk weighted assets.

³ Other assets include intangible assets and derivative assets. Non-interest bearing liabilities include derivative liabilities.

⁴ Debt issues and other includes bank acceptances and liabilities at fair value.

Divisional Performance (continued)

Institutional Banking and Markets (continued)

Financial Performance and Business Review

Half Year Ended December 2021 versus December 2020

Institutional Banking and Markets net profit after tax ("statutory basis") for the half year ended 31 December 2021 was \$587 million, an increase of \$161 million or 38% on the prior comparative period. The result was driven by a 7% decrease in total banking income, a 2% increase in operating expenses and a \$302 million decrease in loan impairment expense.

Net Interest Income

Net interest income was \$787 million, a \$19 million increase on the prior comparative period. The result was driven by a 13% increase in net interest margin, partly offset by a 10% decrease in average interest earning assets.

Net interest margin increased 14 basis points, reflecting:

- Increased Institutional lending margin (up 7 basis points) due to lower funding costs with client pricing remaining flat;
- Favourable assets mix from reduction of lower margin pooled facilities and non-lending interest earning assets (up 7 basis points);
- Increased earnings from Markets including commodities (up 3 basis points); and
- Higher Structured Asset Finance revenue driven by an increase in the residual value of shipping vessels under finance leases (up 3 basis points); partly offset by
- Reduced deposit revenue reflecting the continued impact of the low-rate environment (down 3 basis points); and
- Lower earnings on equity due to the low rate environment (down 3 basis points).

Other Banking Income

Other banking income was \$359 million, a decrease of \$111 million or 24% on the prior comparative period, reflecting:

- Lower Global Markets trading income from precious metal inventory financing, and the Fixed Income and Rates portfolios;
- Unfavourable derivative valuation adjustments; partly offset by
- Higher Structured Asset Finance revenue mainly due to the non-recurrence of impairment of aircraft operating leases; and
- Higher lending fees due to repricing and increased volume.

Operating Expenses

Operating expenses were \$490 million, an increase of \$9 million or 2% on the prior comparative period. This was driven by higher investment and risk and compliance spend, partly offset by lower amortisation and productivity initiatives.

The number of full-time equivalent staff (FTE) increased by 34 or 2% on the prior comparative period, from 1,419 to 1,453 FTE.

Investment spend focused on upgrading system infrastructure and continuing to strengthen the operational risk and compliance framework.

The operating expenses to total banking income ratio ("statutory basis") was 42.8%, an increase of 390 basis points on the prior comparative period, mainly driven by lower total banking income.

Loan Impairment Expense

Loan impairment expense was a benefit of \$125 million, a decrease of \$302 million on the prior comparative period. This was driven by lower collective provisions reflecting a decrease in forward looking adjustments for the aviation sector and improvement in the economic outlook, and lower individually assessed provisions.

Loan impairment expense as a percentage of average gross loans and acceptances decreased 66 basis points on the prior comparative period to -0.28%.

Asset quality of the portfolio has improved, with the percentage of the book rated as investment grade increasing 120 basis points to 87.9%.

Balance Sheet

Key spot balance sheet movements included:

- Lending balance decrease of \$2.9 billion or 3%, primarily driven by reduction in pooled facilities, partly offset by growth in the Funds Financing, Real Estate and Securitisation portfolios;
- Non-lending interest earning assets decline of \$0.6 billion or 1%, driven by a reduction in the inventory of government bonds, partly offset by an increase in reverse sale and repurchase agreements in Global Markets;
- Other assets and non-interest bearing liabilities decline of \$9.4 billion or 26% and \$9.5 billion or 37% respectively, mainly driven by the revaluation of derivative assets and derivative liabilities due to foreign currency and interest rate volatility. Derivative assets and derivative liabilities are required to be grossed up under accounting standards;
- Total interest bearing deposits decline of \$0.5 billion mainly driven by a decrease in sale and repurchase agreements in Global Markets due to lower funding requirements for government securities, and lower investment and savings deposits; partly offset by an increase from transaction deposits, reflecting increased liquidity in the economy and customer preference for at-call deposits in the low-rate environment; and
- Due to other financial institutions increase of \$9.8 billion driven by higher central bank and foreign currency term deposits, and deposits from other banks.

Divisional Performance (continued)

Institutional Banking and Markets (continued)

Financial Performance and Business Review (continued)

Risk Weighted Assets

Risk weighted assets were \$82.1 billion, a decrease of \$3.8 billion or 4% on the prior comparative period.

- Credit risk weighted assets decreased \$3.3 billion or 5%, primarily driven by improved credit quality, methodology changes and lower derivatives;
- Traded market risk weighted assets decreased \$0.3 billion or 3%; and
- Operational risk weighted assets decreased \$0.2 billion or 4%.

Institutional Banking and Markets generated \$679 million of organic capital¹ for the Group in the current half. This contributed 15 basis points to the Group's CET1 ratio.

Half Year Ended December 2021 versus June 2021

Net profit after tax ("statutory basis") increased \$85 million or 17% on the prior half. The result was driven by an 8% increase in total banking income, a 1% decrease in operating expenses, and a 54% decrease in loan impairment expense.

Net Interest Income

Net interest income increased \$23 million or 3% on the prior half. The result was driven by a 2% increase in net interest margin and the benefit of three additional calendar days in the current half, partly offset by a 1% decrease in average interest earning assets.

Net interest margin increased 2 basis points, reflecting:

- Favourable asset mix from reduction of lower margin pooled facilities and non-lending interest earning assets (up 4 basis points);
- Higher Structured Asset Finance revenue driven by an increase in the residual value of shipping vessels under finance leases (up 3 basis points); and
- Higher Institutional lending margins (up 1 basis point) due to lower funding costs; partly offset by
- Reduced deposit revenue reflecting the continued impact of the low-rate environment (down 2 basis points);
- Lower margins in Fixed Income (down 2 basis points); and
- Lower earnings on equity due to the low rate environment (down 2 basis points).

Other Banking Income

Other banking income increased \$57 million or 19% on the prior half, reflecting:

- Higher Global Markets sales and trading performance mainly from Foreign Exchange, and Fixed Income and Rates portfolios;
- Higher Structured Asset Finance revenue mainly due to the non-recurrence of impairment of aircraft operating leases; and
- Higher lending fees due to repricing and increased volume; partly offset by
- Unfavourable derivative valuation adjustments.

Operating Expenses

Operating expenses decreased \$5 million or 1% on the prior half. This was primarily driven by productivity initiatives and lower amortisation, partly offset by higher risk and compliance and operations costs.

The number of FTE increased by 2% on the prior half, from 1,431 to 1,453 FTE.

The operating expenses to total banking income ratio ("statutory basis") decreased by 350 basis points from 46.3% in the prior half, mainly driven by higher total banking income.

Loan Impairment Expense

Loan impairment expense decreased \$44 million on the prior half. This was driven by lower collective provisions reflecting a decrease in forward looking adjustments for the aviation sector and improvement in the economic outlook, partly offset by higher individually assessed provisions due to lower write-backs in the current half.

Loan impairment expense as a percentage of average gross loans and acceptances decreased 9 basis points on the prior half to -0.28%.

Asset quality of the portfolio has improved, with the percentage of the book rated as investment grade increasing 90 basis points to 87.9%.

Balance Sheet

Key spot balance sheet movements included:

- Non-lending interest earning assets growth of \$10.1 billion or 24%, driven by higher reverse sale and repurchase agreements, partly offset by reduction in the inventory of government bonds in Global Markets;
- Total interest bearing deposits increase of \$1.4 billion or 1% mainly driven by growth in investment deposits, and higher sale and repurchase agreements in Global Markets, partly offset by lower savings deposits; and
- Due to other financial institutions increase of \$2.5 billion or 18% mainly due to higher central bank deposits and deposits from other banks.

Risk Weighted Assets

Risk weighted assets were flat on the prior half.

- Credit risk weighted assets decreased \$2.2 billion or 3%, primarily driven by improved credit quality, methodology changes and lower derivatives; and
- Operational risk weighted assets decreased \$0.3 billion or 5%; partly offset by
- Traded market risk weighted assets increased \$2.5 billion or 35%, driven by an APRA capital overlay to be held until modelling work is completed by the Group and approved by APRA in relation to the revised Risks-Not-In-VaR (RNIV) framework.

¹ Organic capital generation represents cash net profit after tax less the capital equivalent of the change in regulatory risk weighted assets (excluding FX as it is capital neutral with offsetting impacts in regulatory capital deductions) used to generate those profits. Amounts quoted exclude the payment of dividends, the allocation of Operational RWA from the Enforceable Undertaking with APRA.

Divisional Performance (continued)

New Zealand

Overview

New Zealand primarily includes the banking and funds management businesses operating under the ASB brand. ASB provides a range of banking, wealth and insurance products and services to its personal, business, rural and corporate customers in New Zealand.

ASB serves the financial needs of its customers across multiple channels including an extensive network of branches, ATMs, contact centres, digital platforms and relationship managers.

Financial Performance and Business Review

Half Year Ended December 2021 versus December 2020

New Zealand net profit after tax ¹ ("statutory basis") for the half year ended 31 December 2021 was NZD723 million, an increase of NZD140 million or 24% on the prior comparative period. The result was driven by a 12% increase in total operating income, a 5% increase in operating expenses and a NZD43 million decrease in loan impairment expense.

New Zealand generated AUD332 million of organic capital ² for the Group in the current half. This contributed 8 basis points to the Group's CET1 ratio.

Half Year Ended December 2021 versus June 2021

New Zealand net profit after tax ¹ ("statutory basis") for the half year ended 31 December 2021 increased NZD54 million or 8% on the prior half. The result was driven by a 2% increase in total operating income, a 10% decrease in operating expenses and a NZD22 million increase in loan impairment expense.

¹ The New Zealand result incorporates ASB and allocated CBA capital charges and costs. The CBA Branch results relating to the Institutional Banking and Markets business in New Zealand are not included.

² Organic capital generation represents cash net profit after tax less the capital equivalent of the change in regulatory risk weighted assets (excluding FX as it is capital neutral with offsetting impacts in regulatory capital deductions and in accordance with APRA requirements) used to generate those profits. Amounts quoted exclude the payment of dividends.

Divisional Performance (continued)

New Zealand (continued)

Financial Performance and Business Review

Half Year Ended December 2021 versus December 2020

ASB net profit after tax ("statutory basis") for the half year ended 31 December 2021 was NZD754 million, an increase of NZD144 million or 24% on the prior comparative period. The result was driven by a 12% increase in total operating income, a 5% increase in operating expenses and a NZD43 million decrease in loan impairment expense.

Net Interest Income

Net interest income was NZD1,270 million, an increase of NZD148 million or 13% on the prior comparative period. The increase was driven by a 10% growth in average interest earning assets and a 3% increase in net interest margin.

Net interest margin increased 7 basis points, reflecting:

- Higher deposit margins (up 7 basis points) due to benefits from investment deposits repricing (up 11 basis points), partly offset by reduced earnings on transaction and savings deposits (down 4 basis points);
- Lower wholesale funding costs (up 6 basis points); and
- Favourable portfolio mix (up 1 basis point) driven by strong growth in transaction and savings deposits (up 4 basis points), partly offset by unfavourable lending mix driven by a higher proportion of lower margin home loan balances relative to higher margin consumer finance and business lending balances (down 3 basis points); partly offset by
- Unfavourable lending margins (down 4 basis points) reflecting lower home loan margins (down 7 basis points) due to increased competition, partly offset by higher business and rural lending margins (up 3 basis points); and
- Lower earnings on equity due to the low rate environment (down 3 basis points).

Other Banking Income

Other banking income was NZD224 million, an increase of NZD15 million or 7% on the prior comparative period, reflecting:

- Higher Markets revenue from increased sales and trading income; and
- Higher gains from the sale of government securities; partly offset by
- Lower fees due to the removal and reduction of various transaction service fees.

Funds Management Income

Funds management income was NZD80 million, an increase of NZD7 million or 10% on the prior comparative period, driven by higher average Assets Under Management (AUM) (up 14%), reflecting favourable net inflows and market performance, and improved margins, partly offset by the removal of administration fees on KiwiSaver accounts.

Operating Expenses

Operating expenses were NZD556 million, an increase of NZD26 million or 5% on the prior comparative period. The increase was primarily driven by staff costs due to higher FTE, salary increases and lower annual leave usage due to the impact of COVID-19, and growth in investment spend to deliver strategic priorities, partly offset by a release of the provision relating to historical holiday pay.

FTE increased by 312 or 6% on the prior comparative period from 5,505 to 5,817 FTE driven by growth to support investment in technology and the insurance and business bank distribution teams.

Investment spend continues to focus on regulatory compliance, customer experience initiatives and enhancing technology platforms.

The operating expenses to total operating income ratio ("statutory basis") for ASB was 35.0%, a decrease of 260 basis points on the prior comparative period driven by growth in total operating income.

Loan Impairment Expense

Loan impairment expense was a benefit of NZD13 million, a decrease of NZD43 million on the prior comparative period. This was driven by collective provision releases reflecting an improvement in the economic outlook combined with lower write offs, partly offset by an increase in individually assessed provisions.

Home loan 90+ days arrears decreased 1 basis point, from 0.18% to 0.17%, and consumer finance 90+ days arrears decreased 19 basis points, from 0.74% to 0.55%, reflecting an improvement in economic conditions.

Balance Sheet

Key spot balance sheet movements included:

- Home loan growth of NZD5.4 billion or 8%, below system growth of 10%¹, with continued customer preference for fixed rate loans in a competitive market;
- Business loan growth of NZD1.7 billion or 10%, above system growth of 6%¹, driven by strong growth in commercial property lending;
- Rural loan growth of NZD0.2 billion or 2%, above a system decline of 1%¹; and
- Total customer deposit growth of NZD6.0 billion or 9% (interest bearing and non-interest bearing), above system growth of 5%^{1,2}, with a customer preference for at-call deposits.

¹ System growth rates are based on the 12 months to December 2021.

² RBNZ system data includes institutional deposits which are excluded from the ASB Management Balance Sheet.

Divisional Performance (continued)

New Zealand (continued)

Financial Performance and Business Review (continued)

Risk Weighted Assets ¹

Risk weighted assets were NZD61.5 billion, an increase of NZD0.1 billion on the prior comparative period.

- Operational risk weighted assets increased NZD2.0 billion or 37% following changes in the operational risk profile and methodology; partly offset by
- Credit risk weighted assets decreased NZD1.5 billion or 3%, driven by improved credit quality, partly offset by an increase in lending volumes and modelling changes for home loans; and
- Market risk weighted assets decreased NZD0.4 billion or 12%, primarily due to FX methodology changes and a reduction in NZD interest rate risk positions.

ASB generated AUD374 million of organic capital ² for the Group in the current half. This contributed 8 basis points to the Group's CET1 ratio.

Half Year Ended December 2021 versus June 2021

Net profit after tax ("statutory basis") increased NZD55 million or 8% on the prior half. The result was driven by a 2% increase in total operating income, a 10% decrease in operating expenses and a 63% increase in loan impairment expense.

Net Interest Income

Net interest income increased NZD9 million or 1% on the prior half. This result was driven by a 4% growth in average interest earning assets and the benefit of three additional calendar days in the current half, partly offset by a 5% decrease in net interest margin.

Net interest margin decreased 12 basis points, reflecting:

- Unfavourable lending margins (down 14 basis points) mainly from increased competition in home lending;
- Unfavourable portfolio mix (down 2 basis points) driven by unfavourable lending mix due to a higher proportion of lower margin home loan balances relative to higher margin consumer finance and business lending balances (down 3 basis points), partly offset by strong growth in transaction and savings deposits (up 1 basis point); and
- Lower earnings on equity due to the low rate environment (down 1 basis point); partly offset by
- Higher deposit margins (up 5 basis points) due to benefits from investment and savings deposit repricing.

Other Banking Income

Other banking income increased NZD21 million or 10% on the prior half, reflecting:

- Higher gains from the sale of government securities; and
- Higher insurance commission income; partly offset by
- Lower fees due to the removal and reduction of various transaction service fees.

Funds Management Income

Funds management income increased NZD3 million or 4% on the prior half, driven by higher average AUM (up 6%) reflecting favourable net inflows and market performance, and improved margins, partly offset by the removal of administration fees on KiwiSaver accounts.

Operating Expenses

Operating expenses decreased NZD62 million or 10% on the prior half. The reduction was driven by lower staff costs primarily due to a release of the provision relating to historical holiday pay and reduced marketing spend, partly offset by higher FTE and IT expenses.

The number of FTE increased by 95 or 2% on the prior half from 5,722 to 5,817 FTE, to support investment in technology and the business bank distribution team.

The operating expenses to total operating income ratio ("statutory basis") decreased 470 basis points on the prior half mainly driven by lower operating expenses.

Loan Impairment Expense

Loan impairment expense increased NZD22 million or 63% on the prior half. This was primarily driven by higher collective provision releases in the prior half, partly offset by lower write offs in the current half reflecting a decrease in consumer finance balances, and lower individually assessed provisions.

Home loan 90+ days arrears decreased 1 basis point, from 0.18% to 0.17%. Consumer finance 90+ days arrears increased 19 basis points, from 0.36% to 0.55% driven by lower write offs.

Balance Sheet

Key spot balance sheet movements included:

- Home loan growth of NZD2.2 billion or 3%, below system growth of 4%³, with continued customer preference for fixed rate loans in a competitive market;
- Business loan growth of NZD0.6 billion or 3%, below system growth of 4%³;
- Rural loan growth of NZD0.1 billion or 1%, above a system decline of 1%³; and
- Total customer deposit growth of NZD4.8 billion or 7% (interest bearing and non-interest bearing), above system growth of 5%^{3,4}, with a customer preference for at-call deposits.

Risk Weighted Assets ¹

Risk weighted assets increased NZD0.2 billion on the prior half.

- Operational risk weighted assets increased NZD1.2 billion or 20% due to a change in methodology; partly offset by
- Market risk weighted assets decreased NZD0.7 billion or 19% primarily due to a reduction in NZD interest rate risk positions and FX methodology changes; and
- Credit risk weighted assets decreased NZD0.3 billion or 1%, driven by improved credit quality, partly offset by an increase in lending volumes and modelling changes in home loans.

1 Risk weighted assets reflect the New Zealand dollar amount calculated in accordance with RBNZ requirements.

2 Organic capital generation represents cash net profit after tax less the capital equivalent of the change in regulatory risk weighted assets (excluding FX as it is capital neutral with offsetting impacts in regulatory capital deductions and in accordance with APRA requirements) used to generate those profits. Amounts quoted exclude the payment of dividends.

3 System growth rates are based on the 6 months to December 2021.

4 RBNZ system data includes institutional deposits which are excluded from the ASB Management Balance Sheet.

Divisional Performance (continued)

Corporate Centre and Other

Overview

Corporate Centre and Other includes the results of the Group's centrally held minority investments and subsidiaries, Group-wide remediation costs, investment spend including enterprise-wide infrastructure and other strategic projects, employee entitlements, and unallocated revenue and expenses relating to the Bank's support functions including Treasury, Investor Relations, Group Strategy, Legal and Corporate Affairs and Bank-wide elimination entries arising on consolidation.

Centrally held minority investments and subsidiaries include the Group's offshore minority investments in China (Bank of Hangzhou and Qilu Bank), Vietnam (Vietnam International Bank), as well as its Indonesian banking subsidiary (PT Bank Commonwealth). They also include domestically held minority investments in Lendi Group ¹ and CFS ¹ as well as the strategic investments in x15ventures.

Treasury is primarily focused on the management of the Bank's interest rate risk, funding and liquidity requirements, and management of the Bank's capital.

The Treasury function includes:

- Portfolio Management: manages the interest rate risk of the Bank's non-traded Balance Sheet using transfer pricing to consolidate risk into Treasury, and hedging the residual mismatch between assets and liabilities using swaps, futures and options;
- Group Funding and Liquidity: manages the Bank's long-term and short-term wholesale funding requirements, and the Bank's prudent liquidity requirements; and
- Capital and Regulatory Strategy: manages the Bank's capital requirements.

Corporate Centre and Other (continuing operations, including eliminations)	Half Year Ended ²

¹ Lendi Group represents the Group's 42% holding in the business after the completion of the merger between Aussie Home Loans and Lendi Pty Ltd on 3 May 2021. CFS represents the Group's 45% minority interest in Superannuation and Investment Holdings Pty Limited, the parent entity of the Colonial First State (CFS) business, which was a subsidiary of the Group until the disposal of a 55% interest on 1 December 2021.

² Comparative information has been restated to conform to the presentation in the current half. Refer to Appendix 4.8 to this Document for further details.

