6 Section 3: Information on the Strategy

Information about the S&P/ASX 200

The S&P/ASX 200 Index is a free float index representing 200 of the largest listed companies on the Australian Securities Exchange. It is the primary representation of the Australian equity market and covers approximately 78% of Australian equity market capitalisation.

The S&P/ASX 200 Index is recognised as the investable benchmark for the Australian equity market. The S&P/ASX 200 Index takes into account price movements in the relevant shares excluding dividends, bonuses, buyback and other offers that may affect the price of the shares.

The historical performance of the S&P/ASX 200 Index since 2003 is shown in the graph below.

Source: Bloomberg

Note that past performance is not a reliable indicator of future performance.

The top ten constituents of the S&P/ASX 200 Index as at September 2008 are shown below:

Security Name	Weight%
BHP Billiton Limited	12.02%
Commonwealth Bank of Australia	5.81%
Westpac Banking Corporation	4.52%
Telstra Corp Ltd	4.37%
National Australia Bank Limited	4.26%
ANZ Banking Group Ltd	3.70%
Westfield Group	3.10%
Woolworths Limited	3.02%
Rio Tinto Ltd	2.88%
Woodside Petroleum Limited	2.59%

Source: Bloomberg

In considering the above information you should remember:

- Past performance is not a reliable indicator of future performance. The historical returns achieved by the Underlying Portfolio are not reliable indicators of future performance for the Underlying Portfolio or your Investment.
- Generally the higher the potential return for an investment, the higher the corresponding volatility or risk and the greater the chance of substantial fluctuations in returns over time.
- The Underlying Portfolio itself has no actual performance history, however, the Reference Asset in the Underlying Portfolio has performance history.

8 Section 4: What happens at maturity?

4.1 Calculating the Strategy Portfolio Return

The levels used in these examples are for illustrative purposes only and do not represent, and should not be taken to represent, our view of what the levels on those days might be, or what you should expect the levels to be on those days, or the manner in which the levels might move between those days. In these examples you would be reliant on us – Commonwealth Bank – to meet our obligations, which are unsecured.

Example 1

On the Maturity Date, the Strategy Portfolio Return is calculated in accordance with the steps set out below.

In the examples below, we have assumed the Participation Rate on the Start Date is 100%.

Step	Example
Step 1: The Initial Reference Level of the S&P/ASX 200 Index is determined on the Start Date.	4,650
Step 2: The Final Reference Level of the S&P/ASX 200 Index is calculated. The Final Reference Level is the Closing Level of the S&P/ASX 200 Index on the Observation Date, as determined by the Calculation Agent in its discretion.	7,996
Step 3: The Strategy Portfolio Return is calculated, which is the percentage change from the Initial Reference Level to the Final Reference Level multiplied by the Participation Rate. This can be expressed by the formula: $(\text{Final Reference Level} - \text{Initial Reference Level}) / \text{Initial Reference Level} \times \text{Participation Rate}$, expressed as a percentage. In this example, the Strategy Portfolio Return is 71.96% $((7,996 - 4,650) / 4,650) \times 100\%$	71.96%

4.2 Calculating the Maturity Value

The Strategy Maturity Value is calculated using the Strategy Portfolio Return.

In the examples below, we have assumed a Strategy Investment Amount of \$20,000. In this Strategy, the Strategy Capital Protection Amount is also \$20,000.

Example 2

(assumes a positive return for the Strategy)

The Strategy Portfolio Return is 71.96% (the Final Reference Level was above the Initial Reference Level)

The Strategy Maturity Value is the greater of:

(a) your Strategy Investment Amount + (your Strategy Investment Amount x Strategy Portfolio Return)

$$= \$20,000.00 + (\$20,000.00 \times 71.96\%)$$
$$= \$20,000.00 + (\$14,392.00)$$
$$= \$34,392.00$$

and

(b) your Strategy Capital Protection Amount

$$= \$20,000.00$$

In this example, if you invested \$20,000 in this Strategy, the Strategy Maturity Value would be \$34,392.00. Therefore, the Maturity Value of your Investment is also \$34,392.00.

Result: You would receive your Investment Amount and the capital growth generated over the term. Depending on your choice, you will receive either physical delivery of the Delivery Parcel to the value of \$34,392.00, or a cash payment (the Sale Proceeds) of \$34,392.00. If you choose to receive Sale Proceeds, the Brokerage Fee will be charged to you separately.

Example 3

(assumes a 0.00% return for the Strategy)

The Strategy Portfolio Returns is 0.00% (the Final Reference Level was equal to the Initial Reference Level)

The Strategy Maturity Value is the greater of:

$$\begin{aligned}
 \text{(a)} \quad & \text{your Strategy Investment Amount} + (\text{your Strategy Investment Amount} \times \text{Strategy Portfolio Return}) \\
 & = \$20,000.00 + (\$20,000.00 \times 0.00\%) \\
 & = \$20,000.00 + (\$0.00) \\
 & = \$20,000.00
 \end{aligned}$$

and

$$\begin{aligned}
 \text{(b)} \quad & \text{your Strategy Capital Protection Amount} \\
 & = \$20,000.00
 \end{aligned}$$

In this example, if you invested \$20,000 in this Strategy, the Strategy Maturity Value would be \$20,000.00. Therefore, the Maturity Value of your Investment is also \$20,000.00.

