## 1 Introduction

The Commonwealth Bank of Australia (the Group) is an Authorised Deposit-taking Institution (ADI) regulated by the Australian Prudential Regulation Authority (APRA) under the authority of the Banking Act 1959.

This document is prepared in accordance with Board approved policy and APRA's prudential standard APS 330 "Public Disclosure". It presents information on the Group's capital adequacy and Risk Weighted Asset (RWA) calculations for credit risk including securitisation and equities exposures, market risk, Interest Rate Risk in the Banking Book (IRRBB) and operational risk.

The Group is required to report its assessment of capital adequacy on a Level 2 basis. Level 2 is defined as the consolidated banking group excluding the insurance, funds management businesses and entities through which securitisation of Group assets are conducted.

The Group is predominantly accredited to use the Advanced Internal Ratings Based approach (AIRB) for credit risk and Advanced Measurement Approach (AMA) for operational risk. The Group is also required to assess its traded market risk and IRRBB requirement under Pillar 1 of the Basel capital framework.

This document is unaudited, however, it has been prepared consistent with information that has been subject to review by an external auditor and published elsewhere or has been supplied to APRA.

This document is available on the Group's corporate website [www.commbank.com.au/about-us/investors/shareholders](http://www.commbank.com.au/about-us/investors/shareholders).

### The Group in Review

The Group continued to maintain its strong capital position. The Group's Basel III CET1, Tier 1 and Total Capital Ratios as measured on an APRA basis as at 31 December 2014 were 9.2%, 11.6% and 12.7% respectively.

The Group regularly benchmarks and aligns its policy framework against existing prudential and regulatory

standards. Potential developments in Australian and international standards, and global best practice are also considered.

The Group continues to monitor and take actions to enhance its strong risk culture. This includes a risk appetite framework and the risk accountability (Three Lines of Defence) model. The risk appetite framework creates clear obligations and transparency over risk management and strategy decisions; and, the Three Lines of Defence model requires business management to operate responsibly by taking well understood and managed risks that are appropriately and adequately priced.

The strength and robustness of the Group's risk management framework has been reflected in the Group's overall asset quality and capital position. In particular, the Group remains in a select group of banking institutions with an AA-/Aa2 credit rating. To maintain this strength, the Group continues to invest in its risk systems and management processes.

The Group's capital forecasting process ensures pro-active actions and plans are in place to ensure a sufficient capital buffer above minimum levels is in place at all times. The Group manages its capital by regularly and simultaneously considering regulatory capital requirements, rating agency views on the capital required to maintain the Group's credit rating, the market response to capital, stress testing and the Group's bottom up view of economic capital. These views then cascade into considerations on what capital level is targeted.

The Group's management of its capital adequacy is supported by robust capital management processes applied in each Business Unit. The results are integrated into the Group's consolidated regulatory and economic capital requirements, and risk-adjusted performance and pricing processes.

## 2 Scope of Application

This document has been prepared in accordance with Board approved policy and reporting requirements set out in APS 330.

APRA adopts a tiered approach to the measurement of an ADIs capital adequacy:

- **Level 1:** the Parent Bank (Commonwealth Bank of Australia) and offshore branches (the Bank) and APRA approved Extended Licenced Entities (ELE);
- **Level 2** <sup>(1)</sup>: the Consolidated Banking Group excluding the insurance and funds management businesses and the entities through which securitisation of Group assets are conducted; and
- **Level 3:** the conglomerate group including the Group's insurance and funds management businesses (the Group).

The Group is required to report its assessment of capital adequacy on a Level 2 basis. Additional disclosure of capital ratios relating to material ADIs within the Group together with CBA's own Level 1 capital ratios are included under APS 330 Table 6g of this report (page 5).