Divisional Performance (continued)

Corporate Centre and Other (continued)

Financial Performance and Business Review

Half Year Ended December 2021 versus December 2020

Corporate Centre and Other net loss after tax ("statutory basis") for the half year ended 31 December 2021 was \$206 million, a decrease of \$448 million or 69% on the prior comparative period. The result was primarily driven by a \$252 million increase in total operating income, an 8% decrease in operating expenses and a 73% decrease in loan impairment expense.

Net Interest Income

Net interest income was \$60 million, a decrease of \$97 million or 62% on the prior comparative period. This was primarily driven by lower Treasury income from reduced earnings on the liquids portfolio, interest rate risk management activities and lower earnings on equity in the low-rate environment.

Other Banking Income

Other banking income was \$427 million, an increase of \$350 million on the prior comparative period. This was mainly driven by the benefit from the non-recurrence of upfront costs related to the Group's term debt buyback program in the prior comparative period, higher gains from the sale of Treasury liquid assets and higher net profits from minority investments including gains from a reversal of historical impairment.

Operating Expenses

Operating expenses were \$929 million, a decrease of \$80 million or 8% on the prior comparative period. This was primarily driven by reduced occupancy expenses from the consolidation of our property footprint and lower Aligned Advice related remediation costs, partly offset by wage inflation, increased FTE and higher centrally held technology related investment spend.

Loan Impairment Expense

Loan impairment expense was \$23 million, a decrease of \$61 million or 73% on the prior comparative period. This was due to the non-recurrence of a central management overlay taken in the prior comparative period, partly offset by higher individually assessed provision charges in PTBC.

Risk Weighted Assets

Risk weighted assets were \$28.8 billion, an increase of \$2.5 billion or 9% on the prior comparative period.

- IRRBB risk weighted assets increased \$4.8 billion or 35%, mainly due to APRA's required IRRBB capital increase to reflect the impact of the recent interest rate volatility on the Group's invested equity; partly offset by
- Credit risk weighted assets decreased \$2.3 billion or 25%, mainly due to improved credit quality and methodology changes.

Corporate Centre consumed \$5,001 million of organic capital¹ for the Group in the current half, largely due to the payment of the 2021 final dividend and increase in IRRBB RWA. This impacted the Group's CET1 ratio by 109 basis points.

Half Year Ended December 2021 versus June 2021

Net loss after tax ("statutory basis") for the half year ended 31 December 2021 decreased \$107 million or 34% on the prior half. The result was primarily driven by flat total operating income, a 6% decrease in operating expenses and a 92% increase in loan impairment expense.

Net Interest Income

Net interest income decreased \$39 million or 39% on the prior half. This was mainly driven by lower Treasury income from reduced earnings on interest rate risk management activities and the liquids portfolio.

Other Banking Income

Other banking income increased \$41 million or 11% on the prior half. This was primarily driven by the non-recurrence of upfront break costs related to the Group's term debt buyback program in the prior half, and higher gains from the sale of Treasury liquid assets, partly offset by lower net profits from minority investments due to the non-recurrence of gains from a reversal of historical impairment in prior half.

Operating Expenses

Operating expenses decreased \$61 million or 6% on the prior half. This was mainly driven by lower Aligned Advice related remediation costs, partly offset by wage inflation and increased FTE.

Loan Impairment Expense

Loan impairment expense increased \$11 million or 92% on the prior half. This was due to the non-recurrence of the benefit from the release of a central management overlay in the prior half, partly offset by lower collective provision charges in PTBC.

Risk Weighted Assets

Risk weighted assets increased \$6.6 billion or 30% on the prior half.

- IRRBB risk weighted assets increased \$7.7 billion or 70%, mainly due to APRA's required IRRBB capital increase to reflect the impact of the recent interest rate volatility on the Group's invested equity; partly offset by
- Credit risk weighted assets decreased \$1.1 billion or 14%.

¹ Organic capital generation represents cash net profit after tax less the capital equivalent of the change in regulatory risk weighted assets (excluding FX as it is capital neutral with offsetting impacts in regulatory capital deductions) used to generate those profits. Amounts quoted include discontinued operations and exclude the allocation of Operational RWA from the Enforceable Undertaking with APRA.

Directors' Report

The Directors of the Commonwealth Bank of Australia present their report, together with the financial statements of the Commonwealth Bank of Australia and its controlled entities (collectively referred to as 'the Group') for the half year ended 31 December 2021.

Directors

The names of the Directors holding office at any time during or since the end of the half year were:

Catherine Livingstone AO	Chairman
Matt Comyn	Managing Director and Chief Executive Officer
Shirish Apte	Director
Genevieve Bell AO	Director
Julie Galbo	Director (appointed 1 September 2021)
Peter Harmer	Director
Simon Moutter	Director
Paul O'Malley	Director
Mary Padbury	Director
Anne Templeman-Jones	Director
Robert Whitfield AM	Director

Review and Results of Operations

The Group's statutory net profit after tax for the half year ended 31 December 2021 was \$5,870 million, an increase of \$1,001 million or 21% on the prior comparative period. The increase was driven by higher net operating income, higher operating expenses, lower loan impairment expense and higher income tax expense.

On 21 June 2021, the Group announced the sale of Commlnsure General Insurance to Hollard Insurance Company Pty Ltd (Hollard). The sale is subject to Australian regulatory approvals and other conditions, and is expected to complete in the second half of calendar year 2022.

On 28 July 2021, the Group entered into an agreement with AIA Australia for a partial transfer of the Commonwealth Financial Planning (CFP) business to AIA Financial Services Limited. On 26 October 2021, the Group announced its intent to close the remaining CFP business. The transfer completed on 30 November 2021.

On 1 December 2021, the Group completed the sale of a 55% interest in Colonial First State (CFS) to KKR.

CFS has been classified as a discontinued operation in the Group's financial statements for the half year ended 31 December 2021. The assets and liabilities of Commlnsure General Insurance are classified as held for sale as at 31 December 2021.

There have been no other significant changes in the nature of the principal activities of the Group during the half year.

The performance of the Group's business segments for the half year ended 31 December 2021 was as follows:

- The statutory net profit after tax from Retail Banking Services was \$2,259 million, an increase of \$111 million or 5% on the prior comparative period. The increase was driven by lower operating expenses and loan impairment expense, partly offset by a decrease in total operating income and costs associated with a partial transfer of the CFP business to AIA Financial Serviced Limited and the closure of the remaining CFP business.
- The statutory net profit after tax from Business Banking was \$1,490 million, an increase of \$135 million or 10% on the prior comparative period. The increase was driven by higher total operating income, lower loan impairment expense and the non-recurrence of separation and transaction costs associated with the disposal of AUSIEX, partly offset by higher operating expenses.

- The statutory net profit after tax from Institutional Banking and Markets was \$587 million, an increase of \$161 million or 38% on the prior comparative period. The increase was driven by lower loan impairment expense, partly offset by lower total operating income and higher operating expenses.
- The statutory net profit after tax from New Zealand was \$611 million, an increase of \$127 million or 26% on the prior comparative period. The increase was driven by higher total operating income and lower loan impairment expense, partly offset by higher operating expenses and an increase in hedging and IFRS volatility losses.
- The statutory net loss after tax including discontinued operations from Corporate Centre and Other was \$197 million, a decrease of \$82 million on the prior comparative period. The increase was driven by higher total operating income, lower operating expenses and loan impairment expense, partly offset by the non-recurrence of the net gain on disposal of BoCommLife.
- The statutory net profit after tax including discontinued operations from Wealth Management was \$1,120 million, an increase of \$385 million or 52% on the prior comparative period. The increase was primarily driven by the gain on disposal of CFS net of transaction and separation costs, and the non-recurrence of post-completion adjustments and transaction and separation costs associated with other previously announced divestments.

Additional analysis of operations for the half year ended 31 December 2021 is set out in the Highlights and Group and Divisional Performance Analysis sections.

The Board has received written statements from the Chief Executive Officer and Chief Financial Officer that the accompanying Financial Statements have been prepared in accordance with Australian Accounting Standards, Corporations Regulations 2001 and Corporations Act.

Directors' Report

Material Business risks

The Group recognises that risk is inherent in business and that effective risk management is a key component of sound corporate governance and is essential in delivering our business objectives.

The Group seeks to adopt a comprehensive approach to risk management through its Risk Management Framework. This framework covers the Group's systems, policies, processes and people who monitor, mitigate and report risk.

The Group's risk management framework, material risk types and approach to managing them during the period are described in the 2021 Annual Report on pages 42-47 and in Note 9 of the Financial report on pages 204-239.

In addition, commentary on the Group's ongoing litigations, investigations and reviews for half year ended 31 December 2021 is included in Note 7.2 of the Financial Statements for the half year ended 31 December 2021.

Rounding and Presentation of Amounts

Unless otherwise indicated, the Group has rounded off amounts in this Directors' Report and the accompanying financial statements to the nearest million dollars in accordance with ASIC Corporations Instrument 2016/191.

Auditor's Independence Declaration

We have obtained the following independence declaration from the Group's auditors, PricewaterhouseCoopers:

Auditor's Independence Declaration

As lead auditor for the review of the Commonwealth Bank of Australia for the half-year ended 31 December 2021, I declare that to the best of my knowledge and belief, there have been:

- (a) no contraventions of the auditor independence requirements of the *Corporations Act 2001* in relation to the review, and
- (b) no contraventions of any applicable code of professional conduct in relation to the review.

This declaration is in respect of the Commonwealth Bank of Australia and the entities it controlled during the period.

1 Comparative information has been restated to reflect the prior period adjustments detailed in Note 1.1.

2 Includes \$207 million reclassification from foreign currency translation reserve to retained profits related to a historical restructuring where the Group no longer holds exposure to foreign exchange risk.

3 On 4 October 2021, the Group announced the successful completion of its \$6 billion off-market buy-back of CBA ordinary shares. 67,704,807 ordinary shares were bought back at \$88.62, and comprised a fully franked dividend component of \$66.96 per share (\$4,534 million) and a capital component of \$21.66 per share (\$1,466 million). The Group recognised \$1 million transaction costs in relation to the capital return. The shares bought back were subsequently cancelled.

The above Consolidated Statement of Changes in Equity should be read in conjunction with the accompanying notes.

Cash and cash equivalents at end of period	107,565	87,380	44,322

1 It should be noted that the Group does not use this accounting Statement of Cash Flows in the internal management of its liquidity positions.

2 Includes discontinued operations.

3 Comparative information has been restated to conform to presentation in the current period.

4 Includes the dividend reinvestment plan (DRP) satisfied by on-market purchase and transfer of shares.

The above Consolidated Statement of Cash Flows should be read in conjunction with the accompanying notes.

Notes to the Financial Statements

1. Overview

1.1 General Information, Basis of Accounting, Adoption of Amended Accounting Standards and Future Accounting Developments

General Information

Commonwealth Bank of Australia (the Bank) is Australia's leading provider of integrated financial services, including retail, business and institutional banking, funds management, superannuation, insurance, investment and share-broking products and services. The Bank has branches across Australia and New Zealand as well as Europe, North America and Asia.

The financial statements of the Bank and its subsidiaries (the Group) for the half year ended 31 December 2021, were approved and authorised for issue by the Board of Directors on 9 February 2022. The Directors have the power to amend and reissue the financial statements.

The financial report includes the consolidated financial statements of the Group, accompanying notes, Directors' Declaration and the Independent Auditor's Review Report.

The Bank is a for-profit entity incorporated and domiciled in Australia. It is a company limited by shares that are publicly traded on the Australian Securities Exchange. The registered office is Ground Floor, Tower 1, 201 Sussex Street, Sydney, NSW 2000, Australia.

On 21 June 2021, the Group announced the sale of CommInsure General Insurance to Hollard Insurance Company Pty Ltd (Hollard). The sale is subject to Australian regulatory approvals and other conditions, and is expected to complete in the second half of calendar year 2022.

On 28 July 2021, the Group entered into an agreement with AIA Australia for a partial transfer of the Commonwealth Financial Planning (CFP) business to AIA Financial Services Limited. On 26 October 2021, the Group announced its intent to close the remaining CFP business. The transfer completed on 30 November 2021.

On 1 December 2021, the Group completed the sale of a 55% interest in Colonial First State (CFS) to KKR.

CFS has been classified as a discontinued operation in the Group's financial statements for the half year ended 31 December 2021. The assets and liabilities of CommInsure General Insurance are classified as held for sale as at 31 December 2021.

There have been no other significant changes in the nature of the principal activities of the Group during the half year.

Basis of Accounting

The general purpose financial report for the half year ended 31 December 2021 has been prepared in accordance with the requirements of the Corporations Act 2001 (Cth) and AASB 134 'Interim Financial Reporting' which ensures compliance with IAS 34 Interim Financial Reporting. The Group is a for-profit entity for the purpose of preparing this report.

This half year financial report does not include all notes of the type normally included within an Annual Financial Report and therefore cannot be expected to provide as full an understanding of the financial position and financial performance of the Group as that given by the Annual Financial Report.

As a result, this half year financial report should be read in conjunction with the 30 June 2021 Annual Report of the Group and any public announcements made in the period by the Group in accordance with the continuous disclosure requirements of the Corporations Act 2001 (Cth) and the ASX Listing Rules.

The amounts contained in this half year financial report are presented in Australian dollars and rounded to the nearest million dollars unless otherwise stated, under the option available under ASIC Corporations Instrument 2016/191. For the purpose of this half year financial report, the half year has been treated as a discrete reporting period.

Except as discussed below, the accounting policies adopted in the preparation of the half year financial report are consistent with those adopted by the Group and disclosed in the Annual Financial Report for the year ended 30 June 2021.

Where necessary, comparative information has been restated to conform to presentation in the current period. All changes have been footnoted throughout the financial statements. Discontinued operations are excluded from the results of the continuing operations and are presented as a single line item "net profit after tax from discontinued operations" in the Consolidated Income Statement. Assets and liabilities of discontinued operations have been presented separately as held for sale on the Consolidated Balance Sheet.

Notes to the Financial Statements (continued)

1.1 General Information, Basis of Accounting, Adoption of Amended Accounting Standards and Future Accounting Developments (continued)

Impacts of coronavirus (COVID-19)

The Group has carefully considered the impact of COVID-19 in preparing its financial statements for the half year ended 31 December 2021, including the application of critical estimates and judgements. The key impacts on the financial statements are as follows:

- Provisions for impairment (refer to Note 3.2)
- Assessment of impairment of non-financial assets.

The Group assessed property, plant and equipment, right of use assets, and assets held as lessor for indicators of impairment. Due to the expected recoveries by global aviation and shipping industries from the impacts of COVID-19, impairment reversals of \$8 million were recognised during the half year ended 31 December 2021, which are presented within other banking income. In determining the value in use of the aircraft, the Group incorporates the cash inflows over the lease term, as well as the expected selling price on expiry of the lease. Recovery from disruption across the aviation industry resulted in a partial recovery in the assets' expected recoverable values. There remains uncertainty regarding the aviation sector, and the duration of restrictions on domestic and international travel.

Adoption of Amended Accounting Standards and Future Accounting Developments

Future Accounting Developments

AASB 17 Insurance Contracts will replace AASB 4 Insurance Contracts, AASB 1023 General Insurance Contracts and AASB 1038 Life Insurance Contracts, with effect from 1 July 2023. On 30 July 2020, a number of amendments to AASB 17 were issued under AASB 2020-05 Amendments to Australian Accounting Standards – Insurance Contracts, including an additional scope exclusion for credit cards and similar contracts that provide insurance coverage, as well as an optional scope exclusion for loan contracts that transfer significant insurance risk. The sale of the Group's Commlnsure General Insurance business is expected to complete in the second half of calendar 2022. As a result, the impact of AASB 17 is not expected to be material to the Group.

Other amendments that are not yet effective are not expected to result in significant changes to the Group's accounting policies.

Interest Rate Benchmark Reform

Background

Interbank Offered Rates (IBORs), such as the London Interbank Offered Rate (LIBOR), play a critical role in global financial markets, serving as reference rates for derivatives, loans and securities, and as parameters in the valuation of financial instruments. While many of these IBORs have been reformed, some are ceasing altogether. In March 2021, the UK Financial Conduct Authority (FCA) announced the date on which LIBOR will cease, after which representative LIBOR rates will no longer be available. The cessation date for all tenors of GBP, CHF, EUR and JPY LIBOR and the one-week and two-month tenors for USD LIBOR was 31 December 2021. The cessation date for the remaining USD LIBOR tenors is 30 June 2023. Market-led working groups in respective jurisdictions have recommended alternative risk-free reference rates (RFRs). The AUD Bank Bill Swap Rate (BBSW), Euro Interbank Offered Rate (EURIBOR) and NZ Bank Bill Market (BKBM) are not expected to be directly impacted by the interest rate benchmark reform (IBOR reform) and are not expected to be discontinued.

The Group is exposed to LIBORs through various financial instruments including loans, investment and trading securities, derivatives, debt issues, and deposits. Existing LIBOR-referencing contracts that mature beyond their respective LIBOR cessation dates are to be replaced with new contracts or to be amended to either reference an alternate RFR or include legal provisions that offer an unambiguous and predetermined path to interest rate benchmark replacement (fallback provisions), prior to LIBOR's cessation. Amongst the matters considered in the contractual transition are the fundamental differences between LIBORs and RFRs. RFRs are overnight rates, while LIBORs are available in multiple tenors. LIBORs also incorporate a bank credit risk premium while RFRs do not. As a result of these differences, both term and spread adjustments to the applicable fallback RFRs are required to ensure that contracts that reference LIBOR transition on an economically equivalent basis.

Notes to the Financial Statements (continued)

1.1 General Information, Basis of Accounting, Adoption of Amended Accounting Standards and Future Accounting Developments (continued)

Accounting amendments

In 2018, in response to the uncertain long-term viability of interest rate benchmarks, and LIBOR in particular, the International Accounting Standards Board (IASB) commenced a review of the financial reporting implications associated with IBOR reform. Resulting amendments to accounting standards were subsequently issued in two phases.

AASB 2019-3 *Amendments to Australian Accounting Standards – Interest Rate Benchmark Reform* was issued by the Australian Accounting Standards Board (AASB) in October 2019 and amended hedge accounting requirements to provide relief from the potential effects of uncertainty caused by IBOR reform. The Group early adopted the amendments for the year ended 30 June 2020.

AASB 2020-8 *Amendments to Australian Accounting Standards – Interest Rate Benchmark Reform – Phase 2* was issued by the AASB in September 2020. The amendments only apply to those changes to financial instruments and hedging relationships that are a direct consequence of IBOR reform and where cash flows are amended on an economically equivalent basis. The Group adopted these amendments during the current reporting period. The key changes include the following:

- A practical expedient for changes in contractual cash flows required by the reform – the Group does not have to derecognise or adjust the carrying amount of financial instruments for these changes, but instead updates the effective interest rate to reflect the change to the alternative benchmark rate;
- Hedge accounting – the Group does not have to discontinue its hedge accounting solely because it makes changes required by the reform, if the hedge meets all the other hedge accounting criteria; and
- Additional disclosures – the Group is required to disclose information, as contained in this note, about new risks arising from the reform as well as how the Group manages the transition to alternative benchmark rates.

IBOR reform program

In October 2018, the Group formed the Interest Rate Benchmark Reform Program (the Program) which has been tasked with addressing the impact to the Group resulting from the transition from IBORs to RFRs. The Program includes a formal governance structure to ensure clear accountability for all decisions, and incorporates the requisite risk, treasury, finance, legal, business, and support functions.

The transition from IBORs to RFRs has resulted in various risks to the Group, including operational, financial, legal, compliance and conduct risks. These risks have stemmed from, amongst others, the need for new products that incorporate RFRs, the impact of IBOR related changes on customers and financial instrument counterparties, as well as the need for different system and process capabilities. The Group under direction of the Program, has applied various means of eliminating and managing these risks, while ensuring that customer outcomes are appropriate and any disruption to business is minimized. No material changes have been made to the Group's risk management strategy.

The Group has been actively engaged in industry working groups and IBOR reform forums which has ensured the implementation has been consistent with the market and compliant to date.

The use of LIBOR in new products has been phased out in accordance with industry and supervisory guidance.

Financial instruments impacted by IBOR reform

The table below provides the Group's remaining material exposure to interest rate benchmarks that are subject to IBOR reform. More specifically, the table provides financial instrument exposures that currently mature after the relevant LIBOR cessation date and that are yet to transition to an alternative RFR. The vast majority of non-cleared derivatives are now subject to the ISDA Fallbacks Protocol for converting LIBORs to RFRs upon the occurrence of an index cessation event. Cleared derivatives will transition in accordance with the clearing house rulebook. In addition, the Group has been engaging with customers and counterparties in respect of non-derivative financial instruments to transition to an alternative RFR or include appropriate fallback provisions.

