General Information

Features at a glance

Significant benefits	Provides protection against adverse <i>exchange rate</i> movements whilst also providing the potential to benefit from favourable <i>exchange rate</i> movements.
Significant risks	See “What are the significant risks of a FFP transaction?” on page 8.
Minimum transaction amount	Australian dollars (AUD) 50,000.00 or equivalent foreign currency.
Terms	3 <i>business days</i> to 2 years. (Longer terms may be available on request.)
Costs	See “What are the costs involved in FFP transactions?” on page 10.
Settlement	<i>Settlement date</i> , once agreed, cannot be varied.
Early termination	An amount may be payable to you depending on the <i>mark-to-market value</i> of the transaction upon termination.

This is a sophisticated financial product which involves dealing in foreign exchange. The information in this Product Disclosure Statement (PDS) does not take into account your personal objectives, financial situation and needs. Before transacting in this product you should be satisfied that this product is suitable for you in view of those objectives, and your financial situation and needs, and we recommend that you consult your investment adviser or obtain other independent advice. Unless you are familiar with foreign exchange dealings and products of this type, the product may not be suitable for you.

The information in this PDS is subject to change from time to time and is up to date as at the date stated on the cover. Where the new information is materially adverse information the Bank will either issue a new PDS or a supplementary PDS setting out the updated information. Where the new information is not materially adverse information we will not issue a new PDS or supplementary PDS to you, but you will be able to find the updated information on our web site commbank.com.au or you can call **13 2221**. If you ask us to, we will send you a paper copy of the information.

Purpose of a Product Disclosure Statement (PDS)

A PDS aims to provide you with enough information to help you decide whether the product will meet your needs. It also helps you to compare the product with others you might be considering.

This PDS provides information about a **Flexible Forward Protector** (FFP). If you decide to enter a FFP transaction, you should keep this PDS and all other documentation relating to your FFP transaction for future reference.

If you have any questions or wish to contact us call **13 2221** between 8am and 8pm, Monday to Friday, visit our web site at **commbank.com.au**, call into any branch of Commonwealth Bank of Australia (the Bank) or contact your relationship manager.

To assist you in understanding this PDS, the definitions of some words are provided in the “Definitions” section on page 12 at the end of this PDS. When used in this PDS, these words usually appear in italics.

What is a Flexible Forward Protector (FFP) transaction?

A FFP transaction is an agreement between you and the Bank where in return for the payment of a *premium* by you to the Bank, you can exchange one currency for another at an *exchange rate* that is equal to or more favourable to you than an agreed *contract rate* on an agreed *settlement date*. The agreed *settlement date* must be a date that is more than 2 *business days* (but not more than 2 years) after the *trade date*.

You are required to pay the Bank a *premium* (see “Determining FFP exchange rates and premium” on page 4), on the *settlement date*. In return for paying the *premium* you obtain protection from unfavourable *exchange rate* movements above or below the *contract rate* (as the case may be) and at the same time you are able to benefit if the *market spot exchange rate* is more favourable than the *contract rate*.

At the *expiration time* of a FFP transaction:

- if the *market spot exchange rate* is equal to or less favourable to you than the *contract rate*, on the *settlement date* the currencies must be exchanged between you and the Bank at the *contract rate* adjusted to take the *premium* into account; or
- if the *market spot exchange rate* is more favourable to you than the *contract rate*, on the *settlement date* the currencies must be exchanged between you and the Bank at the *spot exchange rate* adjusted to take the *premium* into account.

The *premium* is usually payable in AUD where AUD is one of the currencies of the FFP transaction. If AUD is not a currency of the FFP transaction, the *parties to the agreement* must agree the currency of the *premium* on the *trade date*. The currency of the *premium* must be one of the currencies of the FFP transaction. The *premium* is not refundable. The *premium* is payable on the *settlement date* as an adjustment to either the *contract rate* or the *spot exchange rate* (as the case may be).

FFP transactions are available only in some currencies (see Appendix A).

Details of current *exchange rates*, including the currencies in which the Bank offers FFP transactions, are available on request from your relationship manager or any branch of the Bank.

FFP transactions are subject to the standard credit approval process employed by the Bank.

Uses of FFP transactions

Commercial activities for which FFP transactions may be useful include:

- importing where the invoice is quoted in foreign currencies;
- exporting where the invoice is quoted in foreign currencies;
- foreign currency borrowing;
- foreign currency investing;
- repatriation of overseas profit or interest back to Australia; and
- other foreign currency payments and receipts.