Result: You would receive 100% of your Investment Amount back but there would not be any capital growth over the term. Depending on your choice, you will receive either physical delivery of the Delivery Parcel to the value of \$20,000.00, or a cash payment (the Sale Proceeds) of \$20,000.00. If you choose to receive Sale Proceeds, the Brokerage Fee will be charged to you separately.

Example 4

(assumes a negative return for the strategy)

The Strategy Portfolio Return is -38.96% (the Final Reference Level was below the Initial Reference Level)

The Strategy Maturity Value is the greater of:

$$\begin{aligned}
 \text{(a)} \quad & \text{your Strategy Investment Amount} + (\text{your Strategy Investment Amount} \times \text{Strategy Portfolio Return}) \\
 & = \$20,000.00 + (\$20,000.00 \times -38.96\%) \\
 & = \$20,000.00 + (-\$7,792.00) \\
 & = \$12,208.00
 \end{aligned}$$

and

$$\begin{aligned}
 \text{(b)} \quad & \text{your Strategy Capital Protection Amount} \\
 & = \$20,000.00
 \end{aligned}$$

In this example, if you invested \$20,000 in this Strategy, the Strategy Maturity Value would be \$20,000.00. Therefore, the Maturity Value of your Investment is also \$20,000.00.

Result: You would receive 100% of your Investment Amount back but there would not be any capital growth over the term. Depending on your choice, you will receive either physical delivery of the Delivery Parcel to the value of \$20,000.00, or a cash payment (the Sale Proceeds) of \$20,000.00. If you choose to receive Sale Proceeds, the Brokerage Fee will be charged to you separately.

Contact your financial adviser or call us on **13 15 20** if you require further information.

C Capital Investment Loan and Interest in Advance Loan (continued...)

OPTIONAL

SECTION C2: RISK DISCLOSURE

Risk statement for Loan Applicants

Before you apply for a Capital Investment Loan and an Interest in Advance Loan (if applicable), you must consider:

- whether the Loans are right for you; and
- the risks associated with the Loans; and
- the risks involved in investing in Capital Series *Australia* in which you are applying the proceeds of the Loans.

We strongly suggest that you obtain independent legal, tax and financial advice to get a better idea of the risks involved and the way in which you can manage the Loans.

You and your advisers should be aware of the following risks:

- borrowing money to invest in a Capital Series *Australia* (gearing) can magnify the financial effect on you of any decrease in the value of your investment in Capital Series *Australia*;
- income from your investments (if any) may fluctuate. Also, the time at which you pay interest on your Loan Account may be different from the time at which you can earn income on your investment;
- repayment of any part of the Loans before the Final Maturity Date which can occur through your decision or your default may result in significant costs being payable by you to us;
- the Terms and Conditions of the Loan as they apply to you and the choices you make may have significant tax implications for you.

There may be circumstances in which we can require you to pay all of what you owe to us immediately. Those circumstances include where:

- you fail to pay any sum payable by you to us on the date the payment is due;
- we consider that your financial position has deteriorated to a point where you may not be able to meet any obligation you owe to us.

You should familiarise yourself with the other circumstances in which we can ask you to pay us immediately (for example, see Clause 8 to Clause 10 and Clause 12 of the Loan Agreement).

You should obtain independent legal, tax, and financial advice on the effect on your investment, tax and financial obligations if the Loans are repaid early.

Payments to Loan Account

If we accept your application for a Capital Investment Loan, you will have a Capital Investment Loan Account ("CIL Loan Account"). If we accept your application for an Interest in Advance Loan you will have an Interest in Advance Loan Account ("IAL Loan Account").

Other than when we require you to pay your CIL Loan Account in full, we do not require you to make any principal payments on your CIL Loan Account. If you have an IAL Loan Account we require you to make principal and interest payments on your IAL Loan Account. The amount you owe to us can increase with unpaid interest and unpaid fees and charges we debit to your CIL Loan Account and your IAL Loan Account (if applicable).

We charge interest on the debit balance of your Loan Account. The balance of your Loan Account may increase with unpaid interest, fees and charges sufficient to require us to terminate the Loan Account.

Taxation

You should speak to an independent taxation adviser to determine whether you can deduct part of the interest incurred by you on your Loan Account. If you have an Interest in Advance Loan we require you to make principal and interest payments on your loan. Depending on your individual circumstances, some or all of the interest otherwise deductible might be disallowed by the Australian Tax Office.

You have sole responsibility for deciding to invest in Capital Series *Australia* for which this Loan is supplied. We do not:

- recommend Capital Series *Australia*; or
- give any opinion on the performance of Capital Series *Australia*, even if we are willing to lend money against Capital Series *Australia*.

You may wish to negatively gear investments you make with loan proceeds, however, it may not be possible to do so.

I / We have read and understood the Risk Disclosure Statement appearing above.