Notes to the Financial Statements (continued)

1.1 General Information, Basis of Accounting, Adoption of Amended Accounting Standards and Future Accounting Developments (continued)

	Gross carrying value at 31 Dec 21 of financial instruments yet to transition to RFRs		
	USD Libor	GBP Libor ¹	Total
	\$M	\$M	\$M
Non-derivative financial assets ²	7,515	228	7,743
Non-derivative financial liabilities	904	–	904
Derivative assets	4,842	2	4,844
Derivative liabilities	3,774	3	3,777
Loan commitments ³	4,412	1,832	6,244

1 Financial Instruments are yet to transition where they reference GBP LIBOR, mature after 31 December 2022 (when synthetic GBP LIBOR is no longer available), and have not yet been restructured to transition to an alternative RFR on the next reset date which falls after the relevant LIBOR cessation date.

2 Excludes provisions for expected credit losses.

3 For the multi-currency facilities that reference a benchmark rate impacted by the IBOR reform, the undrawn balance has been allocated to the LIBOR currency with the earliest LIBOR cessation date where the facility is yet to transition to an alternative RFR for that currency.

Prior period restatements

During the half year ended 31 December 2021, the Group implemented the following changes that were applied retrospectively and impacted the prior periods' financial statements:

- The Group performed a review of the corporate and business credit limits utilisation data and identified products for which drawdowns were considered probable; facility and line fees on these products were reclassified from other banking income to net interest income;
- As part of its continued broad review of employee entitlements, the Group finalised remediation amounts required to be paid to impacted employees in relation to a number of historic employee entitlements calculations.

The impact of these changes on the prior periods' financial statements was as follows:

- an increase in net interest income and a decrease in other banking income for the half years ended 30 June 2021 and 31 December 2020 of \$234 million and \$229 million, respectively;
- an increase in provisions as at 30 June 2021 and 31 December 2020 of \$43 million;
- an increase in deferred tax asset as at 30 June 2021 and 31 December 2020 of \$13 million;
- a decrease in retained profits as at 1 July 2020 of \$30 million.

Changes implemented during the year ended 30 June 2021

As disclosed in the Group's 30 June 2021 Annual Report, the following changes were implemented during the year ended 30 June 2021:

- the Group performed a review of the historic accounting treatment of a transaction product arrangement comprised of both loan and deposit balances and concluded that, under AASB 132 Financial Instruments: Presentation, the credit balances cannot be netted against the debit balances drawn under the arrangement;
- the Group revised its allocation approach for certain centrally incurred costs impacting continuing and discontinued operations;
- as part of its broad review of employee entitlements the Group determined remediation amounts required to be paid to impacted employees in relation to a number of historic employee entitlements calculations; and
- the Group revised its accounting policy in relation to configuration and customisation costs incurred in implementing software-as-a-service (SaaS) arrangements with cloud providers. The change in accounting policy resulted from the implementation of agenda decisions issued by the IFRS Interpretations Committee (IFRIC) clarifying its interpretation of how current accounting standards apply to these types of arrangements.

These changes were applied retrospectively and impacted the financial statements of the Group as follows:

- an increase in loans, bills discounted and other receivables and deposits and public borrowings as at 31 December 2020 of \$1,514 million;
- an increase in provisions as at 31 December 2020 of \$55 million;
- an increase in deferred tax asset as at 31 December 2020 of \$35 million;
- a decrease in intangible assets as at 31 December 2020 of \$63 million;
- an increase in operating expenses for the half year ended 31 December 2020 of \$25 million;
- a decrease in income tax expense for the half year ended 31 December 2020 of \$7 million;
- an increase in the Group's net profit from discontinued operations after tax for the half year ended 31 December 2020 of \$10 million;
- a decrease in retained profits as at 1 July 2020 of \$75 million.

Notes to the Financial Statements (continued)

2. Our Performance

Overview

The Group earns its returns from providing a broad range of banking products and services to retail and wholesale customers in Australia, New Zealand and other jurisdictions.

Lending and deposit taking are the Group's primary business activities with Net interest income being the main contributor to the Group's results. Net interest income is derived from the difference between interest earned on lending and investment assets and interest incurred on customer deposits and wholesale debt raised to fund these assets.

The Group further generates income from lending fees and commissions, general insurance products and trading activities. It also incurs costs associated with running the business such as staff, occupancy and technology related expenses.

Our Performance section provides details of the main contributors to the Group's returns and analysis of its financial performance by business segments and geographic regions.

Notes to the Financial Statements (continued)

2.1 Net Interest Income (continued)

ACCOUNTING POLICIES

Interest income and interest expense on financial assets and liabilities measured at amortised cost, and debt financial assets measured at fair value through OCI, are recognised using the effective interest method. Interest income recognition for these categories of financial assets depends on the expected credit losses (ECL) stage they are allocated to in accordance with the Group's ECL methodology. For financial assets classified within Stage 1 and Stage 2 interest income is calculated by applying the effective interest rate to the gross carrying amount of the assets. Interest income on financial assets in Stage 3 is recognised by applying the effective interest rate to the gross carrying amount net of provisions for impairment. For details on the Group's ECL methodology refer to Note 3.2.

Fees, transaction costs and issue costs integral to financial assets and liabilities are capitalised and included in the interest recognised over the expected life of the instrument. This includes fees for providing a loan or a lease arrangement. Facility and line fees in relation to commitments made under credit facilities where draw down is assessed as probable are considered an integral part of effective interest rate and recognised in net interest income.

Interest income on finance leases is recognised progressively over the life of the lease, consistent with the outstanding investment and unearned income balance.

Interest income and expense on financial assets and liabilities that are classified at fair value through the Income Statement are accounted for on a contractual rate basis and include amortisation of premium/discounts.

Interest expense also includes payments made under a liquidity facility arrangement with the Reserve Bank of Australia, the Major Bank Levy (Bank Levy) expense and other financing charges.

2.2 Other Operating Income

3 The half year ended 31 December 2021 includes depreciation of \$32 million in relation to assets held for lease as lessor by the Group (30 June 2021: \$35 million; 31 December 2020: \$40 million).

4 The half year ended 31 December 2021 includes a \$8 million reversal of impairment loss in relation to certain aircraft owned by the Group and leased to various airlines (30 June 2021: \$12 million impairment reversal; 31 December 2020: \$124 million impairment loss).

Notes to the Financial Statements (continued)

2.2 Other Operating Income (continued)

ACCOUNTING POLICIES

Lending fees and commission income are accounted for as follows:

- facility fees earned for managing and administering credit and other facilities for customers are generally charged to the customer on a monthly or annual basis and are recognised as revenue over the service period. Annual fees are deferred on the Balance Sheet in Bills payable and other liabilities and recognised on a straight-line basis over the year. Transaction based fees are charged and recognised at the time of the transaction;
- commitment fees and fees in relation to guarantee arrangements are deferred and recognised over the life of the contractual arrangements; and
- fee income is earned for providing advisory or arrangement services, placement and underwriting services. These fees are recognised and charged when the related service is completed which is typically at the time of the transaction.

Establishment fees on financing facilities are deferred and amortised to interest income over the expected life of the loan and are not recognised when the commitment is issued.

Trading income represents both realised and unrealised gains and losses from changes in the fair value of trading assets, liabilities and derivatives, which are recognised in the period in which they arise.

Net gain/(loss) on non-trading financial instruments includes realised gains and losses from non-trading financial assets and liabilities, as well as realised and unrealised gains and losses on non-trading derivatives that are held for risk management purposes.

Net gain/(loss) on the disposal of property, plant and equipment is the difference between proceeds received and its carrying value.

Net hedging ineffectiveness is measured on fair value, cash flow and net investment hedges.

Dividends received on non-trading equity investments are recognised on the ex-dividend date or when the right to receive payment is established.

Funds management fees are recognised over the service period as the performance obligation is met and when it is probable that the revenue will be received.

General insurance premiums received and receivable are recognised as revenue when they are earned, based on actuarial assessment of the likely pattern in which risk will emerge. The portion not yet earned based on the pattern assessment is recognised as an unearned premium liability. Claims are recognised as an expense when the liability is established.

The Group equity accounts for its share of the profits or losses of associate or joint venture investments, net of impairment recognised. Dividends received are recognised as a reduction of the investment carrying amount.

Other income includes rental income on operating leases which is recognised on a straight-line basis over the lease term. This is offset by depreciation and impairment expense on the associated operating lease assets held by the Group.

Other income also includes the impact of foreign currency revaluations for foreign currency monetary assets and liabilities. These assets and liabilities are retranslated at the spot rate at the balance sheet date. Exchange differences arising upon settling or translating monetary items at different rates to those at which they were initially recognised or previously reported, are recognised in the Income Statement.

Critical accounting judgements and estimates

The amount of trail commission revenue is dependent on assumptions about the behavioural life of the underlying transaction generating the commission. Trail commission income is only recognised to the extent it is highly probable it will not reverse in future periods.

1 Comparative information has been restated to conform to presentation in the current period and to reflect the prior period adjustments detailed in Note 1.1.

2 The half year ended 31 December 2021 includes \$50 million of Banking, other Wealth and employee related remediation and litigation provisions (30 June 2021: \$156 million; 31 December 2020: \$93 million), and \$43 million of additional costs, including provisions, for historical Aligned Advice remediation issues and associated program costs (30 June 2021: \$177 million; 31 December 2020: \$149 million).

Notes to the Financial Statements (continued)

2.3 Operating Expenses (continued)

ACCOUNTING POLICIES

Salaries and related on-costs include annual leave, long service leave, employee incentives and relevant taxes. Staff expenses are recognised over the period the employee renders the service. Long service leave is discounted to present value using assumptions relating to staff departures, leave utilisation and future salary.

Share-based compensation includes plans which may be both cash or equity settled. Cash settled share-based remuneration is recognised as a liability and re-measured to fair value until settled. The changes in fair value are recognised as staff expenses. Equity settled remuneration is fair valued at the grant date and amortised to staff expenses over the vesting period, with a corresponding increase in the Employee compensation reserve.

Superannuation expense includes expenses relating to defined contribution and defined benefit superannuation plans. Defined contribution expense is recognised in the period the service is provided, whilst the defined benefit expense, which measures current and past service costs, is determined by an actuarial calculation.

Occupancy and equipment expenses include depreciation which is calculated using the straight-line method over the asset's estimated useful life. The right-of-use assets are depreciated over the shorter of the lease term or the useful life of the underlying asset, with the depreciation presented within depreciation of Property, plant and equipment.

IT services expenses are recognised as incurred when the related services are delivered, unless they qualify for capitalisation as computer software because they are identifiable and controlled in a way that allows future economic benefits to be obtained and others' access to those benefits can be restricted. Capitalised computer software assets are amortised over their estimated useful life.

SaaS arrangements are service contracts providing the Group with the right to access the cloud provider's application software over the contract period. Costs incurred to configure or customise, and the ongoing fees to obtain access to the cloud provider's application software, are recognised as operating expenses when the services are received. Some of these costs incurred are for the development of software code that enhances, modifies or creates additional capability to existing on-premise systems and meets the recognition criteria for an intangible asset.

The Group assesses, at each Balance Sheet date, useful lives and residual values and whether there is any objective evidence of impairment. If an asset's carrying value is greater than its recoverable amount, the carrying amount is written down immediately to its recoverable amount.

Other expenses are recognised as the relevant service is rendered. Operating expenses related to provisions are recognised for present obligations arising from past events where a payment to settle the obligation is probable and can be reliably estimated.

Critical accounting judgements and estimates

Actuarial valuations of the Group's defined benefit superannuation plans' obligations are dependent on a series of assumptions set out in Note 10.2 in the 2021 Annual Report including inflation rates, discount rates and salary growth rates. Changes in these assumptions impact the fair value of the plans' obligations, assets, superannuation expense and actuarial gains and losses recognised in other comprehensive income.

Measurement of the Group's share-based compensation is dependent on assumptions, including grant date fair values. Information on these is set out in Note 10.1 in the 2021 Annual Report.

Refer to note 6.2 in the 2021 Annual Report for more information on the judgements and estimates associated with goodwill.

2.4 Financial Reporting by Segments

The principal activities of the Group are carried out in the business segments below. These segments are based on the distribution channels through which customer relationships are managed. Business segments are managed on the basis of net profit after tax ("cash basis").

During the half year ended 31 December 2021, there were re-segmentations, allocations and reclassifications, including refinements to the allocation of support units and other costs. These changes have not impacted the Group's net profit, but have resulted in changes to the presentation of the Income Statement and the Balance Sheet of the affected segments. These changes have been applied retrospectively.

1 Information is presented on a continuing operations basis. For details on the Group's discontinued operations refer to Note 7.3.

2 Other locations include: United Kingdom, the Netherlands, United States, Japan, Singapore, Malta, Hong Kong, Indonesia, China, Vietnam and India.

3 Non-current assets include Property, plant and equipment, Investments in associates and joint ventures, and Intangible assets.

The geographical segment represents the location in which the transaction was recognised.

ACCOUNTING POLICY

Operating segments are reported based on the Group's organisational and management structures. Senior management review the Group's internal reporting based around these segments, in order to assess performance and allocate resources.

All transactions between segments are conducted on an arm's length basis, with inter-segment revenue and costs being eliminated in the 'Corporate Centre and Other' segment.

Other	(61)	(62)	13
Total income tax expense	1,905	1,929	1,603
Effective tax rate (%)	28.7	27.5	29.9

¹ Comparative information has been restated to reflect the prior period adjustments detailed in Note 1.1

ACCOUNTING POLICY

Income tax on the profit or loss for the period comprises current and deferred tax.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted at the Balance Sheet date, and any adjustment to tax payable in respect of previous years.

Deferred tax is calculated using the Balance Sheet method where temporary differences are identified by comparing the carrying amounts of assets and liabilities for financial reporting purposes to their tax bases.

The amount of deferred tax recognised is based on the expected manner of realisation or settlement of the carrying amount of assets and liabilities (i.e. through use or through sale), using tax rates which are expected to apply when the Deferred tax asset is realised or the Deferred tax liability is settled.

The Group recognised and disclosed separate deferred tax assets and deferred tax liabilities arising from arrangements where the Group is lessee. Deferred tax assets and liabilities are offset where they relate to income tax levied by the same taxation authority on either the same taxable entity or different taxable entities within the same taxable group.

The Bank and its wholly owned Australian subsidiaries elected to be treated as a single entity ("the tax consolidated group") under the tax consolidation regime from 1 July 2002. The members of the tax consolidated group have entered into tax funding and tax sharing agreements, which set out the funding obligations and members.

Any current tax liabilities/assets and deferred tax assets from unused tax losses from subsidiaries in the tax consolidated group are recognised by the Bank legal entity and funded in line with the tax funding arrangement.

The measurement and disclosure of deferred tax assets and liabilities have been performed on a modified stand-alone basis under UIG 1052 Tax Consolidation Accounting.

Critical accounting judgements and estimates

Provisions for taxation require significant judgement with respect to outcomes that are uncertain. For such uncertainties, the Group has estimated the tax provisions based on the expected outcomes. A deferred tax asset is only recognised to the extent that it is probable that future taxable profits will be available for it to be used against.

Notes to the Financial Statements (continued)

3. Our Lending Activities

Overview

Lending is the Group's primary business activity, generating most of its net interest income and lending fees. The Group satisfies customers' needs for borrowed funds by providing a broad range of lending products in Australia, New Zealand and other jurisdictions. As a result of its lending activities, the Group assumes credit risk arising from the potential that it will not receive the full amount owed.

This section provides details of the Group's lending portfolio by type of product and geographic region, analysis of the credit quality of the Group's lending portfolio and the related impairment provisions.

2 Home loans are presented gross of mortgage offset balances, which are required to be grossed up under accounting standards, but are netted down for the calculation of customer interest payments.

Notes to the Financial Statements (continued)

3.1 Loans, Bills Discounted and Other Receivables (continued)

ACCOUNTING POLICIES

Loans, bills discounted and other receivables include overdrafts, home loans, credit cards and other personal lending, term loans, and discounted bills. These financial assets are held within a business model whose objective is to hold financial assets in order to collect contractual cash flows. The contractual cash flows on these financial assets comprise the payment of principal and interest only. These instruments are accordingly measured at amortised cost.

Loans, bills discounted and other receivables, consistent with the Group's policy for all financial assets measured at amortised cost, are recognised on settlement date, when funding is advanced to the borrowers. They are initially recognised at their fair value plus directly attributable transaction costs such as broker fees. Subsequent to initial recognition, they are measured at amortised cost using the effective interest method and are presented net of provisions for impairment. The accounting policy for provisions for impairment is provided in Note 3.2. For information on the Group's management of credit risk, refer to Note 9.2 of the 2021 Annual Report.

Finance leases, where the Group acts as lessor, are also included in Loans, bills discounted and other receivables. Finance leases are those where substantially all the risks and rewards of the lease asset have been transferred to the lessee. Lease receivables are recognised at an amount equal to the net investment in the lease. Finance lease income reflects a constant periodic return on this net investment and is recognised within interest income in the Income Statement.

Critical accounting judgements and estimates

When applying the effective interest method the Group has estimated the behavioural term of each loan portfolio by reference to historical prepayment rates and the contractual maturity.

3.2 Loan Impairment Expense, Provisions for Impairment and Asset Quality

The following table provides information about movements in the Group's provision for impairment losses.

Movement in provisions for impairment and credit exposures by ECL stage

The following table provides movements in the Group's impairment provisions and credit exposures by expected credit loss (ECL) stage for the half years ended 31 December 2021, 30 June 2021 and 31 December 2020.

Movements in credit exposures and provisions for impairment in the following tables represent the sum of monthly movements over the half-year periods and are attributable to the following items:

- **Transfers to/(from):** movements due to transfers of credit exposures between Stage 1, Stage 2 and Stage 3. Excludes the impact of re-measurements of provisions for impairment between 12 months and lifetime ECL.
- **Net re-measurement on transfers between stages:** movements in provisions for impairment due to re-measurement between 12 months and lifetime ECL as a result of transfers of credit exposures between stages.
- **Net financial assets originated:** net movements in credit exposures and provisions for impairment due to new financial assets originated as well as changes in existing credit exposures due to maturities, repayments or credit limit changes.
- **Movements in existing IAP (including IAP write-backs):** net movements in existing Individually Assessed Provisions (IAP) excluding write-offs.
- **Movement due to risk parameter and other changes:** movements in provisions for impairment due to changes in credit risk parameters, forward looking economic scenarios or other assumptions as well as other changes in underlying credit quality that do not lead to transfers between Stage 1, Stage 2 and Stage 3.
- **Write-offs:** derecognition of credit exposures and provisions for impairment upon write-offs.
- **Recoveries:** increases in provisions for impairment due to recoveries of loans previously written off.
- **Foreign exchange and other movements:** other movements in credit exposures and provisions for impairment including the impact of changes in foreign exchange rates.

- Comparative information has been restated to conform to presentation in the current period and to reflect the prior period adjustment detailed in Note 1.1.
- Movements in credit exposures exclude Cash and liquid assets and Receivables from financial institutions. Movements in provisions for impairment losses include provisions in relation to Cash and liquid assets and Receivables from financial institutions. As at 31 December 2021, collective provisions in Stage 1 include \$17 million in relation to these financial assets (30 June 2021: \$15 million; 31 December 2020: \$14 million).
- The assessment of significant increase in credit risk (SICR) includes the impact of forward looking multiple economic scenarios in addition to adjustments for emerging risks at an industry, geographic location or particular portfolio segment level, which are calculated by stressing an exposure's internal credit rating grade at the reporting date. This accounts for approximately 65% of Stage 2 exposures as at 31 December 2021 (30 June 2021: 62%; 31 December 2020: 57%).
- As at 31 December 2021, Stage 3 includes \$5,431 million of collectively assessed credit exposures (30 June 2021: \$5,742 million; 31 December 2020: \$4,777 million) and \$1,706 million of individually assessed credit exposures (30 June 2021: \$1,971 million; 31 December 2020: \$1,970 million). Stage 3 provisions for impairment include \$559 million of collective provisions (30 June 2021: \$761 million; 31 December 2020: \$770 million) and \$792 million of individually assessed provisions (30 June 2021: \$900 million; 31 December 2020: \$872 million).

Notes to the Financial Statements (continued)

3.2 Loan Impairment Expense, Provisions for Impairment and Asset Quality (continued)

ACCOUNTING POLICY

By providing loans to customers, the Group bears the risk that the future circumstances of customers might change, including their ability to repay their loans in part or in full. While the Group's credit and responsible lending policies aim to minimise this risk, there will always be instances where the Group will not receive the full amount owed and hence a provision for impairment is required.