Determining FFP exchange rates and premium

You will specify to the Bank the *contract rate*, being your level of *exchange rate* protection, the transaction amount and the *settlement date* (see “Entering and settling FFP transactions” on page 9 of this PDS).

The Bank will determine the *premium* that you must pay on the *trade date* taking the following factors into account:

- the *market spot exchange rate*;
- the *forward points*;
- the *contract rate*;
- the transaction amount;
- a *volatility factor*;
- the *transaction period*;
- an allowance for the Bank’s costs, both fixed and variable; and
- the Bank’s profit margin.

Examples of how a FFP transaction works

Example 1: You are making a payment in a foreign currency

You will be making a payment of USD100,000.00 to an offshore party in 93 days. You will need to sell AUD and buy USD to make this payment.

The *market spot exchange rate* is AUD/USD0.6500. A fall in the AUD/USD *market spot exchange rate* would mean you would have to pay more AUD for your USD so you are seeking protection against a fall in the AUD/USD *market spot exchange rate*. You would also like the potential to benefit if the AUD/USD *market spot exchange rate* rises.

The 93 day *forward exchange rate* is AUD/USD0.6440 after allowing for a *forward points* adjustment of 0.0060 to the *market spot exchange rate*. To enter a FFP transaction you are required to set a *contract rate*; this can be at, below or above the 93 day *forward exchange rate*. A *premium* is payable by you to the Bank in consideration for receiving *exchange rate* protection and the potential to benefit if the AUD/USD *market spot exchange rate* rises above the *contract rate*.

During the next 93 days you believe that the AUD/USD *market spot exchange rate* will rise from its current level of 0.6500. To enter a FFP transaction you will specify to the Bank the *contract rate* you require. In this example you would like to set a *contract rate* at AUD/USD0.6440 to protect against any fall in the AUD/USD *market spot exchange rate* below 0.6440.

Assume the following for Example 1

USD amount	100,000.00
AUD/USD <i>market spot exchange rate</i>	0.6500
AUD/USD <i>contract rate</i> (specified by you)	0.6440
<i>Premium</i> (determined by the Bank)	AUD3,230.00
<i>Transaction period</i>	93 days

Possible outcomes at the *expiration time*

Possible exchange rate achieved (excluding the *premium*)*

If the *market spot exchange rate* is equal to or lower than the *contract rate*, on the *settlement date* you must buy USD100,000.00 from the Bank in exchange for AUD at the *contract rate* plus the *premium*. You will pay:

0.6440

$$\text{USD}100,000.00 \div 0.6440 + \text{AUD}3,230.00 = \text{AUD}158,509.50$$

This means that on the *settlement date* the single transaction that will occur is one where you must buy USD100,000.00 from the Bank and must sell AUD158,509.50 to the Bank at an *exchange rate* of 0.6308770.

$$\text{USD}100,000.00 \div 0.6308770 = \text{AUD}158,509.50$$

If the *market spot exchange rate* is higher than the *contract rate* you must buy USD100,000.00 from the Bank in exchange for AUD at the *spot exchange rate* plus the *premium*. For example, if you buy USD100,000.00 from the Bank and the *spot exchange rate* is 0.6800 you will pay:

Higher than 0.6440

$$\text{USD}100,000.00 \div 0.6800 + \text{AUD}3,230.00 = \text{AUD}150,288.82$$

This means that on the *settlement date* the single transaction that will occur is one where you must buy USD100,000.00 from the Bank and must sell AUD150,288.82 to the Bank at an *exchange rate* of 0.6653855.

$$\text{USD}100,000.00 \div 0.6653855 = \text{AUD}150,288.82.$$

*Examples are for illustrative purposes only and do not reflect current market prices and outcomes. The *exchange rates* achieved do not take into account the *premium* paid by you.

With this FFP transaction, the maximum amount of AUD you will pay is \$158,509.50 (including the *premium*). At the same time you will be able to take advantage of any rise in the AUD/USD *market spot exchange rate* above 0.6440 (excluding the *premium*).