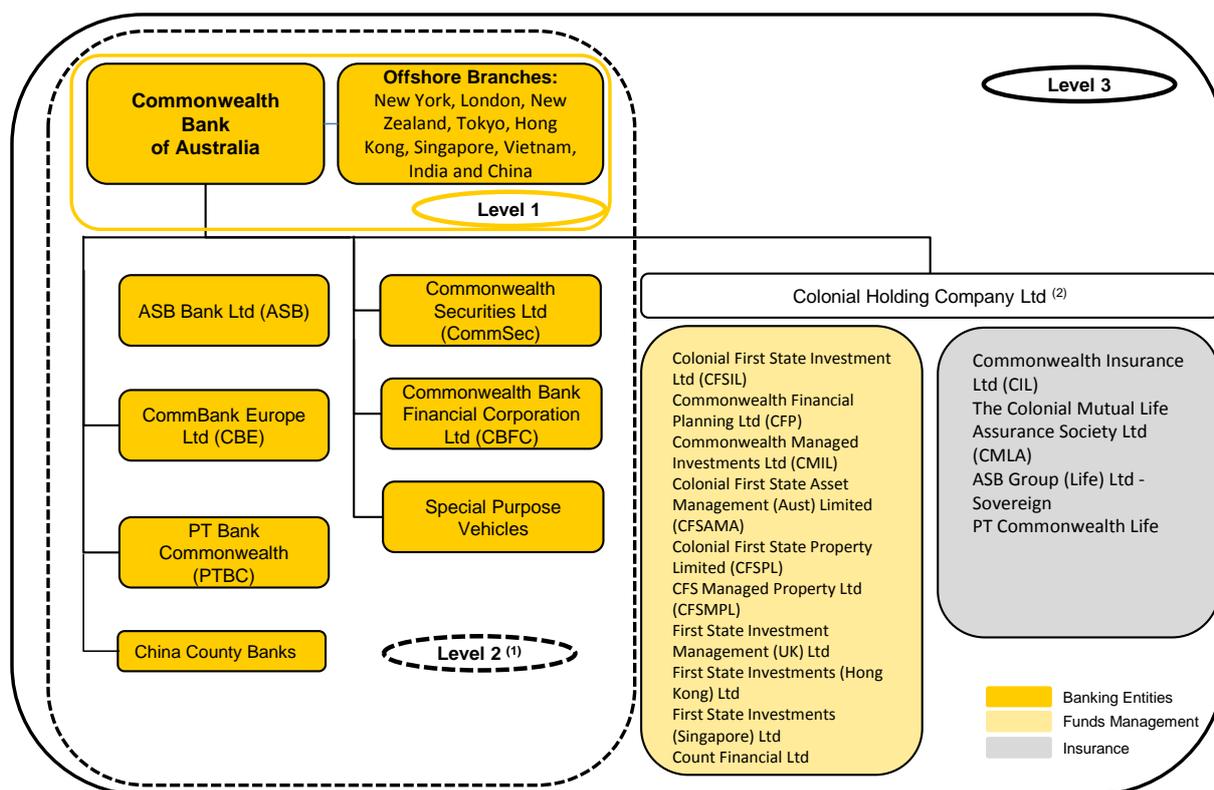

ASB Bank Limited (ASB) operates under advanced Basel III status and is subject to regulation by the Reserve Bank of New Zealand (RBNZ). The RBNZ applies a similar methodology to APRA in calculating regulatory capital requirements.

CommBank Europe (CBE), PT Bank Commonwealth (PTBC) and the China County Banks use Standardised Basel III methodology.

### Restrictions on transfer of funds or regulatory capital within the Group

The transfer of regulatory capital and funding within the Group is subject to restrictions imposed by local regulatory requirements. In particular, APS 222 "Associations with Related Entities" establishes prudential limits on the level of exposure that the Bank may have to a related entity.

The Bank and all of the subsidiaries of the Group are adequately capitalised. There are no restrictions or other major impediments on the transfer of funds within the Group. There are no capital deficiencies in non-consolidated subsidiaries in the Group.

(1) The Level 2 Regulatory Consolidated group is based on the historic definition of the Level 2 Group, prior to APRA clarification provided in May 2014. Refer to Section 3 Capital – Other Regulatory Changes on page 4 or more details.

(2) Represents the Colonial Holding Company Ltd and major operating subsidiaries. A more detailed list of non-consolidated entities, together with details on their principal activities is provided in Appendix 9.4.

### 3 Capital

#### Basel III

In December 2010, the Basel Committee on Banking Supervision (BCBS) published a discussion paper on banking reforms to address issues which led to the Global Financial Crisis and to position banks for future crises. The objectives of the capital reforms are to increase the quality, consistency and transparency of capital, to enhance the risk coverage framework, and to reduce systemic and pro-cyclical risk. The major reforms are being implemented on a phased approach to 1 January 2019.