A description of the key components of the Group's AASB 9 impairment methodology is provided below.

Expected credit loss (ECL) model

The ECL model applies to all financial assets measured at amortised cost, debt securities measured at fair value through other comprehensive income, finance lease receivables, loan commitments and financial guarantee contracts not measured at fair value through profit or loss (FVTPL). The model uses a three-stage approach to recognition of expected credit losses. Financial assets migrate through these stages based on changes in credit risk since origination:

- **Stage 1 – 12 months ECL – Performing Loans**

On origination, an impairment provision equivalent to 12 months ECL is recognised. 12 months ECL is the credit losses expected to arise from defaults occurring over the next 12 months.

- **Stage 2 – Lifetime ECL – Performing loans that have experienced a significant increase in credit risk (SICR)**

Financial assets that have experienced a SICR since origination are transferred to Stage 2 and an impairment provision equivalent to lifetime ECL is recognised. Lifetime ECL is the credit losses expected to arise from defaults occurring over the remaining life of financial assets. If credit quality improves in a subsequent period such that the increase in credit risk since origination is no longer considered significant the exposure is reclassified to Stage 1 and the impairment provision reverts to 12 months ECL.

- **Stage 3 – Lifetime ECL – Non-performing loans**

Financial assets in default are transferred to Stage 3 and an impairment provision equivalent to lifetime ECL is recognised. This includes assets that are considered impaired as well as assets that are considered to be in default but are not impaired because, for example, no loss is expected based on the security position.

Credit losses for financial assets in Stage 1 and Stage 2 are assessed for impairment collectively, whilst those in Stage 3 are subjected to either collective or individual assessment of ECL.

Significant increase in credit risk (SICR)

SICR is assessed by comparing the risk of default occurring over the expected life of the financial asset at reporting date to the corresponding risk of default at origination. The Group considers all available qualitative and quantitative information that is relevant to assessing SICR.

For non-retail portfolios, such as the corporate risk rated portfolio and the asset finance portfolio, the risk of default is defined using the existing Risk Rated Probability of Default (PD) Masterscale. The PD Masterscale is used in internal credit risk management and includes 23 risk grades that are assigned at a customer level using rating tools reflecting customer specific financial and non-financial information and management's experienced credit judgement. Internal credit risk ratings are updated regularly on the basis of the most recent financial and non-financial information.

The Group uses a Retail Masterscale in the ECL measurement on personal loans, credit cards, home loans and SME retail portfolios. The Retail Masterscale has 15 risk grades that are assigned to retail accounts based on their credit quality scores determined through a credit quality scorecard. Risk grades for retail exposures are updated monthly as credit quality scorecards are recalculated based on new behavioural information.

For significant portfolios, the primary indicator of SICR is a significant deterioration in an exposure's internal credit rating grade between origination and reporting date. Application of the primary SICR indicator uses a sliding threshold such that an exposure with a higher credit quality at origination would need to experience a more significant downgrade compared to a lower credit quality exposure before SICR is triggered. The level of downgrade required to trigger SICR for each origination grade has been defined for each significant portfolio.

The assessment of SICR includes the impact of forward looking multiple economic scenarios in addition to adjustments for emerging risks at an industry, geographic location or particular portfolio segment level, which are calculated by stressing an exposure's internal credit rating grade at reporting date. This accounts for approximately 65% of Stage 2 exposures as at 31 December 2021 (30 June 2021: 62%, 31 December 2020: 57%).

The Group also uses secondary SICR indicators as backstops in combination with the primary SICR indicator, including:

- arrears status, that incorporates the AASB 9 rebuttable presumption of 30 days past due;
- a retail exposure entering a financial hardship status;
- a non-retail exposure's referral to Group Credit Structuring.

Notes to the Financial Statements (continued)

3.2 Loan Impairment Expense, Provisions for Impairment and Asset Quality (continued)

For a number of small portfolios, which are not considered significant individually or in combination, the Group applies simplified provisioning approaches that differ from the description above. 30 days past due is used as a primary indicator of SICR on exposures in these portfolios.

The offer or uptake of an initial COVID-19 related repayment deferral was not itself considered to constitute a SICR event unless the exposure was considered to have experienced a SICR based on other available information. Subsequent to an initial deferral some customers have been provided with a further deferral extension or other contract modification such as a term extension, or switch from principal and interest repayments to interest only repayments. Where an extension of a deferral was granted or a modification was given outside of commercial terms those exposures were considered to have experienced a SICR event. Modifications that are routinely offered in the normal course of business, such as interest only switches, were not considered to constitute a SICR event.

Definition of default, impaired and write-offs

The definition of default used in measuring ECL is aligned to the definition used for internal credit risk management purposes across all portfolios. Default occurs when there are indicators that a debtor is unlikely to meet contractual credit obligations to the Group in full, or the exposure is 90 days past due.

Facilities are classified as impaired where there is doubt as to whether the full amounts due, including interest and other contractual payments, will be received in a timely manner.

Loans are written off when there is no reasonable expectation of recovery. Unsecured retail loans are generally written off when repayments become 180 days past due. Secured loans are generally written off when assets pledged to the Group have been realised and there are no further prospects of additional recovery.

The offer or uptake of a COVID-19 related repayment deferral was not considered to constitute a default or credit impairment unless the exposure is considered to be in default or impaired based on the criteria outlined above.

ECL measurement

ECL is a probability weighted expected credit loss estimated by evaluating a range of possible outcomes and taking into account the time value of money, past events, current conditions and forecasts of future economic conditions.

The Group uses the following AASB 9 collective provisioning models in calculating ECL for significant portfolios:

- **Retail lending:** Personal Loans model, Credit Cards model, Home Loans model;
- **Non-retail lending:** Corporate Risk Rated model, Asset Finance model, Retail SME model.

For each significant portfolio ECL is calculated as a product of the following credit risk factors at a facility level:

- **Probability of default (PD):** The likelihood that a debtor will be unable to pay its obligations in full without having to take actions such as realising on security or that the debtor will become 90 days overdue on its obligation or contractual commitment;
- **Exposure at default (EAD):** The expected Balance Sheet exposure at default. The Group generally calculates EAD as the higher of the drawn balance and total credit limit, except for the credit cards portfolio, for which EAD calculation also takes into account the probability of unused limits being drawn down; and
- **Loss given default (LGD):** The amount that is not expected to be recovered following default.

Secured retail exposures and defaulted non-retail exposures are assessed for impairment through an Individually Assessed Provisions (IAP) process if expected losses are in excess of \$20,000. Impairment provisions on these exposures are calculated directly as the difference between the defaulted asset's carrying value and the present value of expected future cash flows including cash flows from realisation of collateral, where applicable.

Lifetime of an exposure

For exposures in Stage 2 and Stage 3 impairment provisions are determined as a lifetime expected loss. The Group uses a range of approaches to estimate expected lives of financial instruments subject to ECL requirements:

- **Non-revolving products in corporate portfolios:** Expected life is determined as a maximum contractual period over which the Group is exposed to credit risk;
- **Non-revolving retail products:** For fixed term products such as personal loans and home loans, expected life is determined using behavioural term analysis and does not exceed the maximum contractual period; and
- **Revolving products in corporate and retail portfolios:** For revolving products that include both a loan and an undrawn commitment, such as credit cards and corporate lines of credit, the Group's contractual ability to cancel the undrawn limits and demand repayments does not limit the exposure to credit losses to the contractual notice period. For such products, ECL is measured over the behavioural life.

Forward-looking information

Credit risk factors of PD and LGD used in ECL calculation are point-in-time estimates based on current conditions and adjusted to include the impact of multiple probability-weighted future forecast economic scenarios.

Forward looking PD and LGD factors are modelled for each significant portfolio based on macroeconomic factors that are most closely correlated with credit losses in the relevant portfolios. Each of the four scenarios (refer below) includes a forecast of relevant macro-economic variables which differ by portfolio:

- **Retail portfolios:** Cash rate, unemployment rate, GDP per capita and House price index.
- **Non-retail lending:** Unemployment rate, business investment index, disposable income, ASX 200 and the AUD/USD exchange rate.

Notes to the Financial Statements (continued)

3.2 Loan Impairment Expense, Provisions for Impairment and Asset Quality (continued)

New Zealand equivalents of a subset of the above macro-economic variables are used for retail credit exposures originated in New Zealand.

The Group uses the following four alternative macro-economic scenarios to reflect an unbiased probability-weighted range of possible future outcomes in estimating ECL for significant portfolios:

- **Central scenario:** This scenario is based on the Group's internal economic forecasts and considers Central Bank forecasts as well as other assumptions used in business planning and forecasting.
- **Downside scenario:** This scenario contemplates the potential impact of possible, but less likely, adverse macroeconomic conditions, resulting from further sustained periods of lockdowns or other adverse macroeconomic conditions.
- **Upside scenario:** This scenario is included to account for the potential impact of remote, more favourable macroeconomic conditions. Relative to the Central scenario, the Upside scenario features slightly stronger growth in economic output and further improvement in labour market conditions. In addition to this, the scenario features a stronger exchange rate, stronger housing market, business investment, disposable income and the share market as well as further increases in interest rates.
- **Severe downside scenario:** This scenario contemplates the potentially severe impact of remote, extremely adverse macroeconomic conditions. Relative to the Downside scenario, this scenario features a sharper contraction with a slower recovery in economic output, heightened and prolonged weakness in the labour market, and more severe declines in house prices and the share market. In addition to this, the scenario features a more severe and prolonged contraction in business investment and a weaker exchange rate, while interest rates remain accommodative.

The table below provides a summary of macro-economic variables used in the Central and Downside scenarios as at 31 December 2021.

	Central Calendar year			Downside Calendar year		
	2022	2023	2024	2022	2023	2024
GDP	5.0	3.0	2.5	(7.5)	2.5	2.5
Unemployment rate (%) ¹	4.1	4.0	4.0	9.5	8.5	7.5
Cash rate (%) ¹	0.50	1.25	1.25	0.10	0.10	0.10
House prices (annual % change)	7.0	(10.0)	(5.0)	(15.0)	(10.0)	1.0
Business investment (annual % change)	6.3	2.5	2.5	(15.0)	–	3.0
AUD/USD exchange rate ¹	0.80	0.78	0.78	0.65	0.65	0.65
Disposable income (annual % change)	1.0	1.7	1.7	(4.0)	1.5	2.5
ASX 200 (annual % change)	2.7	2.0	1.6	(15.0)	2.5	1.0
NZ unemployment rate (%) ¹	3.5	3.7	3.9	8.5	7.5	6.5
NZ cash rate (%)	2.00	2.00	2.00	(0.25)	(0.25)	(0.25)
NZ house prices (annual % change)	(3.0)	6.1	7.4	(15.0)	(10.0)	–

¹ Spot rate at December each year, unless otherwise stated.

The requirement to probability-weight possible future outcomes captures the uncertainty inherent in the credit outlook, and changes in that uncertainty over time. Weights are assigned to each scenario based on management's best estimate of the proportion of potential future loss outcomes that each scenario represents. The same economic scenarios and probability weights apply across all portfolios. The following probability weights applied at 31 December 2021, 30 June 2021 and 31 December 2020:

	Combined Weighting		
	31 Dec 21	30 Jun 21	31 Dec 20
Central and Upside	57.5%	67.5%	60.0%
Downside and Severe Downside	42.5%	32.5%	40.0%

During the half year ended 31 December 2021, the macroeconomic scenarios were updated to reflect continued improvements in economic conditions and the consequent prospect of near term increases in interest rates. The overall impact on the estimates of ECL under the Central and Upside scenarios has been minimal. In order to reflect the uncertainty about the speed of the economic recovery and the risk posed by further extended lockdowns and other adverse economic events, the Group decreased the combined weighting of the Central and Upside scenarios from 67.5% to 57.5%. This led to a commensurate increase in the combined weighting of the Downside and Severe Downside scenario from 32.5% to 42.5%. In addition, the ECL attributable to forward looking adjustments and overlays has increased over the half year ended 31 December 2021.

The Group's assessment of SICR also incorporates the impact of multiple probability-weighted future forecast economic scenarios on exposures' internal risk grades using the same four forecast macroeconomic scenarios as described above.

In estimating impairment provisions on individually significant defaulted exposures, the Group generally applies prudent assumptions in estimating recovery cash flows. Incorporating multiple forecast economic scenarios in estimates is not expected to significantly affect the level of impairment provisions on these credit exposures.

Notes to the Financial Statements (continued)

3.2 Loan Impairment Expense, Provisions for Impairment and Asset Quality (continued)

Incorporation of experienced credit judgement

Management exercises credit judgement in assessing if an exposure has experienced SICR and in determining the amount of impairment provisions at each reporting date. Where applicable, credit risk factors (PD and LGD) are adjusted upwards to incorporate reasonable and supportable forward looking information about known or expected risks for specific segments of portfolios that would otherwise not have been considered in the modelling process. Credit judgement is used to determine the degree of adjustment to be applied and considers information such as emerging risks at an industry, geographical and portfolio segment level.

The Group also applies overlays which are determined based on a range of techniques including stress testing, benchmarking, scenario analysis and expert judgement. Overlays are subject to internal governance and applied as an incremental ECL top-up amount to the impacted portfolio segments. In addition to this, the Group applies overlays for model risks and other external factors that cannot be adequately accounted for through the ECL models.

As at 30 June 2021, the Group held \$906 million of overlays related to uncertainties associated with the ongoing impacts of COVID-19 and other adverse economic conditions. This included overlays for customers impacted by the cessation of liquidity support measures, the emergence of new COVID-19 variants and the impacts of travel restrictions, particularly on the Aviation sector. The overlays contained \$285 million in relation to the Group's non-retail lending portfolio and \$621 million in relation to retail portfolios. As of 31 December 2021, overlays in relation to these factors reduced to \$739 million and include \$161 million in relation to the Group's non-retail lending portfolio and \$578 million in relation to retail portfolios. This reflects a reduction in overlays held for customers impacted by the cessation of liquidity support measures and partial recovery of the Aviation sector, partly offset by new or increased overlays in relation to potential impacts from inflationary pressures.

Sensitivity of provisions for impairment to changes in forward looking assumptions

As described above, the Group applies four alternative macro-economic scenarios (Central, Upside, Downside and Severe downside scenarios) to reflect an unbiased probability-weighted range of possible future outcomes in estimating ECL.

The table below provides approximate levels of provisions for impairment under the Central and Downside scenarios assuming 100% weighting was applied to each scenario and holding all other assumptions constant. As noted above, these scenarios and their associated weights have been selected based on the expected range of potential future loss outcomes.

	31 Dec 21 \$M	30 Jun 21 \$M	31 Dec 20 \$M
Reported probability - weighted ECL	5,854	6,211	6,815
100% Central scenario	3,771	4,119	5,022
100% Downside scenario	7,425	9,000	8,978

Sensitivity of provisions for impairment to SICR assessment criteria

If 1% of Stage 1 credit exposures as at 31 December 2021 was included in Stage 2, provisions for impairment would increase by approximately \$146 million (30 June 2021: \$162 million; 31 December 2020: \$136 million).

If 1% of Stage 2 credit exposures as at 31 December 2021 was included in Stage 1, provisions for impairment would decrease by approximately \$25 million (30 June 2021: \$27 million; 31 December 2020: \$31 million).

Modifications relating to COVID-19

In prior periods, the Group extended a number of support measures to customers impacted by COVID-19, including loan repayment deferrals, switches from principal and interest repayments to interest only repayments and other modifications including the extension of loan maturity dates. The majority of retail and non-retail loans that were previously granted COVID-19 deferrals returned to their regular non-deferral repayment terms. Deferral extensions were treated as non-substantial modifications and therefore accounted for as a continuation of the existing loan with no material modification gains or losses having been recognised. Other contract modifications were treated as substantial or non-substantial based on the terms on which they were granted.

Notes to the Financial Statements (continued)

3.2 Loan Impairment Expense, Provisions for Impairment and Asset Quality (continued)

During the half year ended 31 December 2021 loans with a gross carrying value of approximately \$1,626 million were granted COVID-19 related repayment deferrals or other contractual modifications when they were included in either Stage 2 or Stage 3 (30 June 2021: \$273 million; 31 December 2020: \$10,303 million). Loans with a gross carrying value of approximately \$13,396 million, that were subject to COVID-19 related modifications when in Stage 2 or Stage 3, remained in either Stage 2 or Stage 3 at 31 December 2021 (30 June 2021: \$14,902 million; 31 December 2020: \$23,281 million). The following table provides a summary of gross carrying values of credit exposures subject to COVID-19 related modifications.

	31 Dec 21 \$M	30 Jun 21 \$M	31 Dec 20 \$M
Retail secured			
Stage 1	1,378	2,385	5,069
Stage 2	392	617	14,497
Stage 3	97	112	342
Total retail secured	1,867	3,114	19,908
Retail unsecured			
Stage 1	–	–	277
Stage 2	–	–	11
Stage 3	–	–	7
Total retail unsecured	–	–	295
Non-retail

The majority of credit exposures subject to COVID-19 related modifications are secured. The Group takes into account market values of available collateral in calculating provisions for impairment. As at 31 December 2021, the provision for impairment held by the Group in relation to credit exposures subject to COVID-19 related modifications was \$159 million (30 June 2021: \$193 million; 31 December 2020: \$323 million).

Notes to the Financial Statements (continued)

3.2 Loan Impairment Expense, Provisions for Impairment and Asset Quality (continued)

Asset Quality

The tables below provide information about the credit quality of the Group's assets.

	As at 31 December 2021			
	Home	Other	Other	Total
	Loans ¹	Personal ²	Commercial	
	\$M	\$M	\$M	\$M
Loans which were neither past due nor impaired				
Investment Grade	327,399	4,770	97,871	430,040
Pass Grade	261,462	10,870	121,698	394,030
Weak	4,798	891	3,426	9,115
Total loans which were neither past due nor impaired	593,659	16,531	222,995	833,185
Loans which were past due but not impaired³

Past due 30 - 59 days	1,348	95	183	1,626
Past due 60 - 89 days	629	51	113	793
Past due 90 - 179 days	972	–	233	1,205
Past due 180 days or more	1,631	–	509	2,140
Total loans past due but not impaired	11,237	502	2,175	13,914

1 During the half year ended 31 December 2021, the Group refreshed its New Zealand residential mortgage regulatory capital model which resulted in movements of credit risk exposures across PD bands. There was a reduction in investment grade and an increase in pass grade as a result of this change.

2 Included in these balances are credit card facilities and other unsecured portfolio managed facilities up to 90 days past due. At 90 days past due all unsecured portfolio managed facilities are classified as impaired.

3 Includes assets in Stage 3 that have defaulted, but have not been classified as credit impaired as the loans are well secured and expected to be recovered.

Provisions to credit exposure, %	0.2	1.9	10.3	46.4	0.6

1 The assessment of SICR includes the impact of forward looking multiple economic scenarios in addition to adjustments for emerging risks at an industry, geographic location or particular portfolio segment level, which are calculated by stressing an exposure's internal credit rating grade at the reporting date. This accounts for approximately 65% of Stage 2 exposures as at 31 December 2021.

Provisions to credit exposure, %	0.2	1.9	16.1	44.3	0.7

¹ Comparative information has been restated to conform to presentation in the current period and to reflect the prior period adjustment detailed in Note 1.1.

² The assessment of significant increase in credit risk includes the impact of forward looking multiple economic scenarios in addition to adjustments for emerging risk at an industry, geographic location or a particular portfolio segment level, which are calculated by stressing an exposure's internal credit rating grade at the reporting date. This accounts for approximately 57% of Stage 2 credit exposures as at 31 December 2020.

Notes to the Financial Statements (continued)

4. Our Deposits and Funding Activities

Overview

Stable and well diversified funding sources are critical to the Group's ability to fund its lending and investing activities, and support growing its business.

Our main sources of funding include customer deposits, term funds raised in domestic and offshore wholesale markets via issuing debt securities and loan capital, and term funding from central banks. The Group also relies on repurchase agreements as a source of short-term wholesale funding. Refer to Note 9.4 of the 2021 Annual Report for the Group's management of liquidity and funding risk.

4.1 Deposits and Other Public Borrowings

	As at ¹		
	31 Dec 21	30 Jun 21	31 Dec 20

Total deposits and other public borrowings	815,124	766,381	747,980

¹ Comparative information has been restated to reflect the prior period adjustment detailed in Note 1.1.

ACCOUNTING POLICY

Deposits from customers include certificates of deposit, term deposits, savings deposits and other demand deposits. Deposits are initially recognised at their fair value less directly attributable transaction costs. Subsequent to initial recognition, they are measured at amortised cost. Interest incurred is recognised within net interest income using the effective interest method.