Issues to consider

In setting your *contract rate* there are various issues you need to consider. Using Example 1, these can be summarised as follows:

- A higher *contract rate* means your exposure to a falling AUD is reduced, however, it also means the resultant *premium* will be higher.
- A lower *contract rate* means your exposure to a falling AUD is increased, however, it also means the resultant *premium* will be lower.
- A longer *transaction period* means you have protection at the *contract rate* for a greater time, however, it also means that the resultant *premium* will be higher.
- A shorter *transaction period* means you have protection at the *contract rate* for a shorter time, however, it also means that the resultant *premium* will be lower.

**Example 2:
You are receiving a payment in
a foreign currency**

You will be receiving a payment of USD100,000.00 from an offshore party in 93 days. When the USD is received you would like to sell it and buy AUD.

The *market spot exchange rate* is AUD/USD0.6500. A rise in the AUD/USD *market spot exchange rate* would mean you get fewer AUD for your USD so you are seeking protection against a rise in the AUD/USD *market spot exchange rate*. You would also like the potential to benefit if the AUD/USD *market spot exchange rate* falls.

The 93 day *forward exchange rate* is AUD/USD0.6445 after allowing for a *forward points* adjustment of 0.0055 to the *market spot exchange rate*. To enter a FFP transaction you are required to set a *contract rate*; this can be at, below or above the 93 day *forward exchange rate*. A *premium* is payable by you to the Bank in consideration for receiving *exchange rate* protection and the potential to benefit if the AUD/USD *market spot exchange rate* falls below the *contract rate*.

During the next 93 days you believe that the AUD/USD *market spot exchange rate* will fall from its current level of 0.6500. To enter a FFP transaction you will specify to the Bank the *contract rate* you require. In this example you would like to set a *contract rate* at AUD/USD0.6445 to protect against any rise in the AUD/USD *market spot exchange rate* above 0.6445.

Assume the following for Example 2

USD amount	100,000.00
AUD/USD <i>market spot exchange rate</i>	0.6500
AUD/USD <i>contract rate</i> (specified by you)	0.6445
<i>Premium</i> (determined by the Bank)	AUD3,230.00
<i>Transaction period</i>	93 days

Possible outcomes at the *expiration time*

Possible exchange rate achieved (excluding the *premium*)*

If the *market spot exchange rate* is equal to or higher than the *contract rate*, on the *settlement date* you must sell USD100,000.00 to the Bank in exchange for AUD at the *contract rate* less the *premium*. You will receive:

0.6445

$$\text{USD}100,000.00 \div 0.6445 - \text{AUD}3,230.00 = \text{AUD}151,929.04$$

This means that on the *settlement date* the single transaction that will occur is one where you must sell USD100,000.00 to the Bank and must buy AUD151,929.04 from the Bank at an *exchange rate* of 0.6582020.

$$\text{USD}100,000.00 \div 0.6582020 = \text{AUD}151,929.04$$

If the *market spot exchange rate* is lower than the *contract rate* you must sell USD100,000.00 to the Bank in exchange for AUD at the *spot exchange rate* less the *premium*. For example, if you sell USD100,000.00 to the Bank and the *spot exchange rate* is 0.6200 you will receive:

Lower than 0.6445

$$\text{USD}100,000.00 \div 0.6200 - \text{AUD}3,230.00 = \text{AUD}158,060.32$$

This means that on the *settlement date* the single transaction that will occur is one where you must sell USD100,000.00 to the Bank and must buy AUD158,060.32 from the Bank at an *exchange rate* of 0.63266985.

$$\text{USD}100,000.00 \div 0.63266985 = \text{AUD}158,060.32.$$

* Examples are for illustrative purposes only and do not reflect current market prices and outcomes. The *exchange rates* achieved do not take into account the *premium* paid by you.

With this FFP transaction, the minimum amount of AUD you will receive is \$151,929.04 (including the *premium*). At the same time you will be able to take advantage of any fall in the AUD/USD *market spot exchange rate* below 0.6445 (excluding the *premium*).

Issues to consider

In setting your *contract rate* there are various issues you need to consider. Using Example 2 these can be summarised as follows:

- A lower *contract rate* means your exposure to a rising AUD is reduced, however, it also means the resultant *premium* will be higher.
- A higher *contract rate* means your exposure to a rising AUD is increased, however, it also means the resultant *premium* will be lower.
- A longer *transaction period* means you have protection at the *contract rate* for a greater time, however, it also means that the resultant *premium* will be higher.
- A shorter *transaction period* means you have protection at the *contract rate* for a shorter time, however, it also means that the resultant *premium* will be lower.