In September 2012, APRA published final standards relating to the implementation of the Basel III capital reforms in Australia. APRA has adopted a more conservative approach than the minimum standards published by the BCBS and a more accelerated timetable for implementation.

The Group adopted the Basel III measurement and monitoring of regulatory capital effective from 1 January 2013.

The APRA prudential standards require a minimum CET1 ratio of 4.5% effective from 1 January 2013. An additional CET1 capital conservation buffer of 3.5%, inclusive of a Domestic Systemically Important Banks (D-SIBs) requirement of 1%, will be implemented on 1 January 2016, bringing the minimum CET1 requirement to 8%.

#### Capital Management

The Group's Basel III CET1 ratio as measured on an APRA basis was 9.2% at 31 December 2014, compared with 9.3% at 30 June 2014. The relatively flat capital movement across the period was due in part to the neutralisation of the June 2014 final Dividend Reinvestment Plan (DRP).

The Tier 1 and Total Capital ratios under Basel III (APRA) are 11.6% and 12.7% respectively at 31 December 2014.

#### Capital Initiatives

In order to actively manage the Group's capital, the following significant initiatives were undertaken during the half year ended 31 December 2014:

- The DRP in respect of the 2014 final dividend was satisfied in full by the on market purchase of shares. The participation ratio for the DRP was 19.9%;
- In October 2014, the Bank issued \$3 billion of CommBank PERLS VII Capital Notes (PERLS VII) a Basel III compliant Additional Tier 1 security, the proceeds of which were used to fund the Group's business. In turn, the Bank bought back and cancelled \$2 billion of PERLS V issued in 2009; and
- In November 2014, the Group issued \$1 billion subordinated notes that are Basel III compliant Tier 2 capital.

#### Other Regulatory Changes

##### Financial Systems Inquiry

On 7 December 2014, the Government released the final report of the Financial System Inquiry (FSI). The key recommendations from the report that may have an impact on regulatory capital include:

- Setting capital standards such that Australian Authorised Deposit-taking Institution (ADI) capital ratios are unquestionably strong;

- Raising the average Internal Ratings-Based (IRB) mortgage risk weight for ADIs using IRB risk-weight models;
- Implementing a framework for minimum loss absorbing and recapitalisation capacity in line with emerging international practice, sufficient to facilitate the orderly resolution of ADI's and minimise taxpayer support;
- Introducing a leverage ratio, in line with the Basel Committee that acts as a backstop to the capital position of ADIs; and
- Developing a reporting template to improve the transparency and comparability of capital ratios.

The Government will consult on the Inquiry's recommendations before making any decision. This consultation will occur up to 31 March 2015.

#### Composition of Level 2 ADI Groups

In May 2014, APRA provided more clarity in relation to the definition of the Level 2 Banking Group. Subsidiary intermediate holding companies are now considered part of the Level 2 Group, regardless of the nature of any activity undertaken by the operating subsidiary. As a result, capital benefits arising from the debt issued by the Colonial Group will be phased out.

APRA granted the Group transition arrangements with regard to the impact on capital ratios in line with the maturity profile of the debt.

Given the transitional arrangements and the maturity profile of the debt, there is no immediate effect on the Group's capital ratios. The impact on future periods is expected to be minimal given the Group's strong capital generation capabilities.

#### Conglomerate Groups

APRA is extending its current prudential supervision framework to Conglomerate Groups that have material operations in more than one APRA regulated industry and/or have one or more material unregulated entities.

APRA released revised conglomerate standards in August 2014 however, a decision on the implementation date has been deferred until after the Federal Government's response to the FSI. APRA have confirmed that a minimum transition period of 12 months will apply once the implementation date is established.

#### Leverage Ratio

In January 2014, the BCBS endorsed the leverage ratio framework and disclosure requirements. The ratio is defined as Tier 1 Capital as a percentage of exposures, with a proposed minimum of 3%.

The BCBS has advised that any final adjustments to the definition and calibration of the ratio will be made by 2017. Migration to a Pillar 1 (minimum capital requirement) is expected from 1 January 2018.

In September 2014 APRA approved the approach adopted by the BCBS, with public disclosure to commence from 1 April 2015.