Securities sold under repurchase agreements are retained on the Balance Sheet where substantially all the risks and rewards of ownership remain with the Group. A liability for the agreed repurchase amount is recognised within Deposits and other public borrowings.

Notes to the Financial Statements (continued)

5. Our Capital, Equity and Reserves

Overview

The Group maintains a strong capital position in order to satisfy regulatory capital requirements, provide financial security to its depositors and creditors and adequate return to its shareholders. The Group's shareholders' equity includes issued ordinary shares, retained earnings and reserves.

This section provides analysis of the Group's shareholders' equity including changes during the period.

1 On 4 October 2021, the Group announced the successful completion of its \$6 billion off-market buy-back of CBA ordinary shares. 67,704,807 ordinary shares were bought back at \$88.62, and comprised a fully franked dividend component of \$66.96 per share (\$4,534 million) and a capital component of \$21.66 per share (\$1,466 million). The Group recognised \$1 million transaction costs in relation to the capital return. The shares bought back were subsequently cancelled.

2 The DRP in respect of the final 2020/2021 and interim 2020/2021 dividends were satisfied in full through the on-market purchase and transfer of 5,618,474 shares at \$101.00, and 4,869,634 shares at \$85.25, respectively.

3 The DRP in respect of the final 2019/2020 dividend was satisfied by the issue of 3,856,903 shares at \$68.53. The total value of shares issued under the DRP rules net of issues costs was \$264 million.

4 Relates to the movements in treasury shares held within the employee share scheme plans.

5 Comparative information has been restated to reflect the prior period adjustments detailed in Note 1.1.

6 Relates to a historical Group restructuring where the Group no longer holds exposure to foreign exchange risk.

Notes to the Financial Statements (continued)

5.1 Shareholders' Equity (continued)

ACCOUNTING POLICY

Shareholders' equity includes Ordinary share capital, Retained profits and Reserves. Policies for each component are set out below:

Ordinary share capital

Ordinary shares are recognised at the amount paid up per ordinary share, net of directly attributable issue costs. Where the Bank or entities within the Group purchase shares in the Bank, the consideration paid is deducted from total shareholders' equity and the shares are treated as treasury shares until they are subsequently sold, reissued or cancelled. Where such shares are sold or reissued, any consideration received is included in shareholders' equity.

Retained profits

Retained profits includes the accumulated profits for the Group including certain amounts recognised directly in retained profits less dividends paid.

Reserves

Asset revaluation reserve

The Asset revaluation reserve is used to record revaluation adjustments on the Group's property assets. Where an asset is sold or disposed of, any balance in the reserve in relation to the asset is transferred directly to Retained profits.

Foreign currency translation reserve

Exchange differences arising on translation of the Group's foreign operations are accumulated in the Foreign currency translation reserve. Specifically assets and liabilities are translated at the prevailing exchange rate at Balance Sheet date; revenue and expenses are translated at the transaction date; and all resulting exchange differences are recognised in the Foreign currency translation reserve. When a foreign operation is disposed of, exchange differences are recycled out of the reserve and recognised in the Income Statement.

Cash flow hedge reserve

The Cash flow hedge reserve is used to record fair value gains or losses associated with the effective portion of designated cash flow hedging instruments. Amounts are reclassified to the Income Statement when the hedged transaction impacts profit or loss.

Employee compensation reserve

The Employee compensation reserve is used to recognise the fair value of shares and other equity instruments issued to employees under the employee share plans and bonus schemes.

Investment securities revaluation reserve

The Investment securities revaluation reserve includes changes in the fair value of Investment securities measured at fair value through other comprehensive income. For debt securities, these changes are reclassified to the Income Statement when the asset is derecognised. For equity securities, these changes are not reclassified to the Income Statement when derecognised.

Notes to the Financial Statements (continued)

6. Fair Values

Overview

The Group holds a range of financial instruments as a result of its lending, investing and funding activities. Some of the financial instruments are actively traded on stock exchanges or in over-the-counter markets whilst others do not have liquid markets. This section provides information about fair values of the Group's financial instruments including a description of valuation methodologies used, the classification of financial instruments according to liquidity and the observability of inputs used in deriving the fair values.

6.1 Disclosures about Fair Values

Financial assets and financial liabilities are measured on an ongoing basis either at fair value or amortised cost.

(a) Fair Value Information for Financial Instruments not measured at Fair Value

The estimated fair values of the Group's financial instruments not measured at fair value are presented below. Fair values of financial assets and liabilities not included in the table below approximate their carrying values.

	31 Dec 21		30 Jun 21	
	Carrying value	Fair Value	Carrying value	Fair Value
	\$M	\$M	\$M	\$M
Financial assets				
Investment securities at amortised cost	3,930	3,941	4,278	4,313
Loans, bills discounted and other receivables	843,950	843,242	811,356	813,503
Financial liabilities

ACCOUNTING POLICY

Valuation

Fair value is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. On initial recognition, the transaction price generally represents the fair value of the financial instrument, unless there is observable information from an active market that provides a more appropriate fair value.

The fair value for financial instruments traded in active markets at the reporting date is based on their quoted market price or dealer price quotations, without any deduction for transaction costs. Assets and long positions are measured at a quoted bid price, liabilities and short positions are measured at a quoted asking price. Where the Group has positions with offsetting market risks, mid-market prices are used to measure the offsetting risk positions and a quoted bid or asking price adjustment is applied only to the net open position as appropriate.

Non-market quoted financial instruments are mostly valued using valuation techniques based on observable inputs except where observable market data is unavailable. Where market data is unavailable the financial instrument is initially recognised at the transaction price, which is generally the best indicator of fair value. This may differ from the value obtained from the valuation model. The timing of the recognition in the Income Statement of this initial difference in fair value depends on the individual facts and circumstances of each transaction, but is never later than when the market data becomes observable. The difference may be either amortised over the life of the transaction, recognised when the inputs become observable or on derecognition of the instrument, as appropriate.

Notes to the Financial Statements (continued)

6.1 Disclosures about Fair Values (continued)

ACCOUNTING POLICY (continued)

The fair value of Over-the-Counter (OTC) derivatives includes credit valuation adjustments (CVA) for derivative assets to reflect the credit worthiness of the counterparty. Fair value of uncollateralised derivative assets and uncollateralised derivative liabilities incorporate funding valuation adjustments (FVA) to reflect funding costs and benefits to the Group. These adjustments are applied after considering any relevant collateral or master netting arrangements.

Fair value hierarchy

The Group utilises various valuation techniques and applies a hierarchy for valuation inputs that maximise the use of observable market data, if available.

Under AASB 13 *Fair Value Measurement* all financial and non-financial assets and liabilities measured or disclosed at fair value are categorised into one of the following three fair value hierarchy levels:

Quoted prices in active markets – Level 1

This category includes assets and liabilities for which the valuation is determined by reference to unadjusted quoted prices for identical assets or liabilities in active markets where the quoted price is readily available, and the price represents actual and regularly occurring market transactions on an arm's length basis. An active market is one in which transactions occur with sufficient volume and frequency to provide pricing information on an ongoing basis.

Financial instruments included in this category are liquid government bonds, listed equities and exchange traded derivatives.

Valuation technique using observable inputs – Level 2

This category includes assets and liabilities that have been valued using inputs other than quoted prices as described for Level 1, but which are observable for the asset or liability, either directly or indirectly. The valuation techniques include the use of discounted cash flow analysis, option pricing models and other market accepted valuation models.

Financial instruments included in this category are financial institution and corporate bonds, certificates of deposit, bank bills, commercial papers, mortgage-backed securities and OTC derivatives including interest rate swaps, cross currency swaps and FX options.

Valuation technique using significant unobservable inputs – Level 3

This category includes assets and liabilities where the valuation incorporates significant inputs that are not based on observable market data (unobservable inputs). Unobservable inputs are those not readily available in an active market due to market illiquidity or complexity of the product. These inputs are generally derived and extrapolated from observable inputs to match the risk profile of the financial instrument, and are calibrated against current market assumptions, historic transactions and economic models, where available. These inputs may include the timing and amount of future cash flows, rates of estimated credit losses, discount rates and volatility. Financial instruments included in this category are certain exotic OTC derivatives and unlisted equity instruments.

As at 31 December 2021, the Group held an unlisted equity investment in Klarna Bank AB (Klarna) measured on a recurring basis at fair value through other comprehensive income of \$2,481 million (30 June 2021: \$2,701 million). The valuation of the investment as at 31 December 2021 was based on a methodology leveraging revenue multiples of market listed comparable companies. Comparable listed companies were included based on industry, size, developmental stage and/or strategy. A revenue multiple was derived for each comparable company identified and then discounted for considerations such as illiquidity and differences between the comparable companies and Klarna based on company-specific facts and circumstances. The range of revenue multiples applied by the Group in assessing the fair value was 22-35x. The Group adopted a revenue multiple of 28x in its valuation as at 31 December 2021. The effect of adjusting the revenue multiples by +/-20% representing a range of reasonably possible alternatives would be to increase the fair value by up to \$496 million or to decrease the fair value by up to \$496 million with all of the potential effect impacting the Investment securities revaluation reserve. The valuation as at 30 June 2021 was based on a different methodology on the basis that there was a private equity capital raising executed by the entity close to the balance sheet date. The methodology leveraged revenue multiples of market listed comparable companies and significant unobservable inputs including adjustments for market volatility and liquidity, as well as inputs relating to a recent private equity capital raise executed by Klarna. The range of revenue multiples applied by the Group in assessing the fair value was 29-36x. The Group adopted a revenue multiple of 32x in its valuation as at 30 June 2021.

Critical accounting judgements and estimates

Valuation techniques are used to estimate the fair value of securities. When using valuation techniques the Group makes maximum use of market inputs and relies as little as possible on entity specific inputs. It incorporates all factors that the Group believes market participants would consider in setting a price and is consistent with accepted economic methodologies for pricing financial instruments. Data inputs that the Group relies upon when valuing financial instruments relate to counterparty credit risk, volatility, correlation and extrapolation.

Periodically, the Group calibrates its valuation techniques and tests them for validity using prices from any observable current market transaction in the same instruments (i.e. without modification or repackaging) and any other available observable market data.

Notes to the Financial Statements (continued)

7. Other Information

7.1 Contingent Liabilities, Contingent Assets and Commitments arising from the banking business

Details of contingent liabilities and off Balance Sheet instruments are presented below and in Note 7.2, in relation to litigation, investigations and reviews. The face value represents the maximum potential amount that could be lost if the counterparty fails to meet its financial obligations. The credit equivalent amounts are a measure of potential loss to the Group in the event of non-performance by the counterparty. The credit commitments shown in the table below also constitute contingent assets. These commitments would be classified as loans and other receivables in the Balance Sheet should they be drawn upon by the customer.

	Face Value		Credit Equivalent	
	31 Dec 21	30 Jun 21	31 Dec 21	30 Jun 21
	\$M	\$M	\$M	\$M
Credit risk related instruments				
Financial guarantees	5,981	5,909	4,207	3,982
Performance related contingencies	5,328	5,401	2,664	2,700
Commitments to provide credit	198,022	187,572	184,902	176,397
Other commitments	1,130	1,639	1,127	1,631
Total credit risk related instruments	210,461	200,521	192,900	184,710

ACCOUNTING POLICY

The types of instruments included in this category are:

Financial guarantees are unconditional undertakings given to support the obligations of a customer to third parties. They include documentary letters of credit which are undertakings by the Group to pay or accept drafts drawn by a supplier of goods against presentation of documents in the event of payment default by a customer. Financial guarantees are recognised within other liabilities and are initially measured at their fair value, equal to the premium received. Subsequent to initial recognition, the Group's liability under each guarantee is measured at the higher of the amount initially recognised less cumulative amortisation recognised in the Income Statement and the expected credit losses. Any increase in the liability relating to financial guarantees is recorded in the Income Statement. The premium received is recognised in the Income Statement in other operating income on a straight-line basis over the life of the guarantee.

Performance related contingencies are undertakings that oblige the Group to pay third parties should a customer fail to fulfil a contractual non-monetary obligation. Performance related contingencies are performance guarantees and do not meet the definition of a financial guarantee. Performance guarantees are recognised when it is probable that an obligation has arisen. The amount of any provision is the best estimate of the amount required to fulfil the obligation.

Commitments to provide credit include obligations on the part of the Group to provide credit facilities against which clients can borrow money under defined terms and conditions. Such loan commitments are made either for a fixed period, or are cancellable by the Group subject to notice conditions. As facilities may expire without being drawn upon, the notional amounts do not necessarily reflect future cash requirements. Loan commitments must be measured with reference to expected credit losses required to be recognised. In the case of undrawn loan commitments, the inherent credit risk is managed and monitored by the Group together with the drawn component as a single credit exposure. The exposure at default on the entire facility is used to calculate the cumulative expected credit losses.

Other commitments to provide credit include commitments with certain drawdowns, standby letters of credit and bill endorsements. The details of the Group's accounting policies and critical judgements and estimates involved in calculating impairment provisions are provided in Note 3.2.

Notes to the Financial Statements (continued)

7.2 Customer Remediation, Litigation, Investigations and reviews, other matters

Customer Remediation

Provisions for customer remediation require significant levels of estimation and judgement. The amount raised depends on a number of different assumptions, such as the number of years impacted, the forecast refund rate and the average cost per case. The Group is committed to comprehensively and efficiently addressing the full range of remediation issues impacting customers of the Banking and Wealth Management businesses. Significant resources have been committed to a comprehensive program of work, to ensure that all issues are identified and addressed.

Aligned Advice remediation – ongoing service fees

Aligned advisors were not employed by the Group but were representatives authorised to provide financial advice under the licences of the Group's subsidiaries, Financial Wisdom Limited (FWL), Count Financial Limited (Count Financial) and Commonwealth Financial Planning Limited-Pathways (CFP-Pathways). The Group completed the sale of Count Financial to CountPlus Limited (CountPlus) on 1 October 2019, and ceased providing licensee services through CFP-Pathways and Financial Wisdom in March and June 2020, respectively. The Bank entered into reimbursement agreements with Financial Wisdom and CFP-Pathways, and an indemnity deed with CountPlus, to cover potential remediation of past issues including ongoing service fees charged where no service was provided. For details on the reimbursement agreements and the indemnity deed, refer to Note 11.2 of the 2021 Annual Report.

During the half year ended 31 December 2021, the Group recognised an increase in the provision for Aligned Advice remediation issues and program costs of \$17 million, including ongoing service fees charged where no service was provided. As at 31 December 2021, the provision held by the Group in relation to Aligned Advice remediation was \$992 million (30 June 2021: \$1,018 million; 31 December 2020: \$896 million). The provision includes \$479 million for customer fee refunds (30 June 2021: \$468 million; 31 December 2020: \$436 million), \$410 million for interest on fees subject to refunds (30 June 2021: \$423 million; 31 December 2020: \$329 million) and \$103 million for costs to implement the remediation program (30 June 2021: \$127 million; 31 December 2020: \$131 million).

The Group's estimate of the proportion of fees to be refunded is based on sample testing and allows for a threshold below which customers will be automatically refunded without detailed assessment. It assumes an average refund rate across licensees of 40% (30 June 2021: 39%; 31 December 2020: 37%). This compares to a refund rate of 22%, which was paid for our salaried advisors. An increase/(decrease) in the failure rate by 1% would result in an increase/(decrease) in the provision of approximately \$20 million. The Group is continuing to engage with ASIC in relation to its remediation approach.

Banking and other Wealth customer remediation

As at 31 December 2021, the provision held by the Group in relation to Banking and other Wealth Management customer remediation programs was \$180 million (30 June 2021: \$159 million; 31 December 2020: \$174 million). The provision for Banking remediation includes an estimate of customer refunds (including interest) relating to business and retail banking products (including bank guarantees, cash deposit accounts and merchants billing), and the related program costs. The wealth remediation provision includes an estimate of customer refunds (including interest) relating to advice quality, the Consumer Credit Insurance products, certain superannuation products, and the related program costs.

Litigation, investigations and reviews

The Group is party to a number of legal proceedings, and the subject of various investigations and reviews. Provisions have been raised in accordance with the principles outlined in the accounting policy section of this note.

Litigation

The main litigated claims against the Group as at 31 December 2021 are summarised below.

Shareholder class actions

In October 2017 and June 2018 two separate shareholder class action proceedings were filed against CBA in the Federal Court of Australia, alleging breaches of CBA's continuous disclosure obligations and misleading and deceptive conduct in relation to the subject matter of the civil penalty proceedings brought against CBA by the Australian Transaction Reports and Analysis Centre (AUSTRAC). The AUSTRAC proceedings concerned contraventions of the Anti-Money Laundering and Counter-Terrorism Financing Act 2006 (Cth).

The resolution of the AUSTRAC civil penalty proceedings was approved by the Federal Court on 20 June 2018 with CBA paying a penalty of \$700 million and legal costs.

It is alleged in the class actions that CBA shareholders who acquired an interest in CBA shares between 16 June 2014 and 3 August 2017 suffered losses as a result of the alleged conduct. The two class actions are being case managed together, with a single harmonised statement of claim. CBA denies the allegations made against it, and it is currently not possible to determine the ultimate impact of these claims, if any, on the Group. The Group has provided for legal costs expected to be incurred in the defence of the claims. A mediation in this matter is likely in July 2022 and a trial is set to commence on 7 November 2022.

Superannuation class actions

The Group is also defending four class action claims in relation to superannuation products.

On 9 October 2018, a class action was filed against Colonial First State Investments Limited (CFSIL) and CBA in the Federal Court of Australia. The claim initially related to investment in cash and deposit options (which are cash and deposit products provided by CBA) in the Colonial First State First Choice Superannuation Trust (FirstChoice Fund) and Commonwealth Essential Super (CES) and later expanded to join Avanteos Investments Limited (AIL) as a party in respect of claims regarding the FirstWrap Pooled Cash Account.

Notes to the Financial Statements (continued)

7.2 Customer Remediation, Litigation, Investigations and reviews, other matters (continued)

The main claims are that members that invested in these cash and deposit options received lower interest rates than they could have received had CFSIL/AIL offered similar products made available in the market by another bank with comparable risk and that CFSIL/AIL retained the margin that arises through the internal transfer pricing process in respect of deposits made with CBA, for their own benefit. It is claimed CFSIL/AIL breached their duties as a trustee of the funds, CFSIL breached its duties as a Responsible Entity of the underlying managed investment schemes and that CBA was involved in CFSIL/AIL's breaches. CBA, CFSIL and AIL deny the allegations and are defending the proceedings.

On 18 October 2019, a second class action was commenced against CFSIL in the Federal Court of Australia. The claim relates to certain fees charged to members of the FirstChoice Fund. It is alleged that CFSIL breached its duties as trustee and acted unconscionably because it failed, between 2013 and 2019, to take steps to avoid the payment of grandfathered commissions to financial advisers, which would have resulted in a reduction of the fees paid by members in respect of whom those commissions were paid. CFSIL denies the allegations and is defending the proceedings. Mediation in this matter is likely in the last quarter of 2022.

On 24 October 2019, a third class action was filed against CFSIL and a former executive director of CFSIL in the Federal Court of Australia, relating to alleged contraventions of statutory obligations under superannuation law and trustee breaches in the period between 2013 and 2017. The class action relates to the transfer of certain default balances held by members of FirstChoice Employer Super to a MySuper product. The key allegation is that members should have been transferred to a MySuper product earlier than they were, and that the alleged failure to effect the transfer as soon as reasonably practicable caused affected members to pay higher fees and receive lower investment returns during the period of delay. CFSIL and its former director deny the allegations and are defending the proceedings. A mediation in this matter is to be held in March 2022 with a trial set to commence on 4 April 2022.

On 22 January 2020, a fourth class action was filed against CFSIL and The Colonial Mutual Life Assurance Society Limited (CMLA) in the Federal Court of Australia. On 22 October 2021, AIA Australia Limited (AIAA), who from 1 April 2021 was liable for and assumed certain liabilities of CMLA under a life insurance scheme pursuant to Part 9 of the *Life Insurance Act 1995* (Cth) (Part 9 Scheme), was joined as a third respondent to the class action. The class action alleges that CFSIL did not act in the best interests of members and breached its trustee duties when taking out group insurance policies obtained from CMLA. The key allegation is that CFSIL entered into and maintained insurance policies with CMLA on terms that were less favourable to members than would have reasonably been available in the market. It is alleged that CMLA was knowingly involved in CFSIL's contraventions as trustee and profited from those contraventions. CFSIL, CMLA and AIAA deny the allegations and are defending the proceedings.

On 1 December 2021, the Group completed the sale of a 55% interest in Colonial First State (CFS) to KKR. CBA has assumed carriage of the four superannuation class actions proceedings on CFSIL's and AIL's behalf subject to the terms of a conduct indemnity deed between CBA, CFSIL and AIL.