What are the significant benefits of a FFP transaction?

Benefits include:

- provides *exchange rate* protection via a *contract rate*; and
- provides the potential to benefit from favourable *exchange rate* movements.

What are the significant disadvantages of a FFP transaction?

Disadvantages include:

- the *exchange rate* achieved under the FFP transaction may be less favourable than that achieved with a *forward exchange rate*; and
- the Bank will automatically adjust any amount payable by you or to you to take the *premium* into account.

What are the significant risks of a FFP transaction?

Risks derive from factors that are beyond your control. Starting from the time at which you enter a FFP transaction with the Bank, risk factors may lead to changes in the financial outcomes that are unfavourable to you. Monitoring of any risks associated with this product is your responsibility (subject to the responsibility of the Bank for its own operational processes, see “Operational risk” on this page).

Market risk

The FFP guarantees that your least favourable outcome will be to transact at the *contract rate*.

In FFP transactions, the key market risk to you is that you do not receive any additional benefit beyond protection via the *contract rate* after you enter into a FFP transaction with the Bank. This will occur if you must exchange at the *contract rate* because the relevant *spot exchange rate* is less favourable to you than the *contract rate* at the *expiration time*.

Credit risk

Credit risk is common to all financial markets products that you may hold with the Bank. In all cases, you are reliant on the ability of the Bank to meet its obligations to you under the terms of each transaction. This risk is sometimes described as “counterparty risk”.

Operational risk

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people and systems or external events.

You are reliant on the ability of the Bank to price and settle your FFP transaction in a timely and accurate manner. The Bank in turn is dependent on the reliability of its own operational processes that include communications, computers and computer networks. Disruptions in the Bank’s processes may lead to delays in the execution and settlement of your FFP transaction. Such disruptions may result in contractual outcomes that are less favourable to you.

However, once you have entered into the FFP transaction, the management of risks associated with its own operational processes is the responsibility of the Bank.

The risks described here may not include all risk considerations that may be relevant to you when transacting FFP. Please also refer to “What are the significant disadvantages of a FFP transaction?” on this page. Before transacting in this product you should be satisfied that this product is suitable for you. We recommend that you consult your investment adviser or obtain other independent advice.

Legal risk

Australia, as a member state of the United Nations, is obliged to implement United Nations Security Council sanctions. Australia also may be required to implement other international sanctions and sometimes imposes unilateral sanctions. Sanctions can cover various subject matters including financial restrictions. Consequently, the Bank may be prohibited from dealing with certain persons or entities.

This means that if the Bank is aware that you are a proscribed person or entity, then the Bank may be required to suspend, cancel or refuse you services or close or terminate any account, facility, transaction, arrangement or agreement with you. We may also be required to freeze your assets. You could incur significant costs as a result of these actions.

Entering and settling FFP transactions

Entering a FFP transaction

Following credit approval by the Bank and your entering into the *master agreement* and *transactions addendum* (being part of the FFP documentation) (see “FFP documentation” below), you may enter FFP transactions with the Bank.

The next steps are:

1. You contact the Bank and ask for a FFP transaction for a *currency pair* for a specified *settlement date*. You will specify to the Bank the *contract rate* you require and the transaction amount before the Bank can offer you a FFP transaction.
2. The Bank will calculate the *premium*. If the Bank offers you a FFP transaction, and if you accept the offer (which can be done verbally), a FFP transaction is entered into between you and the Bank. All telephone conversations between you and the Bank will be recorded.
3. The Bank will send you a *confirmation letter* setting out the details of your FFP transaction. You must sign and return this *confirmation letter* to the Bank.

FFP documentation

The FFP documentation comprises a *master agreement and transactions addendum* and a *confirmation letter*. The FFP documentation sets out in full the terms and conditions of the FFP transaction. Samples of the FFP documentation can be obtained through your relationship manager or any branch of the Bank on request.

Settling a FFP transaction

Subject to the terms and conditions of the FFP documentation, on the *settlement date* the *currency pair* is exchanged. You must also pay the *premium* to the Bank on the *settlement date*. You must ensure that you have sufficient cleared funds accessible to the Bank.

Variations to settlement dates

Variations to the *settlement date* are not available after the FFP transaction has been entered into.

Terminating a FFP transaction

A FFP transaction may be terminated either:

- by agreement between you and the Bank; or
- as set out in the FFP documentation.