## 4 Risk Weighted Assets

Risk weighted assets are calculated in accordance with the AIRB approach for the majority of the Group's credit risk exposures.

Internal assessment and supervisory formula approaches are used where relevant for non-rated securitisation exposures

and the ratings-based approach is used for securitisation exposures rated by External Credit Assessment Institutions (ECAI).

(1) Advanced RWA for SME retail exposures secured by residential mortgages is calculated using the same method as advanced residential mortgages. From June 2014, unless specified otherwise, the Group will include these exposures under SME retail. Prior to that date, these exposures were included in residential mortgages.

(2) A change in the application of the Retail Best Estimate of Expected Loss (BEEL) resulted in an increase RWA of \$6.4 billion which was largely offset by a drop in the regulatory Expected Loss deduction for CET1 capital.

(3) APRA requires RWA amounts that are derived from IRB risk weight functions to be multiplied by a factor of 1.06.

### Risk Weighted Assets

Total Group RWA increased by \$15.3 billion or 4.5% on the prior half to \$353.0 billion.

### Credit Risk Exposure and RWA

Credit risk RWA increased over the half by \$22.4 billion or 7.7% to \$311.5 billion, mostly due to:

- Lending growth in most portfolios;
- Revision of regulatory treatments, primarily in relation to the application of retail Best Estimate of Expected Loss (BEEL); and
- Depreciation of the Australian dollar.

These increases were partly offset by improved credit quality.

### Traded Market Risk RWA

Traded market risk RWA increased by \$1.2 billion or 22.4% to \$6.5 billion. This was driven mainly by an increase in activity in interest rate and fixed income products and increased volatility in the currency market.

### Interest Rate Risk in the Banking Book (IRRBB) RWA

IRRBB RWA decreased by \$9.9 billion or 67.2% during the half as a result of treasury risk management activities, lower modelled volatility of interest rates and increased offset of embedded gains from lower long term interest rates.

### Operational Risk RWA

Operational Risk RWA increased by \$1.7 billion or 5.9% to \$30.2 billion. The increase reflects industry events and the current regulatory environment.

### Explanation of change in credit RWA

The composition of the movement in Credit RWA over the prior half, as reflected in APS 330 Table 6b to 6f, is shown below.

From June 2014, unless specified otherwise, the Group will include these exposures under SME retail. Prior to that date, these exposures were included in residential mortgages.

(4) Total credit risk exposures (calculated as EAD) do not include equities or securitisation exposures.

#### Explanation of change in credit risk exposure

Details of credit risk exposure movements over the prior half are as follows:

Asset Category	Total exposure change \$M	Regulatory Exposure Driver
AIRB corporate (including SME) and specialised lending	16,654	Reflects portfolio growth, revised treatment of commitments at offer, and depreciation of the Australian dollar.
AIRB sovereign	8,437	Reflects growth in liquidity holdings.
AIRB bank	2,192	Reflects growth in portfolio and depreciation of the Australian dollar.
AIRB consumer retail	15,534	Reflects revision to regulatory treatments in the application of BEEL, portfolio growth and depreciation of the Australian dollar.
<b>Total advanced and specialised lending</b>	<b>42,817</b>	
Standardised including other assets and central counterparties	9,736	Reflects portfolio growth and migration of trades to central clearing.
<b>Total excluding securitisation and equity exposures</b>	<b>52,553</b>

## 5.2 Past Due and Impaired Exposures, Provisions and Reserves

All provisions for impairment assessed on an individual basis in accordance with the Australian Accounting Standards are classified as specific provisions in accordance with APS220 "Credit Quality". Most of the collective provisions raised under the Australian Accounting Standards are included in the General Reserve for Credit Losses (GRCL), however, certain collective provisions not eligible for inclusion in the GRCL are classified as specific provisions. This includes, for example, collective provisions on unsecured retail products 90 days or more past due.

### Reconciliation of the Australian Accounting Standards, APS 220 based credit provisions and APS 330

#### 5.4 Portfolios Subject to Internal Ratings Based Approaches

The Group's mapping of internal rating scales for risk-rated exposures to external rating agencies is detailed in APS 330 Table 9b.