The Group has provided for certain legal and other costs associated with its obligations under the indemnity deed.

Advice Class Actions

On 21 August 2020, a class action was filed in the Federal Court of Australia against Commonwealth Financial Planning Limited (CFP), Financial Wisdom Limited (FWL) and CMLA. The claim relates to certain CommInsure (CMLA) life insurance policies recommended by financial advisers appointed by CFP and FWL during the period from 21 August 2014 to 21 August 2020. On 16 November 2021, AIAA (who from 1 April 2021 was liable for and assumed certain liabilities of CMLA under the Part 9 Scheme) was joined as a fourth respondent to the class action. The key allegations include that CFP and FWL or their financial advisers breached their fiduciary duties to their clients, breached their duty to act in the best interest of their clients, and had prioritised their own interests (and the interests of CFP, FWL and CMLA) over the interest of their clients, in recommending certain CommInsure life insurance policies in preference to substantially equivalent or better policies available at lower premiums from third party insurers. It is also alleged that CMLA knew the material facts giving rise to the breaches of fiduciary duty. CFP, FWL, CMLA and AIAA are defending the proceedings.

On 3 September 2020, CBA was notified of a class action commenced against Count Financial Limited (Count) in the Federal Court of Australia on 24 August 2020. The proceeding relates to commissions paid to Count and its authorised representative financial advisers in respect of financial products (including insurance) and certain obligations of its financial advisers to provide ongoing advice in the period from 21 August 2014 to 21 August 2020. The claim also includes allegations (related to the receipt of commissions) that Count engaged in misleading or deceptive conduct, and that Count and its authorised representatives breached fiduciary duties owed to the applicant and group members. The claim seeks compensation and damages from Count, including any profits resulting from the contraventions.

Count was a wholly owned subsidiary of CBA until 1 October 2019, when it was acquired by CountPlus Limited. CBA has assumed the conduct of the defence in this matter on Count's behalf. Count is defending the proceedings.

It is currently not possible to determine the ultimate impact of these claims, if any, on the Group. The Group has provided for legal costs expected to be incurred in the defence of these claims.

US BBSW class action

In 2016, a class action was commenced in the United States District Court in New York against CBA, other banks and two brokers, claiming a conspiracy among competitors to manipulate the BBSW benchmark for mutual gain. The claims include allegations that United States racketeering and antitrust legislation have been contravened.

On 21 March 2021, CBA reached a confidential agreement in principle with the plaintiffs to settle the action. The settlement was made without admission of liability and was subject to the negotiation and execution of a Deed of Settlement and Court approval.

Notes to the Financial Statements (continued)

7.2 Customer Remediation, Litigation, Investigations and reviews, other matters (continued)

CBA entered into a final Deed of Settlement with the plaintiffs on 11 December 2021, which is subject to Court approval. The final approval hearing is scheduled to take place on 13 October 2022.

The Group has provided for legal costs expected to be incurred in the matter and the agreed settlement sum.

Consumer credit insurance class action

On 10 June 2020, a class action was commenced against CBA and CMLA in the Federal Court of Australia. The claim relates to consumer credit insurance for credit cards and personal loans that was sold between 1 January 2010 and 7 March 2018. The class action alleges that CBA and CMLA engaged in unconscionable and misleading or deceptive conduct, failed to act in the best interests of customers and provided them with inappropriate advice. In particular, it is alleged that some customers were excluded from claiming certain benefits under the policies and the insurance was therefore unsuitable or of no value. Allegations are also made in relation to the manner in which the insurance was sold. CBA and CMLA deny the allegations and are defending the proceedings.

It is currently not possible to determine the ultimate impact of this claim, if any, on the Group. The Group has provided for legal costs expected to be incurred in the defence of this claim.

ASB class action

Proceedings were served on CBA subsidiary ASB Bank Limited (ASB) on 29 September 2021 by plaintiffs seeking to bring a representative action on behalf of a class of plaintiffs against ASB in the High Court of New Zealand, Auckland Registry. These proceedings relate to ASB's variation disclosure obligations under the *Credit Contracts and Consumer Finance Act 2003*. ASB is defending the claim.

It is currently not possible to determine the ultimate impact of this claim, if any, on the Group.

Regulatory enforcement proceedings

Commonwealth Essential Super

On 22 June 2020, ASIC commenced civil penalty proceedings against CFSIL and CBA in the Federal Court of Australia for alleged contraventions of the conflicted remuneration provisions in the Corporations Act relating to the arrangements between CFSIL and CBA for the distribution of CES. CES is a MySuper product issued by CFSIL.

CBA filed its defence to the proceedings on 24 August 2020 and CFSIL filed its defence on 25 August 2020. CBA and CFSIL deny the allegations and are defending the proceedings. A hearing on the question of liability has been listed for 26 April 2022.

It is currently not possible to determine the ultimate impact of this claim, if any, on the Group. The Group has provided for legal costs expected to be incurred in relation to this matter.

CommSec/AUSIEX

On 1 March 2021, ASIC commenced proceedings against Commonwealth Securities Limited (CommSec) and Australian Investment Exchange Limited (AUSIEX) in the Federal Court of Australia. The proceedings relate to a number of issues including regulatory data requirements, trade confirmations requirements, client monies and brokerage issues. CommSec and AUSIEX are not defending the proceedings. A hearing has been listed for 3 March 2022 to determine penalties. CommSec and AUSIEX have also agreed to enter into a court-ordered compliance program.

AUSIEX was a subsidiary of the CBA Group until 3 May 2021. CBA has assumed carriage of the proceedings on AUSIEX's behalf.

It is currently not possible to determine the ultimate impact of this claim on the Group. The Group has provided for legal costs expected to be incurred and the potential penalty in relation to this matter.

Monthly Account Fees

On 31 March 2021, ASIC commenced proceedings against CBA in the Federal Court of Australia. The proceedings relate to errors by CBA between 1 June 2010 and 11 September 2019 where monthly account fee waivers were not applied to accounts for certain customers. ASIC is alleging contraventions of certain misleading and deceptive conduct provisions of the ASIC Act and breaches of the general obligations under the Corporations Act. CBA does not accept the way the alleged contraventions have been formulated in the proceedings and is defending the proceedings. A hearing on the question of liability has been listed for 4 October 2022.

It is currently not possible to determine the ultimate impact of this claim, if any, on the Group. The Group has provided for legal costs expected to be incurred in relation to this matter.

Fair Work Ombudsman (FWO) proceedings

In October 2021, the FWO commenced civil penalty proceedings in the Federal Court against CBA and CommSec, alleging contraventions of the Fair Work Act 2009 (Cth) (Fair Work Act). The proceedings follow an investigation by FWO of the Group's employee entitlement review (EER) and potential breaches by CBA and its related entities, including CommSec, of the Group's current and previous enterprise agreements and of the Fair Work Act. CBA self-disclosed these matters in the EER to the FWO.

CBA and CommSec have cooperated fully with the FWO's investigation. It is currently not possible to determine the ultimate impact of this claim on the Group. The Group has provided for legal costs expected to be incurred in relation to this matter.

CBA is continuing with its broad review of employee entitlements and is remediating impacted current and former employees as the review progresses. We continue to update both the FWO and the Finance Sector Union as the review progresses. The Group holds a provision for remediation and program costs related to the EER.

Notes to the Financial Statements (continued)

7.2 Customer Remediation, Litigation, Investigations and reviews, other matters (continued)

Consumer Credit Insurance

On 16 September 2021, ASIC commenced criminal proceedings against CBA in the Federal Court of Australia.

A sentencing hearing was held on 29 October 2021 where CBA pleaded guilty to the 30 charges. The proceedings relate to false or misleading representations made to 165 customers from 2011 to 2015 in contravention of the ASIC Act when CBA did not adequately disclose to those customers at the point of sale that they were not eligible for certain benefits under the CCI policies because of their employment status.

The penalty amount is to be decided by the Court. It is currently not possible to determine the ultimate impact of this claim on the Group. The Group has provided for legal costs expected to be incurred in relation to this matter.

Avanteos Investments Limited – defective disclosure documents

On 8 December 2021, the Commonwealth Director of Public Prosecutions filed criminal proceedings against AIL in the County Court of Victoria. AIL was charged with 18 offences relating to AIL's failure in January 2016 to correct defective disclosure documents in contravention of the Corporations Act. The disclosure documents were defective because they did not specify that AIL would continue to deduct adviser service fees from a member's account and pay those fees to the member's financial adviser after being notified of the member's death. In 2018, AIL implemented processes to stop this practice and has remediated impacted member accounts. AIL has pleaded guilty to the 18 charges.

The matter is listed for sentencing on 1 June 2022. It is currently not possible to determine the ultimate impact of this claim on the Group.

Ongoing regulatory investigations and reviews

The Group undertakes ongoing compliance activities, including breach reporting, reviews of products, advice, conduct and services provided to customers, as well as interest, fees and premiums charged. Some of these activities have resulted in remediation programs and where required the Group consults with the relevant regulator on the proposed remediation action.

Provisions have been recognised by the Group where the criteria outlined in the accounting policy section of this note are satisfied. Contingent liabilities exist with respect to these matters where it is not possible to determine the extent of any obligation to remediate or the potential liability cannot be reliably estimated.

There are also a number of ongoing matters where regulators are investigating whether CBA or a Group entity has breached laws or regulatory obligations. Where a breach has occurred, regulators are likely to impose, or apply to a Court for, fines and/or other sanctions. These matters include investigations of a number of issues which were notified to, or identified by, regulators.

In addition to possible regulatory actions and reviews, there may also be financial exposure to claims by customers, third parties and shareholders and this could include further class actions, customer remediation or claims for compensation or other remedies. The outcomes and total costs associated with such regulatory actions and reviews, and possible claims remain uncertain.

Other regulatory matters

The following matters were significant regulatory investigations and reviews, which have been completed, but have resulted in ongoing action required by the Group.

Enforceable undertaking to ASIC (foreign exchange)

In December 2016, CBA provided an enforceable undertaking (EU) to ASIC arising from an investigation into wholesale spot foreign exchange (FX) trading between 2008 and 2013. ASIC accepted a variation to the EU on 16 October 2020. The EU included the engagement of an independent expert, to review and assess the changes we have made to our trading operating model in recent years, including in training, procedures and oversight.

The EU also included a voluntary contribution of \$2.5 million to support the further development of financial literacy education relating to changes to delivery of care in the aged care sector. CBA continues to implement the terms of the varied EU.

Prudential inquiry into CBA and enforceable undertaking to APRA

On 28 August 2017, APRA announced it would establish an independent prudential inquiry (the Inquiry) into the Group focusing on the governance, culture and accountability frameworks and practices within the Group. The final report of the Inquiry was released on 1 May 2018 (the Final Report). The Final Report made a number of findings regarding the complex interplay of organisational and cultural factors within the Group and the need for enhanced management of non-financial risks.

In response to the Final Report, the Group acknowledged that it would implement all of the recommendations and agreed to adjust its minimum operational risk capital requirements by an additional \$1 billion (an impact to risk weighted assets of \$12.5 billion) until such time as the recommendations are implemented to APRA's satisfaction.

CBA has entered into an EU under which CBA's remedial action (Remedial Action Plan) in response to the Final Report would be agreed and monitored regularly by APRA. The Remedial Action Plan provides a detailed program of change outlining how CBA will improve the way it runs its business, manages risk, and works with regulators. The Remedial Action Plan also provides a comprehensive assurance framework, with Promontory Australasia (Sydney) Pty Ltd (Promontory) having been appointed as the independent reviewer, and which is required to report to APRA on the Group's progress against committed milestones every 3 months.

Notes to the Financial Statements (continued)

7.2 Customer Remediation, Litigation, Investigations and reviews, other matters (continued)

On 12 October 2021 CBA released the thirteenth and final Promontory report. Promontory noted that as at September 2021 all milestones have been assessed as complete and effective and all recommendations closed. The focus is to now demonstrate that the changes made are sustained and continuously improved.

Financial crime compliance

As noted above, in 2018 the Group resolved the AUSTRAC proceedings relating to contraventions of anti-money laundering/counter-terrorism financing (AML/CTF) laws.

Recognising the crucial role that the Group plays in fighting financial crime, it continues to invest significantly in its financial crime capabilities, including in its AML/CTF Compliance team and through the Program of Action with coverage across all aspects of financial crime (including AML/CTF, sanctions and anti-bribery and corruption) and all business units.

The Group provides updates to AUSTRAC on the Program of Action implemented by the Group.

However, there is no assurance that AUSTRAC or the Group's other regulators will agree that the Group's Program of Action will be adequate or that the Program of Action will effectively enhance the Group's financial crime compliance programs across its business units and the jurisdictions in which it operates. Although the Group is not currently aware of any other enforcement action by other domestic or foreign regulators in respect of its financial crime compliance, the Group regularly engages with such regulators (including in respect of compliance matters) and there can be no assurance that the Group will not be subject to such enforcement actions in the future.

Enforceable undertaking to ASIC (BBSW)

On 21 June 2018, the Federal Court approved an agreement between CBA and ASIC to resolve proceedings concerning alleged market manipulation and unconscionable conduct in respect of the bank bill market. CBA paid a civil penalty of \$5 million and a community benefit payment of \$15 million to Financial Literacy Australia. It also agreed to pay ASIC's costs of the investigation and legal costs. The Group provided for these costs in an earlier period.

As part of the settlement CBA also entered into an EU with ASIC under which CBA undertook to engage an independent expert to assess changes it has made (and will make) to its policies, procedures, controls systems, training, guidance and framework for the monitoring and supervision of employees and trading in Prime Bank Bills and CBA's BBSW-referenced product businesses. CBA has developed and implemented an enhanced control framework as part of this program of work. CBA continues to implement the terms of the EU.

Enforceable undertaking to the Office of Australian Information Commissioner (OAIC)

In June 2019, the Australian Information and Privacy Commissioner (Commissioner) accepted an EU offered by CBA, which requires further enhancements to the management and retention of customer personal information within CBA and certain subsidiaries.

The EU follows CBA's work to address two incidents: one relating to the disposal by a third party of magnetic data tapes containing historical customer statements and the other relating to potential unauthorised internal user access to certain systems and applications containing customer personal information. CBA reported the incidents to the Commissioner in 2016 and 2018 respectively and has since addressed these incidents. CBA found no evidence that as a result of these incidents, its customers' personal information was compromised or that there have been any instances of unauthorised access by CBA employees or third parties.

The Group has provided for certain costs associated with implementation and compliance with the EU provided to the Commissioner.

Other matters

Exposures to divested businesses

The Group has potential exposures to divested businesses, including through the provision of services, warranties and indemnities. These exposures may have an adverse impact on the Group's financial performance and position. The Group has recognised provisions where payments in relation to the exposures are probable and reliably measurable.

ACCOUNTING POLICY

Provisions are recognised for present obligations arising from past events where a payment to settle the obligation is probable and can be reliably estimated. Where the effect of the time value of money is material, the amount of the provision is measured as the present value of expenditures required to settle the obligation, based on a market observable rate. Where a payment to settle an obligation is not probable or cannot be reliably estimated, no provision is recognised. Such obligations are disclosed as contingent liabilities.

Notes to the Financial Statements (continued)

7.3 Discontinued Operations and Businesses Held for Sale

The Group continues to deliver on its strategic priority to create simpler, better foundations through divestments of wealth management and other non-core businesses. A summary of divestments completed during the half years ended 31 December 2021, 30 June 2021 and 31 December 2020, as well as ongoing divestments is provided below.

Completed transactions

BoCommLife

On 23 May 2018, the Group announced the sale of its 37.5% equity interest in BoCommLife Insurance Company Limited (BoCommLife) to MS&AD Insurance Group Holdings (MS&AD), the ultimate parent company of Mitsui Sumitomo Insurance Co., subject to Chinese regulatory approvals. The sale of BoCommLife completed on 10 December 2020, resulting in a post-tax gain of \$369 million (net of transaction costs) recognised during the half year ended 31 December 2020.

Life insurance businesses in Australia

On 21 September 2017, the Group entered into an agreement to sell 100% of its life insurance businesses in Australia (CommInsure Life) to AIA Group Limited (AIA).

On 1 November 2019, the Group announced the implementation of a joint cooperation agreement (JCA) which resulted in the full economic interests associated with CommInsure Life being transferred to AIA and AIA obtaining direct management and control of the business (excluding in relation to the Group's 37.5% equity interest in BoCommLife). As a result, CommInsure Life (excluding BoCommLife) was deconsolidated and derecognised on 1 November 2019.

The Group recognised a total post-tax loss of \$316 million on the deconsolidation of CommInsure Life. This includes a \$116 million post-tax loss on deconsolidation, net of transaction and separation costs recognised during the half year ended 31 December 2019. Post-tax transaction and separation costs of \$82 million and \$118 million were recognised during the years ended 30 June 2019 and 30 June 2018, respectively.

The sale was completed via a statutory asset transfer on 1 April 2021, and all proceeds have been received.

Australian Investment Exchange

On 28 April 2020, the Group announced the sale of its subsidiary, Australian Investment Exchange Limited (AUSIEX), to Nomura Research Institute (NRI). AUSIEX trades under the brand name CommSec Advisor Services. The sale completed on 3 May 2021, resulting in a post-tax gain of \$49 million (net of transaction and separation costs). This includes \$23 million of transaction and separation costs recognised during the year ended 30 June 2020. As AUSIEX did not constitute a major line of the Group's business, it was not classified as a discontinued operation.

Aussie Home Loans

On 16 December 2020, the Group entered into an agreement to merge Aussie Home Loans with Lendi, an online home loan platform. The sale completed on 3 May 2021, resulting in a post-tax gain of \$253 million (net of transaction and separation costs). Upon completion, the Group retained a 44% shareholding in the combined business. Subsequently, on 7 May 2021, the Group sold a portion of its investment, reducing its shareholding to 42%. As Aussie Home Loans did not constitute a major line of the Group's business, it was not classified as a discontinued operation.

Commonwealth Financial Planning

On 28 July 2021, the Group entered into an agreement with AIA Australia for a partial transfer of the Commonwealth Financial Planning (CFP) business to AIA Financial Services Limited. The transaction completed on 30 November 2021. On 26 October 2021, the Group announced the closure of the remaining CFP business effective from 30 November 2021. During the half year ended 31 December 2021, the Group recognised a post-tax loss of \$73 million mainly related to the write-down of customer receivables and the provision for employee redundancy payments.

Colonial First State

On 13 May 2020, the Group entered into an agreement to sell a 55% interest in Colonial First State (CFS) to KKR. The sale completed on 1 December 2021, resulting in a post-tax gain of \$840 million (net of transaction and separation costs). Post-tax transaction and separation costs of \$47 million and \$137 million were recognised during the years ended 30 June 2021 and 30 June 2020. The Group has retained a 45% interest in the parent entity of the CFS business, Superannuation and Investments HoldCo Pty Limited, which is accounted for as an investment in a joint venture.

Ongoing transaction

CommInsure General Insurance

On 21 June 2021, the Group announced the sale of CommInsure General Insurance to Hollard Insurance Company Pty Ltd (Hollard). As part of the sale, the Group established an exclusive 15-year strategic alliance with Hollard for the distribution of home and motor vehicle insurance products. On completion, the Group is expected to receive proceeds of approximately \$625 million, subject to completion adjustments, together with deferred business milestone payments and additional investment from Hollard throughout the 15-year strategic alliance. The sale is subject to Australian regulatory approvals and other conditions, and is expected to complete in the second half of calendar year 2022. As CommInsure General Insurance did not constitute a major line of the Group's business, it was not classified as a discontinued operation. The assets and liabilities have been reclassified to held for sale as at 31 December 2021.

Notes to the Financial Statements (continued)

7.3 Discontinued Operations and Businesses Held for Sale (continued)

Income Statement

Financial Impact of Discontinued Operations on the Group

The performance and net cash flows of CFS and the Group's interests in BoCommLife are set out in the tables below.

	Half Year Ended ¹		
	31 Dec 21	30 Jun 21	31 Dec 20
	\$M	\$M	\$M
Other banking income	13	23	34
Net banking operating income	13	23	34

Net cash (outflows)/inflows from discontinued operations	(360)	(60)	148

¹ Represents cash flows from the underlying businesses classified as discontinued operations and excludes proceeds from disposal.

Balance Sheet

The Balance Sheet of CommInsure General Insurance is set out in the table below. Balances as at 30 June 2021 include the assets and liabilities of CFS. Balances as at 31 December 2020 include the assets and liabilities of CFS, Aussie Home Loans and AUSIEX.