At termination, the Bank will calculate the *mark-to-market value* of the FFP transaction in AUD, as at the *termination date*, using prevailing market rates chosen by the Bank in good faith. The Bank calculates the *mark-to-market value* having regard to what a person would pay the Bank, expressed as a negative number, or what the Bank would have to pay another person, expressed as a positive number, in order to take over your rights and obligations under the terminated transaction. The Bank will notify you as soon as practicable after making this calculation.

If more than one FFP transaction is terminated, the sum of all positive *mark-to-market values* of those FFP transactions and any other transactions also terminated under the *master agreement and transactions addendum* governing the FFP transactions will be set-off against the sum of all negative *mark-to-market values*. If, as a result of this calculation, the overall sum is positive, you must pay the Bank an amount equal to the total positive sum. Alternatively, if as a result of this calculation, the overall sum is negative then the Bank must pay you an amount equal to the total negative sum. The Bank will notify you as soon as practicable after making these calculations. Any *premium* will also become immediately due and payable by you.

Payments netting

In accordance with the FFP documentation, if you have more than one transaction under the FFP documentation (including the FFP transaction), with the same *settlement date* and for the same *currency pair*, payments and receipts may be “net settled”. This means that all settlements are combined to a single net payment between you and the Bank.

What are the costs involved in FFP transactions?

Fees and charges

There are no fees and charges for entering into a FFP transaction.

Your FFP transaction may be subject to government taxes and duties (if any). These may vary from State to State.

Premium

You must pay the *premium* to the Bank on the *settlement date* (see “Determining FFP exchange rates and premium” on page 4 of this PDS).

Are there any tax implications you should be aware of?

FFP transactions may have tax implications. These can be complex and are invariably specific to your circumstances. The outcomes may vary depending on the type of entity investing and whether you have made any elections in relation to foreign currency. Therefore, you should discuss any taxation issues with your independent tax adviser before entering into a FFP transaction.

What if you have a complaint?

Please contact your relationship manager or the manager of the department that handled the matter and explain the problem.

Our staff will review the situation and, if possible, resolve it immediately. If the matter has not been resolved to your satisfaction, please contact our Customer Relations team via:

- our web site at:
commbank.com.au/contactus/comment.asp;
- telephone **1800 805 605**;
- facsimile **1800 028 542**; or
- writing to:
Customer Relations
Commonwealth Bank
Reply Paid 41
Sydney NSW 2001

If, after giving us the opportunity to resolve your complaint, you feel we have not resolved it satisfactorily, you may also lodge a written complaint with the Financial Ombudsman Service at:

Financial Ombudsman Service Limited
GPO Box 3
Melbourne VIC 3001

Phone **1300 780 808**
Fax **03 9613 6399**
Internet **www.fos.org.au**

Customer information and privacy

What information we collect

In this clause 'you' includes our customer and any person who holds office in an entity which is a customer. We collect information about you (such as your name, address and contact details), and information about your interactions with us, such as transactions on your account. We may also collect publicly available information about you.

Why we collect your information and what we use it for

We collect your information because we are required to identify you in accordance with the Anti-Money Laundering and Counter-Terrorism Financing Act 2006 and in order to comply with taxation laws, such as the Taxation Administration Act 1953 and the Income Tax Assessment Act 1936. We also collect it to administer our customer relationships and internal processes including risk management and pricing, to meet our obligations in relation to external payment systems and under our arrangements with government agencies, and to identify and tell you about products and services that may interest you (unless you tell us not to). If you don't want to receive marketing information you can tell us by calling 13 2221, or speak to your relationship manager.

If you give us your electronic and telephone details, you agree we may use this to communicate with you electronically, by phone or SMS, including providing updates, reminders and (unless you tell us not to) marketing information.

You must give us accurate and complete information; otherwise you may be breaking the law and we may not be able to provide you with the products and services that you require.

If you change your personal details (e.g. address, name or email address) you must tell us straight away.

Who we may exchange your information with

We may exchange your information with other members of the Group who may use your information for any of the purposes we can.

We may also exchange your information with others outside the Group, for example, your representatives, our service providers, other financial institutions (for example, in relation to a mistaken payment claim), enforcement and government authorities, relevant public registers and payment system operators (for example, BPAY Pty Ltd).

Sometimes it may be necessary to send your information overseas – for example, where we outsource functions overseas, send information to Group members overseas, where we need to complete a transaction on your behalf or where this is required by laws and regulations in Australia or in another country. See our Group Privacy Policy for more information.