##### APS 330 Table 9b – Internal ratings structure for credit risk exposures

Description	Internal Rating	Probability of Default
Exceptional	A0, A1, A2, A3	0% - 0.038%
Strong	B1, B2, B3, C1, C2, C3	>0.038% - 0.453%
Pass	D1, D2, D3, E1, E2, E3	>0.453% - 5.924%
Weak/doubtful	F1, F2, F3, G1, G2, G3	> 5.924%
Restructured/default	R, H	21.22%, 100%

Description	S&P Rating	Moody's Rating
Exceptional	AAA, AA+, AA, AA-	Aaa, Aa1, Aa2, Aa3
Strong	A+, A, A-, BBB+, BBB, BBB-	A1, A2, A3, Baa1, Baa2, Baa3
Pass	BB+, BB, BB-, B+, B, B-	Ba1, Ba2, Ba3, B1, B2, B3
Weak/doubtful	CCC, CC, C	Caa, Ca
Default	D	C

##### APS 330 Table 9c – PD rating methodology by portfolio segment

Portfolio Segment	PD Rating Methodology
Bank and sovereign exposures	Expert judgement assigned risk rating, informed but not driven by rating agency views.
Large corporate exposures	Combination of Expert Judgement and PD Rating Tool assigned risk ratings depending on the industry sector.
Middle market and local business banking exposures	PD Rating Tool(s) and Expert Judgement assigned risk rating.
SME retail exposures < \$1m	SME Behaviour Score assigned PD pools.
Consumer retail exposures	Depending on the product, PD pools are assigned using product specific Application Scorecards, Behavioural Scorecards, payment status or a combination of these.

Actual losses are historical and are based on the quality of the assets in prior periods, write-offs (whether full or partial) and recent economic conditions. Regulatory EL for AIRB portfolios is based on the quality of non-defaulted exposures at a point in time using long-run PDs and downturn LGDs as required by APRA and for defaulted exposures the Best Estimate of Expected loss is used. Hence, actual outcomes may differ from modelled regulatory estimates for a number of reasons.

Actual losses are expected to be below the regulatory EL estimate in most years. Regulatory EL is reported for both defaulted and non-defaulted exposures. Regulatory EL measures economic loss including costs (such as internal costs) not included in actual losses.

## Accuracy of Risk Estimates

The following tables provide a summary of IRB credit risk estimates used in calculating regulatory capital compared to realised outcomes.

### Probability of Default

APS 330 Table 9f (ii) compares estimates of long-run PD to actual default rates averaged over 6.5 financial years to 31 December 2014, where results for the half year to December 2014 have been annualised without adjustment for seasonality.

#### APS 330 Table 9f (ii) – Accuracy of risk estimates – PD

Portfolio Type	As at 31 December 2014	
	Average estimated PD	Average actual PD
	%	%
Corporate	1.36	0.91
SME corporate	2.19	1.94
SME retail (including SME retail secured by residential mortgages)	1.84	0.89
Specialised lending <sup>(1)</sup>	n/a	1.62
Sovereign <sup>(2)</sup>	0.64	0.03
Bank <sup>(2)</sup>	0.26	0.31
Residential mortgage (excluding SME retail secured by residential mortgages)	0.89	0.77
Qualifying revolving retail	1.97	2.14
Other retail	4.76	4.49

(1) Average estimated PD not relevant for specialised lending under the Supervisory Slotting approach.

(2) Realised PDs based on a low volume of defaults observed.

### Loss Given Default and Exposure at Default

LGDs for non-retail portfolios are based on accounts that defaulted in 2009 to 2012 financial years. LGDs for retail portfolios are based on accounts that defaulted in 2009 to 2013 financial years. Defaults occurring in the most recent years have been excluded from the analysis, to allow

sufficient time for workout of impaired assets, booking of losses and more meaningful disclosures.

The EAD ratio compares estimates of EAD prior to default to realised EAD for obligors that defaulted.

#### APS 330 Table 9f (iii) – Accuracy of risk estimates – LGD and EAD

Other retail	95.5	82.4	1.0

(1) LGD and EAD estimates and actuals have not changed from those reported at 30 June 2014.

(2) Average estimated LGD is not relevant for specialised lending under Supervisory Slotting approach.

(3) Realised LGDs for Banks based on a low volume of defaults observed.

(4) Estimated downturn LGD based on minimum regulatory floor requirements imposed by APRA and RBNZ.