	As at		
	31 Dec 21	30 Jun 21	31 Dec 20
	\$M	\$M	\$M
Assets held for sale			
Cash and liquid assets	–	5	41
Assets at fair value through Income Statement	377	301	253
Intangible assets	35	700	761
Deferred tax assets	9	69	22
Other assets	624	124	538
Total assets¹	1,045	1,199	1,615
Liabilities held for sale			
Other liabilities	952	405	655
Total liabilities	952	405	655

¹ In addition to assets of business held for sale, the Group's total assets held for sale include \$6 million of properties held for sale (30 June 2021: \$2 million; 31 December 2020: \$2 million).

ACCOUNTING POLICY

Non-current assets (including disposal groups) are classified as held for sale if they will be recovered primarily through sale rather than through continuing use. Non-current assets which are to be abandoned, or businesses which are to be closed, are not classified as held for sale, since the carrying amount will be recovered principally through continuing use. A discontinued operation is a component of an entity that has been sold, or classified as held for sale, and represents a separate major line of business or geographical area of operations, is part of a single co-ordinated plan to dispose of a separate major line of business or geographical area of operations, or is a subsidiary acquired exclusively with a view to resale.

Notes to the Financial Statements (continued)

7.4 Subsequent Events

The Directors have determined a fully franked interim dividend of 175 cents per share amounting to \$2,986 million.

The Bank expects the DRP for the interim dividend for the half year ended 31 December 2021 will be satisfied in full by an on-market purchase of shares of approximately \$480 million.

Share buy-back

On 9 February 2022, the Bank announced its intention to undertake an on-market buy-back of up to \$2 billion of shares. The Bank reserves the right to vary, suspend or terminate the buy-back at any time.

Impact of COVID-19

There remains significant uncertainty regarding how the COVID-19 pandemic will evolve. In accordance with AASB 110 *Events after the Reporting Period*, the Group considered whether events after the reporting period confirmed conditions existing before the reporting date. The Group did not identify any subsequent events precipitated by COVID-19 related developments, which would require adjustment to the amounts or disclosures in the financial statements. Further, no other material non-adjusting subsequent events relating to COVID-19 were identified requiring disclosure in the financial statements. The Group will continue to regularly review forward looking assumptions and forecast economic scenarios.

Directors' Declaration

The Directors of the Commonwealth Bank of Australia declare that:

In the opinion of the Directors, the consolidated financial statements and notes for the half year ended on 31 December 2021, as set out on pages 81 to 133, are in accordance with the *Corporations Act 2001 (Cth)*, including:

- i. complying with the Australian Accounting Standards and any further requirements in the *Corporations Regulations 2001*; and
- ii. giving a true and fair view of the Group's financial position as at 31 December 2021 and its performance for the six months ended 31 December 2021;

In the opinion of the Directors, there are reasonable grounds to believe that the Commonwealth Bank of Australia will be able to pay its debts as and when they become due and payable.

This declaration is made in accordance with a resolution of the Directors.

Independent auditor's review report to the members of the Commonwealth Bank of Australia

Report on the half-year financial report

Conclusion

We have reviewed the half-year financial report of the Commonwealth Bank of Australia (the Bank) and the entities it controlled during the half-year (together the Group), which comprises the Consolidated Balance Sheet as at 31 December 2021, and the Consolidated Income Statement, Consolidated Statement of Comprehensive Income, Consolidated Statement of Changes in Equity and Condensed Consolidated Statement of Cash Flows for the half-year ended on that date, significant accounting policies and explanatory notes and the Directors' Declaration.

Based on our review, which is not an audit, we have not become aware of any matter that makes us believe that the accompanying half-year financial report of the Bank does not comply with the *Corporations Act 2001* including:

1. giving a true and fair view of the Group's financial position as at 31 December 2021 and of its performance for the half-year ended on that date; and
2. complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*.

Basis for conclusion

We conducted our review in accordance with ASRE 2410 *Review of a Financial Report Performed by the Independent Auditor of the Entity* (ASRE 2410). Our responsibilities are further described in the *Auditor's responsibilities for the review of the half-year financial report* section of our report.

We are independent of the Group in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the Accounting Professional & Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to the audit of the annual financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

Responsibilities of the Directors for the half-year financial report

The Directors of the Bank are responsible for the preparation of the half-year financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the Directors determine is necessary to enable the preparation of the half-year financial report that gives a true and fair view and is free from material misstatement whether due to fraud or error.

Auditor's responsibilities for the review of the half-year financial report

Our responsibility is to express a conclusion on the half-year financial report based on our review. ASRE 2410 requires us to conclude whether we have become aware of any matter that makes us believe that the half-year financial report is not in accordance with the *Corporations Act 2001* including giving a true

and fair view of the Group's financial position as at 31 December 2021 and of its performance for the half-year ended on that date, and complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*.

A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

1. Our Performance

Overview

The Group earns its returns from providing a broad range of banking and wealth management products and services to retail and wholesale customers in Australia, New Zealand and other jurisdictions.

Lending and deposit taking are the Group's primary business activities with net interest income being the main contributor to the Group's results. Net interest income is derived from the difference between interest earned on lending and investment assets and interest incurred on customer deposits and wholesale debt raised to fund these assets.

The Group further generates income from lending fees and commissions, general insurance products and trading activities. It also incurs costs associated with running the business such as staff, occupancy and technology related expenses.

The Performance section provides details of the main contributors to the Group's returns and analysis of its financial performance by business segments and geographical regions.

1.1 Net Interest Margin (continuing operations basis)

	Half Year Ended ¹		
	31 Dec 21	30 Jun 21	31 Dec 20
	%	%	%
Australia			
Interest spread ^{2,3}	1.88	2.03	2.03
Benefit of interest-free liabilities, provisions and equity ⁴	0.08	0.10	0.11

New Zealand			
Interest spread ^{2,3}	1.91	1.91	1.66
Benefit of interest-free liabilities, provisions and equity ⁴	0.16	0.17	0.25
Net interest margin ^{3,5}	2.07	2.08	1.91
Other Overseas			
Interest spread ^{2,3}	0.66	0.53	0.40
Benefit of interest-free liabilities, provisions and equity ⁴	–	0.01	0.03
Net interest margin ^{3,5}	0.66	0.54	0.43
Total Group			
Interest spread ²	1.82	1.99	1.93
Benefit of interest-free liabilities, provisions and equity ⁴	0.10	0.10	0.13
Net interest margin ⁵	1.92	2.09	2.06

1 Comparative information has been restated to conform to the presentation in the current half. Refer to Appendix 4.8 to this Document for further details.

2 Difference between the average interest rate earned and the average interest rate paid on funds.

3 Interest spread and margin calculations have been adjusted to include intragroup borrowings to more appropriately reflect the overseas cost of funds.

4 A portion of the Group's interest earning assets is funded by net interest-free liabilities and shareholders' equity. The benefit to the Group of these interest-free funds is the amount it would cost to replace them at the average cost of funds.

5 Net interest income divided by average interest earning assets for the half year annualised.

Appendices (continued)

1.2 Average Balances and Related Interest (continuing operations basis)

The following tables list the major categories of interest earning assets and interest bearing liabilities of the Group together with the respective interest earned or paid and the average interest rate for each of the half years ended 31 December 2021, 30 June 2021 and 31 December 2020. Averages used were predominantly daily averages. Interest is accounted for based on product yield.

Where assets or liabilities are hedged, the interest amounts are shown net of the hedge, however individual items not separately hedged may be affected by movements in exchange rates.

The New Zealand and Other Overseas components comprise overseas branches of the Group and overseas domiciled controlled entities.

Non-accrual loans are included in interest earning assets under loans, bills discounted and other receivables.

During the half year ended 31 December 2021 the official cash rate in Australia remained flat on a spot basis, while in New Zealand the official cash rate has increased 50 basis points on a spot basis.

¹ Comparative information has been restated to conform to the presentation in the current half. Refer to Appendix 4.8 to this Document for further details.

² Home loans are reported net of average mortgage offset balances (half year ended 31 December 2021: \$62,988 million; half year ended 30 June 2021: \$58,336 million; half year ended 31 December 2020: \$55,040 million), which are included in non-interest earning assets. Gross average home loans balance in the half year ended 31 December 2021, excluding mortgage offset accounts was \$593,214 million (half year ended 30 June 2021: \$567,368 million; half year ended 31 December 2020: \$549,776 million). While these balances are required to be grossed up under accounting standards, they are netted down for the calculation of customer interest payments and the calculation of the Group's net interest margin.

³ Consumer finance includes personal loans, credit cards and margin loans.

⁴ Used for calculating net interest margin.

New Zealand	19	(4)	15	35	(17)	18
Other Overseas	1	2	3	–	(6)	(6)
Total	191	(178)	13	169	(262)	(93)

¹ Comparative information has been restated to conform to the presentation in the current half. Refer to Appendix 4.8 to this Document for further details.

² "Rate" reflects the change due to movements in yield assuming average volume is consistent across the two periods. "Volume" reflects the change due to balance growth assuming the average rate is consistent across the two periods and the impact of variation in calendar days. The volume and rate variances for total interest earning assets and total interest bearing liabilities have been calculated separately (rather than being the sum of the individual categories).

Other ^{3,4}	75	72	(10)	4	(large)
Total other banking income - "statutory basis"	2,419	2,677	2,125	(10)	14

1 Comparative information has been restated to conform to the presentation in the current half. Refer to Appendix 4.8 to this Document for further details.

2 Includes gains/(losses) on non-trading derivatives that are held for risk management purposes.

3 The half year ended 31 December 2021 includes depreciation of \$32 million in relation to assets held for lease by the Group (30 June 2021: \$35 million; 31 December 2020: \$40 million).

4 The half year ended 31 December 2021 includes an \$8 million reversal of impairment loss in relation to certain aircraft owned by the Group and leased to various airlines (30 June 2021: \$12 million impairment reversal; 31 December 2020: \$124m impairment loss). The provisions are driven by the impact of COVID-19 on the aviation sector.

Other Banking Income – Reconciliation of Cash and Statutory Basis

The table below sets out various accounting impacts arising from the application of AASB 139 *Financial Instruments: Recognition and Measurement* to the Group's derivative hedging activities and other non-cash items.

	Half Year Ended ¹				
	31 Dec 21 \$M	30 Jun 21 \$M	31 Dec 20 \$M	Dec 21 vs Jun 21 %	Dec 21 vs Dec 20 %

1 Comparative information has been restated to conform to the presentation in the current half. Refer to Appendix 4.8 to this Document for further details.

Appendices (continued)

2. Risk Management

Overview

The Group is exposed to financial risks, non-financial risks and strategic risks arising from its operations. The Group manages these risks through its Risk Management Framework (the Framework), which evolves to accommodate changes in the business operating environment, better practice approaches, and regulatory and community expectations. The Group's key risk types are credit, market, liquidity, operational, insurance, strategic and compliance. The framework is discussed in Note 9.1 in the 2021 Financial Report.

2.1 Integrated Risk Management

The Group's approach to risk management is described within Note 9 of the 2021 Financial Report. Further disclosures in respect of capital adequacy and risk are provided in the Group's annual Pillar 3 document.

Credit Risk

The Group uses a portfolio approach for the management of its credit risk, of which a key element is a well-diversified portfolio. The Group uses various portfolio management tools to assist in diversifying the credit portfolio.

Below is a breakdown of the Group's committed exposures across industry sector, region and commercial credit quality.

By Sector	As at ¹		
	31 Dec 21	30 Jun 21	31 Dec 20
	%	%	%
Consumer	56.9	57.5	58.7
Government, Admin. & Defence	15.9	15.3	12.8
Finance & Insurance	6.7	6.5	6.8

	100.0	100.0	100.0

¹ Committed exposures by region and commercial credit quality are disclosed on a gross basis (calculated before collateralisation).

As a measure of individually risk-rated commercial portfolio exposure (including finance and insurance), the Group has 69.0% (June 2021: 68.3%; December 2020: 65.9%) of commercial exposures at investment grade quality.

Appendices (continued)

2.1 Integrated Risk Management (continued)

Market Risk

Market risk in the Balance Sheet is discussed within Note 9.3 of the 2021 Financial Report.

Value at Risk (VaR)

The Group uses Value at Risk (VaR) as one of the measures of Traded and Non-Traded market risk. VaR measures potential loss using historically observed market movements and correlation between different markets.

VaR is modelled at a 99.0% confidence level. This means that there is a 99.0% probability that the loss will not exceed the VaR estimate on any given day.

A 10-day holding period is used for trading book positions. A 20-day holding period is used for interest rate risk in the banking book.

Where VaR is deemed not to be an appropriate method of risk measurement other risk measures have been used, as specified by the heading or accompanying footnotes of the tables provided.

	Average VaR ¹		
	31 Dec 21	30 Jun 21	31 Dec 20
	\$M	\$M	\$M
Traded Market Risk			
Risk Type			
Interest rate risk	24.7	33.1	29.1
Foreign exchange risk	7.3	6.5	7.6
Equities risk	0.6	0.9	0.4
Commodities risk	24.7	17.6	14.4
Credit spread risk	42.0	33.8	27.5
Other market risk ²	21.6	18.7	20.5
Diversification benefit	(66.6)	(56.4)	(35.7)
Total general market risk	54.3	54.2	63.8
Undiversified risk	17.0	10.9	14.7
Other ³	1.8	3.8	3.6
Total	73.1	68.9	82.1

1 Average VaR is at 10 day 99% confidence and is calculated for each 6 month period.

2 Includes volatility risk and basis risk.

3 Includes ASB, PTBC and Europe.

Appendices (continued)

2.1 Integrated Risk Management (continued)

Interest rate risk in the banking book

Interest rate risk in the banking book is discussed within Note 9.3 of the 2021 Financial Report.

(a) Next 12 Months' Earnings

The figures in the following table represent the potential unfavourable change to the Group's net interest earnings during the year based on a 100 basis point parallel rate shock. As the official cash rate in both Australia and New Zealand was below 1.00% as at 31 December 2021, a downward rate shock of 100 basis points implies a negative interest rate of 0.90% and 0.25% for Australia and New Zealand, respectively. The analysis does not take into account management actions that may be taken to mitigate the unfavourable impact of falling interest rates.

		Half Year Ended		
		31 Dec 21	30 Jun 21	31 Dec 20
Net Interest Earnings at Risk ¹		\$M	\$M	\$M
Average monthly exposure	AUD	1,329. 2	1,753. 0	1,833. 6
	NZD	317. 0	322. 9	253. 2
High month exposure	AUD	1,488. 5	2,346. 5	2,084. 4
	NZD	327. 7	331. 4	313. 5
Low month exposure	AUD	1,177. 6	765. 0	1,627. 0
	NZD	311. 8	310. 3	212. 4

¹ Exposures over a 6 month period. NZD exposures are presented in NZD.

(b) Economic Value

A 20-day 99.0% VaR measure is used to capture the economic impact of adverse changes in interest rates on all banking book assets and liabilities.

	Half Year Ended		
	31 Dec 21	30 Jun 21	31 Dec 20
Non-Traded Interest Rate Risk VaR ¹ (20-day 99.0% confidence)	\$M	\$M	\$M

1 Comparative information has been restated to conform to the presentation in the current half. Refer to Appendix 4.8 to this Document for further details.

2 Transaction deposits exclude non-interest bearing deposits (included in other customer deposits).

3 Other customer deposits primarily consist of non-interest bearing transaction deposits and deposits held at fair value through the Income Statement.

4 Includes Bank acceptances.

5 Includes net non-HQLA securities sold or purchased under repurchase agreements and interbank borrowings.

6 Includes other repurchase agreements not reported above and Vostro balances.

7 Residual maturity of long-term wholesale funding (included in Debt issues and Loan capital) is the earlier of the next call date or final maturity.

8 Includes notes issued under the Bank's 3(a)(2) program.

9 Includes drawings from the TFF, RBNZ Funding for Lending Programme (FLP) and Term Lending Facility (TLF).

Appendices (continued)

2.1 Integrated Risk Management (continued)

Overview

The Group's liquidity and funding policies are designed to ensure it will meet its obligations as and when they fall due by ensuring it is able to issue debt on an unsecured or secured basis, has sufficient liquid assets to borrow against under repurchase agreements or sell to raise immediate funds without adversely affecting the Group's net asset value.

The Group's liquidity policies are designed to ensure it maintains sufficient cash balances and liquid asset holdings to meet its obligations to customers, in both ordinary market conditions and during periods of extreme stress. These policies are intended to protect the value of the Group's operations during periods of unfavourable market conditions.

The Group's funding policies are designed to achieve diversified sources of funding by product, term, maturity date, investor type, investor location, currency and concentration, on a cost effective basis. This objective applies to the Group's wholesale and retail funding activities.

Liquidity and Risk Management Framework

The CBA Board is ultimately responsible for the sound and prudent management of liquidity risk across the Group. The Group's liquidity and funding policies, structured under a formal Group Liquidity and Funding Risk Management Framework, are approved by the Board and agreed with APRA. The Group Asset and Liability Committee (ALCO) charter includes reviewing the management of assets and liabilities, reviewing liquidity and funding policies and strategies, as well as regularly monitoring compliance with those policies across the Group. Group Treasury manages the Group's liquidity and funding positions in accordance with the Group's Liquidity Policy and supporting standards, and has ultimate authority to execute liquidity and funding decisions should the Group Contingency Funding Plan be activated. Risk Management provides oversight of the Group's liquidity and funding risks, compliance with Group policies and manages the Group's relationship with prudential regulators.

Subsidiaries within the Group apply their own liquidity and funding strategies to address their specific needs. The Group's New Zealand banking subsidiary, ASB, manages its own domestic liquidity and funding needs in accordance with its own liquidity policy and the policies of the Group. ASB's liquidity policy is also overseen by the RBNZ.

Liquidity and Funding Policies and Management

The Group's liquidity and funding policies provide that:

- An excess of liquid assets over the minimum prescribed under APRA's LCR requirement is maintained. Australian ADIs are required to meet a 100% LCR, calculated as the ratio of high quality liquid assets to 30 day net cash outflows projected under a prescribed stress scenario;
- A surplus of stable funding from various sources, as measured by APRA's Net Stable Funding Ratio (NSFR), is maintained. The NSFR is calculated by applying factors prescribed by APRA to assets and liabilities to determine a ratio of required stable funding to available stable funding which must be greater than 100%;

- Additional internal funding and liquidity metrics are calculated and stress tests additional to the LCR are run;
- Short and long-term wholesale funding limits are established, monitored and reviewed regularly;
- The Group's wholesale funding market capacity is regularly assessed and used as a factor in funding strategies;
- Liquid assets are held in Australian dollar and foreign currency denominated securities in accordance with expected requirements;
- The Group has three categories of liquid assets within its domestic liquid assets portfolio. The first includes cash, government and Australian semi-government securities. The second includes Negotiable Certificates of Deposit, bank term securities, supranational bonds, Australian Residential Mortgage Backed Securities (RMBS) and other securities that meet RBA criteria for purchases under repurchase agreements. The final category is internal RMBS, being mortgages that have been securitised but retained by the Bank, that are repo-eligible with the RBA using the Committed Liquidity Facility (CLF) and Term Funding Facility (TFF); and
- Offshore branches and subsidiaries adhere to liquidity policies and hold appropriate foreign currency liquid assets to meet required regulations.

The Group's key funding tools include:

- Consumer retail funding base, which includes a wide range of retail transaction accounts, savings accounts and term deposits for individual consumers;
- Small business customer and institutional deposit base;
- Wholesale domestic and international funding programmes, which include Australian dollar Negotiable Certificates of Deposit, US and Euro Commercial Paper programmes, Australian dollar Domestic Debt Programme, US Medium-Term Note Programmes, Euro Medium-Term Note Programme, multi jurisdiction Covered Bond programme and Medallion securitisation programmes; and
- Existing drawdowns under the RBA Term Funding Facility (TFF).

The Group's key liquidity tools include:

- A liquidity management model that implements the established prudential liquidity requirements. This model is calibrated with a series of 'stress' liquidity crisis scenarios, incorporating both systemic and idiosyncratic crisis assumptions, such that the Group will have sufficient liquid assets available to ensure it meets all of its obligations as and when they fall due;
- An additional liquidity management model that allows forecasting of liquidity needs on a daily basis;
- A regulatory liquidity management reporting system delivering granular customer and product type information to inform business decision making, product development and resulting in a greater awareness of the liquidity risk-adjusted value of banking products;

Appendices (continued)

2.1 Integrated Risk Management (continued)

- Central Bank repurchase agreement facilities including the RBA's CLF that provide the Group with the ability to borrow funds on a secured basis, even when normal funding markets are unavailable. In September 2021 APRA announced that the CLF will be phased out by the end of 2022. The Group's liquidity position will be managed accordingly in anticipation of the CLF reduction; and
- A robust Contingency Funding Plan that is regularly tested so that it can be quickly activated when required.