Our Group Privacy Policy

Our Group Privacy Policy is available on our website at commbank.com.au (follow the Privacy Policy link) or upon request from any branch of the Bank and should be read in conjunction with the above. It contains further details about our information collection and handling practices including information about:

- other ways we may collect, use or exchange your information;
- how you may access and seek correction of the information; and
- how to make a complaint about a breach of your privacy rights, and our complaint handling procedures.

We encourage you to check our website regularly for any updates to the Policy.

How to contact us

For privacy-related enquiries, please contact us by:

- email at CustomerRelations@cba.com.au
- telephone **1800 805 605**, or
- writing to the address in our Group Privacy Policy.

Definitions

“AUD”

Australian dollars.

the “Bank”

Commonwealth Bank of Australia
ABN 48 123 123 124.

“business day”

A day in which banks are open for business in Sydney.

“cleared funds”

Funds that are immediately available to you for settlement of your FFP transaction.

“confirmation letter”

A letter confirming the details of a particular FFP transaction.

“contract rate”

The agreed *exchange rate* at which the *currency pair* may be exchanged on the *settlement date*.

“currency pair”

The two currencies that are the subject of the FFP transaction.

“effective exchange rate”

The *exchange rate* that is the *contract rate* adjusted for the *premium*.

“exchange rate”

The expression of the value of one currency in terms of another. For example, in the exchange rate AUD/USD0.6500, one Australian dollar is equal to 65 United States cents (AUD1.0000 = USD0.6500).

“expiration date”

The date at which the outcome of the FFP transaction is determined which is *2 business days* before the *settlement date*.

“expiration time”

Usually 3pm Sydney time on the *expiration date*.

“forward exchange rate”

The expression of the value of one currency in terms of another where the *settlement date* is more than *2 business days* after the *trade date*. A forward exchange rate is the *spot exchange rate* of the currencies on the *trade date* adjusted for the *forward points*.

“forward points”

The value of the interest rate *differential* for the *currency pair* over the period from the *spot settlement date* to the *settlement date*, expressed as an adjustment to the *spot exchange rate*.

“interest rate differential”

The difference between the interest rates applicable to the *currency pair* for the *transaction period* of a FFP transaction.

“market spot exchange rate”

The expression of one currency in terms of another for exchange on the *spot settlement date* before an allowance for the Bank’s costs, both fixed and variable; and the Bank’s profit margin.

“mark-to-market value”

A valuation method where an existing FFP transaction is valued against current market rates to calculate any potential profit or loss on termination.

“master agreement and transactions addendum”

The Bank’s Derivatives Master Agreement and Flexible Forward Transactions Addendum.

“parties to the agreement”

The parties to a FFP transaction are you and the Bank.

“premium”

An amount calculated by the Bank and payable by you to the Bank on the *settlement date* as an adjustment to the *contract rate* or *spot exchange rate* (as the case may be).

“settlement date”

A *business day* on which the *currency pair* subject to a FFP transaction are exchanged.

“spot exchange rate”

The expression of one currency in terms of another for exchange on the *spot settlement date* after an allowance for the Bank’s costs, both fixed and variable; and the Bank’s profit margin.

“spot settlement date”

The date that is 2 *business days* after any date on which the Bank fixes the *spot exchange rate*.

“termination date”

A date on which you or the Bank terminate the FFP transaction.

“trade date”

The date on which a FFP transaction is entered into by the *parties to the agreement*.

“transaction period”

The period from and including the *trade date* to and including the *settlement date*.

“USD”

United States dollars.

“volatility factor”

The expected degree of fluctuation in the *market spot exchange rate* during the *transaction period* as calculated by the Bank.

“you”, “your”

The customer who is one of the *parties to the agreement*.

APPENDIX A

Currencies (FFP)

FFP transactions are only available in some currencies. Examples are included below.

Currencies

United States Dollars (USD)

Pounds Sterling or Great British Pounds (GBP)

Japanese Yen (JPY)

New Zealand Dollars (NZD)

Euro (EUR)

Singapore Dollars (SGD)

Hong Kong Dollars (HKD)

Canadian Dollars (CAD)

Details of current *exchange rates*, including all of the foreign currencies in which the Bank offers FFP transactions, as well as information on interest rates, are available on request from your relationship manager or any branch of the Bank.