(4) Third party originated assets comprise assets managed and sponsored by the Group.

### APS 330 Table 12g (ii) – Banking book exposures securitised – synthetic securitisation

APS 120 provides specific regulatory treatment for synthetic securitisations where credit risk is transferred to a third party, however, legal ownership of the underlying assets remains with the originator.

The Group has not undertaken any synthetic securitisation in the banking book.

**APS 330 Table 12I (i) – Banking book exposure by risk weighting**

Total securitisation exposures in the banking book increased by \$2,267 million or 23.9% during the half year ended 31 December 2014. Corresponding RWA increased by \$22 million or 0.4%. This was mainly due to changes in risk profile for securitisation exposures.

**APS 330 Table 12n – Banking book resecuritisation exposures**

As at 31 December 2014, banking book resecuritisation exposures without credit risk mitigation total \$26 million (30 June 2014: \$26 million; 31 December 2013: \$27 million).

The Group did not have any resecuritisation exposures subject to credit risk mitigation.

The Group did not have any exposure to third party guarantors providing guarantees for securitised assets.

**APS 330 Table 12o (i) – Trading book exposures securitised – traditional securitisation**

The Group has not undertaken any traditional securitisations of exposures in the trading book.

**APS 330 Table 12o (ii) – Trading book exposures securitised – synthetic securitisation**

The Group has not undertaken any synthetic securitisations of exposures in the trading book.

**APS 330 Table 12o (iii) – Total trading book exposures securitised**

The Group has not securitised any exposures from the trading book.

**APS 330 Table 12p – Trading book exposures intended to be securitised**

The Group does not have any outstanding trading book exposures that are intended to be securitised at 31 December 2014.

**APS 330 Table 12q – Trading book activity for the reporting period**

\$33 million residential mortgages were securitised by the Group in the trading book for the half year to 31 December 2014 (30 June 2014: \$27 million; 31 December 2013: \$10 million).

Securitisation activity has been restated to include investment securities.

**APS 330 Table 12r – Trading book exposures subject to APS 116**

The aggregate amount of exposures securitised by the Group and subject to Prudential Standard APS 116 “Capital Adequacy: Market Risk” was \$83 million as at 31 December 2014 (30 June 2014: \$322 million; 31 December 2013: \$314 million). This consists of:

- Securities held in the trading book subject to the Standard Method of \$36 million (30 June 2014: \$85 million; 31 December 2013: \$48 million); and
- Derivatives held in the trading book subject to the Internal Models Approach (IMA) of \$47 million (30 June 2014: \$237 million; 31 December 2013: \$266 million).

Details on the main features of Capital instruments included in the Group's Regulatory Capital, (Ordinary Share Capital, Additional Tier 1 Capital and Tier 2 Capital) as required by APS 330 Attachment B can be found at [www.commbank.com.au/about-us/investors/shareholders](http://www.commbank.com.au/about-us/investors/shareholders).

- (1) Represents the balance per Level 2 Regulatory balance sheet.
- (2) For regulatory capital purposes, APRA requires these instruments to be included as if they were unhedged.
- (3) Represents Trust Preferred Securities 2006 issued on 15 March 2006.
- (4) Unamortised issue costs relating to capital instruments are netted off against each instrument in the balance sheet. For regulatory capital purposes, these capital instruments are shown at face value. The unamortised issue costs are deducted from CET1 as part of capitalised expenses in Row 26f in the Capital template.
- (5) Basel III transitional arrangements apply to directly issued capital instruments and instruments issued by subsidiaries not compliant with the new Basel III requirements.
- (6) In October 2014, the Bank issued \$3 billion of Commbank PERLS VII Capital Notes (PERLS VII), a Basel III compliant Additional Tier 1 security.
- (7) In April 2014 the Group issued NZD\$400 million ASB Subordinated Notes through ASB, its New Zealand subsidiary. The notes are Basel III compliant Tier 2 securities and fully contribute towards ASB capital ratios. The amount of these notes that contributes to ASB capital in excess of its minimum regulatory requirements is not eligible for inclusion in the Group's capital (31 December 2014 ineligible amount AUD \$129 million).
- (8) APRA requires these instruments to be amortised by 20% of the original amount during each of the last five years to maturity. This is in addition to Basel III transitional arrangements.