2.2 Counterparty and Other Credit Risk Exposures

Securitisation, covered bonds and transferred assets

The Group enters into transactions in the normal course of business that transfers financial assets to counterparties or to Special Purpose Vehicles (SPVs). Transferred financial assets that do not qualify for derecognition are typically associated with repurchase agreements and our covered bonds and securitisation programs. The underlying assets remain on the Group's Balance Sheet. Refer to Note 4.5 to the 2021 Financial Report and pages 41-50 of the December 2021 Capital Disclosure Report for further details.

Leveraged Finance

The Group provides leveraged finance to companies. This can include companies acquired or owned by private equity sponsors which can be highly leveraged, primarily domiciled in Australia and New Zealand and exhibit stable and established earnings providing the ability to reduce borrowing levels. The Group's exposure to firms owned by private equity sponsors is diversified across industries and private equity sponsors. Leveraged debt facilities provided to private equity sponsors are typically senior with first ranking security over the cash flows and assets of the businesses.

Hedge Funds

There were no material movements in exposures to hedge funds during the current half and these exposures are not considered to be material.

Collateralised Debt Obligations (CDOs) and Credit Linked Notes

The Group has no material direct or indirect exposure to CDOs or credit linked notes.

Appendices (continued)

3. Our Capital, Equity and Reserves

Overview

The Group maintains a strong capital position in order to satisfy regulatory capital requirements, provide financial security to its depositors and creditors and adequate return to its shareholders. The Group's shareholders' equity includes issued ordinary shares, retained earnings and reserves.

This section provides analysis of the Group's shareholders' equity including changes during the period.

3.1 Capital

The tables below show the APRA Basel III capital adequacy calculation at 31 December 2021 together with prior period comparatives.

	As at		
	31 Dec 21	30 Jun 21	31 Dec 20
Risk Weighted Capital Ratios	%	%	%

1 Comparative information has been restated to conform to the presentation in the current half. Refer to Appendix 4.8 to this Document for further details.

2 Includes goodwill from discontinued operations.

3 Other intangibles (including capitalised software costs), net of any associated deferred tax liability.

4 Represents the surplus in the Group's defined benefit superannuation fund, net of any deferred tax liability.

5 Represents the Group's non-controlling interest in other entities.

6 Non-consolidated subsidiaries consists of the insurance and funds management entities, and qualifying securitisation vehicles that meets APRA's operational requirement for regulatory capital relief under APS 120 "Securitisation". Reduction in the half year ended 31 December 2021 attributable to the completion of the majority sale of Colonial First State Group on 1 December 2021.

7 Includes gains due to changes in our credit risk on fair valued liabilities and other prudential valuation adjustments.

8 Represents the shortfall between the regulatory Expected Losses (EL) and Eligible Provisions (EP) with respect to credit portfolios which are subject to the AIRB approach. The adjustment is assessed separately for both defaulted and non-defaulted exposures. Where there is an excess of EL over EP in either assessments, the difference must be deducted from CET1. For non-defaulted exposures where the EL is lower than the EP, this may be included in Tier 2 capital up to a maximum of 0.6% of total credit RWAs.

9 As at 31 December 2021, comprises PERLS XIII \$1,180 million (April 2021), PERLS XII \$1,650 million (November 2019), PERLS XI \$1,590 million (December 2018), PERLS X \$1,365 million (April 2018), PERLS IX \$1,640 million (March 2017), and PERLS VII \$3,000 million (October 2014).

10 Represents APRA Basel III non-compliant Additional Tier 1 Capital Instruments that are eligible for inclusion in regulatory capital up until 1 January 2022 as part of the Basel III transitional relief arrangements.

11 In the half year ended 31 December 2021, the Group issued a AUD1,500 million, a AUD136 million, a AUD135 million and a JPY14 billion subordinated note, that were Basel III compliant. In the half year ended 30 June 2021, the Group issued a USD1,250 million and a USD1,500 million subordinated note, that were Basel III compliant.

12 Represents APRA Basel III non-compliant Tier 2 capital instruments that are eligible for inclusion in regulatory capital up until 1 January 2022 as part of the Basel III transitional relief arrangements.

13 Represents the collective provision and general reserve for credit losses for exposures in the Group which are measured for capital purposes under the Standardised approach to credit risk.

Closing balance	1,704,881,283	1,772,431,382	1,772,345,332

- On 4 October 2021, the Group announced the successful completion of its \$6 billion off-market buy-back of CBA ordinary shares. 67,704,807 ordinary shares were bought back at \$88.62, and comprised a fully franked dividend component of \$66.96 per share (\$4,534 million) and a capital component of \$21.66 per share (\$1,466 million). The Group recognised \$1 million transaction costs in relation to the capital return. The shares bought back were subsequently cancelled.
- The DRP in respect of the final 2020/2021 and interim 2020/2021 dividends were satisfied in full through the on-market purchase and transfer of 5,618,474 shares at \$101.00, and 4,869,634 shares at \$85.25, respectively.
- The DRP in respect of the final 2019/2020 dividend was satisfied by the issue of 3,856,903 shares at \$68.53. The total value of shares issued under the DRP rules net of issues costs was \$264 million.
- Relates to treasury shares held within the employee share plans.

Dividend Franking Account

Australian Franking Credits

The franking credits available to the Group at 31 December 2021, after allowing for Australian tax payable in respect of the current and prior reporting period's profit, are estimated to be \$1,354 million (30 June 2021: \$3,709 million; 31 December 2020: \$3,448 million).

New Zealand Imputation Credits

The New Zealand imputation credits available to CBA at 31 December 2021 are estimated to be NZ\$923 million (30 June 2021: NZ\$874 million; 31 December 2020: NZ\$1,039 million). This is calculated on the same basis as the Australian franking credits but using the New Zealand current tax liability.

Dividends

The Directors have determined a fully franked interim dividend of 175 cents per share amounting to \$2,986 million. There is no foreign conduit income attributed to the interim dividend. The dividend is expected to be paid on 30 March 2022 to shareholders on the register at 5:00pm AEST on 17 February 2022.

The Board determines the dividend per share based on net profit after tax ("cash basis") per share, having regard to a range of factors including:

- Current and expected rates of business growth and the mix of business;
- Capital needs to support economic, regulatory and credit ratings requirements;
- Investments and/or divestments to support business development;
- Competitors comparison and market expectations; and
- Earnings per share growth.

Dividend Reinvestment Plan

The Group has a Dividend Reinvestment Plan (DRP) that is available to shareholders in Australia and certain other jurisdictions. Shareholders can elect to participate to acquire fully paid ordinary shares instead of receiving a cash dividend payment. Shares issued under DRP rank equally with ordinary shares on issue. The DRP for the 2021 final and interim dividends were satisfied in full by the on-market purchase and transfer of shares, and had participation rates of 16.1% and 15.7% respectively. The DRP for the 2020 final dividend was satisfied by the issuance of shares and had a participation rate of 15.2%.

Record Date

The register closed for determination of dividend entitlement at 5:00pm AEST on 17 February 2022. The deadline for notifying a change to participation in the DRP was 5:00pm AEST on 18 February 2022.

Ex-Dividend Date

The ex-dividend date was 16 February 2022.

Share Buy-Back

On 4 October 2021, the Group announced the successful completion of its \$6 billion off-market buy-back of CBA ordinary shares. The ordinary shares were bought back at \$88.62, and comprised a fully franked dividend component of \$66.96 per share (\$4,534 million) and a capital component of \$21.66 per share (\$1,466 million). The ordinary shares bought back were subsequently cancelled.

¹ Comparative information has been restated to conform to the presentation in the current half. Refer to Appendix 4.8 to this Document for further details.

² Brand names predominantly represent the value of royalty costs foregone by the Group through acquiring the Bankwest brand name. The royalty costs that would have been incurred by an entity using the Bankwest brand name are based on an annual percentage of income generated by Bankwest. The Bankwest brand name has an indefinite useful life, as there is no foreseeable limit to the period over which the brand name is expected to generate cash flows. This is not subject to amortisation, but requires annual impairment testing. No impairment was recognised during the period.

Appendices (continued)

4.3 Profit Reconciliation

Non-cash items are excluded from net profit after tax ("cash basis"), which is management's preferred measure of the Group's financial performance, as they tend to be non-recurring in nature or are not considered representative of the Group's ongoing financial performance. The impact of these items on the Group's net profit after tax ("statutory basis") is outlined below and treated consistently with the prior financial year. A description of these items is provided below.

	Half Year Ended 31 December 2021			Net profit after tax "statutory basis" \$M
	Net profit after tax "cash basis" \$M	Gain/(loss) on disposal and acquisition of controlled entities ¹ \$M	Hedging and IFRS volatility \$M

1 These amounts include post-completion adjustments (such as purchase price adjustments, and finalisation of accounting adjustments for goodwill and foreign currency reserve recycling), and transaction and separation costs associated with the previously announced divestments.

2 Interest income includes total effective interest income and other interest income.

3 Statutory net profit after income tax from discontinued operations is presented net of non-controlling interests.

Gain/(loss) on disposal and acquisition of controlled entities

Gains and losses on these transactions are inclusive of foreign exchange impacts, impairments, restructuring, separation and transactions costs and cover both controlled businesses and associates.

Hedging and IFRS volatility

Hedging and IFRS volatility represents timing differences between fair value movements on qualifying economic hedges and the underlying exposure. They do not affect the Group's performance over the life of the hedge relationship, and are recognised over the life of the hedged transaction. To qualify as an economic hedge the terms and/or risk profile must match or be substantially the same as the underlying exposure.

4.7 Definitions

Glossary of Terms

Term	Description
Assets under management	Assets under management (AUM) represents the market value of assets for which the Group acts as an appointed manager.
Bankwest	Bankwest is active in all domestic market segments, with lending diversified between the business, rural, housing and personal markets, including a full range of deposit products. The retail banking activities conducted under the Bankwest brand are consolidated into Retail Banking Services, and the business banking activities conducted under the Bankwest brand are consolidated into Business Banking.
Basis Risk	Basis risk arises from the spread between the 3 month bank bill swap rate and the 3 month overnight index swap rate.
Business Banking	Business Banking serves the banking needs of business, corporate and agribusiness customers across the full range of financial services solutions, as well as equities trading and margin lending services through the CommSec business. Business Banking includes the financial results of business banking activities conducted under the Bankwest brand.
Cash Management Pooling Facility (CMPF)	Designed for Australian registered large companies, government entities and not-for-profit organisations. The Cash Management Pooling Facility assists to pool balances from multiple Commonwealth Bank accounts, including those in overdraft positions, for flexible cash management.
Corporate Centre and Other	Corporate Centre and Other includes the results of the Group's centrally held minority investments and subsidiaries, Group-wide remediation costs, investment spend including enterprise-wide infrastructure and other strategic projects, employee entitlements, and unallocated revenue and expenses relating to the Bank's support functions including Treasury, Investor Relations, Group Strategy, Legal and Corporate Affairs and Bank-wide elimination entries arising on consolidation.
Common Equity Tier 1 (CET1) Capital	The highest quality of capital available to the Group reflecting the permanent and unrestricted commitment of funds that are freely available to absorb losses. It comprises ordinary share capital, retained earnings and reserves less prescribed deductions.
Corporations Act	<i>Corporations Act 2001</i> (Cth).
Dividend payout ratio ("cash basis")	Dividends paid on ordinary shares divided by net profit after tax ("cash basis").
Dividend payout ratio ("statutory basis")	Dividends paid on ordinary shares divided by net profit after tax ("statutory basis").
DRP	Dividend reinvestment plan.
DRP participation	The percentage of total issued capital participating in the dividend reinvestment plan.
Earnings per share (basic)	Basic earnings per share is the net profit attributable to ordinary equity holders of the Bank, divided by the weighted average number of ordinary shares on issue during the period per the requirements of relevant accounting standards.
Earnings per share (diluted)	Diluted earnings per share adjusts the net profit attributable to ordinary equity holders of the Bank and the weighted average number of ordinary shares on issue used in the calculation of basic earnings per share, for the effects of dilutive potential ordinary shares per the requirements of relevant accounting standards.
Full-time equivalent (FTE) staff	Includes all permanent full-time staff, part-time staff equivalents and external contractors employed through third-party agencies.
Funds under administration	Funds under administration (FUA) represents the market value of funds administered by the Group and excludes AUM.
Institutional Banking and Markets	Institutional Banking & Markets serves the commercial and wholesale banking needs of large corporate, institutional and government clients across a full range of financial services solutions including access to debt capital markets, transaction banking, working capital and risk management through dedicated product and industry specialists.

Appendices (continued)

Term	Description
Interest rate risk in the banking book (IRRBB)	Interest rate risk in the banking book (IRRBB) is the risk that the Bank's profit derived from Net interest income (interest earned less interest paid), in current and future periods, is adversely impacted by changes in interest rates. This is measured from two perspectives: quantifying the change in the net present value of the Balance Sheet's future earnings potential, and the anticipated change to the Net interest income earned over 12 months. This calculation is driven by APRA regulations with further detail outlined in the Group's Basel III Pillar 3 report.
Leverage Ratio	Common Equity Tier 1 Capital divided by Total Exposures, with this ratio expressed as a percentage.
Liquidity Coverage Ratio (LCR)	The LCR is a quantitative liquidity measure that is part of the Basel III reforms. It was implemented by APRA in Australia on 1 January 2015. It requires Australian ADIs to hold sufficient liquid assets to meet 30 day net cash outflows projected under an APRA-prescribed stress scenario.
Net profit after tax ("cash basis")	Represents net profit after tax and non-controlling interests before non-cash items including hedging and IFRS volatility, and losses or gains on acquisition, disposal, closure, capital repatriation and demerger of businesses. This is management's preferred measure of the Group's financial performance.
Net profit after tax ("statutory basis")	Represents net profit after tax and non-controlling interests, calculated in accordance with Australian Accounting Standards. This is equivalent to the statutory item "Net profit attributable to Equity holders of the Bank".
Net Stable Funding Ratio (NSFR)	The NSFR more closely aligns the behaviour terms of assets and liabilities. It is the ratio of the amount of available stable funding (ASF) to the amount of required stable funding (RSF). ASF is the portion of an Authorised Deposit-taking Institution's (ADI) capital and liabilities expected to be a reliable source of funds over a one year time horizon. RSF is a function of the liquidity characteristics and residual maturities of an ADI's assets and off Balance Sheet activities.
Net tangible assets per share	Net assets excluding intangible assets, non-controlling interests and other equity instruments divided by ordinary shares on issue at the end of the period (excluding Treasury Shares deduction). Right of use assets are included in net tangible assets per share.
New Zealand	New Zealand includes the banking and funds management businesses operating under the ASB brand. ASB provides a range of banking, wealth and insurance products and services to its personal, business, rural and corporate customers in New Zealand.
Operating expenses to total operating income	Represents operating expenses as a percentage of total operating income. The ratio is a key efficiency measure.
Other Overseas	Represents amounts booked in branches and controlled entities outside Australia and New Zealand.
Profit after capital charge (PACC)	The Group uses PACC, a risk-adjusted measure, as a key measure of financial performance. It takes into account the profit achieved, the risk to capital that was taken to achieve it, and other adjustments.
Retail Banking Services	Retail Banking Services provides banking and general insurance products and services to personal and private bank customers. Retail Banking Services also includes the financial results of retail banking activities conducted under the Bankwest brand.
Return on equity ("cash basis")	Based on net profit after tax ("cash basis") less other equity instruments' distributions applied to average shareholders' equity, excluding non-controlling interests and other equity instruments.
Return on equity ("statutory basis")	Based on net profit after tax ("statutory basis") less other equity instruments' distributions applied to average shareholders' equity, excluding non-controlling interests and other equity instruments.
Total Committed Exposure (TCE)	Total Committed Exposure is defined as the balance outstanding and undrawn components of committed facility limits. It is calculated before collateralisation and excludes settlement exposures on derivatives.
Risk Weighted Assets (RWA)	The value of the Group's On and Off Balance Sheet assets are adjusted by risk weights calculated according to various APRA prudential standards. For more information, refer to the APRA website.
Weighted average number of shares	The calculation incorporates the bonus element of any rights issue, discount element of any DRP and excludes "Treasury Shares" related to investments in the Bank's shares held by the employee share scheme trust.

Appendices (continued)

Market Share Definitions

Retail Banking Services

Home loans (APRA)	CBA Loans to individuals that are Owner Occupied and Investment Home Loans as per APRA monthly ADI Statistics, divided by APRA Monthly ADI Statistics back series.
Home Loans (RBA)	CBA Loans to individuals that are Owner Occupied and Investment Home Loans as per APRA monthly ADI Statistics + separately reported subsidiaries: Wallaby Trust, Residential Mortgage Group P/L, divided by RBA Financial Aggregates Owner Occupied and Investor Home Lending (includes ADIs and RFCs).
Credit cards (APRA)	CBA Personal Credit Card Lending (APRA), divided by Loans to Households: Credit Cards (APRA Monthly ADI Statistics back series).
Consumer finance (other household lending)	CBA Lending to individuals which includes: Personal Loans, Margin Lending, Personal Leasing, Revolving Credit, Overdrafts, and Home Loans for personal purposes, divided by Loans to Households: Other (APRA Monthly ADI Statistics back series).
Household deposits	Total CBA transaction and non-transaction account deposit balances from residents as reported under APRA definitions for Households (individuals) excluding Self-Managed Super Funds (as per deposit balances submitted to APRA in ARF720.2A Deposits), divided by Deposits from Households (APRA Monthly ADI Statistics back series).
Business Banking	
Business lending (APRA)	CBA Total Loans to residents as reported under APRA definitions for the Non-Financial Businesses sector (as per lending balances submitted to APRA in ARF720.1A ABS/RBA Loans and Finance Leases) (this includes some Housing Loans to businesses), divided by Loans to Non-Financial Businesses (APRA Monthly ADI Statistics back series).
Business lending (RBA)	CBA Business Lending and Credit: specific "business lending" categories in lodged APRA returns – ARF720.1A ABS/RBA Loans and Finance Leases, ARF720.7 ABS/RBA Bill Acceptances and Endorsements, excluding sub-categories of RBA, ADIs, RFCs and Central Borrowing Authorities, and the category of General Government, divided by RBA Total Business Lending (adjusted for series breaks).
Business deposits (APRA)	Total CBA transaction and non-transaction account deposit balances from residents as reported under APRA definitions for the Non-Financial Businesses sector (as per deposit balances submitted to APRA in ARF720.2A Deposits), divided by Deposits from Non-Financial Businesses (from APRA Monthly ADI Statistics back series).
Equities trading	Twelve months rolling average of Australian equities traded value (CommSec excluding AUSIEX), divided by Twelve months rolling average of total Australian equities market traded value.

4.8 Disclosure Changes

Financial Reporting Changes in this Document

Changes to financial reporting arising from the simplification of CBA's operating model

Continued enhancement of our classification of portfolios have been made during the current half which results in changes to comparative financial information. These changes have not impacted CBA's statutory net profit after tax (NPAT), but result in changes to the presentation of the Divisional Income Statements and Balance sheets of the affected divisions. The key changes are:

- The transfer of some customers between Retail Banking Services, Business Banking and Institutional Banking and Markets.
- Refinements of the allocation of capital and support units costs.

Prior period restatements

During the half year ended 31 December 2021, the Group implemented the following changes that were applied retrospectively and impacted the prior periods' financial statements:

- The Group performed a review of the corporate and business credit limits utilisation data and identified products for which drawdowns were considered probable; facility and line fees on these products were reclassified from other banking income to net interest income;
- As part of its continued broad review of employee entitlements, the Group finalised remediation amounts required to be paid to impacted employees in relation to a number of historic employee entitlements calculations.

For further information regarding prior period restatements and changes implemented during the year ended 30 June 2021, please refer to Note 1.1 to the Financial Statements included in this Document.

4.9 Independent Auditors

With respect to the unaudited financial information contained in the half-year financial report of Commonwealth Bank of Australia which comprises the balance sheet, the income statement, the statement of comprehensive income, statement of changes in equity, statement of cash flows and related notes for the six-month periods ended 31 December 2021, 30 June 2021, and 31 December 2020, included in this Document, PricewaterhouseCoopers, an Australian partnership (“PwC Australia”) reported that they have applied review procedures in accordance with the Auditing Standard on Review Engagements ASRE 2410 Review of a Financial Report by the Independent Auditor of the Entity. Their separate report dated 9 February 2022 appearing herein states that they did not perform an audit and they do not express an audit opinion on that unaudited financial information. Accordingly, the degree of reliance on their report on such information should be restricted in light of the limited nature of the review procedures applied.
